The Highland Scenic Highway was originally designed and constructed as a multipurpose State highway on the Federal-aid Highway System. As such, it was maintained by the State until the passage of the Federal-aid Highway Act of 1973 which designated it as a scenic highway with portions limited solely to scenic and recreational use and passenger car use. The scenic highway designation precludes community service vehicles such as bread trucks, service trucks and farm trucks from using the highway and use of the road for National Forest management activities requiring use of trucks. This designation thus made the highway a limited service highway which precludes continued maintenance by the State as State law prohibits the expenditure of maintenance funds on limited service highways.

This amendment would correct this anomaly by modifying the vehicle limitation so that the State could maintain the road and, at the same time, protect the important recreational and scenic values of the highway.

ALLOCATION OF URBAN FUNDS

SEC. 222. Existing law permits transferability between urban and primary system funds. However, it does not permit transfer of funds allocated out of urban system funds attributable to urbanized areas of 200,000 or more population from the alloca-

tion of one urbanized area to that of another urbanized area or to an urban area. This amendment to section 150 of title 23, United States Code, would permit the transfer of such attributable funds to the allocation of another urbanized area in the State or to any other urban area in the State. A transfer, requested by the State, would be subject to the approval of the Secretary and the local officials of the urbanized area from which the funds are to be transferred. The proposed transfer provision would enhance the capability of the States and local governments by giving them more flexibility in programing projects, setting priorities, and utilizing scarce financial resources.

CERTIFICATION ACCEPTANCE

SEC. 223. This section amends 23 U.S.C. 117 to provide for: (1) the application of certification acceptance to the physical construction phase of Interstate 4R projects; (2) the elimination of the requirement to make a final inspection on every project under both the certification acceptance and secondary road plan programs; and (3) the extension of coverage under the secondary road plan program to: "projects, as defined by the Secretary and which are not on the Interstate System." These changes in no way would relieve the State highway departments from the requirement of entering into formal project agreements with the Secretary pursuant to section 110 of title 23. Certification acceptance would be available to Interstate restoration projects once they reach the construction phase; thus it would apply only to those work areas such as time extensions, construction contract change orders, assessment of liquidated damages, etc., which take place subsequent to the actual construction project being authorized. The amendments would make both concepts more attractive to the States because of the expanded coverage and the reduction in Federal involvement and redtape.

DEFENSE ACCESS ROADS

SEC. 224. Section 210(c) of title 23, United States Code, provides for the use, up to $5,000,000, of any funds appropriated under the Act approved October 16, 1951 (65 Stat. 422) for highways in military training and maneuver areas. In 1958, Public Law 85-767 (72 Stat. 885), which revised and codified prior highway legislation as title 23, United States Code, repealed other Acts and portions of Acts. In addition, the second Supplemental Appropriations Act of 1957 (including the Bureau of Public Roads under the Department of Commerce) rescinded, effective June 20, 1957, all unexpended appropriations from prior laws. (Public Law 85-855.) Thus, there are no current highway appropriations from which any part of $5,000,000 could be made available for the construction, maintenance, and repair of maneuver areas.

In 1955, the Office of Management and Budget directed the Department of Defense to budget for defense access roads. Since 1957, each military department has budgeted separately for defense access roads. By direction of the Assistant Secretary of Defense (Comptroller), maintenance and repair of public highways used for maneuvers will be accomplished from funds made available by the appropriate military department; but in order to insure prompt repairs, military regulations provide that the Commander, Military Traffic Management Command, may authorize the Federal Highway Administration to temporarily use available access road funds, pending payment by the military department concerned from its operation and maintenance funds. Since funds for the repair of maneuver road damage are not available from highway appropriations acts, but are available from defense appropriations acts, the opening clause is misleading and should be amended to reflect current law and practice.

This amendment to section 210(c) of title 23, United States Code, has been coordinated with the Military Traffic Management Command.

MAINTENANCE

SEC. 225. Subsection 116(b) of title 23, United States Code, requires maintenance agreements between a State without authority to maintain a project constructed "on the Federal-aid secondary system, or within a municipality," and the appropriate county or municipal officials. This section would amend subsection (b) to require maintenance agreements when a State does not have authority to maintain any project.

This section would amend subsection 116(c) of title 23, United States Code, to permit the Secretary to withhold project approval for projects in specific areas on one or more of the Federal-aid Systems or programs within a State, or for the entire State, where the Secretary finds that a project is not being properly maintained. Under present law, the Secretary must withhold project approval for the entire State for all projects when a single project is not being properly maintained. Present law does not represent a practical enforcement sanction. Stopping all project approvals in an entire State could involve massive disruption of planning and considerable economic waste. The amendment provides a practical enforcement sanction which should be an effective tool in enforcing maintenance.

Subsections (b), (c), (d), (e), (f), and (g) transfer maintenance provisions from 23 U.S.C. 109 to 23 U.S.C. 116.

CONSTRUCTION

SEC. 226. Title 23, United States Code, now requires that the Secretary inspect each highway construction project. This amendment would remove that requirement. The Secretary would establish procedures for inspecting and approving construction but would not have to inspect each project.

This subsection amends section 113 of title 23, United States Code, to clarify the application of the Davis-Bacon Act (40 U.S.C. 267a) to 3-R work on the non-Interstate highway network. The amendment strikes the word "initial" before "construction" in the first sentence.

This clarification was necessary to correct an interpretation of section 113(a) by the Federal Highway Administration which stated that Davis-Bacon did not apply to 3R work. Under the language of this subsection, the Act applies to all construction, rehabilitation, resurfacing, or reconstruction work carried out under the Federal-aid highway program.

RESEARCH AND PLANNING

SEC. 227. This section would amend 23 U.S.C. 307 to confirm the legal basis for pooling 1½ percent highway planning and research (HPR) funds into a single fund and to establish a uniform period of availability, and a standard Federal matching share. This section also clarifies that the States may use these funds for study, research and training on engineering standards and construction materials, including evaluation and accreditation of inspection and testing.

NONDISCRIMINATION

SEC. 228. This section amends 140 of title 23, United States Code, to assure that equal employment opportunity must be provided without regard to sex; to authorize the Secretary of Transportation to conduct and finance minority business enterprise training programs and assistance programs; and to authorize the use of $10 million per fiscal year from the sums apportioned under 23 U.S.C. 104(b) to conduct and finance minority business enterprise training programs and assistance programs. These training and assistance programs are specifically provided for the benefit of women and minorities.

INTERAGENCY AGREEMENTS

SEC. 229. This section adds a new section to title 23, United States Code, under which the Secretary of Transportation would be required to enter into memoranda of understanding with other Federal agencies to coordinate the various environmental compliance reviews that apply to Federal and Federal-aid highway projects. The purpose of such memoranda is to minimize, to the maximum extent practicable, duplication, needless paperwork, and delays in approval of projects under title 23, United Stated Code. This section is intended to reinforce the national policy on minimization of redtape set forth in section 101(e) of title 23, United States Code, by consolidating environmental compliance procedures to the greatest extent possible in a single project development process to be coordinated by the Department of Transportation.

OBLIGATION LIMITATION AND ALLOCATION FORMULA

SEC. 230. This section establishes an obligation limitation of $12 billion for fiscal year 1983, $12.8 billion for fiscal year 1984, $13.6 billion for fiscal year 1985, $14.5 billion for fiscal year 1986, and $14.9 billion for fiscal year 1987, excluding emergency relief projects, rehabilitation of a federally-owned bridge, and a highway construction project at Union Station. The obligational authority for each year would be allocated to the States in the same ratio in which sums to be appropriated to the States for Federal-aid highways and highway safety construction are apportioned or allocated. Collectively, the States can obligate no more than 25 percent during the first quarter of fiscal year 1983.

In revising the redistributions each year, the Secretary shall give priority to those States which have experienced substantial proportional reductions in their apportionments and allocations because of statutory changes under this Act and under P.L. 97-134.

After passage in December 1981 of P.L. 97-134, which revised the Interstate Cost Estimate, many States experienced substantial cuts in their Interstate allotments. Similarly, changes under the Committee bill, including elimination of the priority program, will create reductions to some States' programs.

Consequently, the Secretary shall first consider providing additional funding during the August 1 redistribution to those States which have experienced such reductions, and are able to obligate additional funds.

CERTIFICATION OF STATE PROCEDURES

SEC. 231. This section authorizes the Secretary of Transportation to carry out a project in cooperation with the State of Vermont, which will demonstrate the feasibility of extending the coverage of State certifications under section 117(a) of title 23, United States Code. The purpose of the demonstration project is to determine to what extent

States are able to carry out the requirements of Federal law, both title 23 and non-title 23 requirements, and to determine what kinds of problems may be encountered under such procedures. The project shall also document those areas where savings can be made in time and paperwork without adverse impacts on public participation or the environment.

ALASKA HIGHWAY

SEC. 232. This section amends section 218(a) of title 23, United States Code, to allow the State of Alaska to use its apportioned Federal-aid highway funds on the continued construction of the portions of the Alaska highway located in Canada.

Since Congress authorized the construction of the Alaska highway in the Federal-aid Highway Act of 1973 (Pub. L. 93-87, appropriated funds have been obligated for the project and work is now completed or underway. However, no funds were appropriated in the 1979-1982 United States budget.

The current provisions of title 23, United States Code, do not permit a State to expend its Federal-aid funds in a foreign country. This section would permit Alaska to use its Federal-aid highway funds for the construction of the Alaska highway in Canada, as provided in section 218.

TERRITORIAL HIGHWAY PROGRAM

SEC. 233. Subsection (a) of this section repeals section 215 (Territorial Highway Program) of title 23, United States Code.

Subsection (b)(1) of this section provides that outstanding funds authorized or appropriated for carrying out repealed section 215 shall remain available for obligation under the conditions applicable prior to such repeal.

ACCELERATION OF BRIDGE PROJECTS

SEC. 234. This section repeals the acceleration of bridge project programs which provides special funding for the U.S. Grant Bridge in Kentucky and the East Huntington Bridge in West Virginia. Funds authorized for this program would remain available for obligation for two years under the same conditions which existed prior to the repeal of this section.

LAKE ROAD EROSION DEMONSTRATION

SEC. 235. This section authorizes the Secretary of Transportation in cooperation with the State of North Dakota to carry out projects in and around Devils Lake, North Dakota which demonstrate the use of construction techniques which will prevent wave erosion on roadways which cross closed basin lakes at grade level. Because of the emergency nature of this work the State of North Dakota has already begun work on some roads, the Secretary is authorized to reimburse for such work and to participate in future project activities.

The purpose of the demonstration project is to examine alternative construction methods which can be used in the unique situation of Devils Lake. The project shall shall also demonstrate where savings can be made by using the best possible construction techniques to prevent erosion over the longest period of time possible.

TRUCK SAFETY DEMONSTRATION

SEC. 236. This section authorizes the Secretary of Transportation to carry out a project in cooperation with the State of Idaho to detemine what factors contribute to a high incidence of truck accidents. The factors examined should include weather conditions, sight distance, road curvature, roadway width, and gradient. A further purpose of the demonstration project is to analyze the benefit-cost ratio of certain safety improvements implemented to correct hazards contributing to truck accidents.

DEFINITION

SEC. 237. This section changes the definition of "construction" to permit Federal participation in State highway agency audit costs incurred in performing Federal-aid project related audits which directly benefit the Federal-aid highway program. State highway agency audit costs are not now eligible. Audit costs incurred in special studies or audits and investigations performed for management purposes that could not be shown to directly benefit the Federal-aid highway program would not be eligible for reimbursement.

REPORTS.

SEC. 238. This section codifies the highway needs report submitted to the Congress every 2 years pursuant to section 3 of Public Law 89-139 and section 17 of the Federal-Aid Highway Act of 1968.

CONSTRUCTION BY STATES IN ADVANCE OF APPORTIONMENT

SEC. 239. This section amends the existing advance construction provision to permit construction by States of highway substitute and bridge projects in advance of apportionment of highway substitute and bridge funds apportioned under 23 U.S.C. 103(e)(4) and 144.

DESIGN AND CONSTRUCTION QUALITY ASSURANCE STUDY

SEC. 240. This section requests the Secretary of Transportation, the National Bureau of Standards, the American Society for Testing and Materials, and any other appropriate organizations to provide information on training and accreditation needs of testing facilities.

VENDING MACHINES ON THE INTERSTATE SYSTEM

SEC. 241. This section would permit vending machines on Interstate rights-of-way for the benefit of the traveling public without cost to the Federal Government. The facilities at which vending machines would be permitted include rest areas, weigh stations and visitor information areas. First priority is given under this section to Randolph/Sheppard Act agencies to operate such facilities.

RELOCATION OF UTILITY FACILITIES

SEC. 242. Subsection (a) of this section would amend the definition of "construction" to make clear that the relocation of utilities for safety purposes is eligible work for Federal reimbursement under title 23 of the United States Code.

Subsection (b) amends 23 U.S.C. 123, Relocation of Utility Facilities, to permit payment for utility relocations on any Federal-aid system or under any Federal-aid program and to provide that the Secretary may waive certain provisions of 23 U.S.C. 123(a) to allow Federal participation in costs incurred by the State in relocating utilities for purposes of eliminating hazards, then he determines that such a waiver facilitates the State's safety improvement program.

TECHNICAL AMENDMENTS

SEC. 243. This section makes technical changes to title 23.

ADVANCEMENT OF FEDERAL MATCH

SEC. 244. This provision authorizes that States may receive up to 100 percent of project costs from Federal apportionments until September 30, 1983. This provision is designed to help those States which will have non-Federal share matching problems because of the large increase in Federal funds available under this Act because of the gasoline tax increase.

Funds provided under this section shall come from the apportionments made under this program for fiscal year 1983 and must be repaid by September 30, 1984 or such amount will be deducted from apportionments made on October 1, 1984, and October 1, 1985. Funds deducted will be deducted from all categories on a per-category basis except for Interstate construction funds which will not be limited by this proposal.

GUARANTEED MINIMUM RETURN

Sec. 245. This provision provides contract authority from the Highway Trust Fund to assure that each State receives a minimum of 85 percent of its percentage payments into the Highway Trust Fund through apportionment or allocation. The section creates a pot of money over and above funds authorized for regular Federal-aid Highway categories to insure this 85 percent minimum return. Funds authorized to be allocated under this section may be used on any Federal-aid category and are not subject to any obligation limitation imposed under this Act or any future Act.

VEHICLE WEIGHT LIMITATIONS

SEC. 246. This provision amends section 126 of title 23, United States Code, to establish a national uniform maximum weight per axle and by gross weight. The limits are set at 20,000 pounds for single axles, 34,000 pounds on a tandem axle and an overall gross weight of 80,000 pounds as limited by the bridge formula contained in section 127. This provision is designed to remove the burden on interstate commerce raised by the so-called "barrier states" along the Mississippi River.

The provision also clarifies the application of the "grandfather clauses" authorized by the Federal-Aid Highway Act of 1956 and the Federal-Aid Highway Amendments of 1975. Under this provision States will determine the weight of vehicles and classes of vehicles eligible under the grandfather provision as it applies to their State. However, it is not the intention of the provision to allow any increases in weights but simply to clarify controversy with respect to the grandfather clauses.

INNOVATIVE TECHNOLOGIES

SEC. 247. This section authorizes an increase in the Federal share when a State uses innovative technologies in constructing a road or in an overlay is placed on an existing roadway. Regardless of which highway category a project is proposed for, the Federal share would be increased by 5 percent when recycled materials or commercially available additives are used in pavements. Use of such products are both energy efficient and extend the life of pavements.

The Committee recognizes that new techniques and United States patented products are now available in commercial quantities which both improve the energy efficiency and strength of pavement materials and prolong the life of these pavements. In allowing an increased Federal share in projects which use recycled materials or United States patented asphalt strengthening additives, the Committee provides a necessary incentive to the States to use these commercial products in the resurfacing and construction of our highways. These incentives are necessary because of the additional capital costs of these innovative products, but the Committee believes that these addi-

tional costs should be offset in the public interest because of proven longer pavement life cycles and lower maintenance costs. The Committee also acknowledges the need to obviate existing institutional barriers to the use of innovative products, and, therefore, recognizes that sole source procurement and the purchase of proprietary products and materials may be allowed as needed in the public interest.

The Committee notes the progress that has been achieved in the use of rubber recycled from tires in the reconstruction of our Nation's roads. Studies have proven that the life expectancy of a rehabilitation project using the combination of asphalt with recycled tires is many times greater than that of asphalt alone. Thus, use of this combination results in a cost-savings to the Federal government over the long term. Because excise taxes from tires contribute directly to the Highway Trust Fund, funds available for those projects which utilize such substances or materials produced, in substantial part from recycled rubber tires should be encouraged by increasing Federal participation in project costs.

ENERGY-IMPACTED ROADS

SEC. 248. This provision is intended to place greater emphasis on the improvement of energy-impacted roads. It does this by increasing the Federal share to 85 per centum for 3-R projects on Federal-aid routes which the Secretary has determined, at State requests, are energy-impacted. This provision allows the States to give priority to such projects in their annual program for Federal-aid funds and allows the Secretary to give priority to such projects in approving the State program of projects for a fiscal year.

DOWNTOWN CONGESTION DEMONSTRATION

SEC. 249. This section authorizes a demonstration project on the Federal-aid urban system to show how downtown congestion can be relieved by the construction of a high-level bridge over a segment of intercoastal waterway. $23 million is authorized in contract authority to carry out this provision.

DEMONSTRATION PROJECT

SEC. 250. This section authorizes a demonstration project for East Baton Rouge, Louisiana.

TITLE III—SECTION-BY-SECTION ANALYSIS

CHANGES TO SECTION 3 CAPITAL GRANT PROGRAM

Section 4(a) is amended to require a 40 percent local match for new fixed guideway projects or for extensions to an existing system funded with discretionary grant. Other discretionary projects funded by Section 3 will require a 30 percent local match. These higher local matching requirements will allow the more limited Federal discretionary funds to support those projects which have high local priority. However, these changes will not affect previous commitments made prior to this Act including those to the Washington, D.C. system.

In making discretionary grants, the Secretary is required to take into account the adverse effects of decreased commuter rail service resulting from railroad bankruptcy.

AUTHORIZATIONS

A three year comprehensive authorization for the mass transit program is established at $3.13 billion per year for fiscal year 1983, 1984, 1985 which includes funding for all programs except interstate transfer. From the funds appropriated under this authorization up to seventy-five million dollars is authorized for appropriations for research, development, and administrative expenses. From the remainder of the total amount appropriated:

(a) 24 percent of the funds must be made available for discretionary grants under Section 3 (until 1985 when it shall be 10 percent).

(b) 67.25 percent of the funds must be made available for formula grants for urbanized areas with populations greater than 200,000 (until 1985 when it shall be 79.63 percent).

(c) 6.5 percent of the funds must be made available for formula grants for urbanized areas with populations of less than 200,000 but greater than 50,000 (until 1985 when it shall be 7.7 percent).

(d) 2.25 percent of the funds must be made available for grants to urbanized areas of less than 50,000 in population (until 1985 when it shall be 2.67 percent).

Fifty million dollars will be available for planning grants made under the authority of Section 8. These grants will be funded from the funds available for Section 3. Furthermore, urbanized areas are allowed to decide to use block grant funds for additional planning activities.

An overall authorization of $3.495 billion will cap total appropriations for all transit programs including all titles of this Act, the Interstate Transfer program, and the so-called Stark-Harris funding for the Washington, D.C. Metro System. This amount is the level allowed by the Budget Resolution.

NEW BLOCK GRANT PROGRAM

The legislation authorizes a new block grant program to replace the formula grants now made under Section 5. The new Section 9 provides funds to urbanized areas to finance the planning acquisition, construction, improvement, and operating costs of facilities, equipment, and associated maintenance activities in mass transportation services. The inclusion of associated maintenance activities is the only change in eligible expenses from the current Section 5 program. For purposes of this section, associated maintenance activities means equipment and materials each of which costs at least one percent of the fair market value of the bus or rail car for which the equipment is to be used.

FUND DISTRIBUTION

Grants made to urbanized areas of greater than 200,000 population under Section 9 will be made on the basis of a formula that divides 68 percent of the available funds on the basis of each area's total bus revenue miles, each area's population, and each area's population weighted by a factor of density. The bus revenue mile factor will be used to distribute 50 percent of the funds. The population factor and the density factor will each be used to distribute 25 percent of the funds. Of this 68 percent distributed by bus related factors, three fourths of the funds are for urbanized areas over 1 million population and one fourth is reserved for areas of less than 1 million population.

The remaining 32 percent of the available funds will be distributed to areas that operate fixed guideway rail service. The funds will be distributed on the basis of 60 percent of an area's fixed guideway vehicle miles and 40 percent of an area's fixed guideway route miles. Each urbanized area with at least 750,000 population which provides commuter rail service is guaranteed at least 0.75 percent of the rail funds. Service and route miles provided in a state adjacent to the state or state in which the urbanized area is located and passengers served shall be attributed to the public body which contracts for the service as if the public body was an urbanized area of 200,000 or more. In addition ferry boat operations are included in fixed guideway vehicle miles and route miles.

For urbanized areas of less than 200,000 population that receive a Section 9 grant, the formula will distribute funds on the basis of population and population weighted by density. Each factor will count equally.

The federal share of the cost of any project funded under Section 9 is limited to 80% of the cost of the project for capital projects. The federal share of operating costs is limited to 50% of the cost.

OPERATING SUBSIDIES

With regard to operating subsidies, an area may in general not spend more than 80% of its 1982 operating apportionment if it has a population of more than 1 million, 90% of its 1982 operating apportionment if it has a population of more than 200,000 but less than 1 million, 95% of its 1982 operating apportionment if it has a population of less than 200,000. Where an area first became eligible for an apportionment in 1980, that area cannot use more than 40% of its apportionment for operating costs.

An area may however, transfer funds for operating expenses up to its 1982 operating apportionment if the area:

(a) certifies that it has provided public notice of its intent to use additional operating funds and that it will lose some funds as described in (c) below.

(b) certifies that it has a three year plan which demonstrates how the area will operate its transit system without transferring capital funds in fiscal year 1986.

(c) agrees to forfeit one dollar for every two dollars transferred to operating expense use. (These forfeited amounts are used for discretionary grants made by the Secretary)

The Secretary of Transportation is prohibited from permitting an area to use the transfer option after September 30, 1984.

Funds available for discretionary grants due to a forfeiture under the transfer option shall be made available on a priority basis to areas that did not receive as large a block grant under Section 9 as was received under Section 5 in 1982. Discretionary grants will be available to recipients under the same local matching share requirements for Section 3 grants.

BLOCK GRANT PROCEDURES AND REQUIREMENTS

Sums apportioned under Section 9 for areas of less than 200,000 in population are made available to the Governor for expenditure in accordance with the planning process required under Section 8.

Funds made available to the Governor may be transferred to areas eligible under Section 18 of the Act or to areas with populations of less than 300,000 in population. The Governor may make such transfers only after consulting with local officials.

Funds apportioned under this section shall remain available for three years. Funds which remain unobligated at the end of that period will be reapportioned the following year.

To receive a grant under Section 9 a recipient must comply with Title VI of the Civil Rights Act, subsections (e) (f) and (g) of Section 3 of this Act, as well as Sections 8, 13, 16, and 19 of this Act. The recipient must also submit a statement of activities to be funded and the certifications required by the Act.

The recipient must certify that it has the legal, financial and technical capacity to carry out the proposed projects; has the au-

thority to apply for the grant; will conform to the Uniform Relocation Assistance and Land Acquisition Policies Act of 1970 and Section 7 of this Act; will have continuing control over the equipment purchased and will maintain the facilities and equipment; will use competitive procurement procedures complying with Section 401 of PL 95-599; will comply with National Flood Insurance Act of 1968; has complied with Section 12; will meet the local match requirements of Section 4; and that it has a locally developed process for soliciting and considering public comment prior to raising fares for reducing services.

Each recipient must solicit public comment by making public the amount of funds available, the activities the recipient proposes to undertake with such funds, and publish a proposed statement in a manner which will provide citizens and elected officials an opportunity to comment on the proposed program. The program must be developed in consultation with all interested parties including private transportation providers. Recipients will also hold at least one public hearing to receive comment on the proposed program.

The Secretary may issue regulations which permit recipients to assume the responsibilities of compliance with the National Environmental Policy Act. However, these regulations must be developed in consultation with the Council on Environmental Quality. To release funds under this section, the recipient must submit the environmental certification 15 days in advance and the Secretary must accept the certification. The environmental certification by the recipient must be in a form acceptable to the Secretary, be executed by the chief executive officer, specify that the recipient has carried out its responsibilities, and that the certifying officer consents to assume the status of a responsible federal official under NEPA and he consent to accept the jurisdiction of federal courts for the purposes of enforcement of his responsibilities as such an official.

The Secretary shall not approve a grant unless he finds that the project is part of an approved program of projects required by the Section 8 planning process.

The Secretary shall enter into an annual projects agreement with the Governor or the designated recipient of each urbanized area as soon as practicable after the application is submitted.

Each recipient shall submit to the Secretary an annual report concerning the use of the funds and how such use compares to the statement submitted in the original application. The Secretary shall require annual independent reviews and audits as deemed appropriate by the Secretary.

The Secretary shall determine whether the recipient's activities have been carried out in a timely and effective manner and that the recipient has a continuing capacity to carry out those activities. The Secretary shall also determine whether the recipient has carried out its activities and certifications in accordance with this Act and applicable laws.

Not less than every three years the Secretary shall perform a full review and evaluation of the performance of the recipient in carrying out its program. The Secretary shall determine if the local recipient's program has been in compliance with statutory and administrative requirements and the extent to which the actual program was consistent with the proposed statement and the Section 8 planning process.

The Secretary may make adjustments in annual grants on the basis of his findings and may reduce or withdraw such assistance or take other appropriate action in accordance with the required reviews and audits.

Section 1001 of Title 18 of the United States Code applies to any submission under this section. If any false or fraudulent statements are made in connection with a submission, the Secretary may terminate and seek reimbursement of the affected grant or grants.

A recipient may request the Secretary to approve its procurement system. If the Secretary approves the local procurement system as consistent with the Act, the Secretary shall approve the use of that system for all procurements financed under this Act.

LETTERS OF INTENT

A requirement is added that the Secretary must inform the Committee on Public Works and Transportation of the House of Representatives and the Committee on Banking, Housing and Urban Affairs of the Senate 30 days prior to the issuance of a letter of intent.

The Secretary shall give priority to grant requests to fund programs included in letters of intent or full funding contrats issued prior to the enactment of this Act. Terms and conditions of such letters of intent and full funding contracts may not be altered unless agreed to by all parties. The Secretary is also prohibited from taking any direct or indirect action regarding future available budget authority except by the letter of intent procedure in the statute. This prevents for example any further use of so-called letters of commitment.

The bill clarifies that apportionments made pursuant to Section 5 for fiscal year 1975 shall be deemed to have lapsed on September 30, 1977 and apportionments for fiscal year 1976 shall be deemed to have lapsed on September 30, 1978. This clarification will avoid any confusion created by the transition quarter. Moveover, sums apportioned pursuant to Section 5 shall remain available as initially apportioned to the urbanized areas for expenditure in accordance with the provisions of this section until September 30, 1985.

The definition of fixed guideway systems is amended to include public transportation facilities which utilize a right-of-way rail usable by other forms of transportation.

The current Section 15 reporting requirements are amended to also include grants under the new Section 9.

Section 18 is amended to conform with the balance of the bill with lapsed funds remaining unobligated after September 30, 1982 reallocated under the requirements of this Act.

The authorization for planning and designing of mass transportation facilities to meet the special needs of the elderly and the handicapped is increased from 2 percent to 3.5 percent of the funds available for discretionary grants under Section 3.

Sections 21 and 22 of the Act are repealed.

The authorization for the Waterborne Transportation Demonstration Act is de-authorized as of September 30, 1982.

TRANSIT CAPITAL INFRASTRUCTURE PROGRAM

A new capital infrastructure program is authorized to be financed by revenues allocated to transit by an additional tax on gasoline. Authorized at a level of $550 million for 1983 and $1.1 billion for 1984 and 1985, the program is a discretionary fund administered by the Secretary of Transportation within the requirements of the Section 3 program.

In addition to the requirements of Section 3, grants under this program will be limited to: The acquisition, rehabilitation, and replacement of rolling stock, the construction, rehabilitation, and modernization of commuter rail and fixed guideway systems, the construction, rehabilitation, modernization, and replacement of bus facilities and related equipment, and other projects.

Although this program is primarily a transit program, if a state will not receive at least .5 percent of the funds available under this title, The Secretary is authorized to make grants for highway projects eligible under Title 23 of the United States code in that state. However, the Secretary is limited under this provision to 15 percent of the funds available.

The new infrastructure program will expire on September 30, 1984. After that date the proceeds of the gas tax will be used to fund Section 3 of the UMTA Act.●

TITLE IV—COMMERCIAL MOTOR VEHICLE SAFETY—SECTION-BY-SECTION ANALYSIS

DEFINITIONS

Section 401.—This section defines certain terms used in Title IV (except where the context otherwise requires).

One of the most significant of the definitions is section 401(1), "commerce". At present, the Secretary of Transportation is empowered to regulate commercial motor vehicle safety primarily with regard to vehicles that cross State lines or national boundaries or perform the intrastate portion of a continuous interstate movement. This class of vehicles is operated primarily by the approximately 17,000 carries who must obtain operating authority from the Interstate Commerce Commission (ICC) plus the approximately 140,000 private and exempt interstate carriers. This definition would authorize the Secretary to promulgate regulations regarding the safety of commercial motor vehicle operations both in and affecting interstate and foreign commerce.

The definition of "commercial motor vehicle", section 401(2), includes vehicles used on the highways in commerce which are (1) 10,000 pounds gross vehicle weight rating or more or (2) designed to transport more than 10 passengers, including the driver, or (3) used in the transportation of hazardous materials (found to be hazardous by the Secretary for purposes of the Hazardous Materials Transportation Act (49 U.S.C. 1801 et seq.). The 10,000 pound limit is proposed to focus enforcement efforts and because small vans and pick-up trucks are more analogous to automobiles than to medium and heavy commercial vehicles, and can best be regulated under State automobile licensing, inspection, and traffic surveillance procedures. However, all vehicles designed to transport 10 or more persons would also be covered to assure the highest levels of safety in this particularly important transportation area. Also vehicles transporting hazardous materials would be covered because of the potentially greater safety dangers in this area.

The definition of "employee," section 401(3) includes any individual other than an employer who is employed by a commercial motor carrier and directly affects commercial motor vehicle safety, such as (a) a driver of a commercial motor vehicle (including for purposes of this title any independent contractor while in the course of personally operating a commercial motor

vehicle); (b) a mechanic; or (c) a freight handler.

An employer is defined in section 401(4) as any person engaged in a business affecting commerce who owns or leases a commercial motor vehicle in connection with that business, or assigns employees to operate it in commerce.

The definition of employee includes mechanics and freight handlers who are employed by a commercial motor carrier and in the course of their employment directly affect commercial motor vehicle safety. For example, in loading a truck it is important for highway safety that the load be balanced. Also, a mechanic who repairs commercial motor vehicles has a direct effect on commercial motor vehicles safety and should be subject to the rules, regulations, standards, or orders issued under this title by the Secretary of Transportation. On the other hand, mechanics or freight handlers are not subject to these provisions when repairing or loading a motor vehicle not covered by this title nor with respect to those aspects of their activities that do not directly affect commercial motor vehicles safety.

The Department of Labor continues its authority and this act does not amend or modify the Occupational Safety and Health Act or the National Labor Relations Act.

Whether to treat independent owner-operators as employers or employees posed a unique problem to the drafters. An independent owner-operator owns his own truck and drives it. He also may own several other trucks and have several drivers working for him. There was no question that the commercial motor vehicles he drives and his driving should be subject to the same safety rules as other commercial motor vehicles on the highway. All commercial motor vehicles if improperly maintained or operated pose a significant threat to the public safety.

It was decided that where an independent owner-operator has the primary responsibility for the maintenance and operation of his commercial motor vehicle or vehicles he should be considered an employer and be subject to the penalty provisions for employers. This is appropriate because the owner-operator does have primary control over the vehicle, yet the Committee was sensitive to the fact that the financial status of certain owner-operators is closer to that of employees who are subject to much lower penalties. Therefore, in the actual language of section 407 relating to penalties and the report language accompanying the section the Committee makes clear that in determining the amount of the penalty financial status, among other factors is to be taken into account. This should protect the owner-operator from unreasonable penalties for violations of the title.

This section also defines the terms "person", "Secretary", and "State".

DUTIES

Section 402.—This section requires each employee and employer to comply with the safety and health rules, regulations, standards, and orders issued pursuant to this title.

REGULATORY AUTHORITY AND STANDARDS

Section 403.—Section 403(a) requires the Secretary of Transportation to establish and revise rules, regulations, standards, and orders as may be necessary to further the purpose of this title and to provide that they shall be directed to assuring that (1) commercial motor vehicles are safely maintained, equipped, loaded, and operated; (2) the responsibilities imposed on a driver do not impair his ability to operate the vehicle safely; (3) the physical condition of drivers is adequate to enable them to drive safely; and (4) the operation of commercial motor vehicles does not create deleterious effects on the physical condition of such drivers.

The Secretary is required to consider, where practicable, costs and benefits of such rules, regulations, standards, and orders. In requiring the Secretary to consider costs and benefits, where practicable, in the course of regulatory activities, the Committee realizes that many aspects of safety and health regulation do not lend themselves to cost-benefit analysis. While the benefits of a particular rule or regulation may be substantial, they may not be practicably quantifiable. The relative costs and benefits reasonably expected to result from a proposed safety or health rule warrant the consideration of the Secretary where practicable; but the Committee does not intend such requirement to have the effect of precluding, preventing, or suspending the promulgation or revision of rules, regulations, standards or orders due to difficulty in establishing specific, quantified cost or benefit data.

Section 403(b) requires the Secretary of Transportation to promulgate rules or regulations within 1 year after commencing a proceeding. It this is not possible, the Secretary is required to keep the Congress informed of the reasons for the delay and the efforts and progress being made to complete the proceeding. The purpose of this section is to provide incentives to the Department of Transportation to promulgate rules and regulations in a timely manner.

Section 403(b) also requires that all rules, regulations, standards and orders issued under this section be promulgated in accordance with section 553 of title 5, United States Code (without regard to sections 556 and 557 of that title), except that the time periods specified in section 403(a) apply to such promulgation.

Section 403(c) allows the Secretary to waive the application of any rule, regulation, standard, or order is such waiver is in the public interest and is consistent with the safe operation of commercial motor vehicles. This provision should be used with extreme care, and this waiver provision should only be used if the Secretary has developed sufficient information to provide adequate assurance that such waiver will not adversely affect the safe operation of commercial motor vehicles. It should not be enough to exempt a group merely because it is a small part of the commercial motor vehicle industry.

Section 403(d) directs the Secretary of Transportation and Director of the National Institute for Occupational Safety and Health (NIOSH), in consultation with the Secretary of Labor, to conduct a study of health hazards to which employees engaged in the operation of commercial motor vehicles are exposed and to develop recommendations regarding the most appropriate method for regulating and protecting the health of operators of commercial motor vehicles. This section authorizes an appropriation of $1.5 million out of the Highway Trust Fund for fiscal 1984 to conduct this study.

Subsection (e) requires the Secretary of Transportation, the Director of the National Institute for Occupational Safety and Health, and the Secretary of Labor to coordinate their activities to ensure adequate protection of the safety and health of operators of commercial motor vehicles.

In the context of this section, it is important to note the respective roles of the Departments of Transportation and Labor. The Secretary of Transportation, for example, in protecting the public from unsafe commercial motor vehicles, and assuring that commercial motor vehicles are safely maintained, equipped, loaded, and operated, is responsible for the manner in which brakes are repaired, the manner in which a load is distributed in a vehicle, the design and equipment of the vehicle, and related matters insofar as failure to observe his regulations would adversely affect the safety of the public or the health and safety of operators of commercial motor vehicles. The Secretary of Transportation is not responsible for protecting employees from asbestos fibers, and toxic fumes involved in the course of properly repairing a brake, nor for the protection of employees from slippery walking surfaces or from inadequately braked fork-lift trucks. These activities continue to be the responsibility of the Department of Labor.

It is the intent of the Committee that nothing in section 403 of the bill alter this state of affairs which has developed under existing provisions of law.

At the same time, the Committee believes that both Departments must focus more attention upon the hazards that commercial motor vehicle drivers face in the course of their work. As efforts to permanently reduce or eliminate specified health hazards may ultimately require changes in commerical motor vehicle design, which is generally the expertise of the Secretary of Transportation, this bill therefore directs the Secretary of Transportation and the Director of the National Institute for Occupational Safety and Health, in consultation with the Secretary of Labor, to conduct a study of safety and health hazards to drivers. By doing this, the two regulatory authorities will have the information necessary to determine the extent to which they should utilize their respective expertise to deal with these problems. Section 403(e) does not provide additional or new regulatory authority to the Secretary of Labor or the Director of the National Institute for Occupational Safety and Health. The DOT Secretary is mandated under this act the authority to assure the protection of safety and health of operators while operating commercial motor vehicles. This section requires the Secretaries and the Director to make every attempt to avoid overlap or duplication of activities and to coordinate their efforts. The Committee intends, in the exercise of its regular oversight authority, to follow further developments in this area of concern.

GENERAL POWERS

Section 404.—This section provides the Secretary of Transportation with broad administrative powers to assist in the implementation of this title. Section 404(b) includes provision for the Secretary to delegate enforcement functions, as he determines appropriate, under this title to a State with a plan approved under section 411 of this title.

INSPECTIONS AND WARRANTS

Section 405.—Section 405 authorizes the conditions under which the Secretary of Transportation can carry out inspections or searches. Employers and employees and their duly designated representatives shall be offered a right of accompaniment.

Specifically, section 405(a)(2)(A) provides that an administrative warrant shall be required for any entry or administrative inspection unless the entry of inspection is:

(1) with the consent of the employer, employee, or agent of the employer in charge of the business, establishment, or premises; (2) in situations where there is reasonable cause to believe that the mobility of the motor vehicle makes it impractical to obtain a warrant; (3) in any other exceptional or emergency circumstance where time or opportunity to apply for a warrant is lacking; (4) for access to and examination of books, records, and any other documentary evidence which can be easily altered, manufactured, or falsified; or (5) in any other situations where a warrant is not constitutionally required.

Section 405(a)(2)(B) provides for the issuance and execution of administrative inspection warrants. Any judge of the United States or of a State court of record, or any United States magistrate, may within his territorial jurisdiction, and upon proper oath or affirmation showing probable cause, issue warrants to conduct administrative inspections and to impound motor vehicles or their equipment. This section also sets forth in detail the circumstances under which a warrant shall be issued and the contents of the warrant. Details of the execution and return are also set forth in detail.

DUTY TO INVESTIGATE COMPLAINTS, PROTECTION OF COMPLAINANTS

Section 406.—This section requires the Secretary of Transportation to investigate nonfrivolous written complaints alleging a material violation of the title. The Secretary is also required to take steps to protect the identity of persons complaining of safety violations.

PENALTIES

Section 407.—This section sets forth the penalties available to the Secretary of Transportation in enforcing violations of sections 402 through 417 of this title. The section provides for both civil and criminal penalties, subsections (b) and (e), injunctive relief, subsection (h), and imminent hazard authority, subsection (d).

Subsection (a) sets out the procedure for the Secretary to follow if he finds that a violation under this title has occurred.

Subsection (b) provides for a civil penalty of up to $500 for a recordkeeping violation. The total of all recordkeeping offenses relating to any single recordkeeping violation shall not exceed $10,000. If the Secretary determines that a substantial health or safety violation exists or has occurred which could reasonably lead to or has resulted in serious personal injury or death, he may assess a civil penalty of up to $10,000 for each offense. However, no civil penalty, except recordkeeping penalties, may be assessed against an employee unless the employee is the operator of a commercial motor vehicle and the Secretary of Transportation determines that the employee's actions constituted gross negligence or reckless disregard for safety, in which case such employee shall be liable for a civil penalty up to $1,000. In assessing civil penalties the Secretary is to take into account the nature, circumstances, extent, and gravity of the violation and the degree of culpability, history of prior offenses, ability to pay, and effect on ability to continue to do business of the violator. The assessment is to be calculated to induce further compliance.

The Committee felt that an employee who is operating a commercial motor vehicle in a grossly negligent manner or with reckless disregard for safety and in violation of this title should be subject to a civil penalty. At the same time the Committee recognized the fact that employees and employers enjoy a different financial status. The level of penalty necessary to provide a deterrent to an employer could have the effect of financially bankrupting an employee. The different levels of penalties for employers and employees are designed, therefore, to create adequate incentives to assure compliance with the act. As stated in the section-by-section analysis under the definition of employee and employer, the independent owner-operator posed a unique problem for the drafters. For the purposes of this title only an owner-operator while in the course of personally operating a commercial motor vehicle for a commercial motor carrier is considered an employee for penalty purposes. When the owner-operator is not acting in such capacity, for purposes of this title he shall be treated as an employer. However, the Secretary, in assessing a civil penalty, is directed to take into account, among other criteria, the ability to pay and effect on ability to do business.

Subsection (c) authorizes the Secretary to require a violator to post a copy of a notice of violation or a statement thereof.

Subsection (d) authorizes the Secretary to place a vehicle out of operation or to order an employer to cease all or part of his commercial motor vehicle operations if the Secretary determines that an imminent hazard to safety exists.

Subsection (e) provides for criminal penalties for employers and employees who are operating a commercial motor vehicle who knowingly or willfully violate the act. Penalties for an employer are a fine of up to $25,000 and or imprisonment not to exceed 1 year. An employee is subject to a $2,500 fine. The Committee felt this was sufficient deterrent for the employee because he would also be subject to employer sanctions and State laws.

Subsection (f) requires the Secretary to promulgate regulations establishing penalty schedules designed to induce timely compliance for those failing to comply promptly with the requirements set forth in notices and orders.

Subsection (g) establishes a procedure whereby any aggrieved person who, after a hearing is adversely affected by a final order issued by the Secretary, may petition for review of the order in the U.S. Court of Appeals.

Subsection (h) authorizes the Secretary to obtain enforcement of any penalty or order issued under this section by applying to the United States District Court. In addition, to granting enforcement, the District Court may assess a penalty for noncompliance.

Subsection (i) provides that penalties and fines imposed shall be deposited into the Treasury as miscellaneous receipts.

Subsection (j) provides that subpenas for witnesses who are required to attend a District Court may run into any District.

Subsection (k) provides procedures for proceedings for criminal contempt in accordance with the Federal Rules of Criminal Procedure.

REPRESENTATION BEFORE THE COURTS

Section 408.—The section authorizes the General Counsel of the Department of Transportation to appear for and represent the Secretary in all proceedings and in any civil litigation brought under this title, except as otherwise provided.

PROTECTION OF EMPLOYEES

Section 409.—Subsection (a) of section 409 prohibits any person from disciplining, discriminating against, or discharging an employee for filing a complaint or exercising a right afforded by this title or other authorities of the Secretary of Transportation concerning commercial motor vehicle safety.

Subsection (b) provides for protection of an employee who refuses to operate an unsafe vehicle. In order to qualify for protection under this subsection, the employee must have sought from his employer and have been unable to obtain, correction of the unsafe condition. The employee's refusal to operate the vehicle must be of such nature that a reasonable person, under the circumstances then confronting the employee, would conclude that there is a bona fide danger of an accident, injury or serious impairment of health, resulting from the unsafe condition. In providing protection of employees in section 409, it is intended to assure that employees are not forced to drive unsafe vehicles or commit unsafe acts. It is not intended to promote refusal of employees to operate when violations occur en route that do not adversely affect safety or health.

Subsection (c) provides the procedure an employee may follow if the employee believes he has been discriminated against, disciplined or discharged in violation of subsection (a) or (b). An employee may file a complaint, within 180 days after the alleged violation occurs with the Secretary of Labor. The Secretary of Labor is then required to conduct an investigation within 60 days of receipt of a complaint and report his findings and conclusions to the affected parties. If the Secretary of Labor determines that there is reasonable cause to believe that the complaint has merit, he shall notify the complainant and the person alleged to have committed the violation. Thereafter, either the person alleged to have committed the violation or the complainant may, within 30 days file objections to the proposed order and request a hearing on the record. Where a hearing is not timely requested, the Secretary shall issue a final order not subject to judicial review. Where a hearing is requested, it is to be expeditiously conducted with a final order issued within 120 days after conclusion of the hearing. If, in response to a complaint, the Secretary of Labor determines that a violation of subsection (a) or (b) has occurred, he shall order (1) the person who committed such violation to take affirmative action to abate the violation, (2) such person to reinstate the complainant to the complainant's former position, (3) compensatory damages, and (4) where appropriate, exemplary damages. If such an order is issued, the Secretary of Labor may assess against the person against whom the order is issued a sum equal to the aggregate amount of all costs and expenses reasonably incurred by the complainant for, or in connection with, the bringing of the complaint.

Subsection (d) allows any person adversely affected by a subsection (c) order to obtain review of the order in the United States Court of Appeals.

Subsection (e) authorizes the Secretary of Labor to obtain enforcement of its order in the United States District Courts.

The section was considered necessary to encourage "whistle-blowing" by employees. Enforcement of commercial motor vehicle safety laws and regulations is possible only through an effort on the part of employers, employees, State safety agencies, and the Department of Transportation. Therefore, the Committee considered it necessary to specifically provide protection for those employees who are discharged or discriminated

against for exercising their rights and responsibilities under this title.

The Committee determined that employees with reasonable complaints should be able in the first instance to seek timely consideration of their complaints from a Federal agency rather than a court. Redress through the court system is a very expensive and time-consuming process. It was believed that timely agency review of employee complaints would result in a fairer resolution of employer/employee disputes. In addition, the Committee believes that section 409 provides one more incentive to employers to comply with rules, regulation standards and orders issued under the title.

The Department of Labor was designated the agency responsible for review of employee complaints. The Department of Labor has responsibility for similar employee protection provisions in the Toxic Substances Control Act and other environmental and safety legislation and was deemed to be the agency most appropriate for handling complaints relating to employer/employee labor relations. While the Department of Transportation has expertise for developing commercial motor vehicle safety regulations, the Committee believes that the Department of Transportation should focus its effort on commercial motor vehicle safety and health regulations rather than employer/employee labor relations. The Committee believes it is extremely important for the Department of Labor to act expeditiously in this area.

GRANT TO STATES

Section 410.—This section authorizes the Secretary to make grants to the States for the development or implementation of programs to enforce commercial motor vehicle safety laws and regulations.

This provision is considered to be very important to achieving the purposes of this title. There are millions of commercial motor vehicles travelling on our Nation's highways. It is impossible and in fact not desirable to have a Federal force large enough to be solely responsible for the enforcement of the commercial motor vehicle safety and health rules and regulations.

The drafters of this legislation realize that the State highway safety agencies must have a major responsibility for enforcement if the purposes of this act are to be achieved. While the States already play a significant enforcement role, the Committee is aware that the States would need increased financial assistance if State programs were to be improved and expanded. The purpose of sections 410, 411, 412, 413, and 414 are to assist the States in meeting the goals of this legislation.

STATE ENFORCEMENT

Section 411.—Subsection (a) of section 411 requires the Secretary of Transportation to formulate procedures for a State to submit a plan whereby the State agrees to adopt and assume responsibility for enforcing rules, regulations, standards, and orders in compliance with this title.

Subsection (b) requires the Secretary to make a continuing evaluation of the manner in which each State with an approved plan is carrying out the plan or enforcing the rules, regulations, standards, or orders under this title. A State whose approved plan is withdrawn by the Secretary may seek judicial review.

Subsection (c) provides that no State plan shall be approved which does not provide for funding for commercial motor vehicle safety programs at a level which does not fall below the average level of such expenditures by the State for the last 2 fiscal years preceding the date of enactment of this act.

STATE REGULATIONS

Section 412.—Generally, subsection (a) of section 112 allows a State to adopt additional or more stringent commercial motor vehicle safety rules if the rules do not create a burden on commerce or are not inconsistent with the Federal rules, regulations, standards, or orders issued under this title.

Subsection (b) states that this act shall not affect existing State hours-of-service regulations applying to commercial motor vehicles operations occurring wholly within the State unless the Secretary of Transportation finds upon review of a State's hours-of-service regulations that such State regulation materially diminishes commercial motor vehicle safety or health, is not required by compelling local conditions, or unduly burdens interstate commerce.

FEDERAL SHARE OF COSTS

Section 413.—This section authorizes the Secretary to reimburse a State for up to 80 percent of costs incurred by the State in the development and implementation of programs to enforce commercial motor vehicle safety laws and regulations.

AUTHORIZATIONS

Section 414.—This section authorizes appropriations out of the Highway Trust Fund not to exceed $10 million in fiscal 1984, $20 million in fiscal 1985, $30 million in fiscal 1986, $40 million in fiscal 1987, and $50 million in fiscal 1988 to reimburse to States the Federal pro rata share of costs incurred under sections 410 and 411 of this title.

ANNUAL REPORT

Section 415.—Section 415 requires the Secretary of Transportation to annually report to Congress concerning his efforts and plans to upgrade the safey and health of operators of commercial motor vehicles.

APPLICABILITY

Section 416.—This section exempts from this title the operation of any vehicles engaged in farming activities and logging operations as defined by the Secretary.

The primary purpose of this legislation is to reduce the deaths and personal injuries due to commercial motor vehicle operations. For this reason, the Committee believed it was necessary and logical to include within the scope of this title many motor vehicles not covered under present law. On the other hand, it is not the intent of the Committee to cover commercial motor vehicle operations which do not affect highway safety. For this reason certain farming and logging operations were exempted from the title. For example, logging operations may include mechanical and manual activities, used to move forest growth in a variety of forms from the forest origin point to a facility converting the forest growth to consumer or industrial products or energy. Generally, the movement of forest growth on a highway vehicle begins in the forest, may be subject to intermediate activities such as scaling, bucking, debarking, chipping, sorting, or reloading, and ends when unloaded at the conversion facility. Any such logging operation which merely crosses the highway, travels short distances on the highways, and has only a minimal effect on highway safety should not be subject to the provisions of the act. The Secretary of Transportation is responsible for determining which logging or farming operations do not have an impact on highway safety and should be exempt from the act.

COMMERCIAL MOTOR VEHICLE SAFETY ADVISORY COMMITTEE

Section 417.—This section establishes a Commercial Motor Vehicle Safety Advisory Committee with the Secretary of Transportation and 15 members appointed by the Secretary. The Advisory Committee is to advise, consult with and make recommendations to the Secretary on matters relating to the activities and functions of the Department of Transportation in the field of commercial motor vehicle safety. An appropriation of not to exceed $125,000 for each of fiscal years 1984, 1985, and 1986 is authorized for carrying out this section.

This committee is patterned after the Highway Safety Act. Such a committee is expected to be very helpful in improving communications, among the many parties interested in and affected by rules and regulations adopted under this title. Other similar safety advisory committees have proved beneficial to assuring more sensible and effective safety rules and regulations.

AUTHORIZATION OF APPROPRIATIONS

Section 418.—This section authorizes appropriations from the Highway Trust Fund of $13 million for each of fiscal years 1985 through 1988 for Federal Highway Administration safety research and development programs.

This section also authorizes appropriations for each of fiscal years 1985 through 1988 of $100 million from the Highway Trust Fund for National Highway Traffic Safety Administration (NHTSA) highway safety programs and $31 million for each of these fiscal years for NHTSA highway safety research and development.

APPORTIONMENT

Section 419.—Subsection 419(a) strikes the definition of "State" in section 401 of title 23, United States Code, dealing with expenditures for carrying out safety programs.

Subsection 419(b) amends section 402 of title 23, United States Code, regarding the annual highway safety apportionment by striking exceptions relating to the Virgin Islands, Guam, and American Samoa.

Section 420.—National Uniform State Regulation. Section 19 of the Motor Carrier Act of 1980, Pub. L. 96-296, requires the Department of Transportation and the Interstate Commerce Commission to develop legislative or other recommendations to provide a more efficient and equitable system of State motor carrier regulations. After soliciting public comments, both written and oral, a final report detailing the various inconsistencies between State regulations in these areas has been prepared.

This section provides that a working group be established to review the various State licensing and State taxing requirements of interstate motor carriers by highway. This working group will recommend standards to the Secretary of Transportation. The Secretary may then initiate a rulemaking action to adopt or otherwise implement these standards. As a minimum such standards are to include: (1) standardized procedures and forms; (2) base State certification; (3) a single State unit for filings, applications, and permits; (4) payment of fees and taxes to the base State; (5) equitable distribution of revenues; (6) a common basis for taxation in each area of requirements; and (7) reasonable limits on fees paid for identification stickers, plates or other indicia.

Subsection (a) establishes a working group.

Subsection (b) defines the responsibilities of the working group. The working group is to develop uniform State procedural standards for vehicle registration, fuel tax, and third structural tax requirements.

Subsection (c) provides for the expenses to be paid to the members of the working group.

Subsection (d) provides that after the working group has completed its work, it must submit recommended standards to the Secretary, Department of Transportation, within 18 months of the date of enactment of this Act.

Subsection (c) provides that the Secretary may initiate rulemaking to implement the recommended standards found acceptable.

Subsection (f) provides that, if the working group fails to act, the Secretary may develop such standards and initiate rulemaking. The Secretary may act in any area or on any subject on which the working group fails to act after 18 months.

This section authorizes Federal preemption of certain State procedures, e.g., the manner in which States collect fuel taxes; administer vehicle registration.

MINIMUM FINANCIAL RESPONSIBILITY FOR MOTOR CARRIERS

Section 421.—This section amends the financial responsibility requirements contained in section 30 for motor carriers of property.

Subsection (a) would remove the limitation on the levels of financial responsibility for motor carriers of property established by the Secretary and allow the Secretary to determine appropriate levels through public rulemaking action.

Subsection (c) would do three things: (1) complement the proposed amendment to Section 30(b)(1) and subject motor vehicles transporting certain specified hazardous materials, substances, or wastes in foreign commerce to the financial responsibility provisions of Section 30; (2) change the language of subsection (c) to be consistent with the Department's hazardous materials regulations; and (3) remove the limitations on the levels of financial responsibility established by the Secretary, and allow the Secretary to determine future appropriate levels through public rulemaking action.

Subsection (d) would also do three things: (1) complement the proposed amendment to Section 30(b)(1) and subject motor vehicles transporting other hazardous materials, substances, or wastes in foreign commerce to the financial responsibility of Section 30; (2) remove the limitations on the levels of financial responsibility established by the Secretary and allow the Secretary to determine future appropriate levels required through public rulemaking action; and (3) effectively exempt many more small businesses from the financial responsibility requirements of Section 30 without compromising highway safety.

Subsection (e) would also do two things: (1) complement the proposed amendment to Section 30(b)(1) and subject motor vehicles transporting any hazardous materials, substances, and wastes in foreign commerce to the financial responsibility provisions of Section 30; and (2) remove the limitation on the limits established by the Secretary and allow the Secretary to determine future appropriate levels required through public rulemaking action.

Subsection (f) amends the 10,000 pound GVWR exemption to Section 30. It would exclude from the 10,000 pound GVWR exemption those vehicles transporting any quantity of Class A or B explosives, poison gas, or large quantity radioactive materials in interstate foreign commerce.

Section 422.—Commercial Motor Vehicle Length Limitation. Subsection (a) prohibits States from imposing trailer limitations if less than 48 feet for trailers in a "single" combination or 28 feet for "double" combinations on any segment of the interstate system or Federal-aid highways except with respect to such qualifying Federal-aid highways designated pursuant to subsection (e).

Subsection (b) assures that State regulation may not apply to the length of truck tractors or the overall length of singles and doubles. (The bill is neutral with respect to State regulation of "triples" or straight trucks involving no combinations.) States are prohibited from imposing regulations that have the effect of being more restrictive than those in force on December 1, 1982. Existing trailers or semitrailers of up to twenty eight and a half feet in length, in a truck tractor-semitrailer-trailer combination are allowed to continue to operate in Commerce if actually operating on December 1, 1982 within a 65 foot overall length limit in any State.

Subsection (c) prohibits States from precluding "double" combination units from the interstate and federal-aid highway system—except with respect to such qualifying Federal-aid highways designated pursuant to subsection (e) of this section.

Subsection (d) gives the Secretary of Transportation the authority to establish or guidelines for the implementation of the provisions of the section and to make such determinations as are necessary to accommodate specialized equipment. The bill notes, by example, the situation of automobile haulers where the cargo-carrying unit extends over the cab. A strict interpretation of trailer size limitations could jeopardize what has become a standard and perfectly safe vehicle configuration. The Secretary should also be guided by the desire of Congress to assure that no existing regulations are made more restrictive.

Subsection (e) authorizes the Secretary of Transportation and the States to restrict the application of the federal standards for length on Federal-aid highways if the application of such standards to specific Federal-aid highways would adversely affect the public safety.

Subsection (f) defines "truck tractor" as the non-cargo carrying power unit that operates in combination with a semi-trailer or trailer(s).

Subsection (g) provides that the provisions of the section take effect six months after the enactment of the bill. This will allow time for the States to adjust their regulations, if necessary.

Section 423.—Commercial Motor Vehicle Width Regulations. States are required to allow commercial motor vehicles to operate on highways at a width of 102 inches provided the traffic laws are designed to be a width of 12 feet or more.

Section 424.—Safety Related Services. This provision provides that the limits described in sections 422 and 423 are exclusive of a number of fuel conservation and safety devices listed.

Section 425.—Access to the Interstate System. This provides that no State may deny reasonable access to and from the interstate and federal aid system and terminals and facilities for food, fuel, repairs, and rest.

Section 426.—Enforcement. This provision allows the Secretary of Transportation to seek injunctive relief to require compliance with the provisions of the act.

Section 427.—Splash and Spray Suppressant Devices. The Secretary of Transportation is required to set standards for the use of splash and spray suppressant devices for tractors, semi-trailers, and trailers.

Section 428.—Report Regarding Longer Combination Commercial Motor Vehicles. The Secretary of Transportation is required to study and report on the potential benefits and costs that may result from the establishment of a National intercity truck route network for the operation of a special class of longer-combination commercial motor vehicles.

Section 429.—Airport and Airway Development Program. This section increases airport development spending $475 million over the next 3 years, 1983–1985. This is accomplished by shifting $112.5 million from both 1986 and 1987 and distributing the funds in 1983, 1984 and 1985. Also, an additional $250 million is drawn from the Aviation Trust Fund surplus and is allocated in 1983, 1984 and 1985. The result of this is to increase the authorized level in 1983 by $200 million; 1984 by $200 million and 1985 by $75 million.

	Currently authorized levels	Proposed changes	Actual change
1983	$600,000,000	$800,000,000	+$200,000,000
1984	793,500,000	993,500,000	+200,000,000
1985	912,000,000	987,000,000	+75,000,000
1986	1,017,000,000	904,500,000	−112,500,000
1987	1,017,200,000	904,700,000	−112,500,000

These levels would create an additional 12,000 jobs in both 1983 and 1984 and an additional 4,725 jobs in 1985.

The additional funds shall be discretionary funds and they shall be spent for new construction.

The Secretary may, in no event, reduce any other apportionment or entitlement of the Airport and Airway Improvement Act of 1982.

Section 430.—Recreational Boating and Reforestation Trust Fund Amendment. Subsecion (a) amends Public Law 96-451 to provide the Secretary of Transportation authority to contract with the States to implement and administer a national recreational boating safety and facilities improvement program. A contractual obligation of the United States to distribute motorboat gasoline fuel tax revenues to the States is created when the Secretary of Transportation approves specified elements of the State program.

The formula for distribution is unchanged from current law. The current limitation on amounts which may be held in the Trust Fund is removed, so that all motorboat gasoline fuel tax revenues are transferred into the Fund.

Subsection (b) would require the expenditure of funds collected in the Reforestation Trust Fund created by Public Law 96-451. This is accomplished by repealing the current legal prerequisites to expenditure of the funds by the Secretary of Agriculture. In no case may the Secretary spend, in fiscal year 1983, less than the $104,000,000 now held in the Trust Fund. Any funds remaining in the Trust Fund at the end of fiscal year 1985 are to be distributed to the States for use in State forestry programs.

Section 431.—Amendment to Saltonstall-Kennedy bill. This section would require that all money in the Saltonstall-Kennedy Fund be used in support of the United States fishing industry. Specifically, up to

40 percent of the Fund could be used to support activities within the National Marine Fisheries Service as long as those activities were related to fisheries development.

At least 60 percent of the Fund would have to go directly for industry grants. Since the Fund is currently collecting approximately $28 million per year, at least $17 million would have to go for grants, and the rest could go to the National Marine Fisheries Service fisheries development programs.

Attached to the amendment is an excerpt from a Department of Commerce study of fisheries development potential in the United States. It shows that a strong industry/government development effort could create 43,000 new jobs by the year 1990.

Section 432.—This section provides that no ceiling shall be placed on the Title XI loan guarantee program other than a ceiling imposed by authorizing legislation. The Committee is proposing no such ceiling.

Mr. HUMPHREY. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HUMPHREY. Is not a meeting of the relevant committee necessary and the obtaining of agreement among a majority of its members necessary to withdraw a committee amendment?

The PRESIDING OFFICER. A meeting is not necessary. It is necessary, however, that a majority of the members of the Committee on Finance agree to the withdrawal of the amendment.

Mr. HUMPHREY. Has the Chair been notified that such a meeting has taken place or such an agreement has been obtained?

Mr. BAKER. Mr. President.

The PRESIDING OFFICER. When the majority leader states it is withdrawn on behalf of the committee, there is an inference that such an agreement has been obtained.

Mr. HUMPHREY. A parliamentary inquiry, Mr. President. Are there not three other committee amendments?

The PRESIDING OFFICER. It is the Chair's understanding that there is one committee amendment.

Mr. ROBERT C. BYRD. Mr. President.

The PRESIDING OFFICER. The minority leader is recognized.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. ROBERT C. BYRD. Yes; I yield.

Mr. BAKER. The statement I made a the time the Chair announced the withdrawal of the committee amendment was that I was authorized on behalf of the committee to do so. I inquire of the Chair, is that not then in compliance with the requirement?

The PRESIDING OFFICER. It is.

Mr. BAKER. I thank the Chair.

Mr. President, the substitute is the pending question before the Senate; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. And the amendment is now open for debate?

The PRESIDING OFFICER. The amendment is now open for debate.

Mr. BAKER. Mr. President, I yield to the Senator from Kansas.

Mr. ROBERT C. BYRD. Mr. President, I have the floor.

Mr. BAKER. Mr. President, I am sorry; I yield to the minority leader.

The PRESIDING OFFICER. The minority leader is recognized.

UP AMENDMENT NO. 1441

Mr. ROBERT C. BYRD. Mr. President, I send to the desk an amendment and ask that it be stated by the clerk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) proposes an unprinted amendment numbered 1441.

Mr. ROBERT C. BYRD. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

TITLE I—FAIRNESS IN TAXATION ACT OF 1982

MODIFICATION OF TAX CUT

SEC. 101. (a) IN GENERAL.—Section 1 of the Internal Revenue Code of 1954 (relating to tax imposed) is amended by striking out subsections (a), (b), (c), (d), and (e) and inserting in lieu thereof the following:

"(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and every surviving spouse (as defined in section 2(a)), a tax determined in accordance with the following tables:

"(1) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $3,400	No tax.
Over $3,400 but not over $5,500	11% of the excess over $3,400.
Over $5,500 but not over $7,600	$231, plus 13% of the excess over $5,500.
Over $7,600 but not over $11,900	$504, plus 15% of the excess over $7,600.
Over $11,900 but not over $16,000	$1,149, plus 17% of the excess over $11,900.
Over $16,000 but not over $20,200	$1,846, plus 19% of the excess over $16,000.
Over $20,200 but not over $24,600	$2,644, plus 23% of the excess over $20,200.
Over $24,600 but not over $29,900	$3,656, plus 26% of the excess over $24,600.
Over $29,900 but not over $35,200	$5,034, plus 30% of the excess over $29,900.
Over $35,200 but not over $37,900	$6,624, plus 35% of the excess over $35,200.
Over $37,900 but not over $60,000	$7,569, plus 42% of the excess over $37,900.
Over $60,000 but not over $85,600	$16,851, plus 46% of the excess over $60,000.
Over $85,600	$28,627, plus 50% of the excess over $85,600.

"(2) FOR TAXABLE YEARS BEGINNING IN 1984 AND 1985.—

"If taxable income is:	The tax is:
Not over $3,400	No. tax.
Over 3,400 but not over $5,500	11% of the excess over $3,400.
Over $5,500 but not over $7,600	$231, plus 12% of the excess over $5,500.
Over $7,600 but not over $11,900	$483, plus 14% of the excess over $7,600.
Over $11,900 but not over $16,000	$1,085, plus 16% of the excess over $11,900.
Over $16,000 but not over $20,200	$1,741, plus 18% of the excess over $16,000.
Over $20,200 but not over $24,600	$2,497, plus 22% of the excess over $20,200.
Over $24,600 but not over $29,900	$3,476, plus 25% of the excess over $24,600.
Over $29,900 but not over $35,200	$4,790, plus 28% of the excess over $29,900.
Over $35,200 but not over $37,900	$6,274, plus 33% of the excess over $35,200.
Over $37,900 but not over $45,800	$7,165, plus 47% of the excess over $37,900.
Over $45,800 but not over $60,000	$10,878, plus 42% of the excess over $45,800.
Over $60,000 but not over $85,600	$16,842, plus 46% of the excess over $60,000.
Over $85,600	$28,618, plus 50% of the excess over $85,600.

"(3) FOR TAXABLE YEARS BEGINNING IN 1986.—

"If taxable income is:	The tax is:
Not over $3,400	No tax.
Over $3,400 but not over $5,500	11% of the excess over $3,400.
Over $5,500 but not over $7,600	$231, plus 12% of the excess over $5,500.
Over $7,600 but not over $11,900	$483, plus 14% of the excess over $7,600.
Over $11,900 but not over $16,000	$1,085, plus 16% of the excess over $11,900.
Over $16,000 but not over $20,200	$1,741, plus 18% of the excess over $16,000.
Over $20,200 but not over $24,600	$2,497, plus 22% of the excess over $20,200.
Over $24,600 but not over $29,900	$3,465, plus 25% of the excess over $24,600.
Over $29,900 but not over $35,200	$4,790, plus 28% of the excess over $29,900.
Over $35,200 but not over $45,800	$6,645, plus 33% of the excess over $35,200.
Over $45,800 but not over $60,000	$9,772, plus 38% of the excess over $45,800.
Over $60,000 but not over $85,600	$15,168, plus 42% of the excess over $60,000.
Over $85,600 but not over $109,400	$25,920, plus 45% of the excess over $85,600.
Over $109,400 but not over $162,400	$36,630, plus 49% of the excess over $109,400.
Over $162,400	$62,600, plus 50% of the excess over $162,400.

"(b) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual who is the head of a household (as defined in section 2(b)) a tax determined in accordance with the following tables:

"(1) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $4,400	11% of the excess over $2,300.
Over $4,400 but not over $6,500	$231, plus 13% of the excess over $4,400.
Over $6,500 but not over $8,700	$504, plus 15% of the excess over $6,500.
Over $8,700 but not over $11,800	$834, plus 18% of the excess over $8,700.
Over $11,800 but not over $15,000	$1,392, plus 19% of the excess over $11,800.
Over $15,000 but not over $18,200	$2,000, plus 21% of the excess over $15,000.
Over $18,200 but not over $23,500	$2,672, plus 25% of the excess over $18,200.
Over $23,500 but not over $28,800	$3,997, plus 29% of the excess over $23,500.
Over $28,800 but not over $34,100	$5,534, plus 43% of the excess over $28,800.
Over $34,100 but not over $44,700	$7,813, plus 39% of the excess over $34,100.
Over $44,700 but not over $60,600	$11,947, plus 46% of the excess over $44,700.
Over $60,00	$19,261, plus 50% of the excess over $60,000.

"(2) FOR TAXABLE YEARS BEGINNING IN 1984 AND 1985.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $4,400	11% of the excess over $2,300.
Over $4,400 but not over $6,500	$231, plus 12% of the excess over $4,400.
Over $6,500 but not over $8,700	$483, plus 14% of the excess over $6,500.
Over $8,700 but not over $11,800	$791, plus 17% of the excess over $8,700.
Over $11,000 but not over $15,000	$1,318, plus 18% of the excess over $11,800.
Over $15,000 but not over $18,200	$1,894, plus 20% of the excess over $15,000.
Over $18,200 but not over $23,500	$2,534, plus 24% of the excess over $18,200.
Over $23,500 but not over $28,800	$3,806, plus 28% of the excess over $23,500.
Over $28,800 but not over $34,100	$5,290, plus 47% of the excess over $28,800.

Over $34,100 but not over $44,700	$7,781, plus 39% of the excess over $34,100.
Over $44,700 but not over $60,600	$11,915, plus 46% of the excess over $44,700.
Over $60,600	$19,229, plus 50% of the excess over $60,600.

"(3) FOR TAXABLE YEARS BEGINNING IN 1986.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $4,400	11% of the excess over $2,300.
Over $4,400 but not over $6,500	$231, plus 12% of the excess over $4,400.
Over $6,500 but not over $8,700	$483, plus 14% of the excess over $6,500.
Over $8,700 but not over $11,800	$791, plus 17% of the excess over $8,700.
Over $11,800 but not over $15,000	$1,318, plus 18% of the excess over $11,800.
Over $15,000 but not over $18,200	$1,894, plus 20% of the excess over $15,000.
Over $18,200 but not over $23,500	$2,534, plus 24% of the excess over $18,200.
Over $23,500 but not over $28,800	$3,806, plus 28% of the excess over $23,500.
Over $28,800 but not over $34,100	$5,290, plus 32% of the excess over $28,800.
Over $34,100 but not over $44,700	$6,986, plus 35% of the excess over $34,100.
Over $44,700 but not over $60,600	$10,696, plus 42% of the excess over $44,700.
Over $60,600 but not over $81,800	$17,374, plus 45% of the excess over $60,600.
Over $81,800 but not over $108,300	$26,914, plus 48% of the excess over $81,800.
Over $108,300	$39,634, plus 50% of the excess over $108,300.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)) who is not a married individual (as defined in section 143) a tax determined in accordance with the following tables:

"(1) For taxable years beginning in 1983.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $3,400	11% of the excess over $2,300.
Over $3,400 but not over $4,400	$121, plus 13% of the excess over $3,400.
Over $4,400 but not over $8,500	$251, plus 15% of the excess over $4,400.
Over $8,500 but not over $10,800	$866, plus 17% of the excess over $8,500.
Over $10,800 but not over $12,900	$1,257, plus 19% of the excess over $10,800.
Over $12,900 but not over $15,000	$1,656, plus 21% of the excess over $12,900.
Over $15,000 but not over $18,200	$2,097, plus 24% of the excess over $15,000.
Over $18,200 but not over $23,500	$2,865, plus 28% of the excess over $18,200.
Over $23,500 but not over $28,800	$4,349, plus 32% of the excess over $23,500.
Over $28,800 but not over $34,100	$6,045, plus 43% of the excess over $28,800.
Over $34,100 but not over $41,500	$8,324, plus 42% of the excess over $34,100.
Over $41,500 but not over $55,300	$11,432, plus 47% of the excess over $41,500.
Over $55,300	$17,918, plus 50% of the excess over $55,300.

"(2) For taxable years beginning in 1984 and 1985.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $3,400	11% of the excess over $2,300.
Over $3,400 but not over $4,400	$121, plus 12% of the excess over $3,400.
Over $4,400 but not over $6,500	$241, plus 14% of the excess over $4,400.
Over $6,500 but not over $8,500	$535, plus 15% of the excess over $6,500.
Over $8,500 but not over $10,800	$835, plus 16% of the excess over $8,500.
Over $10,800 but not over $12,900	$1,203, plus 18% of the excess over $10,800.
Over $12,900 but not over $15,000	$1,581, plus 20% of the excess over $12,900.
Over $15,000 but not over $18,200	$2,001, plus 23% of the excess over $15,000.
Over $18,200 but not over $23,500	$2,737, plus 26% of the excess over $18,200.
Over $23,500 but not over $28,800	$4,115, plus 30% of the excess over $23,500.
Over $28,800 but not over $34,100	$5,705, plus 50% of the excess over $28,800.
Over $34,100 but not over $41,500	$8,355, plus 42% of the excess over $34,100.
Over $41,500 but not over $55,300	$11,463, plus 47% of the excess over $41,500.
Over $55,300	$17,949, plus 50% of the excess over $55,300.

"(3) FOR TAXABLE YEARS BEGINNING IN 1986.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $3,400	11% of the excess over $2,300.
Over $3,400 but not over $4,400	$121, plus 12% of the excess over $3,400.
Over $4,400 but not over $6,500	$24, plus 14% of the excess over $4,400.
Over $6,500 but not over $8,500	$535, plus 15% of the excess over $6,500.
Over $8,500 but not over $10,800	$835, plus 16% of the excess over $8,500.
Over $10,800 but not over $12,900	$1,203, plus 18% of the excess over $10,800.
Over $12,900 but not over $15,000	$1,581, plus 20% of the excess over $12,900.
Over $15,000 but not over $18,200	$2,001, plus 23% of the excess over $15,000.
Over $18,200 but not over $23,500	$2,737, plus 26% of the excess over $18,200.
Over $23,500 but not over $28,800	$4,115, plus 30% of the excess over $23,500.
Over $28,800 but not over $34,100	$5,705, plus 34% of the excess over $28,800.
Over $34,100 but not over $41,500	$7,507, plus 38% of the excess over $34,100.
Over $41,500 but not over $55,300	$10,319, plus 42% of the excess over $41,500.
Over $55,300 but not over $81,800	$16,115, plus 48% of the excess over $55,300.
Over $81,800	$28,835, plus 50% of the excess over $81,800.

"(e) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following tables:

"(1) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $1,700	No tax.
Over $1,700 but not over $2,750	11% of the excess over $1,700.
Over $2,750 but not over $3,800	$115.50 plus 13% of the excess over $2,750.
Over $3,800 but not over $5,950	$252, plus 15% of the excess over $3,800.
Over $5,950 but not over $8,000	$574.50, plus 17% of the excess over $5,950.
Over $8,000 but not over $10,000	$923, plus 19% of the excess over $8,000.
Over $10,100 but not over $12,300	$1,322, plus 23% of the excess over $10,100.
Over $12,300 but not over $14,950	$1,828, plus 26% of the excess over $12,300.
Over $14,950 but not over $17,600	$2,517, plus 30% of the excess over $14,950.
Over $17,600 but not over $18,950	$3,312, plus 35% of the excess over $17,600.
Over $18,950 but not over $30,000	$3,784.50, plus 42% of the excess over $18,950.
Over $30,000 but not over $42,800	$8,425.50 plus 46% of the excess over $30,000.
Over $42,800	$14,313.50 plus 50% of the excess over $42,800.

"(1) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $1,700	No tax.
Over $1,700 but not over $2,750	11% of the excess over $1,700.
Over $2,750 but not over $3,800	$115.50 plus 12% of the excess over $2,750.
Over $3,800 but not over $5,950	$241.50, plus 14% of the excess over $3,800.
Over $5,950 but not over $8,000	$542.50, plus 16% of the excess over $5,950.
Over $8,000 but not over $10,000	$870.50, plus 18% of the excess over $8,000.
Over $10,100 but not over $12,300	$1,248.50, plus 22% of the excess over $10,100.
Over $12,300 but not over $14,950	$1,732.50, plus 25% of the excess over $12,300.
Over $14,950 but not over $17,600	$2,395, plus 28% of the excess over $14,950.
Over $17,600 but not over $18,950	$3,137, plus 33% of the excess over $17,600.
Over $18,950 but not over $22,900	$3,582.50, plus 47% of the excess over $18,950.
Over $22,900 but not over $30,000	$5,439, plus 42% of the excess over $22,900.
Over $30,000 but not over $42,800	$8,421, plus 46% of the excess over $30,000.
Over $42,800	$14,309, plus 50% of the excess over $42,800.

"(3) FOR TAXABLE YEARS BEGINNING IN 1986.—

"If taxable income is:	The tax is:
Not over $1,700	No tax.
Over $1,700 but not over $2,750	11% of the excess over $1,700.
Over $2,750 but not over $3,800	$115, plus 12% of the excess over $2,750.
Over $3,800 but not over $5,950	$241, plus 14% of the excess over $3,800.
Over $5,950 but not over $8,000	$542, plus 16% of the excess over $5,950.
Over $8,000 but not over $10,100	$870, plus 18% of the excess over $8,000.
Over $10,100 but not over $12,300	$1,248, plus 22% of the excess over $10,100.
Over $12,300 but not over $14,950	$1,732, plus 25% of the excess over $12,300.
Over $14,950 but not over $17,600	$2,395, plus 28% of the excess over $14,950.
Over $17,600 but not over $22,900	$3,137, plus 33% of the excess over $17,600.
Over $22,900 but not over $30,000	$4,886, plus 38% of the excess over $22,900.
Over $30,000 but not over $42,800	$7,584, plus 42% of the excess over $30,000.
Over $42,800 but not over $54,700	$12,960, plus 45% of the excess over $42,800.
Over $54,700 but not over $81,200	$18,315, plus 49% of the excess over $54,700.
Over $81,200	$31,300, plus 50% of the excess over $81,200.

"(e) ESTATES AND TRUSTS.—There is hereby imposed on the taxable income of every estate and trust taxable under this subsection a tax determined in accordance with the following tables:

"(1) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $1,050	11% of taxable income.
Over $1,050 but not over $2,100	$115.50, plus 13% of the excess over $1,050
Over $2,120 but not over $4,250	$252, plus 15% of the excess over $2,100.
Over $4,250 but not over $6,300	$574.50, plus 17% of the excess over $4,250.
Over $6,300 but not over $8,400	$923, plus 19% of the excess over $6,300.
Over $8,400 but not over $10,600	$1,322, plus 23% of the excess over $8,400.
Over $10,600 but not over $13,250	$1,828, plus 26% of the excess over $10,600.
Over $13,250 but not over $15,900	$2,517, plus 30% of the excess over $13,250.
Over $15,900 but not over $17,250	$3,312, plus 35% of the excess over $15,900.
Over $17,250 but not over $28,300	$3,784.50, plus 42% of the excess over $17,250.
Over $28,300 but not over $41,100	$8,425.50, plus 46% of the excess over $28,300.
Over $41,100	$14,313.50, plus 50% of the excess over $41,100

"(2) FOR TAXABLE YEARS BEGINNING IN 1984 AND 1985.—

"If taxable income is:	The tax is:
Not over $1,050	11% of taxable income.
Over $1,050 but not over $2,100	$115.50, plus 12% of the excess over $1,050.
Over $2,100 but not over $4,250	$241.50, plus 14% of the excess over $2,100.
Over $4,250 but not over $6,300	$542.50, plus 16% of the excess over $4,250
Over $6,300 but not over $8,400	$870.50, plus 18% of the excess over $6,300.
Over $8,400 but not over $10,600	$1,248.50, plus 22% of the excess over $8,400.
Over $10,600 but not over $13,250	$1,732.50, plus 25% of the excess over $10,600.
Over $13,250 but not over $15,900	$2,395, plus 28% of the excess over $13,250.
Over $15,900 but not over $17,250	$3,137, plus 33% of the excess over $15,900.
Over $17,250 but not over $21,200	$3,582.50, plus 47% of the excess over $17,250.
Over $21,200 but not over $28,300	$5,439, plus 42% of the excess over $21,200.
Over $28,300 but not over $41,100	$8,421, plus 46% of the excess over $28,300.
Over $41,100	$14,309, plus 50% of the excess over $41,100.

"(3) FOR TAXABLE YEARS BEGINNING IN 1986.—

"If taxable income is:	The tax is:
Not over $1,050	11% of taxable income.
Over $1,050 but not over $2,100	$115, plus 12% of the excess over $1,050.
Over $2,100 but not over $4,250	$241, plus 14% of the excess over $2,100.
Over $4,250 but not over $6,300	$542, plus 16% of the excess over $4,250.
Over $6,300 but not over $8,400	$870, plus 18% of the excess over $6,300.
Over $8,400 but not over $10,600	$1,248, plus 22% of the excess over $8,400.
Over $10,600 but not over $13,250	$1,732, plus 25% of the excess over $10,600.
Over $13,250 but not over $15,900	$2,395, plus 28% of the excess over $13,250.
Over $15,900 but not over $21,200	$3,137, plus 33% of the excess over $15,900.
Over $21,200 but not over $28,300	$4,886, plus 38% of the excess over $21,200.
Over $28,300 but not over $41,100	$7,584, plus 42% of the excess over $28,300.
Over $41,100 but not over $53,000	$12,960, plus 45% of the excess over $41,100.
Over $53,000 but not over $79,500	$18,315, plus 49% of the excess over $53,000.
Over $79,500	$31,300, plus 50% of the excess over $79,500.".

(b) CONFORMING AMENDMENT.—Subsection (f) of section 1 of such Code is amended—

(1) by striking out "paragraph (3)" in paragraph (1) and inserting in lieu thereof "paragraphs (2) and (3)", and

(2) by striking out "paragraph (3)" in paragraph (2) and inserting in lieu thereof "paragraph (2) or (3)".

(c) FURTHER ADJUSTMENTS IN TAX TABLES.—Section 1 of such Code is amended by adding at the end thereof the following new subsection:

"(g) FURTHER ADJUSTMENTS IN TAX TABLES.—In the case of taxable years beginning after December 31, 1982, and before January 1, 1986, for taxpayers with taxable incomes which exceed $50,000, in lieu of rates in the tables prescribed under paragraphs (2) and (3) of subsections (a), (b), (c), (d), and (e), the rates shall be the rates in effect if the amount of the reduction which is reflected in the 10 percent reduction in withholding which is to take effect on July 1, 1983 is reduced by 1 percent for each $1,500 of taxable income in excess of $50,000.".

(d) CONFORMING AMENDMENT.—Clause (ii) of section 3401(a)(3)(B) of such Code (relating to income tax collected at source) is amended by inserting before the period a comma and "as modified by the provisions of the Fairness in Taxation Act of 1982".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1982.

TITLE II—HIGHWAY TRUST FUND AND MASS TRANSIT ACCOUNT

HIGHWAY TRUST FUND

SEC. 201. (a) Extension.—Subsections (c) and (f) (3), (4), (6), and (7) of section 209 of the Highway Revenue Act of 1956 (23 U.S.C. 120 note) are amended as follows:

(1) by striking "October 1, 1984" each place it appears and inserting in lieu thereof "October 1, 1989", and

(2) by striking "September 30, 1984", each place it appears and inserting in lieu thereof "September 30, 1989", and

(3) by striking "July 1, 1985" each place it appears and inserting in lieu thereof "July 1, 1990".

(b) CONFORMING AMENDMENTS.—

(1) MANAGEMENT OF TRUST FUND.—Subsection (e)(1) of section 209 of the Highway Revenue Act of 1956 is amended by striking "Commerce" and inserting in lieu thereof "Transportation", and by striking "up to and including the fiscal year ending September 30, 1985".

(2) EXPENDITURES FROM TRUST FUND.—Subsection (f)(1) of section 209 of the Highway Revenue Act of 1956 is amended to read as follows:

"(1) FEDERAL-AID HIGHWAY PROGRAM.—Amounts in the Trust Fund shall be available, as provided by appropriation acts, for making expenditures before October 1, 1990, to meet those obligations of the United States heretofore or hereafter incurred which are authorized by law or which are attributable to Federal-aid highways (including those portions of general administrative expenses of the Federal Highway Administration payable from such appropriations).".

(c) INVESTIGATION AND REPORT TO CONGRESS.—Section 210 of the Highway Revenue Act of 1956 is repealed.

(d) CONFORMING AMENDMENTS TO LAND AND WATER CONSERVATION FUND.—Subsection (b) of section 201 of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4061-11) is amended as follows:

(1) by striking "October 1, 1984" and inserting in lieu thereof "October 1, 1989"; and

(2) by striking "July 1, 1985" each place it appears and inserting in lieu thereof "July 1, 1990".

(e) INCREASE IN AMOUNT TRANSFERRED TO NATIONAL RECREATIONAL BOATING SAFETY AND FACILITIES IMPROVEMENT FUND.—Clause (ii) of section 209(f)(5)(A) of the Highway Revenue Act of 1956 (23 U.S.C. 120 note) is amended—

(1) by striking out "$20,000,000" and inserting in lieu thereof "$45,000,000", and

(2) by striking out "October 1, 1983" and inserting in lieu thereof "October 1, 1989".

MASS TRANSIT ACCOUNT

SEC. 202. (a) IN GENERAL.—Section 209 of the Highway Revenue Act of 1956 is amended by adding at the end thereof the following new subsection:

"(h) MASS TRANSIT ACCOUNT.—

"(1) IN GENERAL.—There is established on the books of the Treasury of the United States an account within the Highway Trust Fund to be known as the 'Mass Transit Account'.

"(2) TRANSFERS TO MASS TRANSIT ACCOUNT.—The Secretary of the Treasury shall transfer to the Mass Transit Account any amounts appropriated thereto by section 347 of the Infrastructure Repair and Emergency Employment Act of 1982.

"(3) EXPENDITURES FROM ACCOUNT.—Amounts in the Mass Transit Account shall be available, as provided by appropriation Acts, for making capital expenditures before October 1, 1989 (including capital expenditures for new projects) under section 22 of the Urban Mass Transportation Act of 1964.

"(4) DUTIES OF THE SECRETARY OF THE TREASURY WITH RESPECT TO THE MASS TRANSIT ACCOUNT.—It shall be the duty of the Secretary of the Treasury to manage the Mass Transit Account and to make an annual report to the Congress as provided in subsection (e) of this section. The interest on, and the proceeds from the sale or redemption of any obligation held in the Mass Transit Account shall be credited to and form a part of the Mass Transit Account.

"(5) REPAYABLE ADVANCES.—There are hereby authorized to be appropriated to the Mass Transit Account, as repayable advances, such additional sums as may be required to make the expenditures referred to in paragraph (3) of this section. Advances made pursuant to this paragraph shall be repaid and interest on such advances shall be paid to the general fund of the Treasury when the Secretary of the Treasury determines that moneys are available in the Mass Transit Account for such purposes. Such interest shall be at rates computed in the same manner as provided in subsection (e)(2) of this section for special obligations and shall be compounded annually.".

TITLE III—INFRASTRUCTURE, EMPLOYMENT, AND UNEMPLOYMENT ASSISTANCE PROGRAMS

SHORT TITLE

SEC. 301. This title may be cited as the "Infrastructure Repair and Emergency Employment Act of 1982".

PART A—EPA WATER AND SEWER GRANT AUTHORITY

EPA AUTHORITY

SEC. 306. (a)(1) The Administrator of the Environmental Protection Agency is authorized to make grants to any State for (A) major sewer system rehabilitation, construction of secondary facilities, correction of infiltration and inflow, and the construction of interceptor sewers; or (B) major rehabilitation of municipal water supply systems.

(2) Any grant for major sewer system rehabilitation, construction of secondary treatment facilities, correction of infiltration and inflow, and the construction of interceptor sewers shall be made in accordance with the provisions of title II of the Federal Water Pollution Control Act.

(3) Any grant for major rehabilitation of a municipal water supply system shall be deemed awarded, unless the Administrator, within 60 days of the receipt of any application for such grant adequately describing the proposed project and on the basis of regulations governing such grants issued within 45 days after the enactment of this Act, determines that such grant is not in accordance with this section, or that insufficient funds are available for such project. Such regulations shall include requirements for water conservation measures to be considered by the grant recipient in conjunction with the project.

(b)(1) There are authorized to be appropriated not to exceed $1,000,000,000 for the fiscal year ending September 30, 1983, to carry out this section.

(2) All sums appropriated under this section shall be allotted pursuant to the provisions of section 205 of the Federal Water Pollution Control Act.

(c) Funds not expended for the purposes of this section shall be reallotted to the States by the Administrator on October 1, 1983, in accordance with section 205 of the Federal Water Pollution Control Act.

(d) As used in this section, the term "state" has the meaning given in section 502 of the Federal Water Pollution Control Act, and the terms "major sewer system rehabilitation", "construction of secondary treatment facilities", "correction of infiltration and inflow", and "construction of interceptor sewers" has the meaning as used in title II of the Federal Water Pollution Control Act. The term "major rehabilitation of a municipal water supply system" means the extensive repair of existing conveyance and distribution facilities, including pumping stations, beyond the scope of normal maintenance programs where facilities are collapsing or structurally unsound.

GENERAL AUTHORITIES AND ELIGIBILITY CRITERIA

SEC. 307. (a) Funds authorized under this part are in addition to any funds heretofore or otherwise authorized for fiscal year 1983 under any other provision of law.

(b) A project is eligible for funding pursuant to this part if it meets all requirements of the legal authorities cited herein under which funds are provided, except such provisions of law or regulation as are specifically exempted by the provisions of this part, and, in addition, if the State, city, or other unit of local government applying for funding certifies to the appropriate Federal agency, that—

(1) any required non-Federal share of project funding will be made available prior to the start of actual repair on rebuilding work:

(2) actual repair or rebuilding work will begin within 120 days of notification that Federal funds will be made available for the project; and

(3) the repair or rebuilding work can and will be accomplished within two years of its initiation, barring unforeseeable difficulties.

(c) Any Federal agency administering funding pursuant to this part shall have authority to withdraw funding at any time that it determines that the provisions of this section, or of other applicable Federal authorities, are being violated.

(d)(1) Notwithstanding any other provision of this part, any sums allotted to the States for the fiscal year 1983, may be utilized for revolving loans or grants or combinations thereof for the construction of secondary teatment facilities, major sewer system rehabilitation, correction of infilltration and inflow, construction of interceptor sewers, and major rehabilitation of municipal water supply systems, in accordance with the prvisions of this part provided that the funding of such works meets with all applicable Environmental Protection Agency regulations concerning project eligibility and priorities for funding. Repayment of these loans shall be made to the States, and the funds so repaid may be used for additional loans or grants or combinations thereof pursuant to this subsection.

(2) Sums allotted to States to be used in revolving loan programs shall be made available in total as grants to States at the time of allotment.

PART B—REBUILDING OF AMERICA ACT

SHORT TITLE

SEC. 311. This part shall be cited as the "Rebuilding of America Act of 1982".

FINDINGS

SEC. 312. The Congress finds and declares that—

(1) highways, roads, bridges, mass transit systems, and water supply and sewer systems are public improvements vital to national development and prosperity;

(2) public works investment in the United States has declined at an alarming rate over the last decade and has resulted in the poor condition of much of our public improvements;

(3) the national costs of deteriorated public improvements are significantly higher than the costs of repairing, rehabilitating, improving, or replacing existing facilities;

(4) the Federal Government is responsible for one-half of all public works investment in the United States through grants in aid and direct investment;

(5) the Federal Government has no institutional means of formulating a comprehensive national public improvements plan and ordering national priorities; and

(6) direct Federal public works investment has been spread unevenly throughout the regions of the Nation.

POLICY

SEC. 313. It is the policy of the Congress that—

(1) States and local governments shall retain their traditional primacy in decisions affecting the use of land and water within their jurisdictions;

(2) the Federal Government shall adopt practices and procedures that will lead to regionally balanced economic development;

(3) prior Federal involvement in a national public improvement shall be a primary consideration but not a sole determinant in establishing future national priorities; and

(4) disincentives for maintaining, repairing, rehabilitating, and replacing deteriorating national public improvements that now exist in Federal laws and regulations shall be corrected to encourage the most economically efficient pattern of investment in public improvements by the Federal Government.

NATIONAL INVENTORY OF PUBLIC IMPROVEMENTS

SEC. 314. The National Commission on the Rebuilding of America, established pursuant to section 318 and hereinafter referred to as the "Commission", shall conduct an inventory of existing major public improvements by region, State, and major metropolitan area of the United States and by type of facility, surveying especially—

(1) age and condition of the facility;

(2) trends in the condition of the facility over the last twenty years and the relation of those trends to usage and maintenance schedules;

(3) means of financing the maintenance, repair, rehabilitation, replacement, and new construction of facilities;

(4) comparison of condition of public improvements within a region, State, or major metropolitan area and the pattern of economic development over the last twenty years; and

(5) trends in public expenditures for maintenance, repair, rehabilitation, replacement, and new construction of public improvements by region, State, and major metropolitan area and by level of government.

DEVELOPMENT OF A NATIONAL PUBLIC IMPROVEMENTS PLAN

SEC. 315. (a) The Commission shall develop a National Improvements Plan, hereinafter referred to as the "Plan", listing in priority order, needed maintenance, repair, rehabilitation, or replacement of public improvements in each region, for the next ten and twenty years, or such other time periods as the Commission may deem appropriate, to sustain regionally balanced national economic development. Priorities shall be listed by type of facility for the Nation as a whole and for each region, and shall further consider the relative priorities among the various types of facilities. The Plan shall include recommended means of financing the needed maintenance, repair, rehabilitation, and replacement, taking into account the least-cost life-cycle costs of developing and maintaining national public improvements and the appropriate mix of Federal, State, and local resources to implement the Plan. The Commission shall consider prior Federal involvement, level of prior maintenance, and regional equity in its recommendations on financing the Plan.

(b) As an integral part of the Plan, the Commission shall suggest specific revisions in Federal laws, regulations, and policies and further suggest alterations in the current responsibilities of Federal, State, and local governments that may be necessary to reverse the pattern of disinvestment in national public improvements and sustain economic development. The Commission shall include analyses and recommendations in accordance with policies set forth in section 313 concerning—

(1) the report of the Comptroller General to the Congress, submitted pursuant to section 316, on identifying Federal civilian capital investment outlays in the unified Federal budget;

(2) changes in the imposition or allocation of excise taxes, user fees, other sources of public revenue, and borrowing authorities;

(3) statutory or regulatory revisions in grants-in-aid, direct construction, or subsidy programs that would eliminate corruption, waste, and delay; that would encourage consideration of least-cost life-cycle costs in developing and maintaining facilities; and that would correct regional imbalances and disincentives for maintenance of facilities in Federal programs; and

(4) the desirability and feasibility of scheduling public improvements construction and major renovation work in a manner counter to national or regional economic cycles in order to reduce the cost of such work and to dampen economic fluctuations.

REPORT ON IDENTIFYING CIVILIAN CAPITAL INVESTMENT IN THE FEDERAL BUDGET

SEC. 316. (a) Within six months of enactment of this Act, the Comptroller General shall submit to the Committee on Environment and Public Works and the Committee on the Budget of the Senate and to the Committee on Public Works and Transportation and the Committee on the Budget of the House of Representatives, model unified budgets, for the fiscal year in which this Act is enacted and for the immediately preceding fiscal year, that distinguish Federal civilian capital investment outlays from other Federal outlays.

(b) Along with the model unified budgets, the Comptroller General shall submit a report including—

(1) a description of how the model budgets differ from existing Federal budget documents;

(2) an analysis of the usefulness of the model budgets in identifying investment and disinvestment in needed public improvements;

(3) an analysis of the usefulness of the model budgets in identifying appropriate programs and amounts of Federal fiscal support in building, maintaining, and repairing needed public improvements; and

(4) an analysis comparing the usefulness of a separate capital budget with the model unified budgets for the purposes of identifying investment and disinvestment in, and appropriate Federal programs and amounts of Federal fiscal support for needed public improvements.

PROCEDURES

SEC. 317. (a) The Commission shall submit to Congress and the President, not later than one year from the date of enactment of this Act, the national inventory of public improvements required pursuant to section 314.

(b) Not later than eighteen months after the enactment of this Act, the Commission shall submit to Congress and the President a draft Plan required pursuant to section 315. For purposes of soliciting and considering public comment, the Commission shall

further distribute the draft Plan to affected Federal agencies, all Members of Congress, major public interest groups, the Governors of the States, local officials, and make the report generally available to the public. All affected Federal agencies shall submit written comments to the Commission within thirty days.

(c) Not later than twenty-four months after the enactment of this Act, the Commission shall submit to the Congress and the President the final version of the Plan pursuant to section 315.

(d) Unless the Congress enacts a joint resolution of disapproval of that portion of the Plan required pursuant to section 315(a) within one hundred and twenty calendar days of receipt of the final Plan, that portion of the Plan shall be deemed to be approved by the Congress and shall be the policy of the Federal Government: *Provided, however,* That no statute or regulation of the Federal Government, of a State or political subdivision thereof shall be in any way altered by congressional approval of that portion of the Plan pursuant to section 315(a).

(e) The Senate Environment and Public Works Committee and House Public Works and Transportation Committee shall hold hearings on the proposed changes in existing law pursuant to section 315 and shall report legislative proposals to the Senate and House of Representatives regarding such changes within one hundred and eighty days of receipt of the Plan to permit full Federal implementation of the Plan.

ESTABLISHMENT OF THE COMMISSION

SEC. 318. (a) There is hereby established a National Commission on the Rebuilding of America which shall assess the condition of the national public works infrastructure, analyze causes of disinvestment in the national public works infrastructure, and evaluate the need to repair, maintain, replace, and expand the national public works infrastructure to support balanced development of the national economy.

(b) The Commission shall be composed of—

(1) the Secretary of the Army, the Secretary of Transportation, and the Secretary of Commerce; in the event the Secretary is unable to attend a meeting of the Commission, he may designate a representative but in no case may the designee be of a rank lower than assistant secretary;

(2) representatives of each of the following organizations: the National Governors Association, the National Conference of State Legislatures, the National League of Cities, United States Conference of Mayors, and the National Association of Counties; and

(3) five individuals from the private sector selected by the President who among them have experience in and knowledge of public investment financing, civil engineering, State and local budgeting practices, and regional planning.

(c) The President shall designate one of the five individuals as Chairman of the Commission. The Chairman shall be an individual of national recognition with experience in both public affairs and private enterprise. The Chairman shall be confirmed by the Senate.

(d) The Secretary of Housing and Urban Development, the Secretary of Labor, the Secretary of Agriculture, the Secretary of the Interior, and the Administrator of the Environmental Protection Agency or their designees shall attend the meetings of the Commission as nonvoting members.

(e) The Commission shall be convened within thirty days of enactment of this Act.

DEFINITIONS

SEC. 319. For the purposes of this part—

(1) The term "national public improvement" means the Nation's systems of highways, roads, bridges, mass transit, main water supply and distribution systems, and sewer systems;

(2) the term "facility" means any physical structure such as a highway, road, bridge, transit line, or structure related to a mass transit system, water supply storage, treatment, and distribution system or sewage treatment and collection system which is owned and operated by the Federal Government, a State, municipality, or other public agency or authority organized pursuant to State or local law;

(3) the term "maintenance" means routine and regularly scheduled activities intended to keep the facility operating at its designed specifications;

(4) the term "repair" means the correction of a structural flaw in the facility without adding significantly to the design life of such a facility;

(5) the term "rehabilitation" means the correction of structural flaws in a facility so as to extend the engineered design life of such a facility;

(6) the term "replacement" means the reconstruction of an existing facility;

(7) the term "life-cycle cost" means the total cost of constructing, operating, and maintaining a facility, including the interest on any borrowed funds, over the design engineered life of the facility;

(8) the term "State" means any State of the United States, the District of Columbia, Puerto Rico, Guam, American Samoa, the Northern Marianas Trust Territories, or the Virgin Islands; and

(9) the term "region" means one of the nine geographical groups of States defined by the Bureau of the Census in the Statistical Abstract of the United States.

AUTHORIZATION OF APPROPRIATIONS

SEC. 320. (a) There shall be a staff for the Commission consisting of no more than thirty full-time employees of the Federal Government, who shall be detailed by the various agencies upon request of the Chairman of the Commission: *Provided,* That nothing in this section shall be construed to permit an increase in the level of total Federal employment.

(b) The Secretary of the Army shall assign an employee of the Army Corps of Engineers as staff director for the Commission, with the concurrence of the Chairman of the Commission, and shall also provide office space, supplies, equipment, and necessary contracting and other support services to the Commission and its staff.

(c) The heads of all Federal agencies are directed to cooperate with the Commission to the maximum extent possible, and to provide, on a timely basis, such information as the Commission may request.

(d) There is hereby authorized to be transferred or reprogramed from appropriations otherwise available to the Army Corps of Engineers, the Department of Transportation, and the Department of Commerce, the total of $5,000,000 to carry out the duties of the Commission during its tenure, said sum to be exclusive of salaries for staff.

(e) The private members of the Commission shall be compensated for their time engaged on Commission business at the daily rate established for employees at grade 18 of the General Schedule.

PART C—LABOR INTENSIVE COMMUNITY PUBLIC WORKS

SHORT TITLE

SEC. 321. This part may be cited as the "Labor Intensive Community Public Works Act of 1982".

PROGRAM AUTHORIZATION

SEC. 322. Title I of the Housing and Community Development Act of 1974 is amended by adding at the end thereof the following:

"LABOR INTENSIVE COMMUNITY PUBLIC WORKS

"SEC. 122. (a) During fiscal year 1983, the Secretary is authorized to make grants in accordance with the allocation formulae contained in subsection (b) for activities described in section 105—

"(1) which are identified in applications submitted under this section;

"(2) which the Secretary determines, on the basis of information provided by the applicant, are labor intensive activities; and

"(3) which are carried out in a manner consistent with the primary objective of this title as stated in section 101(c).

"(b)(1) The amounts appropriated to carry out this section shall be allocated so that each State may receive an amount equal to the sum of—

"(A) 75 percent of such funds multiplied by a fraction the numerator of which is the number of unemployed workers in that State during October 1982 (as determined by the Bureau of Labor Statistics for purposes of computing the total nonseasonally adjusted rate of unemployment for that month), and the denominator of which is the number of unemployed workers in all States during October 1982 (as so determined); and

"(B) 25 percent of such funds multiplied by a fraction the numerator of which is the percentage point increase, if any, in unemployment in that State (determined by subtracting the average total nonseasonally adjusted unemployment rate in that State for October 1982), and the denominator of which is the sum of the increases in unemployment for all States (as so determined).

"(2) The funds allocated to a State under paragraph (1) shall be allocated directly to entitlement areas so that each such area may, subject to subsection (d), receive an amount which bears the same ratio to the total amount allocated to that State under this section as the ratio which the amount allocated for that area under section 106 for fiscal year 1982 bore to the total amount allocated in and to that State under section 106 during such year. In the event that an entitlement area does not apply or does not qualify for a grant, the amount of that area's grant shall be added to the amount available for allocation for other entitlement areas in the same State.

"(3) The amount remaining from a State's allocation after the application of paragraph (2) shall, subject to subsection (d), be available for allocation for use in that State. Any funds for which the State does not apply or qualify shall be reallocated under paragraph (2).

"(c) Not later than ten days after the date of enactment of this section, the Secretary shall prescribe regulations for the implementation of this section and announce the availability of funds under this section. Such regulations shall—

"(1) specify the information required to be submitted in an application under this section;

"(2) require such an application to specify the particular eligible activities proposed and the degree of labor intensity involved in the proposed activities;

"(3) require the applicant to demonstrate, through assurances, or otherwise that—

"(A) not less than 80 percent of the funds provided under this section which are expended for wages and benefits will be used for wages and benefits for workers who were unemployed at least fifteen of the twenty-six weeks immediately preceding the date of enactment of this section, who are no longer eligible for unemployment insurance benefits, and who were unemployed immediately prior to their participation in the program under this section;

"(B) all workers employed under the program assisted by this section have been referred by the appropriate office of United States Employment Service as being currently unemployed;

"(C) no worker will be eligible to be employed under this section if such worker has, within six months prior to the determination, voluntarily terminated, without good cause, his or her last previous full-time employment at a wage rate equal to or exceeding the Federal minimum wage as prescribed under section 6(a)(1) of the Fair Labor Standards Act of 1938;

"(D) workers employed under the program under this section shall be paid not less than the highest of (i) the minimum wage under the Fair Labor Standards Act of 1938, (ii) the minimum wage under the applicable State or local minimum wage law, or (iii) the prevailing rates of pay for workers in similar positions with the same employer;

"(E) the share of wages and benefits paid to any participant out of Federal funds provided under this section will not be greater than the hourly equivalent of $10,000 per year;

"(F) not less than 75 percent of the recipient's funds provided under this section shall be used only to provide employee wages and benefits; and

"(G) no currently employed worker shall be displaced by any worker employed with funds under this section, including partial displacement such as a reduction in the hours of nonovertime work, wages, or employment benefits;

"(4) include provisions for the waiver of subsections (a), (b), and (c) of section 104 or any other provision of this title which the Secretary identifies in such regulations with respect to the program authorized under this section, except that—

"(A) in no case may section 109 or section 110 be waived;

"(B) the Secretary shall require the provision of satisfactory assurances of conformity with subsections (b)(2) and (b)(3) of section 104 in all cases; and

"(C) the proposed recipient must give public notice of the location and nature of activities to be carried out with assistance under this section.

"(5) prohibit the employment of workers in the program under this section on the construction, operation, or maintenance of much of any facility as is used or to be used for sectarian instruction or as a place for religious worship;

"(6) require that funds provided under this section only be used for activities which are in addition to those which would otherwise be available in the area in the absence of such funds;

"(7) provide that only eligible individuals residing in the area of an eligible recipient may be served by employment activities funded under this section; and

"(8) provide that assistance may not be used in a manner which impairs existing contracts for services or collective bargaining agreements.

"(d) To receive assistance under this section, a State or unit of local government must submit an application not later than 30 days after the date the Secretary prescribes regulations and announces the availability of funds under this section. The Secretary shall approve an application unless he finds that it fails to meet any requirement of this section or that the recipient will not be able to commence the proposed activities within 90 days after the date of enactment of this section. An application or supplemental statement shall be deemed to be approved unless specifically disapproved by the Secretary within 15 days after receipt. Upon approval or expiration of the 15-day period referred to in the preceding sentence, funds shall be made available promptly. Within 15 days following any disapproval, the State or unit of local government may reapply. A reapplication shall be deemed to be approved unless specifically disapproved within 10 days after it is filed. Any funds which become available as a result of a disapproval of failure to apply or reapply shall be reallocated as provided in subsection (b) not later than 10 days after the disapproval or filing deadline.

"(e) Funds appropriated to carry out this section may be expended only to cover the cost of activities described in section 105 which are carried out during the one-year period beginning on the date of enactment of this section. The Secretary shall require a financial settlement of each grant under this section as soon as is practicable after the close of such one-year period. All funds appropriated under this section but not expended prior to the expiration of eighteen months after the date of enactment of this section shall be covered into the Treasury.

"(f)(1) The Secretary shall exercise, with respect to grants under this section, the authority conferred by section 104 (d) with respect to grants under section 106, including the authority to recapture or deduct funds from future grants under section 106.

"(2) Not later than 30 days after the date of financial settlement under subsection (e), each recipient of funds under this section shall provide the Secretary with such information as he shall require in order to assess compliance with the provisions of this section. Not later than July 1, 1984, the Secretary shall transmit a report to the Congress describing the program under this section, including a description of the number, type, and location of jobs created, and the characteristics of workers employed.

"(g) There are authorized to be appropriated and are appropriated $2,000,000,000 for grants under this section.".

PART D—FEDERAL SUPPLEMENTAL COMPENSATION

ADDITIONAL WEEKS OF FEDERAL SUPPLEMENTAL COMPENSATION

SEC. 331. (a) Section 602(e) of the Tax Equity and Fiscal Responsibility Act of 1982 is amended—

(1) in paragraph (2)(A)(i), by striking out "50" and inserting in lieu thereof "60";

(2) in paragraph (2)(A)(ii), by striking out "6" and inserting in lieu thereof "8"; and

(3) by striking out subparagraphs (B) and (C) of paragraph (2) and inserting in lieu thereof the following:

"(B) In the case of any State, subparagraph (A) shall be applied—

"(i) with respect to weeks during a higher unemployment period, by substituting '15' for '8' in clause (ii) thereof; and

"(ii) with respect to weeks during a high unemployment period, by substituting '13' for '8' in clause (ii) thereof.

"(C) For purposes of subparagraph (B), the term 'higher unemployment period' means, with respect to any State, the period—

"(i) which begins with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks equals or exceeds 4.0 percent, and

"(ii) which ends with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks is less than 4.0 percent;

except that no higher unemployment period shall last for a period of less than 4 weeks.

"(D) For purposes of subparagraph (B), the term 'high unemployment period' means, with respect to any State, the period—

"(i) which begins with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks equals or exceeds 3.5 percent but is less than 4.0 percent, and

"(ii) which ends with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks is less than 3.5 percent or is equal to or in excess of 4.0 percent;

except that no high unemployment period shall last for a period of less than 4 weeks unless such State enters a period of higher unemployment.

"(E) Notwithstanding the provisions of subparagraph (D), any State in which an extended benefit period was in effect under the Federal-State Extended Unemployment Compensation Act of 1970 for any week which began on or after June 1, 1982, and prior to the date of the enactment of this subparagraph, shall be deemed for any week thereafter, for purposes of subparagraph (B), to be in a period of high unemployment, unless such State is actually in a period of higher unemployment.

"(F) For purposes of this subsection, the rate of insured unemployment for any period shall be determined in the same manner as determined for purposes of section 203 of the Federal-State Extended Unemployment Compensation Act of 1970.

"(3) The amount of Federal supplemental compensation payable to an eligible individual shall not exceed the amount in such individual's account established under this subsection.".

(b) The amendments made by subsection (a) shall apply to Federal supplemental compensation payable for weeks beginning on or after the date of the enactment of this Act. In the case of any eligible individual to whom any Federal supplemental compensation was payable for any week beginning prior to such date of enactment and who exhausted his rights to such compensation (by reason of the payment of all the amount in his Federal supplemental compensation account) prior to the first week beginning on or after such date of enactment, such individual's eligibility for addi-

tional weeks of compensation by reason of the amendments made by this section shall not be limited or terminated by reason of any event, or failure to meet any requirement of law relating to eligibility for unemployment compensation, occurring after the date of such exhaustion of rights and prior to the date of the enactment of this Act (and such weeks shall not be counted for purposes of determining the expiration of the two years following the end of his benefit year for purposes of section 602(b) of the Tax Equity and Fiscal Responsibility Act of 1982).

(c) The Secretary of Labor shall, at the earliest practicable date after the date of the enactment of this Act, propose to each State with which he has in effect an agreement under section 602 of the Tax Equity and Fiscal Responsibility Act of 1982 a modification of such agreement designed to provide for the payment of Federal Supplemental compensation under such Act in accordance with the amendments made by this Act. Notwithstanding any other provision of law, if any State fails or refuses, within the three-week period, beginning on the date the Secretary of Labor proposes such a modification to such State, to enter into such a modification of such agreement, the Secretary of Labor shall terminate such agreement effective with the end of the last week which ends on or before such three-week period.

PART E—ADDITIONAL PUBLIC WORKS, EMPLOYMENT, AND TRAINING APPROPRIATIONS

DISLOCATED WORKERS

SEC. 341. There is appropriated $200,000,000 for fiscal year 1983 for title III of the Job Training Partnership Act, relating to employment and training assistance for dislocated workers.

COMMUNITY SERVICE EMPLOYMENT FOR OLDER AMERICANS

SEC. 342. There is appropriated $100,000,000 for fiscal year 1983 for title V of the Older Americans Act of 1965, relating to community service employment for older Americans in addition to any amounts otherwise available for fiscal year 1982.

ABANDONED MINE RECLAMATION

SEC. 343. There is appropriated $37,000,000 for fiscal year 1983 from the Abandoned Mine Reclamation Fund for abandoned mine reclamation under the Surface Mining Control and Reclamation Act of 1977 in addition to any amounts otherwise available for fiscal year 1983. Amounts appropriated under this section shall remain available until expended.

REFORESTATION AND TIMBER STAND IMPROVEMENT

SEC. 344. There is appropriated $100,000,000 to the Forest Service of the Department of Agriculuture for fiscal year 1983 for reforestation and timber stand improvement, trail work, recreational improvements, and road maintenance, in addition to any amounts otherwise available for fiscal year 1983.

PUBLIC HOUSING REHABILITATION AND MODERNIZATION

SEC. 345. (a) Section 5(c) of the United States Housing Act of 1937 is amended by adding at the end thereof the following new paragraph:

"(7) The Secretary is authorized to enter into contracts for annual contributions aggregating $400,000,000 for fiscal year 1983 for public housing rehabilitation and modernization under this section and section 14 in addition to any amounts otherwise available for such purposes for fiscal year 1983.".

(b) The amount approved in any other appropriation Acts for contracts described in section 5(c)(7) of the United States Housing Act of 1937 is increased by $400,000,000.

AGRICULTURAL EXPORT CREDIT REVOLVING FUND

SEC. 346. There are hereby appropriated, out of any money in the Treasury not otherwise appropriated, $750,000,000 to the Agricultural Export Credit Revolving Fund established by section 4(d) of the Food for Peace Act of 1966 (7 U.S.C. 1707a(d)).

HIGHWAY TRUST FUND AND TRANSIT ACCOUNT

SEC. 347. (a) For fiscal year 1983, there are appropriated to the Highway Trust Fund $2,219,000,000, of which $536,000,000 shall be for the Transit Account.

(d) Effective October 1, 1984, for fiscal year 1984, there are appropriated to the Highway Trust Fund $5,319,00,000 of which $1,073,000,000 shall be for the Transit Account.

(c) Effective October 1, 1984, for fiscal year 1985, there are appropriated $9,625,000,000 to the Highway Trust Fund, of which $1,067,000,000 shall be for the Transit Account.

(d) Not later than February 15, 1985, the Secretary of the Treasury shall transmit a report to the Congress containing recommendations for revenue measures for fiscal years 1986 through 1990 to provide sufficient funding for fiscal year 1990 for transportation and transit activities at levels consistent with those authorized by this Act.

Mr. ROBERT C. BYRD. I ask unanimous consent that the following Senators be added as cosponsors: Mr. KENNEDY, Mr. BRADLEY, Mr. PRYOR, Mr. DIXON, Mr. DODD, Mr. BAUCUS, Mr. SARBANES, Mr. LEVIN, Mr. HUDDLESTON, Mr. CANNON, Mr. RIEGLE, Mr. METZENBAUM, Mr. RANDOLPH, Mr. SASSER, Mr. HART, Mr. BIDEN, and Mr. MITCHELL.

I ask unanimous consent that other Senators may add their names during the course of business today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, if the distinguished manager of the bill or the majority leader should seek to work out an agreement, I renew my offer and my willingness to enter into a time agreement in the hope that I can get an up-or-down vote and in the hope that no amendment would be offered to the amendment.

Mr. DOLE. Will the minority leader yield?

Mr. BAKER. Will the Senator yield?

Mr. ROBERT C. BYRD. I yield to the majority leader for a question with the understanding that I retain my right to the floor.

TIME LIMITATION REQUEST

Mr. BAKER. I really believe that would expedite the business of the Senate, to go forward with an agreement and, once again, to restate the proposal of the minority leader as I understand it. That is that there be a 2-hour time limitation, an hour on a side, that no amendments would be in order to the Byrd amendment to the substitute; and that there be an up-or-down vote.

Once again, amendments can be offered to other titles of the bill, since this is only title I. The amendments can be placed at the end of the bill, according to the rules of the Senate. There are even other procedures that might be utilized to make sure the will of the Senate is accommodated. I am prepared at this time to renew that request simply in the interest of trying to expedite the proceedings of the Senate.

I ask unanimous consent that on the pending amendment there be a time limitation of 2 hours to be equally divided, that no amendments to the amendment be in order, that the vote occur on the amendment, and that no tabling motion be in order.

Mr. NICKLES. Objection.

Mr. HUMPHREY. Mr. President, until such time as we have an opportunity to confer with the parties, I object.

The PRESIDING OFFICER. The objection is heard.

Mr. BAKER. Very well, Mr. President. I shall confer as well and we shall pursue the matter to see if we can arrange it.

The PRESIDING OFFICER. The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader and I thank the Senator from Kansas (Mr. DOLE) for their willingness to proceed along the lines suggested.

Mr. President, our Nation is in the grips of the deepest and most severe recession since the Great Depression; 10.8 percent of the labor force was unemployed in mid-November.

Twelve million people are jobless—the largest number since 1933.

Our plants and equipment stand idle throughout the country. Overall production in our Nation's factories sank to a post-war law of 68.4 percent in October, while our steel and auto plants continued to operate at or below the 50 percent level. Businesses continue to fail at rates not seen since the 1930's, with 23,015 businesses closing their doors for good by the end of November—an increase of nearly 50 percent compared to last year.

We face an economic emergency, and there is no more important task before this Congress in its waning days, than to take the steps that can begin to reverse our economic fortunes. We must send the Federal Reserve Board and the financial markets a clear message that the Congress will not tolerate a return to the tight money policies which have done so much to wreak havoc on our economy. I am introducing a resolution expressing the sense of the Congress that the Federal Reserve Board should pursue and maintain interest rates consistent with economic growth, which I intend

to offer as an amendment to this bill or to the continuing resolution at a later point.

I believe there is no more important step we can take than adopting this amendment.

There is little time remaining in the life of this Congress, and we cannot hope, in the next few days, to put all of America's jobless citizens back to work. But we can make a start today. We have an obligation to take at least the first steps which will offer a helping hand to those who must face this Christmas season without jobs or hope.

I do not doubt for a moment the importance of the legislation now before the Senate. Without question, there is an urgent and pressing need to repair and maintain America's deteriorating public infrastructure. We ignore its dangerous state of disrepair at our peril. But even the strongest adherents of this legislation do not claim that it is a jobs program.

We must do more before we adjourn to address the needs of America's jobless. The amendment I have sent to the desk would add a direct job creation program to this legislation.

The amendment which other Senators and I have joined in cosponsoring would more than double the number of jobs created by the Surface Transportation Assistance Act of 1982, thereby putting more than 731,000 unemployed Americans back to work. Our amendment pays for itself, by partially delaying the third year of the Kemp-Roth tax cut for those making between $50,000 and $65,000 a year, and by fully delaying the third year cut for the few fortunate Americans making more than $65,000 a year. Instead of raising the gasoline tax for all of our citizens, rich and poor alike, our proposal would place a greater share of the burden on those who can most afford to bear it.

Our proposal has several major components.

First, it would authorize a labor-intensive community public works program funded at $2 billion, which would channel funds directly to State and local governments through the community development block grant program. These funds would be used for hiring unemployed workers on such projects as rustproofing bridges, weatherizing public housing, filling potholes and painting public buildings. The decisions on which projects to select would be left with the State and local governments. The program is designed to leave behind a tangible product in the form of improved community facilities, and to avoid the charges of make work which have plagued some jobs programs in the past. Eligible workers would have to have been out of work for 15 of the last 26 weeks. To protect against possible patronage abuse and to make sure that governments cannot use these funds to transfer their existing payroll onto this new program, local governments would have to hire workers referred to them by the local U.S. Employment Service, the agency which administers the unemployment insurance program. The entire program would expire at the end of the fiscal year. All funds would have to be spent during that fiscal year. These features are designed to prevent some of the problems which have plagued some jobs programs in the past.

Our amendment would also provide additional weeks of supplemental unemployment benefits in all States. Under the provisions of last summer's tax bill, the new temporary program of supplemental benefits provides 6 weeks in States with lower unemployment, 8 weeks in States with unemployment in the midrange, and 10 weeks in States with the highest unemployment. The proposal would increase this to 8, 13, and 15 weeks respectively, at a cost of $700 million.

In addition, our amendment would increase appropriations for several existing programs that will undertake needed public work and fund new jobs by adding $400 million to pubic hosuing rehabilitaiton and modernization; $200 million to retrain workers displaced by declining industries; $100 million for the senior citizens employment program under the Older Americans Act; $37 million for reclamation of abandoned mine sites; and $100 million for reforestation and timber land improvement through the Forest Service.

Our amendment also would help create jobs in rural America, by aiding farmers and ranchers in expanding their markets through increased sales of U.S. Agricultural exports. The amendment provides $750 million for the Agriculture export credit revolving fund in the food for peace program. The fund would be used to finance commerical export sales of all U.S. agricultural commodities and breeding livestock. It will help us compete with other countries, employ thousands more of our citizens and bring urgently needed help to a sector of our economy which everyone, including this administration, believes needs help very badly.

Finally, our proposal would modify the heavy public works proposal in the legislation before us to add funds for water and sewer rehabilitation and construction programs, at a cost of $1 billion. We would also require that an inventory of existing major public infrastructures be undertaken, and a plan for their repair, modernization and regular replacement be prepared and submitted to the Congress for its consideration.

This package would cost $5.3 billion. To pay for it, and for the additional heavy public works spending already in the legislation before us, our amendment would eliminate the 5 cents gasoline tax increase proposed by the administration and, instead, partially delay the third year of the Kemp-Roth tax cut for those with incomes over $50,000 a year and fully delay it for those with incomes of $65,000 or more. Those affected would have the third installment of the Kemp-Roth tax cut partially or fully delayed for 3 years. After that, these individuals would receive the full 10 percent tax cut.

Capping the third year of the tax cut in this fashion would raise approximately $23.8 billion over 3 years, an amount more than sufficient to pay for the jobs program I am proposing. Unlike the gas tax, which affects the rich and poor alike, our amendment affects only upper income families. It is a fairer, and better approach than increasing the gasoline tax for all our citizens.

We Democrats believe, as we have said from the start of this administration, that each citizen should bear his or her fair share of the tax burden. We should not ask working and middle-class Americans to bear the entire weight of putting our most hard-pressed citizens back to work. We have offered a better alternative, by delaying the final bit of largesse due the wealthiest few among us from the Kemp-Roth scheme.

We are asking that a small minority of the wealthiest and most fortunate Americans forgo the final installment of tax cuts so that a large number of unfortunate Americans can get back to work at productive jobs. Instead of making the middle class pay once more, we Democrats believe it is time to let the wealthiest pay their fair share.

Why would anyone prefer to tax every single American, no matter how hard-pressed he or she may be, no matter how elderly that person may be, no matter how far that person, such as the coal miner in West Virginia or a steelworker in West Virginia, would have to drive to and from work each day when we can tax only the smallest number of Americans who are already far wealthier than most people?

Why would anyone want a gas tax that drains 27 cents from the general revenue fund for every $1 it raises for the trust fund, when a partial tax delay for the wealthier citizen raises more money than is needed and actually reduces the deficits over 3 years?

Why would anyone prefer imposing a new tax on working and retired Americans when we can simply delay a new tax cut for wealthy Americans? We have just recently imposed new taxes—without my vote—on working Americans and small business people and elderly citizens, school teachers,

store clerks, and other people in other vocations by imposing an additional telephone tax, an additional unemployment compensation tax, an additional tax on cigarettes, an additional tax on airline tickets, and so on.

So, it is time, we think, to let the wealthiest pay their fair share.

We have worked hard to craft a jobs program that targets help where it is needed most, that takes careful note of the lessons we have learned from past job-creation efforts, that is fiscally responsible, and that distributes the burden of paying for this additional spending in the fairest way. We do not claim that our program is a panacea. On the contrary, it is only a beginning in the effort to turn this economy around and put America's jobless citizens back to work. But it is an important and vitally needed first step, which merits the support of my colleagues on both sides of this aisle. I urge them to join us in adopting this amendment.

Mr. President, that completes my statement.

Mr. President, I ask unanimous consent to have printed in the RECORD a table entitled "Infrastructure and Jobs Amendment Offered by Robert C. Byrd," showing program components and dollars in billions, fiscal year 1983; material with reference to the infrastructure and jobs amendment showing costs and additional jobs created beyond those created by H.R. 6211; an explanation of the labor-intensive community public works program; and an editorial from the December 10, 1982, New York Times entitled "It Only Looks Like a Jobs Bill."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Infrastructure and jobs amendment offered by Senator Robert C. Byrd

[In billions of dollars]

Program components:	*Fiscal year 1983*
1. Water and Sewer Infrastructure Repair	1.0
2. Labor Intensive Community Public Works Program	2.0
3. Increased Weeks of Unemployment Insurance	.7
4. Displaced Workers Retraining	.2
5. Senior Citizens Employment	.1
6. Reforestation and Timber Land Improvement	.1
7. Public Housing Rehabilitation	.4
8. Abandoned Mine Reclamation	.04
9. Agricultural Exports Stimulus	.75
Total	5.3

Revenue source

[Preserve 10 percent income tax cut scheduled for July for all under $50,000; reduce amount of tax cut for those with incomes between $50,000 and $65,000 for 3 years only; no tax cut for those with incomes over $65,000 for 3 years. After 3 years, affected individuals would receive 10 percent cut]

	Billions
Fiscal year 1983	$1.6
Fiscal year 1984	10.8
Fiscal year 1985	12.5
Total (3 years)	24.9

INFRASTRUCTURE AND JOBS AMENDMENT PROPOSED BY SENATOR ROBERT C. BYRD

	Cost (fiscal year 1983)	Additional jobs created (beyond those created by H.R. 6211)
1. Water and sewer infrastructure repair program: Work to be accomplished through normal contracting procedures. Projects must be able to begin construction within 120 days.	$1 billion	13,000 direct, 27,000 indirect.
2. Labor intensive community public works program: Funding provided through the community development block grant program to local and State governments to directly hire persons unemployed for at least 15 weeks. Funding distributed on basis of relative unemployment. All projects to be chosen by local recipient jurisdictions from types allowed by Federal law, which will have visible, tangible products, improving the community's public capital facilities.	$2 billion	300,000 direct.
3. Added funding for jobs and training programs:		
A. Displaced workers retraining: Advancing funding for this title of the Job Training Partnership Act (now scheduled to receive only token funding until 1984), to retrain and relocate skilled workers from declining industries such as auto, steel, etc., for whom jobs likely will not be available even after general economic recovery.	$0.2 billion	
B. Senior citizens employment: To employ citizens between age 55 and 65 who often have the most difficult time obtaining work because of age.	$0.1 billion	20,000 direct.
C. Reforestation and timber land improvement: Addresses important, delayed needs in timbered areas; will focus on laid-off employees of hard-hit timber industry.	$0.1 billion	5,000 direct.
D. Public housing rehabilitation: Will address portion of multibillion dollar backlog of needed repairs and rehabilitation of public housing in all States; approximately 70 percent of funding will go to worker wages.	$0.4 billion	10,000 direct.
E. Abandoned coal mine reclamation: Provides for hiring unemployed coal miners and construction workers to perform reclamation work at abandoned coal mine sites.	$0.04 billion	10,000 to 15,000 direct and indirect.
4. Increased weeks of unemployment insurance: The supplemental program established by the 1982 tax bill is the 3d layer of benefits. Unemployed persons in States with highest unemployment receive 10 weeks of supplemental benefits; those with midlevel unemployment, 8 weeks; and those with lowest unemployment, 6 weeks. The proposal increases weeks of benefits in all categories and States to 15, 13, and 8 weeks respectively.	$0.7 billion	
5. Agricultural exports stimulus; Provides $750 million for the agriculture export credit revolving fund in the food for peace program. Fund would be used to finance commercial export sales of all U.S. agricultural commodities and breeding livestock.	$0.75 billion	26,000 indirect.

Note.—Total: Cost (fiscal year 1983) $5.3 billion. Additional jobs created (beyond those created by H.R. 6211) 411,000.

LABOR-INTENSIVE COMMUNITY PUBLIC WORKS PROGRAM

PROGRAM ADMINISTRATION

Program to be channeled through the Community Development Block Grant program.

FUNDING

$2 billion for fiscal year 1983.

Projects must be started within 90 days; all funds must be spent by end of year.

Funds allocated on the basis of relative unemployment to state and local governments.

No matching funds required.

ELIGIBLE WORKERS

80 percent of funds spent for wages must be spent to employ persons who have been unemployed at least 15 of the last 26 weeks and who are ineligible for unemployment insurance. All participants must be unemployed.

All participants must be referred from the local U.S. Employment Service (which administers the unemployment insurance system), to prevent jurisdictions from transferring current employees to the new program's payroll.

ELIGIBLE PROJECTS

Projects will be selected by the recipient jurisdictions; to be eligible for funding, a project must be eligible under the Community Development Block Grant program. Examples of such projects include:

Bridge rustproofing and repair; patching potholes and other road repairs; repairing and upgrading public mass transit systems; installing graded ramps for handicapped; installing or repairing drainage pipes and catch basins in areas subject to flooding; repairing and rehabilitating water and sewer systems; repairing, rehabilitating, and weatherizing public buildings, including schools and public housing; converting surplus public schools to other productive community uses; removal of refuse from drainage ditches, illegal dumping sites, and other public areas, immunization programs, congregate meals and "meals on wheels" programs for the aged, and providing expanded day care opportunities where necessary to enable single, able parents to work.

FEDERAL WAGE CONTRIBUTIONS

Prevailing wages, provided that wages not be less than the minimum wage nor more than the hourly equivalent of $10,000 per year.

OTHER PROGRAM FEATURES

No more than 25 percent of a jurisdiction's funding may be spent for administration, equipment, or materials. (At least 75 percent of funding must be spent on direct wages.)

Jurisdictions prohibited from displacing current workers in favor of individuals newly hired under the program.

[From the New York Times, Dec. 10, 1982]

IT ONLY LOOKS LIKE A JOBS BILL

For a brief moment it appeared that the lame-duck session of Congress might produce a quick, clean bill to repair roadways and revive mass transit by increasing taxes on gasoline and heavy trucks. President Reagan and the Congressional leadership had all signed on. It looked like a sure thing—and a good one, too.

It doesn't look so good any more. The House has approved a version loaded with undesirable amendments, and the Senate Finance Committee has added another. The Senate would do well to adopt the far preferable substitute just proposed by its Democratic minority. Failing that, if the Senate has any pride it will produce a bill free of contaminating amendments.

The original proposal had four commendable goals: repair of rotting roads and bridges; improvements in mass transit; a 5-cent increase in the gasoline tax that would induce conservation, and higher taxes on heavy trucks. It also had a basic weakness: the idea that it would also meet a fifth goal by becoming a "jobs" program. It wouldn't have gotten anywhere politically without appearing to create jobs—320,000 of them in construction and related industries. But the increased taxes would probably kill off as many jobs in other industries.

Then the House compounded the problem, piling on noxious amendments in the name of creating more employment, but actually raising costs and reducing the net number of jobs created.

A "Buy American" amendment requires that road repair materials be bought in this country, even when cheaper foreign materials are available. A "domestic content" amendment requires that any buses or subway cars purchased have a specified amount of American components, also closing out lower-cost foreign suppliers. Both amendments follow a protectionist path that can only lead to trade war and fewer jobs.

Still another amendment expands the scope of the Davis-Bacon law, which would artificially inflate pay scales on public works projects.

Then the Senate Finance Committee got into the act by cutting the proposed increase in truck taxes. On the well-founded theory that heavy trucks to disproportionate damage, the Administration proposed taxing them more. Even that proposal was sugarcoated; it would have relaxed size and weight limits, changes long sought by the trucking industry. Truckers fought the tax increases anyhow, and succeeded in the Finance Committee.

If these amendments stand, they will turn a useful initiative into a solution that is worse than the problem. There's a better way. A bill proposed by Senate Democrats would create a broader public works bill providing twice as many jobs. It would be paid for in a more appealing way—by trimming the tax cut next July for people with high incomes. This proposal would provide more stimulus on the jobs side and less negative effect on the tax side. Its weakness is that it leaves gasoline and truck taxes right where they are.

Congress is determined to do something quickly in response to rising unemployment. The realistic expectation is that the Democrats' proposal won't pass, and that the President would veto it if it did. Probably the best hope is that this Congress, in its dying days, and in the name of relieving hardship, will kill the amendments that pander to special interests. Lame-uck need not mean lame law.

Mr. ROBERT C. BYRD. Mr. President, I see that several of my colleagues who are cosponsors are here and are prepared to speak to it.

Mr. KENNEDY is the principal cosponsor, and I assume that he would wish to address some remarks at this time.

I yield the floor.

Mr. KENNEDY. Mr. President, first of all I want to express my appreciation to the leadership that has been provided on this issue by the minority leader Senator BYRD of West Virginia.

This has been an issue which has been discussed in our caucus over a period of many months. This proposal incorporates not only Senator ROBERT C. BYRD's own areas of expertise and concern but also includes proposals which many of us have been working on over a long period of time. I believe that this amendment represents a constructive and positive program for the Senate and for this country.

I think the American people are entitled to action, and this is an action program.

Mr. President, the amendment offered by Senator BYRD addresses the most pressing problems facing our Nation today—the highest unemployment rate in 40 years; 11.8 million Americans are jobless. Millions more can only find part-time jobs. Others are so discouraged they have totally given up the search for work and the situation is much worse for black Americans and for our young people. One in every three Americans can expect to be unemployed some time during the year.

We are painfully aware of the human suffering behind these statistics. Decent, hard working men and women are losing their savings, their homes and the chance to send their sons and daughters to college. For the first time in our history, parents expect their children to be less well off than they are.

These men and women have searched the want ads and pounded the pavement and still cannot find work.

The fact is that since Ronald Reagan got his job, 4 million Americans have lost theirs. It is no longer possible to say that anyone who really wants to work can find a job. The jobs are simply not there.

And, despite the promises of this administration, unemployment grows worse. Last month the unemployment rate stood at 10.8 percent. Next month there will be more bad news. Unemployment will almost certainly go above 11 percent.

No longer is this recession confined to the auto and steel and construction industries. No longer is high unemployment limited to Michigan and Ohio, and Indiana and Oregon.

Every industry and every region of the country is feeling the bite. From Maine to California, from Florida to Washington, unemployment is on the rise.

It used to be that workers could count on unemployment benefits to tide them over the worst of a recession. But no longer.

Only 40 percent—less than half—of those 12 million now unemployed are covered by unemployment insurance. And the extra benefits we approved last August are about to run out for 2.2 million Americans.

That is why the Democratic proposal includes additional weeks of benefits for the unemployed in every State.

I joined with Senator QUAYLE in introducing the Training for Jobs Act to provide retraining for the disadvantaged and structurally unemployed. The Senate and House adopted that legislation overwhelmingly and the President signed it into law last October.

But that is a training program, not a jobs program. Not one new job will be created. Not one unemployed person will go back to work immediately as a result of that bill. It is a much needed long-term solution for the poor, the young and displaced workers. And it will take time for that program to show results.

I believe we need a jobs program now to put people back to work now.

I believe that our No. 1 problem—unemployment—can be addressed by putting the jobless to work on important projects that need to be done in this country.

It is impossible to drive through any city in this country today without noticing the deterioration in our roads and highways and bridges. But the decline in our public infrastructure is not always so visible.

Many of our public schools, parks, and transportation facilities are literally falling apart. Hospitals in the North and airports in the West are in critical need of repair.

There are other examples:

Subway and rail systems in urban areas are decaying, making service unreliable.

Half the country's sewer, water and drainage systems need repair.

One-third of the non-Federal dams are unsafe.

One of every four prisons needs remodeling to relieve overcrowding.

Our forests and timber ranges are suffering from neglect.

Abandoned coal mines are a danger and an eyesore to neighboring communities.

Our proposal is modest. It would create just 400,000 jobs—less than the number eliminated by Ronald Reagan last year. Less than the jobs created by President Ford when unemployment hit 9 percent in 1975. Less than the 425,000 jobs created in 1977 when unemployment was 7.5 percent.

Our proposal is also very different from the public service employment program created under CETA that has received so much criticism and is no longer a part of the new training bill. Only jobs directly related to the repair and maintenance of public facilities

and the improvement of public lands can be funded. Only those unemployed 15 weeks or longer will be put to work. Private contractors can be selected to do the needed work.

This proposal will not "bust the budget." The program pays for itself, not by imposing a new tax on workers, but by repealing the third year of the tax cut for those in the highest income brackets.

We believe this is a better way to finance a jobs program and rebuild our public infrastructure. It is a fact that doing nothing about unemployment costs the Federal, State, and local governments billions of dollars in unemployment benefits and lost revenues. This bill costs just a fraction of the $20 billion now being spent on unemployment benefits.

These jobs will decide whether the unemployed become taxpayers or tax users.

Our economy is in critical condition. It does not help the unemployed to counsel patience. It does not help the unemployed to promise better things to come. It does not help the unemployed to promise a tax cut. But the unemployed can be helped with jobs which mean new hope and dignity and pride for them and their families.

Mr. President, I hope the Senate will accept this amendment.

Mr. President, restoring the health of the American economy is going to be the overriding issue in the next Congress, and that is going to require the best efforts of all of us on both sides of the aisle.

We realize the problems we are facing are difficult and complex, that there is no easy or simple solution to the problems facing our economy today.

H. L. Mencken, the great publisher and writer, once said:

> For every difficult challenge and problem there is a simple, easy answer—and it is wrong.

We have seen the truth of this observation over the last 19 months. We were facing difficult challenges in January of 1981, and we heard a simple, easy answer. What is the problem? The state of our economy. What is the answer? Supply side economics.

That simple solution was wrong, Mr. President, and there are millions of American people who have paid a fearsome price as a result of the failed, flawed, and unjust economic program of this administration. We are going to have to face that fact and develop a constructive program to get our economy moving again. That is going to take time and it is going to take judgment and it is going to take serious debate across this country and here in the U.S. Senate.

The amendment we are proposing here today is only a partial step, but one that we can address in the final hours of this "lameduck" session. The issue is whether we are going to provide some very limited relief to men and women who, for years, have held jobs and now, as a direct result of the economic policies of this administration, have lost those jobs.

By putting those people to work—taking those people off welfare rolls and off unemployment lines and putting them back on the job rolls—we can do something constructive in meeting the needs of this great country of ours.

This is a modest program. It is an emergency program. It is a responsible program, and it far exceeds what I feel is the grossly inadequate alternative which has been proposed by this administration. But it is an important, meaningful step forward in trying to offer some hope and opportunity to millions of American families that will be facing this Christmas time with little hope and little opportunity to provide for themselves and to provide for their families.

We are not just talking about statistics, as important as they are. We are concerned about the stark reality that is injected into any family's existence when they know they have lost their jobs and that they have little if any hope or opportunity of being able to find a job in the future. We are talking about human needs that must be addressed in the United States immediately.

So, Mr. President, I want to express once again my appreciation for the leadership that has been provided by the Senator from West Virginia. This is a program which can provide some hope, some opportunity, and some redress to the sense of hopelessness and despair that hundreds of thousands of citizens of this country are feeling today. I am hopeful that the Senate will accept this amendment.

Mr. DODD. Mr. President, first of all, let me join my colleague from Massachusetts in commending our leader, the distinguished Senator from West Virginia, for his leadership which has brought together the various elements of this proposal—emergency proposal.

It was as a result of his leadership and guidance that we were able to provide a comprehensive, thoughtful, efficient, effective package that we believe will not only deal with the long-term infrastructure problem we face in this country but, more importantly, given the tremendous legitimate concern expressed all across our land about the straggering levels of unemployment.

I should also note at this juncture, Mr. President, that I will focus my brief remarks here on the second part of our four-part program dealing with the light infrastructure part of the bill that we hope will put as many as 300,000 to 400,000 Americans suffering from unemployment back to work.

I would be remiss at this juncture if a particular note of recognition were not paid to the distinguished Senator from Massachusetts, who introduced a number of times in the last 1½ or 2 years jobs bills when unemployment was high—not as high as it is now—but in anticipation of the problem, and had we acted earlier, then part of this package might already be in place.

I would like to focus, if I may, Mr. President, on the light infrastructure part of this package which has been presented by our minority leader. It is our hope that this component of the substitute will provide immediate employment for, as I mentioned earlier, about 300,000 Americans suffering from the national epidemic of long-term joblessness.

It proposes a one-time-only supplement of $2 billion for the fiscal year 1983 community development block grant program. Those funds would be used to match up an existing pool of American citizens who are able to work and who are actively seeking work with an existing backlog of useful community projects which cities, counties, and governments already intend to implement but for which they lack available funding.

To insure that this expenditure benefits the unemployed, it stipulates that 80 percent of those hired must have been without work for 15 of the preceding 26 weeks and so certified by the local U.S. Employment Service. To guarantee that only useful, necessary jobs be assigned, it draws those assignments from projects which State and local governments have already planned. To assure that the jobs begin as soon as possible, this proposal makes use of an existing program structure and directs that work must begin from 90 days of enactment of this proposal.

In short, Mr. President, this part of the substitute amendment is carefully fashioned to target employment relief to those most in need, to complete only legitimate and useful community improvements, and to get a program underway in the most efficient and expeditious possible manner. Those are its purposes and merits and that is why it is in the national interest for the Senate to act affirmatively on it.

Not a single Senator in this Chamber should doubt the urgency of doing something about unemployment. Certainly, not a single Senator here was in this body when the national rate of joblessness was higher than it is today. Twelve million people in this country are looking for work and cannot find it. Three million more, it is estimated, have given up the search and are no longer in the labor force. In September, unemployment stood at 10.1 percent; in October, 10.4 percent; and in November, 10.8 percent.

Every poll of public opinion demonstrates that Americans think it is the single most significant problem facing the country. That was true when Lou Harris polled the Nation in July; it was the conclusion of a Los Angeles Times survey in August; it was what George Gallup found in September; and it was the bottom line of the CBS news poll released on October 30 of this year. And remember that since that last survey another 440,000 American workers have received their own pink slips.

This has always been an optimistic country, Mr. President, but on this issue the citizens of the United States are losing confidence. There are more Americans who believe the problem will be just as bad or worse a year from now than people who think it will be better. In fact, a Gallup poll earlier this month showed that one out of every five Americans who had a job thought it likely he would be likely be laid off in 1983.

That is the context in which we are considering H.R. 6211, which proposes to finance highway construction and repair frow a new tax on gasoline.

Mr. President, there is no question that something needs to be done to improve the condition of our Nation's physical infrastructure.

I have said that a number of times. I have introduced legislation to try and help solve that problem. Our interstate highway systems and mass transit facilities are vital elements of that network. Both desperately need a strengthened national commitment. That much is beyond dispute. You can question whether a 5 cent a gallon surtax on gasoline is an equitable mechanism for financing those capital improvements. But that issue is at least within the boundaries of reasonable debate.

One thing that is not within the pale of rational discussion is whether this is a useful step toward the solution of our current unemployment disaster.

It is not. If this legislation is passed instantaneously, goes into effect, and ticks like a swiss watch, it will not make the slightest dent in the national unemployment problem in the months ahead. At best, it will create some jobs in the long run. At worst, those new jobs will be more than offset, as Chairman HENRY REUSS of the Joint Economic Committee has argued, by the jobs which will be destroyed by the depressant effects of the gas tax.

But whether you are a laidoff auto worker, a teenager looking for a productive alternative to hanging out, or a recent college graduate looking for your first job, do not expect that anything in H.R. 6211 is going to help. That is something it is not intended to do, that is something it is not designed to do, and therefore, that is something it simply will not do.

That fact is the reason why this substitute has been offered. Its premise is that if Congress is to be called into special legislative session, it ought to consider the major problems confronting the United States and try to do something about it.

That is why we were called back. That is one of the reasons why we are here. The fact of the matter is the H.R. 6211, on its own, will do nothing whatsoever to deal with the most serious problem we face in this country.

The light infrastructure component of the substitute is a major integral part of that effort. We designed it to meet the criteria which would logically characterize an effective jobs bill. We said it ought to be targeted. We said it ought to be effective, and we said it ought to be efficient.

First, an effective jobs bill ought to target help toward those who most need it. The light infrastructure approach stipulates that 80 percent of the Federal wage contribution should go to the long-term unemployed—those who were without a job in 15 of the preceding 26 weeks, whose unemployment compensation has expired, and who are currently unemployed.

In addition, the allocation formula distributes 75 percent of the funds of the basis of a State's relative share of national employment. Finally, the CDBG program—the community development block grant program—already has as its prime objective—by statute—that its projects assist low- and moderate-income families, precisely those suffering most from unemployment. In sum, this is a carefully targeted piece of legislation.

Second, an effective jobs bill ought to create jobs in useful and important areas of public improvement and service. The jobs should not be an end in themselves but ought to make contributions toward healthier, safer, and more productive communities. The light infrastructure approach does not invent new projects out of whole cloth. Instead, eligible activities are limited to those already acceptable under existing community development block grant legislation.

The community development block grant program is among the most popular and successful of Federal programs. The work that can be done under its aegis includes repairing and rustproofing bridges, weatherizing public buildings, such as schools and hospitals, operating day care facilities, cleaning parks and recreation areas, rehabilitating water systems, just to name a few.

Perhaps even more important than these examples is the fact that almost every State and local government that receives CDBG funds has a list of projects it has already planned and to which it is already committed. You can argue whether "make work" is better than "no work at all." In this legislation we do not have to face that choice. We are not making work. These projects are already in the pipeline. The only question is when they will be done. By providing a one-time boost in spending which must be completed within a year, we merely insure that the work be done and the jobs provided sooner rather than later.

Third, an effective jobs program requires efficiency; it should display a favorable ratio of jobs created per Federal dollar expended. This proposal has been crafted to meet that objective, as well.

Among the provisions which contribute to that end are the following: A minimum of 75 percent of the funds must go for wages rather than materials or overhead. The Federal contribution to any specific wage cannot exceed the hourly equivalent of $10,000 a year. And there is a requirement written into the act that requires labor intensiveness as a criterion for a proposed activity's acceptability.

Taken in conjunction, those provisions mean we have a high ratio of jobs to expenditures. It is estimated 300,000 productive jobs will be created if this proposal is adopted.

Fourth and finally, an effective jobs program must create employment opportunities quickly. It is no longer reasonable to rely on hopes that the economy will turn around in the long run. Americans have been suffering too long and too severely from joblessness for that kind of rhetoric. What is called is a policy which places a premium on immediate relief. I would stress this is not a long-term program. It is a 1-year program.

By using a program structure already in place and to a very large extent, procedures already in force and familiar to recipients, the light infrastructure approach obviates the timelag inherent in setting up new bureaucracy and process for approving projects. By drawing on activities already planned, this approach avoids the delay which would inevitably occur if projects had to be designed from the start. And by making it a condition of eligibility that projects must be capable of initiation within 90 days, this approach guarantees that jobs will begin now when they are needed not in the distant future when it may be too late.

In sum, Mr. President, this program has the characteristics we would want an ideal jobs bill to emphasize: It is targeted; its employment opportunities are constructive; it makes efficient use of revenues; and it goes into effect expeditiously. Of all the proposals before the Senate, it clearly represents the most direct and valuable response to what everyone agrees is the No. 1 problem confronting this Nation.

Of itself, it will not bring unemployment down to even remotely accepta-

ble levels. I doubt that any single piece of legislation is capable of that result.

But for 300,000 Americans who want work and cannot find it, this proposal that we are offering this afternoon means a fulfilling job in lieu of frustration, and it means a chance to do something useful for their communities.

And, for those of us in this body, it demonstrates a willingness to make the most pressing difficulty in the minds of the American people our highest priority as well. I do not think it is unreasonable for the citizens who sent us here to expect us to do something about the worst unemployment in four decades. We should not expect less of ourselves. Adopting this program will serve notice that we do not find 10.8-percent unemployment acceptable and that we intend to bring it under control.

Again I want to commend the distinguished minority leader, the Senator from West Virginia, who through his leadership brought this proposal together. It is a proposal that is going to make a difference, is going to address the most serious problem we face. I urge its adoption.

I yield the floor.

Mr. RIEGLE addressed the Chair.

The PRESIDING OFFICER (Mr. SIMPSON). The Senator from Michigan.

Mr. RIEGLE. I thank the Chair.

Mr. President, at the outset, I would like to join in commending the minority leader, the Senator from West Virginia, for his leadership in foreging this package and for the important comments he made earlier about the necessity for us to move forward with this legislation.

Mr. ROBERT C. BYRD. Will the Senator yield at that point?

Mr. RIEGLE. Yes.

Mr. ROBERT C. BYRD. I thank the Senator from Michigan. I also thank Mr. KENNEDY and I thank Mr. DODD for the generous remarks they have made in my behalf.

I take this occasion to thank those who worked with me, a task force of Senators I selected, each of whom has expertise in various fields, for the contribution they made in putting together this package. I wish to thank each member of the task force, Senators BENTSEN, BRADLEY, CHILES, CRANSTON, DIXON, DODD, FORD, JACKSON, KENNEDY, LONG, MOYNIHAN, RANDOLPH, RIEGLE, and SARBANES.

I thank the Senator for yielding.

Mr. RIEGLE. I also thank the Senator from Massachusetts (Mr. KENNEDY) for the fine leadership that he has shown and the excellent statement he made on these issues, and the Senator from Maryland, who will speak later.

Clearly, we face a matter of urgency in the U.S. Senate. It is a pity that the Chamber cannot be filled with all 100 Senators, and the galleries and press galleries as well, because this is literally the one overriding issue that faces the country that we should be taking up, that we should be dealing with.

The whole purpose of the lameduck session, especially now that the Social Security Commission has found itself unable to render judgments on changes in that system, is really to try to do something about the unemployment emergency in the country.

There is a desperate need for jobs. Increasingly the national television networks are doing profile stories on individual families, on regions of the country, on economic sectors, showing the degree of devastation which now stretches coast to coast.

My home State of Michigan is a State in the deepest trouble. The unemployment rate there as of last week was 17.2 percent. I have in my State now more unemployed people than the entire population of nearly 10 other States of our 50 States.

There was a story in the New York Times the other day about people from my State of Michigan, and from other States where unemployment has been the worst, who migrate to Texas to try to find work in Texas. But now the unemployment problem is so severe in Texas that not only are those persons having to leave to come back to their home areas, to move in with family members, or live under bridges or viaducts, whatever they can find, but, in addition, the outflow of people who have gone across the country in search of a job but have not found one has put such a pressure on the availability of U-Haul trailers that they are charging several hundred dollars in premiums for people who have gone to the areas that previously were thought to have the jobs and now must turn, abandon those areas, rent U-Hauls, and go out Lord knows where to try to find something some other place.

We are saddled in this country with the want ad mentality of the Reagan administration, where the President, who shows no comprehension of this problem, no understanding of it, repeatedly refers to the fact that in his view there are sufficient jobs, want ads posted in the weekend editions of newspapers across the country, and the suggestion that if unemployed workers would just work a little harder or get those want ad sections, they could go and find work for themselves.

Well, anybody who has any understanding of what is really happening in this country knows that to be false, and, more than false, it is a dangerous misunderstanding of the problem.

In fact, on the baseline, it is a heartless and a cruel notion that this administration and this President appear to have about this problem, apparently believing that it is far less severe than we know the facts to be.

It has been pointed out here many times that we are now on the verge of the Christmas season, and this is normally the time when families have the opportunity to look at the year's work and the blessings that may have come their way, to be together and to have a period of special feeling at a special time.

Yet, we have millions of families in this country who are absolutely desperate this Christmastime, who are destitute, who cannot pay utility bills, who cannot feed their children properly. The suicide rate is soaring among unemployed workers. We are seeing instances of alcohol abuse, drug abuse, and beatings within families as this level of desperation deepens and broadens.

It is the business of this Congress and of the Senate to come in here in this special session and do something about it. That is what this legislation is about.

I think it is appalling that this administration has not taken the initiative in this area. Yes, even to embrace what we bring as a Democratic Party alternative today. In fact, I think this administration should be going beyond what we are proposing. They should come and embrace our alternative and, in fact, propose to go further. But they are not doing that because they show no comprehension of the scale of this economic disaster that has hit our country.

So they not only fail to come in with a program of their own, but they oppose the one that we offer today.

I would like to believe that if we could have a secret vote here in the Senate today, and if my Republican colleagues who understand this issue from the scale of desperation they see in their own States would be free to vote privately, without being under the pressure and the watchful eye of the White House, that, in fact, they would vote in favor of this program, knowing that it needs to be done.

It has been described today as modest. It is a modest program. It is a very modest program, both in terms of its financial size as well as its component parts. But it is a realistic program and it is a solid program. It is something we can do. It is something we can enact. It is something that could be creating jobs within a matter of days upon signature by the President.

It is important to note that we propose to pay for this not through the imposition of a 5-cent a gallon gasoline tax, which falls very hard on people in our country who must use their cars either to get to work, to get to the store, to get to the doctor, to get to the church on Sunday, whatever it may be. We do not go that route, because that is a tax right now which is a burden for many people of this coun-

try that they can ill afford. Instead, what we propose as a financing alternative is to delay for a 3-year period of time the third-year phase of the tax cut for people in the higher income brackets. We have done so not only because it generates more revenue but because it puts some equity into the tax picture which is presently missing.

It is our view that the country ought not to be reaching into one pocket of the Government and passing out enormous tax benefits come the middle of this year to wealthy people of this country who frankly do not need that kind of windfall again, and, in turn, reach out in the form of a new 5-cent a gallon gasoline tax and extract another tax increase to put into another pocket of Government at the same time.

These two acts are contradicitory, they are unfair, they are unsound, they ought not to be done. We would be much better deferring the third year of the tax cut for those at the high income levels and using that revenue over a 3-year period to pay for this jobs program.

I might further say, and emphasize the fact, that one component of our program is to provide additional emergency unemployment compensation benefits for those men and women who have exhausted their unemployment benefits and literally are destitute at the present time, who need, in the absence of an economic recovery, some way of holding their lives together and providing at least a minimum standard of living for their families.

We have not seen a time in the past with any other administration in contemporary history—Democrat or Republican—one so unwilling to respond to the unemployment emergency in this country than we see at the present time.

I can recall when we had economic recessions less severe than this and we had Presidents Ford or Nixon in the White House. They were willing, as the facts will show, to support extended unemployment benefits beyond what we have today because they understood at that time the absolute necessity of those kinds of payments to people who could not find work.

It was not until this heartless bunch arrived in town in this administration that we saw a fundamental change and, for the first time, an administration of either party which was not willing to respond fully to the emergency problems of unemployed people and unemployed families in this country.

It is a shame that it should be that way. I do not think that is the way the American people feel. I think the American people want to respond. They want to respond with a humane and a sensitive and a sensible impulse to this situation, both in providing jobs and, beyond jobs, to provide emergency help to those people who otherwise will go hungry this very night.

So the least we might do in this lameduck session is to address this problem.

I know I have heard from people in my home State of Michigan who followed the President's trip down in Latin America. He came back after announcing that we were going to be making emergency help available to the Government of Brazil, of $1.2 billion. That was a matter of 20-or-so days ago. According to today's newspapers, they have used that up now. They now want another $1.5 billion. Presumably, a response will be forthcoming.

But what about the State of Michigan? What about the State of Alabama? What about the State of Washington or any of the other 50 States? What about the American people in desperate need who need help, who need jobs, who cannot find jobs? Is our answer to them to say, "Sorry, we cannot do anything for you. We just cannot do it. This administration is not willing to do it. Sorry. Yes, we have money for other things. We have money for the MX missile, money for Brazil, money for anyone else who needs it, for everyone who is on the pet project list."

But when it comes down to some rank-and-file person who may have worked 30 or 40 years in this country and has lost their job, lost their house, lost their car, unable to feed their children, the answer to them is, "Sorry we cannot help you. Get the Sunday newspaper and check the want ads and find something for yourself."

That is the answer of this administration. I think the answer of this Senate ought to be something more than that. That is why we are here. That is why we have been elected and sent here, to try to deal with urgent and human national problems of this sort and this scale.

This program is modest enough. I say again, I think if we could have a secret vote—and many of my Republican colleagues could vote their conviction without worrying about crossing the White House—I think the votes are here to pass this package. If they are, they ought to be here in the cold light of day.

Let us pass this package because it is right, because it is needed, and because it is what we ought to do.

Mr. President, I yield the floor.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, I thank my friend from Michigan for his eloquent remarks. I share with my colleague from Michigan, my seatmate from Connecticut, and the senior Senator from Massachusetts, their enthusiasm for the outstanding work of our distinguished minority leader, the Senator from West Virginia, in putting together this outstanding jobs package.

Mr. President, I rise as an original cosponsor of this amendment, and as one who has indicated serious concern about the issue of extended unemployment benefits during the past year.

The provisions of this portion of the amendment are really an emergency solution to address the problems of those who have exhausted their unemployment benefits or will exhaust them shortly. It does not address the serious inequities of the entire system. That is an issue that must be given more study, in a less restrictive time than a lameduck session of Congress.

As we all know, we added a maximum of 10 weeks of Federal supplemental compensation, or FSC, last September 12. It only takes simple arithmetic to realize that those who first entered that phase of benefits exhausted those 10 weeks on November 21. in other States, benefits ended at the end of 6 and 8 weeks.

What we propose today is to add 5 weeks of benefits to States with insured unemployment rates over 4 percent for a total of 15 weeks of FSC and a maximum of 54 weeks of total benefits, if a State qualifies for extended benefits. According to the latest figures from the Department of Labor, 28 States would receive the maximum in FSC benefits under this bill.

We would also add 5 weeks of benefits to States with insured unemployment rates between 3.5 percent and 3.99 percent, for a total of 13 weeks of FSC and a maximum of 39 weeks of total benefits. Eleven States would qualify in this category.

For States with insured unemployment rates below 3.5 percent, 2 more weeks of FSC would be added, for a total of 8 weeks and a maximum of 34 weeks of available benefits. Eleven States are in this category.

The division of States is as follows:

FSC EXTENSION ELIGIBILTIY AS OF NOVEMBER 27, 1982

15 WEEKS OF FSC

Alabama, Alaska, Arizona, Arkansas, California, Idaho, Illinois, Indiana, Kansas, Kentucky, Louisiana, Michigan, Mississippi, Montana, Nevada, New Jersey, North Carolina, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, Tennessee, Utah, Vermont, Washington, West Virginia, and Wisconsin.

13 WEEKS OF FSC

Delaware, Iowa, Maine, Maryland, Massachusetts, Minnesota, Missouri, New Mexico, New York, Oklahoma, and Wyoming.

8 WEEKS OF FSC

Colorado, Connecticut, Florida, Georgia, Hawaii, Nebraska, New Hampshire, North Dokota, South Dakota, Texas, and Virginia.

The total cost of the program, which would still end on March 31, 1983, as originally intended, is $700 million.

It is inconceivable to me, Mr. President, that this administration can continue to turn its back on over 12 mil-

lion unemployed Americans. Not only does the President oppose extending unemployment benefits, something that previous administrations, both Republican and Democratic have supported, with unemployment rates far lower than the current, disgraceful 10.8 percent we now face.

This President also has made it clear that he opposes any labor-intensive jobs measure as well. He has repeatedly said that the highway package his party has proposed and he endorses is not a jobs bill. It was good of him to point that out. For, although it will put approximately 300,000 people to work, we obviously need to do more.

Perhaps it is appropriate at this time, to look at the unemployment compensation benefits that have been enacted in the past decade. It puts this proposal into an interesting perspective.

In 1971, with a total unemployment rate in this country of 6 percent under the administration of Richard M. Nixon the maximum benefits were increased to 52 weeks.

In 1974, under a Republican President, Gerald Ford, with a national unemployment level of 7.1 percent, a 13-week FSC program was enacted, for a total of 52 weeks of coverage and 26 weeks of federally paid benefits to 12 million workers. In 1975, the FSC program was extended to 65 weeks at a time when the unemployment rate was 8.8 percent.

In 1981, with unemployment continuing to rise, this administration and this Congress ended the national trigger for extended benefits, changed the method of calculating the insured unemployment rate, raised the extended benefits trigger by a full percentage point and established a 20-week work test for extended benefits.

What we are proposing would not reverse any of the changes implemented in August of 1981, although there has been considerable support demonstrated in this body for such a reversal. Our proposal is very modest by comparison—a maximum of 54 weeks of benefits at a time when the unemployment rate is the highest since the end of the Great Depression.

A December 4, 1982 New York Times editorial stated the following:

> This morning's front pages tell only part of the bad news: 10.8 percent unemployment, 12 milion Americans looking for jobs and more than a million others so discouraged they have given up looking. . . . More than half of those 13 million are not getting benefits from unemployment insurance. Beyond any 'jobs' programs, which do not create jobs immediately, and do not address the problems of those who continue unemployed, the Nation's unemployment insurance system is the safety net. It needs repair.

My friends, I say this to an administration which has spoken so eloquently so many times about the safety net that is afforded to the people of America: There is a hole in that safety net for unemployed Americans.

I hope that this Congress will not turn its back on people who genuinely need our help, particularly in this season of good will and giving. It will not be a very festive holiday season for those who have been trying to find work, to feed their families and regain the dignity that comes with a job and a paycheck, if they cannot even count on an unemployment check.

We all saw first-hand what this recession is doing to the people in our States, while we were home for the election recess. People in this country are really hurting. They are doing without basic necessities, losing everything they have worked their whole lives to obtain, standing in line for hours to get a pound of cheese or a single stick of butter, as was the case in Chicago on November 23, losing their homes, keeping their heat turned off because they cannot afford the utility bills, neglecting medical care for themselves and their children because they no longer have insurance and do not qualify for medicaid. The list is endless.

This is not a situation that can be ignored. We must exert some leadership and compassion for those who are enduring the most critical time of their lives.

That same New York Times editorial closed with something that I firmly believe is true:

> Unemployment, no less than poverty, is a national concern. New York didn't bring on the recession and neither did Alabama. The unemployed are the burden of all Americans.

I urge my colleagues to join us in adopting this amendment.

Mr. METZENBAUM. Mr. President.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I rise to express my support for the amendment offered by the minority leader. In doing so, I want to address myself as agreeing to the fact of what this amendment is all about.

We have been here almost 2 years and in 2 years we have done absolutely nothing for the people of this country. We have done an awful lot to hurt the people of this country. The Reagan administration started off with harmful, hurtful measures and has not had the milk of human kindness to recognize the problems that exist out in America today.

First, this administration started off with a host of budget cuts to cut back on people-oriented programs. Oh, that was going to be great for America. I do not have to tell my colleagues that it has not been great for America.

Throughout the entire Nation and every night on the TV tube, you can see more instances of people concerned about programs that would help them, disability benefits being slashed, food stamps being slashed, Government student loan programs being slashed, and even an effort to cut social security benefits.

This administration was not satisfied with just cutting back on all the human service programs. They were determined to and did very effectively make it possible with the tax bill for those who have the wealth of this Nation and who are still earning it, as few as they may be, to get by without paying their fair share of taxes. So they slashed the tax programs of this country.

Most Americans are not aware of what they did. They cut the maximum tax from 70 percent to 50 percent.

That was great for the unemployed workers for this country. And they cut back drastically on the estate taxes. That was great also for middle class and poor Americans who do not have any estates to pay taxes on. And they cut back on the capital gains tax from 28 percent to 20 percent maximum, a slash of better than 25 percent, and all the time saying that they are concerned about what is happening to America, meanwhile causing so much harm and hurt to the people of this country.

Now we find in the closing days of this session that the minority has come up with a program that would make a major step in alleviating some of these problems.

I am a realist. And I recognize what will probably happen, that the very same Members of this body on the other side of the aisle who just were out on the campaign trail telling their constituents they are concerned about their problems will make a political vote and vote no. But the fact is there are 19 of them on the other side of the aisle who will be held to account in the coming election in 1984, and I wonder what their vote will be, whether they will make the political vote and vote no on the Byrd amendment or whether they will do that which is right, fair, and decent and say: "Putting politics aside it is time for us to provide some assistance to the people of this country. It is time for us to provide some sense of fairness and equity."

I support this amendment. It would undo a small part of the damage that has been done to this country by the misguided economic policies of the Reagan administration.

When this amendment came to office the unemployment rate was 7.4 percent. We have almost a 50-percent increase. Today 10.8 percent of Americans are without jobs and that figure does not include the hundreds of thousands who have simply given up looking for work.

In my own State of Ohio, Mr. President, unemployment is running at the catastrophic rate of 14.2 percent. Sta-

tistics do not really mean very much. But when you realize that one out of every seven people who want a job are unemployed in the State of Ohio then maybe it gets closer to home.

The 2 million Americans who have lost their jobs since the Reagan administration came to office are not people who do not want to work. How many times have I heard the members of the majority party talk about the fact people do not want to work, they are lazy, they are indolent? But there are 2 million people who were working and who would like to go back to work and a lot more besides them and they cannot find a job by reason of this administration's program.

It is bad enough to have programs that do not work. It is a lot worse when the leadership of this country does not care and smiles every night on the TV tube to reassure the people that somehow things are going to get better. But that does not put food on their tables. It does not put clothes on their backs. And if does not help them send their children to school.

The people who are unemployed have always worked. They are the new unemployed. They are people who paid their taxes, people who deserve much better from their Government than they have so far received.

Every month nearly 350,000 people in our country exhaust even that meager amount that they receive in unemployment benefits.

I commend the Senator from Illinois and the Senator from Michigan, both of whom have worked with me in an effort to extend unemployment benefits. I support the extension of unemployment benefits contained in this bill and any further extension as well, but what the people of this country really want is an opportunity to work. They want a job.

These are people who do not need a patronizing remark from the White House officials about their motivation. They need jobs.

In 2 short years, this administration's programs continue to cause more and more people to be on the unemployment roll.

Some say, yes, but look what has happened to the stock market. Is that not wonderful? It does not help the poor and middle class Americans to see the stock market go up at the same time that the unemployment rolls of this country go up.

This is the first administration since Herbert Hoover to refuse to put forth a plan to stimulate employment. Instead of action, this President offers platitudes about "staying the course."

Last November we heard a message from the heartland of this country, a message to change the course.

The people in my home State know the real meaning of 14.2 percent unemployment. They understand the personal and family tragedies behind the bankruptcy statistics.

In that connection, Mr. President, it is rather odd, rather ironic, that the only answer that this administration and the leadership of this Senate has to deal with the problem of bankruptcies and more and more bankruptcies is to change the law so that fewer people can go bankrupt.

One would start to laugh about that if it were not so pathetic. But that is the reality. There is a bankruptcy bill waiting here to come on the floor making it much more difficult for those poor unemployed blokes to go bankrupt.

Why do we not find an answer to keep them from having to go bankrupt rather than trying to deprive them of their right under the law as it is today?

Today we have an opportunity with this amendment. But we also have a responsibility to begin to change the Nation's course. What is the Republican highway proposal? It is not a jobs bill. Even those who are on the highest authority in this administration say that if it creates 300,000 jobs it will also deprive 300,000 Americans of their jobs.

It is a regressive tax, no more, no less, another instance of take it out on those people who do not have adequate lobbies working for them here in Washington. Like so many other proposals of this administration its burdens fall most heavily on those who are least able to pay.

It is not enough to say that it will create some new jobs, it will be rebuilding the infrastructure, because you have to finish the sentence and indicate that many people who are out looking for jobs and paying their gasoline bills will have that much less to buy their gasoline with and those who are employed are going to have that much less to feed their families with if they drive to work when you have a regressive nickel-a-gallon tax.

The Democractic alternative makes sense. It is logical. It is well fashioned. It would provide an additional 400,000 jobs. It would provide 5 additional weeks of unemployment benefits. It would provide job training for dislocated workers. It would provide employment for senior citizens. And it would provide work rehabilitating public housing and reclamation of abandoned coal mines and reforestation.

It is not all we should do. We should go much farther than that. But I am hopeful that maybe there are some on the other side of the aisle who will see fit and say "Come along and support this measure because it is right." It is a modest proposal and one designed to touch the most needy of this society. And it would be financed fairly by delaying the third-year tax cut to those who earn over $50,000 per year.

I will leave it to others who will follow me on this floor today to address themselves to the fairness of the financing method with respect to this amendment, but suffice it to say this is an alternative that is right. It is an alternative which is fair and far reaching.

I urge my colleagues to change the course and to put our country back to work and forget the political label under which they sit in this body and to vote for an amendment that truly makes sense and provides some equity and also provides some jobs and some decency in our national policy.

Mr. BRADLEY. Mr. President, I rise in support of the amendment offered by the minority leader.

This initiative has two purposes: To start long-overdue repair of the Nation's badly worn infrastructure and simultaneously provide at least 400,000 jobs for Americans unable to find work because of this protracted recession.

We need to insure that our physical and human resources remain the best in the world. If our country is to remain competitive in international markets, passage of this amendment would be a step in the right direction.

The program has five main components, with a total cost of $5.3 billion in 1983.

First, it authorizes $1 billion for the repair and rehabilitation of sewer and water facilities. This money would be used only for existing systems.

Many of the water systems in cities across the country are over 100 years old and they are deteriorating rapidly.

(Mr. CHAFEE assumed the chair.)

Mr. BRADLEY. In many cases the systems leak badly. Storms commonly cause sewers to back up and ground water to seep into systems, both serious public health dangers. Not only does this frequently waste scarce resources but it also hinders our economic growth.

What is this administration doing in response to this serious problem? Under current Environmental Protection Agency programs we will spend approximately $2.4 billion in each of the next few years to improve our water systems.

Mr. President, this is woefully inadequate. In my State of New Jersey alone more than 200 communities will need over $2 billion during the next few years just to meet their own needs. In fact, one community, Jersey City, had its main water main break last year leaving the city of over 100,000 citizens without water for over 10 days.

Mr. President, in New Jersey we also have a plan for financing the needed infrastructure investment, a plan based on the premise that Federal funds are simply not adequate to address national needs for construction

and repair of waste water treatment facilities, highways, roads, and bridges.

New Jersey proposes to combine the limited Federal and State moneys that currently are available for direct grants and use them instead on a revolving loan basis. These moneys will be deposited in an infrastructure bank that would function much like a commercial bank. Its assets would be managed professionally and would earn interest, thus increasing the total money available. Its customers—State, county, and local governments, would apply for funds in the same way they now ask for a Federal grant and, if approved, would receive these funds at low or no interest.

As the loans are repaid, the proceeds would go back into the bank, providing capital for new projects. These loans would be financed on the local level through user fees.

New Jersey hopes to get the seed capital for the bank from Federal grants such as those included in this amendment, from EPA construction grant programs, from proceeds from authorized bond issues, and State appropriations.

Mr. President, this amendment includes language permitting States to use funds authorized by this legislation for infrastructure bank purposes. Subsequent legislation will be proposed to enable States to use the EPA construction grant money as well.

I think this is an excellent idea that deserves consideration. In terms of the EPA construction grant program alone, New Jersey estimates that this plan will enable the State to finance all 237 projects on its sewer priority list. Under the current grants system, the State would be able to finance only 11.

It will not in any way alter or limit Federal authority with regard to the construction grant program. Projects funded through the bank will still be subject to existing eligibility criteria and approval by EPA.

Second, the amendment would create a $2 billion labor-intensive community public works program to provide short-term jobs for about 300,000 unemployed persons who have been out of work so long that they cannot claim any more unemployment benefits. The funds would be used for community repair, weatherization, and rehabilitation of school buildings.

The money would be distributed quickly through the well-established community development block grant program. We would need no new bureaucracy or additional redtape. Work could begin within 3 months because there is now a tremendous backlog of community development projects awaiting funding.

I want to emphasize that these would not be dead end, make-work jobs. The economic health of our country demands improvement of our infrastructure. We have real work to do. Millions of people are ready and willing to do it.

The third component of the package would provide an additional $840 million for high priority jobs and retraining programs for about 100,000 unemployed persons. Included would be:

A $200 million program to provide retraining opportunities for about 60,000 skilled workers permanently laid off in declining industries.

An increase of $100 million to provide 20,000 more jobs under the senior citizens jobs program, which currently provides about 50,000 part-time jobs to low-income persons over the age of 55.

A $100 million program of reforestation and timberland improvement similar to the Civilian Conservation Corps (CCC) of the New Deal. It is estimated that this effort would aid at least 5,000 unemployed workers in the timber industry.

A $400 million program that would put at least 10,000 unemployed people to work on rehabilitation of public housing projects, where a multibillion-dollar backlog of repairs has accumulated.

A $40 million program to hire about 10,000 unemployed coal miners for reclamation work on abandoned coal mines.

Mr. President, the fourth component of this package would extend unemployment benefits for about 1 million long-term unemployed persons.

In September, despite initial objections of the President, we enacted the Federal supplemental compensation program to provide an additional 6 to 10 weeks of unemployment benefits beyond the existing levels. This amendment would provide an extra 2 to 5 weeks of benefits. In other words, instead of 6 to 10 weeks of additional benefits, an unemployed individual would be eligible for 8 to 15 weeks of benefits.

This is the least we should do for those hardest hit by the current recession. This provision would help many families get through the holiday season before their benefits run out.

Mr. President, the unemployment rate in New Jersey presently stands at 9.9 percent. Contrary to the view of some people in the administration, they need no special incentive to look for work. They are looking, but the jobs simply are not there. The unemployed in my State—and others—deserve these few minimal weeks of protection.

Fifth, the amendment would provide $750 million for the agriculture export credit revolving fund. These funds would be used to finance commercial export sales of American agricultural commodities and breeding livestock.

Finally, Mr. President, we offer a fairer way to finance these initiatives. Instead of the gasoline tax increase, which will raise about $17 billion over the next 3 years, we propose to raise $25 billion in revenues over the same period by modifying the third year of the Kemp-Roth tax cut. The higher revenues will more than pay for our $5.3 billion jobs initiatives.

Under our proposal, the third year of the tax cut would be postponed 3 years for couples with income over $65,000 and couples with incomes between $50,000 and $65,000 would receive only part of the 10-percent scheduled tax cut. It is important to note that couples with incomes below $50,000 would still get their full 10-percent tax cut in July 1983.

This proposal, very similar to the one I sponsored last summer during deliberations on the tax bill, restores a measure of equity to the system. The jobs programs, aimed at helping persons most seriously hurt by the President's program, would be financed by delaying additional benefits to upper income individuals who have already benefited dramatically from the 1981 tax bill. When we must decide who benefits from scarce revenues, we should opt for those who are struggling to make ends meet.

Mr. President, the package we are offering today is a fair and fiscally responsible way to address two problems at once: We can begin to repair our crumbling infrastructure and provide jobs for the unemployed.

Mr. President, I therefore urge adoption of the amendment, but I urge adoption of this amendment recognizing that the 400,000 jobs that are created by the program embodied in this amendment are not the answer to the 12 million people who are out of work in the country today. We are in the deepest recession since the Great Depression, with unemployment at nearly 11 percent, with an additional 2 to 3 million discouraged workers and an additional 5 to 6 million people who are underemployed, only able to find part-time work but desiring full-time work. We are in an extremely serious juncture in this economic cycle.

If you are looking for the normal forces that usually pull us out of our predicament, none of them is apparent in guaranteeing success. Take capital investment: Capital investment is not going to fuel this recovery with a 65-percent plant utilization in our country today. Businessmen simply are not going to invest in new facilities when 35 percent of their existing facilities are vacant.

Take exports, another probable engine for recovery: Exports are not going to do the job when our products are 40 percent overvalued due to the increase in the value of the dollar in the last 18 months, in large part due to the very high-interest rates in this country.

Take Government spending: We are clearly not going to employ 4 to 5 mil-

lion Americans in Government-program jobs. This amendment addresses the question of 400,000 workers, but with a $200 billion budget deficit it is clearly inconsistent with economic growth to argue that you can employ 4 million Americans.

That leaves consumer spending, Mr. President. Consumer spending in the 1970's did indeed fuel a growth that was unfortunately inflationary but, nonetheless, provided jobs for Americans.

Consumer spending is not going to do the job in this particular recession. Across the country today you find the phenomenon of citizens saving instead of spending, looking at the inflation rate dropping and believing that next year it might be lower, so withholding that consumer spending that is absolutely necessary if indeed consumption were to be the engine of recovery.

So, Mr. President, since we are in a deep recession and none of the normal engines of recovery look likely to move us down the track, what offers the prospect of providing relief? In my view the answer lies with the Federal Reserve and in the interest rates. I know that the minority leader will be offering an amendment on interest rates in the next couple of days or the next couple of hours or perhaps the next couple of minutes.

Mr. DOLE. The next couple of minutes.

Mr. BRADLEY. As the distinguished chairman of the Finance Committee states, in the next couple of minutes, hoping we can debate these things simultaneously, perhaps.

But the simple point is this: only with the decline in interest rates are we going to be pulled out of this recession. You see, interest rates in a real sense are still intolerably high, exacting a price on the economy.

Mr. President, it is my view that interest rates are going to come down for two reasons: first, they are going to come down because I think Chairman Volcker sees 12 million people unemployed, recognizes his role in getting money into the economy and people back to work, and he takes that seriously.

But on a much more global sense he recognizes that unless our economy does recover he is the lender of last resort. He recognizes that unless America starts to grow, the exports the countries around the world need to sell, will not be bought and the loans American banks have offered and given to countries around the world will not be repaid, and that when those banks start to fall or totter or weaken, it will be the Federal Reserve that will have to step in. It is this latter point, I believe, that is primarily responsible for the precipitate decline in interest rates since last August.

The PRESIDING OFFICER. I wonder if the Senate will be in order? Let us desist with the noise in the Chamber so that the Senator can be heard. The distinguished Senator from New Jersey is speaking and we want to hear what he has to say.

The Senator may continue.

Mr. BRADLEY. I thank the Chair for his sensitivity.

As I was saying, the interest rates are going to come down because Chairman Volcker sees that as lender of last resort he cannot possibly cover all the open bases and that indeed the result will be a dramatic contraction in the availability of loanable funds, further perpetuating us through the inflationary door into a very dangerous period not only of slow growth but almost no growth.

So, Mr. President, this amendment is not offered with the belief that it is the answer to 12 million people out of work. Interest rates are going to have to do that job. We think they will. We think they will continue to come down. We will follow the action of the Fed to assure that interest rates come down.

But Mr. President what this amendment does while we are waiting for the economy to grow, as we hope it will, by summer, is to say that for 400,000 people out there in the country who do not have work today we want to provide them work. For those who have lost their unemployment benefits we want to recognize their human suffering. This is a modest proposal, a prudent proposal, one that is financed out of the pockets of those who can afford to finance these jobs.

So, Mr. President, I would argue that above all this is a proposal consistent with and, indeed, aiding the prospect of long-term economic growth, and for that reason alone, as well as the many human reasons mentioned on this floor today, it should be adopted.

Mr. DOMENICI. Mr. President, will the Senator yield for a question?

Mr. BRADLEY. I am honored to have the chairman of the Budget Committee ask a question.

Mr. DOMENICI. As I understand it, this proposal is not yet before us in written form. It is a rather lengthy proposal, and I am not critical of the fact that it is not before us. Did I hear the Senator from New Jersey state that in the proposal there is an effort to adopt some part of the infrastructure bank that the Governor of New Jersey, the distinguished Governor Kane, has proposed in his State? This would be an infrastructure bank for financing of water and sewer programs. That also could ultimately be used for other purposes.

Mr. BRADLEY. The Senator is correct.

Mr. DOMENICI. I heard the Senator say that. I wanted to say to him that the Senator from New Mexico for many reasons cannot support the proposal pending. I will not support the pending amendment. But I do want to say that I have not only studied that proposal for about 2 months, but I have met at length with members of the staff of your Governor, the distinguished Governor Kane, on at least two occasions and with the Governor himself concerning this.

It is extremely difficult to incorporate it into the national structure. But I want the Senator to know that I have looked at it and my staff has looked at it at length. It is being examined to see how it might be applied. I think it is an exciting idea. I am hopeful that in the ensuing months we can look at it more closely.

I would make one observation. I do not know if the Senator from New Jersey has mentioned this. It is obvious to the Senator from New Mexico that when we speak of public works from the standpoint of the U.S. Government we usually refer to grants for capital improvement. Grants that we pay in whole or in part—and for the most part they are only part—for a capital improvement that a local unit of government needs. It appears to me, at first blush, after examining the tremendous financial genius that has been applied by the Governor of your State and his advisers, that perhaps we have been extremely shortsighted in having very many of our capital improvement programs be outright grants. I am not sure yet.

On the surface, it appears that a grant program, which funds the water and sewer or sewer disposal plants or sewer cleanup plants, that is now down to 55 percent of the cost that we pay for as a grant, it would appear to the Senator from New Mexico that we ought not be doing that. It appears that we ought to be moving in some direction where funds are pooled and become available as a perpetual kind of financing fund. Thus we would enormously expand how much would get done. In a very short period of time, with far less money, we would accommodate much more of the capital improvements that the States need.

I am not sure that the infrastructure bank proposal is an expedited job-creating program or an emergency job-creating program, but it is obvious that it is an infrastructure financing mechanism worthy of great consideration. And the Senator from New Mexico, if no one else is looking at it, is looking at it.

I cannot believe that we are ready to adopt it today in this bill. Nonetheless, I certainly do not pass judgment on that from the standpoint of this institution. They will vote.

But I would think that it has so much potential. Yet, much new analy-

sis, in terms of how we might implement it, and what should be in it, must be done. I would certainly hope that the fact that it would be voted down today, if it is, as part of a very major package that has that bit of innovativeness, along with a great deal of business as usual, the same kind of solutions to jobs that we saw for at least 15 years, would not prejudice my efforts to present it, not only here but hopefully to the administration and to others in an effort to do something significant and different.

I thank the Senator for his comments on it. I wanted to rise to merely express myself in that regard.

Mr. BRADLEY. Let me express to the Senator from New Mexico my appreciation for his interest and support of this effort. It is clear to him, as he sits on the Budget Committee, and it is clear to me, as I sit on the Finance Committee and try to deal with these problems, that if we are truly going to have an infrastructure program, which means dealing with the old deteriorating sections of the country as well as the burgeoning new sections of the country, that we are not going to be able to do that solely with money coming from the Federal Government.

The key point, as the Senator has correctly pointed out, is how do we leverage what moneys we have at the Federal level into producing more jobs and work at the State level? In programs such as UDAG or EDA grants, it is the concept of leverage that is the key; in the infrastructure bank idea that is developing in New Jersey, it is also leverage that is the key.

I do not dismiss the possibility of changes in the proposal offered in New Jersey at this time by the Governor or his staff. I am sure the Congress is going to rework the proposal. But it is the direction that is important.

I am heartened today to hear such interest from the Senator from New Mexico. I look forward to working with him on this in the future. I think that this amendment, as a part of the larger amendment on the floor at this time, should in no way—whatever occurs to this larger amendment—prejudice the eventual development of the infrastructure bank idea perhaps on a national scale.

So I thank the Senator again for his comments. I urge again the adoption of this amendment. It is important, consistent with economic growth and the human needs of our country.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. SARBANES. Mr. President, at the outset I want to join with others in commending Senator BYRD, the distinguished minority leader, for his consistent and dedicated efforts in helping to shape the substitute proposal now before us—to consider the economic circumstances.

Mr. President, it is important in evaluating this substitute to consider the economic circumstances in which we find ourselves. Just 15 days ago, the Joint Economic Committee received the latest unemployment figure for the Nation, it is at 10.8 percent; 10.8 percent is the highest unemployment rate we have experienced in this country since 1940, 42 years ago. We face today unemployment so high that, to be matched, one must go back to the end years of the Great Depression. The tragedies which are haunting our people today because of this extraordinarily high unemployment are reminiscent of our national experience during the Great Depression.

Sixteen months ago, in July of 1981, the unemployment rate in this country was 7.2 percent. Now, under the President's program and under his admonition to stay the course, we have seen unemployment increase 50 percent in that 6-month period, from 7.2 percent in July of 1981 to 10.8 percent in November of 1982. That unemployment rate translate into 12 million people looking for work and unable to find a job. In addition there are millions more working on a part-time basis who want to work full time. Furthermore, there are a record number of people who are so discouraged that they have dropped out of the work force and, therefore, are not even counted in the unemployment figures.

So you have a 42-year record unemployment at 10.8 percent, you have a record figure in terms of those so discouraged they have dropped out of the work force and are no longer looking for a job, and are not counted in the unemployment rate and you have a record number of people on part-time work who want to work full time. It is a devastating unemployment situation.

On top of these record numbers, a large part of our unemployed population has exhausted their unemployment benefits and many others are fast approaching that situation. Furthermore many, when they lose their job, they lose their health benefits. They immediately then become completely vulnerable to the economic catastrophe that comes with illness. Millions of our citizens are now facing bleak, bleak prospects.

Mr. President, the proposal which is before us is an effort to address a pressing national tragedy. The millions who are unemployed cannot wait. There is not a course on which they can stay. Indeed, they have fallen off the course. They are out of a job. They have no income. They are losing their homes. The figures on home mortgage foreclosures and delinquency in home mortgage payments are at a record high since the depression; business bankruptcies, the same thing; farm mortgage foreclosures, the same thing. We must address this problem. And the proposal which is before us, offered by the distinguished Senator from West Virginia, is a sensible effort to do that.

This proposal encompasses both the highway provisions and the mass transit provisions contained in the legislation brought forward from the committees. What this proposal does is add to those provisions a number of job-producing provisions. These are programs that are desirable in and of themselves in terms of what they accomplish in addressing the Nation's problems—first, repair of our water and sewer infrastructure, a matter which was addressed just before me by the distinguished Senator from New Jersey; second, labor intensive community public works programs, funded through the community development block grant program and able to go into effect immediately; third, retraining of displaced workers; fourth, employment for our senior citizens; fifth, reforestation and timberland improvements; sixth, rehabilitation of public housing, which is deteriorating badly. Yet another example of using up the very physical capital we have managed to build over the years; seventh, reclamation of abandoned coal mines; eighth, an effort to boost agricultural exports and thus provide some assistance in the rural areas of our country; and ninth, further weeks of unemployment insurance in order to provide at least some support for those who find themselves now confronted with the most difficult question of all—how can they and their families live when they are out of work and have no income.

Men and women are losing their homes. People who have worked 25 or 30 years without a break or interruption now, for the first time in their working lives, find themselves out of a job. They have used up the unemployment benefits which this administration has reduced. They now find themselves losing their homes, the only real equity they have been able to accumulate over the course of a working lifetime.

It is no longer adquate to talk in terms of when the recession ends. The question has become if the recession will end. The monthly unemployment figures continue to climb—10.8 percent last month, 10.4 percent the month before, 10.1 percent the month before that.

We have a Secretary of the Treasury who, beginning more than a year ago, said in the fall of last year the recovery would come in the winter, in the winter the recovery was going to come in the spring, in the spring the recovery was going to come in the summer, in the summer the recovery was going to come in the fall. Here we are, and no recovery. We are constantly told

things are going to get better, instead they get worse.

Mr. President, this substitute is the beginning of an effort to put our people back to work and I strongly urge this body to support it.

Mr. President, there is one other aspect of this substitute that I want to address. That is how it proposes to finance the programs.

It is clear that the proposal before us goes well beyond what has been reported by the committees in terms of trying to address the job needs in this country, and it does it with a range of programs, each and every one of them desirable in their own right in terms of what they will accomplish and achieve. The substitute goes well beyond what has been proposed by the committees in trying to provide additional jobs to get our people back to work and to address our Nation's critical unemployment problem.

In its funding provision the substitute addresses the very central issue of fairness, of equity in the operation of our economy. This substitute would fund the entire range of these programs, both the additional job programs and those reported by the committees, by reducing the amount of the tax cut proposed for the third year of the President's program for those receiving between $50,000 and $65,000 of income, and deferring it for those above $65,000 for the next 3 years.

I submit that there is no basis in equity or fairness why those at the very top of the income scale should be receiving further tax benefits when we have millions out of work for whom jobs need to be funded. That is what this package seeks to do. It does not place an additional tax upon working people, as the gasoline tax proposal would do. It recognizes that one of the major effects of the President's economic program has been to markedly shift economic benefits to a very small privileged group at the top end of our economic scale, and to throw burdens upon millions of middle-income and working people in this country.

The President's approach is simply not fair, and it is time that we recognize that the American people will not accept an economic program which calls for sacrifices from working people and middle-income people and gives additional privileges and benefits to those who already find themselves at the very top of the economic pyramid.

What is wrong with deferring the tax cut for those at the very top of the economic scale in order to provide the revenues to fund a jobs program designed to put our people back to work?

It is time that a sense of equity and fairness reassert itself in this Chamber, and this proposal today accomplishes that very simple objective. It puts the American people back to work and it does it in a fair and equitable fashion.

I urge my colleagues to support the substitute.

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, first, let me commend the minority leader on his amendment. For all the reasons which have just been so eloquently stated by my friend from Maryland this amendment should be adopted. Without this amendment, this is not a jobs bill which is before us. That is the critical point. Without this amendment of the minority leader the gasoline tax bill before us is not a jobs bill. As a matter of fact, without this amendment for some of our States this gasoline tax bill is a jobs export bill.

The State of Michigan is one of those donor States. We have been on the losing end of this deal for many, many years. As I look at the Senator from Texas, I know he has done a good deal in this session to try to correct it, with some success, may I say. He has been doing extraordinary work.

But the State of Michigan, I am afraid the facts are, has been receiving back about 83 cents of the dollar. We have been exporting about $63 million a year under the gasoline tax formula—$63 million a year for the last 15 years. We cannot afford that kind of hemorrhaging in a State with 17.2 percent unemployment. We simply cannot afford it.

Even though my good friend from Texas has done great work in building in a floor of 85 cents back on each dollar sent to the Federal Government, I am afraid that means that States like Michigan, instead of being 17 feet under water, are only going to be 15 feet under water, and we are drowning still.

So despite that effort by my good friend, this gasoline tax bill, without the minority leader's amendment, is not a jobs bill at all, but, again, leaves States such as Michigan with a jobs export bill.

The President talked about a user fee, that people who use the highways ought to pay for them. Indeed, that makes sense. The trouble is that for the donor States, in the bill before us the people who are using the highways in our States are paying to build highways in other States. With the kind of unemployment we have in Michigan, we simply cannot afford a jobs export bill.

So this amendment adds the jobs component. It is a coherent response to the disastrous economic situation which confronts our country. The country demands immediate action and this amendment would provide that action.

Mr. President, we have a full-blown depression in Michigan. With all the semantics as to what constitutes a recession—is there a recession; are we on the verge of a recession—we have a full-blown depression in my home State.

The unemployment rate in Michigan now exceeds 17 percent. Some economists are now predicting that the nationwide unemployment rate may go above 11 percent nationwide.

For my State, this will mean that the already intolerable suffering will become even more extreme.

I just looked through the current computer printout of the unemployment data for Michigan townships. Let me tell you, the unemployment rate has already exceeded 20 percent in far too many. Something must be done.

This package which is being offered today looks to the need for action, both in the short and the long run. As a first step, we must extend the period of eligibility for unemployment benefits which individuals are currently receiving under the Federal supplemental benefits program which was enacted as part of this year's tax.

Individuals are now exhausting their benefits under that program in record numbers, and all that has happened in the meantime is that the nationwide unemployment rate has increased from 10.1 to 10.8 percent. In my State of Michigan it has increased from 15.9 percent to 17.2 percent. It is only reasonable that the Congress respond to the worsening jobs picture, as we have twice in the early seventies, by increasing the period of eligibility for unemployment benefits in order to assist those who have been unemployed for a substantial period of time, and those who are still looking for jobs but for whom no jobs can be found.

Mr. President, if this ccmprehensive amendment is not adopted, I intend to offer, with help on both sides of the aisle, this portion of the amendment that relates to the extension of the period of eligibility for unemployment benefits.

I am determined that before this session of the Congress ends we have an opportunity to vote on at least this portion of this comprehensive amendment. I state that determination because of the blood that is being sold by my people in Michigan to pay for food for their children. The blood donor banks in Michigan are receiving record numbers of blood donations from unemployed people to receive a few dollars from each little bit of plasma that can be used to buy food for their children, people who have run out of unemployment benefits.

Again, Mr. President, I am determined that before this session ends we have an opportunity to vote on the extension of unemployment compensation benefits. If this amendment fails,

I will be offering an amendment which contains the extension of the unemployment compensation benefit portion of this amendment to the Senate either on this bill or on the continuing resolution.

This is an amendment which has been supported by so many people in this Senate on both sides of the aisle—Senators DIXON, METZENBAUM, RIEGLE, and others. But again, I will be offering this before this session ends, and I am determined that we have the opportunity to vote on it; that it not be tabled; that it not be subject to a point of order, assuming that the cloture petition is finally filed on this bill or some other bill; that before the continuing resolution is finally voted on we have the opportunity to look at the unemployment benefits issue.

This package also provides $2 billion for the creation of 300,000 jobs in community public works programs. These are jobs which can be filled in the very near future and which will be directed toward improving the Nation's public capital facilities. It is true that when compared to 12 million unemployed, 300,000 is just a small poercentage. But for the person receiving a job under this program, its benefits are very real and significant.

For displaced workers, a prime concern in my State of Michigan as it is throughout the country, this amendment provides $200 million for advance funding under the Job Training Partnership Act to retrain and relocate skilled workers from industries such as auto and steel. In 1978, the employment level in the U.S. auto industry was over 750,000. Now it is set at 448,000. Certainly, when the economy picks up, some of those jobs will return. But we have to recognize that it is unlikely that every currently unemployed autoworker will be able to find reemployment in the auto industry. It would be cruel to create the illusion that expanded economic growth will be sufficient to totally revitalize the auto industry and bring it back to its highwater mark. That is why it is important to take steps now to institute a retraining program on an accelerated basis.

Finally, this package modifies the third year of the tax cut and, thereby, not only funds the jobs initatives, but also provides additional revenues to reduce the deficit. This modification would preserve the third year of the tax cut for most Americans, and ask for a measure of sacrifice from those upper income individuals who have thus far benefited disproportionately from the tax and economic program. The goal here, then, is to take a step which would reduce the deficit so that the private economy can expand without being crowded out, and ultimately stalled, by massive Federal borrowing.

I urge my colleagues to support this package. While it is true that it is being offered from this side of the aisle, I believe that it is consistent with the concerns which were expressed by a majority of Americans in the recent election. They spoke out loudly and clearly that unemployment is too high and that action must be taken to alleviate the suffering it is causing. Passage of this package will enable us to show them that the U.S Senate is listening.

I thank the Chair and I yield the floor.

Mr. BAUCUS addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I am not going to take much of the Senate's time this evening. I think the issue is joined. I think Senators have studied the amendment. They have made up their minds. I should however, like to make three very brief points.

First of all, we all know that this underlying bill, indeed the amendment offered by this side, is not going to send Americans back to work. It is not going to lower unemployment immediately down to 6.7 percent. It is not going to find jobs immediately for the 12 million who are unemployed. We all know the essential reason why we have such high deficits which drive up interest rates. The essential reason why people are unemployed is due to the high interest rates. We have to get budget deficits down and we have to get interest rates down. A lot of it has to do with the Federal Reserve's monetary policy. I think Chairman Volcker is beginning to realize that lower interest rates, expanding the money supply slightly, is the course that he must pursue if we are going to begin to get unemployment down and lower deficits so we get America moving again.

I want to draw the Senate's attention to two of the nine points that are listed in the components of the Democratic program. The first is the last point, No. 9, agricultural export stimulus. That is earmarked at $750 million.

Mr. President, this portion is very simple. It is designed to help stimulate agricultural exports. It is $0.75 billion to the CCC revolving fund, and as a revolving fund it is not going to add to the deficit. It is a credit program. Credits are extended to overseas buyers of American agricultural products. With the purchases of American agricultural products, wheat, feed grains, et cetera, we are able to help our farmers; we are able to get more agricultural products overseas at no cost to the deficit. Indeed, it should create over 26,000 jobs, as well as expand our agriculture markets. Every $1 billion increase in agriculture exports generates some 30,000 jobs in the United States.

I cannot see, frankly, Mr. President, why anyone would oppose this because it is a no cost program. There are not very many of those around.

The other point is No. 6, reforestation and timberland improvement. This is $100 million. It is not a lot of money but it is a step in the right direction—to spend more of our effort to timber stand improvement and reforestation.

Today, Mr. President, there is a some 1.7-million-acre backlog in timber stand improvement. Presently, the Forest Service has budgeted about 400,000 acres only of timber stand improvement. That is less than a fourth of the backlog. This amendment, $100 million, is divided up into several components. Part of it is road repair and construction, part of it is facility improvement, and only $20 million of it is earmarked for timber stand improvement. That $20 million, Mr. President, will add another 200,000 acres at least to our reforestation program. That is a capital expenditure. That is, timber stand improvement. We are going to increase the productivity of the forests. That is critical. We all know one of the areas where unemployment is the highest is in the Northwestern States of our country. Those are States dependent upon the forest products industry. That industry is dependent upon houses, and that, of course, is dependent upon lower interest rates. It is high mortgage interest rates which cause the decline in the housing program. It is the dramatic decline in the housing program which has thrown hundreds of thousands of Americans out of work in the forest products industries States, particularly in the Pacific Northwest. Those States are States with very high percentages of public lands where timber sales will help the forest products industry as opposed to other parts of the country where there are fewer public lands.

If we can increase the productivity of our forests, that is, as a capital expenditure, we are going to help increase the supply of timber available to the forest products industry when interest rates begin to decline. In the meantime, Mr. President, we are putting Americans to work with timber stand improvement, with reforestation. Sure, it is temporary, it is a stop gap program, but it is a temporary stop gap program that makes sense. It is not a make-work program by any stretch of the imagination.

I strongly urge the Members of this body to support the underlying amendment. It is a good amendment. It is not going to solve all our problems but it is certainly going to help put Americans back to work immediately, in the short run, and also it is going to help us to buy a little time so that we can direct our efforts, when we meet next year, to solving the fundamental problems. The fundamental

problems involve disparate rates between the United States and other countries, the yen and the mark and the franc, for example. Problems also revolve around differing export policies of various countries. We in the United States I think are being taken advantage of in this regard. Fundamental problems revolve around efforts in the United States for management, labor, and government to join and work together. There are many fundamental problems we have to address. They are not easy, they take lots of time and effort, but certainly the passage of this amendment will buy some time so that we can begin next year to get to the heart of the matter. I think, Mr. President, that we owe our country no less; that we certainly owe it more if we can do it in the remaining few hours. I strongly urge my colleagues to support the amendment.

Mr. President, I yield the floor.

Mr. BOREN addressed the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. BOREN. Mr. President, the administration proposal does not address the critical situation which exists on the Nation's farms, I am supporting this alternative package principally because I believe that any emergency economic plan should address the needs of agriculture. An integral part of the Democratic alternative is an appropriation for the agricultural export credit revolving fund.

Agriculture is the largest industry in this Nation. Agriculture employs more workers—23 million—than any other industry and is larger than the auto, steel, and housing industries combined. One out of every five jobs in private enterprise is related to agriculture. About 20 percent of the gross national product is generated by agriculture.

Agricultural exports are the one aspect of U.S. trade which has kept the overall trade deficit from increasing any further. Indeed, in 1982 alone, the agricultural trade surplus decreased the overall trade deficit by $23.74 billion.

Over the past two decades, the value of agricultural exports has grown from $4 billion in 1960 to over $40 billion in 1980. However, the U.S. share of the world market for certain commodities has declined recently due to subsidized competition from the European Community and other nations. For example, the EC's share of world wheat trade has increased from about 6 percent in 1970 to 16.5 percent in 1982-83. In poultry meat, the EC has moved from the world's largest importer in the midsixties to the world's largest exporter. The Community now accounts for 35 percent of the world broiler market. The EC is the world's largest dairy exporter, accounting for about 60 percent of world trade. Prior to 1973-74, the EC was a net importer of beef and veal. Now the EC is the world's second largest exporter behind only Australia. Total EC export subsidy expenditures amounted to $7.6 billion in 1981 and should reach $8 billion in 1982.

Not only have our exports for certain commodities been on the decline, but net farm income, adjusted for inflation, is lower than it was in 1932, the worst year of the Depression. It appears that farm income, adjusted for inflation this year, will be the lowest since the Department of Agriculture began keeping records of farm income in the early part of this century. In my own home State of Oklahoma, the net income per farm in 1981 amounted to only $14, down from $5,460 per farm in 1980.

While we readily admit that the drastic decline in net farm income is not solely attributable to the weakness of exports. Exports do play a major role in strengthening farm income. For example, farmers attribute approximately one-fourth of their income to exports. For certain commodities, the percentage of income derived from exports is even higher. Sixty cents out of every dollar of income from rice sales is attributable to exports; wheat and flour, 60 cents; soybeans, 50 cents; cotton, 60 cents; and coarse grains, 30 cents.

The impact of agricultural exports upon the economy is considerable. Exports help farmers make the most efficient use of their resources and keep costs lower, enabling U.S. consumers to spend a smaller share of disposable income on food than consumers in other nations. If production had to be reduced to the level of domestic demand alone, farmers would have no choice but to allocate fixed costs to the remaining output. This would increase unit costs to American consumers substantially. In 1979, U.S. consumers spent an average of 14 percent of total expenditures on food whereas, in Japan, consumers spent about 22 percent of their income on food and in the U.S.S.R., about 32 percent. If we allow agricultural exports to continue to decline, we will probably see a rise in the percent of income spent on food in the United States as well as economic collapse in the agricultural sector of this country.

Agricultural exports not only provide American consumers with a good food bargain, they also provide jobs. That is why it is so important that in terms of addressing an overall approach toward improved employment opportunities in this country, we not leave out the agricultural sector, which as I said earlier, provides, directly or indirectly, one out of every five jobs in this country.

The U.S. Department of Agriculture estimates that for every $1 billion of agricultural exports, 35,000 jobs are created. In 1979, agricultural exports alone provided jobs for over 1 million Americans.

U.S. agricultural exports add stability to the dollar. Further, each dollar of agricultural exports stimulates an additional $1.05 of output in the U.S. economy. About 70 percent of the additional economic activity accrues to nonfarm sectors of the economy.

So it is not only directly on the farm, in agricultural processing, that jobs are created, it is in the nonfarm sector of the economy as well.

To export, we must have credit available on a continuing basis. A self-supporting revolving fund will obviate the arbitrary process of the budget which ignores the fact that the credits are repaid with interest, realizing a profit for the U.S. Government.

This administration has repeatedly said that exports are the key to their farm policy. Yet, this administration has failed, as of now, to ask for an appropriation for the Agricultural Export Credit Revolving Fund, which was authorized in last year's farm bill.

The provision in this package will provide an appropriation of $750 million for the revolving fund. The fund will be used by the Commodity Credit Corporation to finance short-term commercial export sales of agricultural commodities and export sales of breeding animals, including cattle, swine, sheep, and poultry.

Mr. President, this provision is vital to the foundation of our country, as that foundation is agriculture. If we fail to take actions to insure the economic recovery of American agriculture, we will, in the same breath, fail to take actions to insure the recovery of the American economy as a whole. I urge my colleagues to join in this effort.

This provision as a part of this package is one of the most important provisions in it. From my point of view, it is perhaps most important of all. I applaud my colleagues for being sensitive to the needs of agriculture, for not leaving that vital sector of our economy out of this emergency economic package. I am proud to join in support of that package and support, in particular, its provisions for improving agricultural exports.

Mr. SASSER. Mr. President, I rise in strong support of the jobs bill amendment offered by the distinguished Democratic leader (Mr. ROBERT C. BYRD).

I commend him for the initiative that he has taken to address our Nation's mounting unemployment problem.

The current unemployment situation is truly of record dimensions.

I am confident that the majority of my colleagues are familiar with the dismal statistics produced by the present economy: 10.8 percent of our

labor force is unemployed—the highest rate since 1940; 12 million workers were unemployed in November 1982—the highest number since 1933; 10.1 percent of all adult men were unemployed in November—the highest rate on record; 9.1 percent of all adult women were unemployed in November—again, the highest rate on record.

A shocking 16.5 percent of all blue-collar workers were unemployed in November—the highest rate on record; 24.2 percent of all teenagers were unemployed in November—the highest rate on record; 867,000 workers over the age of 55 were unemployed in November—the highest number on record; and 1.6 million unemployed workers became so discouraged about the economy in the third quarter of 1982 that they dropped out of the work force—the highest number on record.

These statistics are appalling.

They paint a vivid portrait of the employment policies of this administration.

It is a portrait of economic depression.

It is a portrait of social and family disruption.

It is a portrait of individual despair.

I wish to share with my colleagues a letter I received from a 9-year-old girl, written on the type of rough pulp paper that children use in grade school for their writing material. It begins with this line.

DEAR SENATOR SASSER: I need your advice (misspelled). My daddy lost his job and mom was laid off. The bank took our house back. We are out of money. I am 9 and I need to know can we ask another country for foreign aid? Nobody is helping us now. We used to live in Memphis so I thought you would know.

Love,

LISA REYNARD.

I say to my colleagues that there is no reason for this Congress to stand idly by and take no action to alleviate the suffering of our people.

We can work to help reduce unemployment by passing the Byrd jobs amendments.

We can help create 411,000 jobs by this amendment and begin to make a dent in the unemployment situation.

We can put 20,000 individuals to work in the very successful title V senior citizen employment program.

We can put 10,000 construction people back to work in rebuilding our deteriorating public housing.

And we can put 340,000 people back to work in repairing the basic capital facilities in local communities all across this country.

The proponents of the gas tax bill say we need their legislation to put our highways back in working order.

I say that we need the Byrd amendment to help bring the economy back into working order.

And in that regard I commend the Democratic leader for his tax proposals which more than offset the cost of this jobs program.

Mr. President, I am going to vote for this amendment because Tennessee and the Nation need this jobs program.

The unemployment rate in my sunbelt State stands at 11.2 percent. Two-hundred forty-three thousand of my fellow Tennesseans are out of work and they need work. They need it now just as the father of this child who wrote me this letter.

Eight Tennessee counties have unemployment rates of over 20 percent. Three of my State's six metropolitan areas have unemployment rates of 10 percent or more.

Perhaps worst of all, Mr. President, is that nearly 80,000 people from my State have exhausted their unemployment benefits as of this past November.

These are 80,000 citizens, men and women, single individuals and heads of families who have tried and tried and tried to find a job but no jobs were available.

I say that the economic policies that we are following have failed and they have failed the people of this country and failed the people of my State. They want to work but they are being denied the opportunity to do so.

This economic situation is intolerable. It cannot be allowed to continue. It must be changed and it must be changed now.

So I urge all of my colleagues to vote for the Byrd jobs amendment and let us get to work and put this country back to work again.

Mr. DOLE. Mr. President, I understand there may be one additional request on the Democratic side and I think the distinguished Senator from Oklahoma wanted to address questions to the minority leader. We are opposed to the amendment. And I have a statement which I will give at the appropriate time.

But I wonder if we might suggest the absence of a quorum and notify the minority leader that the distinguished Senator from Oklahoma, Senator NICKLES, would like to address some questions.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. NICKLES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. Mr. President, I see the minority leader is now in the Chamber. I wonder if I might be able to address a couple of questions to the principal sponsor of this legislation.

I see the distinguished colleague from West Virginia, the minority leader, Senator BYRD is now in the Chamber. I have a couple of questions about the proposal if he might be able to respond.

I listened to some of the debate from the other side and I heard, I think, a couple of different numbers about the number of jobs that would be created. Could he tell us again the number of jobs that would be created by this amendment?

Mr. ROBERT C. BYRD. Mr. President, a minimum of 411,000.

Mr. NICKLES. 411,000 jobs for 1983 and also for 1984 and 1985?

Mr. ROBERT C. BYRD. And that would be in addition to the highway and mass transit pieces which would be 340,000. So it would be something on the order of a total of about 730,000 to 740,000 to 750,000.

Mr. NICKLES. The cost of this proposal I see in the handout which the Senator has given is a total of $5.3 billion for 1983. Does the Senator have the cost figures, what it would be for 1984 and 1985?

Mr. ROBERT C. BYRD. Nothing would be spent in 1984 and 1985 other than that required by the environment and public works highway provision and the Banking Committee's mass transit program.

Mr. NICKLES. Does the Senator happen to have what the total would be to include 1983, 1984, and 1985 in total expenditures in the bill?

Mr. ROBERT C. BYRD. $5.3 billion.

Mr. NICKLES. I see a total of $5.3 billion in 1983. Were there any additional expenditures for 1984 and 1985?

Mr. ROBERT C. BYRD. I thought I just answered that question.

Mr. NICKLES. It is $5.3 billion for all 3 years total. If you are going to create 411,000 jobs, are my calculations correct that that is somewhere in the neighborhood of about $13,000 per job total expenses?

Mr. ROBERT C. BYRD. That may be correct. I would not argue with that.

Mr. NICKLES. Also is it correct that if I add the tax increases, the postponement of the 10-percent tax, for those over the age of 65 beginning in July for 3 years, that is going to raise $24.9 billion?

Mr. RIEGLE. Mr. President, will the minority leader yield?

Mr. ROBERT C. BYRD. Yes.

Mr. RIEGLE. It is not over the age of 65; it is those with incomes above $65,000 a year. It has nothing to do with age. The Senator may have misspoken himself, and I just want to make it clear.

Mr. NICKLES. Thank you. I meant to say those earning over $65,000 a year. So persons with incomes over $65,000 would not get the additional tax cut, and that is estimated to raise $24.9 billion.

Mr. ROBERT C. BYRD. That is correct.

Mr. NICKLES. Looking at this, correct me if I am wrong, the net effect then of this would be that in 1983 you would have outlays of $5.3 billion and revenues of $1.6 billion, which adds to the deficit $3.7 billion for 1983, but then for 1984 you would actually have a surplus for reducing the deficit of about five point some-odd billion dollars, and the same thing for 1985?

Mr. ROBERT C. BYRD. There would be a deficit at the beginning but that would be wiped out by the surplus in the outyears.

Mr. NICKLES. So the net result would be we would have tax increases of $24.9 billion and expenditures of $5.3 billion for the 3 years?

Mr. ROBERT C. BYRD. Will the Senator repeat his question?

Mr. NICKLES. So the net result—I am trying to figure out the financial impact of this over a 3-year period of time—would be raising $24.9 billion in revenues and increasing expenditures by $5.3 billion.

Mr. ROBERT C. BYRD. Overall we would assume spending about $18.9 billion with about $24 billion in revenue.

Mr. NICKLES. So over a 3-year period of time it would be $18.9 billion, and the total revenue increase would be $24.9 billion.

Mr. ROBERT C. BYRD. Yes.

Mr. NICKLES. I thank the Senator and I appreciate his responses.

One additional question: Have there been any hearings on this amendment?

Mr. ROBERT C. BYRD. No; there have been no hearings on it, but the advice of many economists and others has been utilized.

Mr. NICKLES. I appreciate the Senator's responses to our questions.

Mr. President, I would like to make a couple of general comments on this amendment that is before us today. Certainly looking at the list of items that are on it there are a lot of things that have a great deal of appeal to many Members in this Chamber.

I am opposed to the amendment, however, because I do not really think we can afford it. We are talking about enormous tax increases, we are talking about $24.9 billion coming out of the private sector to fund these particular jobs or these particular proposals. I seriously doubt whether or not there would be an additional job created by this proposal because when you take that amount of $24.9 billion out of the economy that is going to cost some jobs.

Granted you might be creating jobs for any individual item that was mentioned here, water and sewer infrastructure, and so on. You may increase employment in this particular sector, but by taking $24.9 billion out of the private sector you are going to be costing jobs someplace else.

So I think the net effect would actually not be a real stimulus or a job stimulus. I do not think the net effect would be a reduction in unemployment. I think actually it would be just the reverse of that. So I hope the Senate in its wisdom will decline to support this amendment regardless of its attractiveness, and I hope we will at the appropriate time move to table the amendment.

Mr. ROBERT C. BYRD. Mr. President, may I say in response to the Senator's concern about taking money out of the private sector, as we have said repeatedly, the program would be paid for, by a delay in the tax cut for those more wealthy persons in our society who are not showing an inclination on the whole to invest in any event and, therefore, in my judgment, it would not be impinging upon the private sector and, therefore, would not be impinging upon investments.

The investment potential—and we have been hearing this all along, I have been hearing this now for about 3 or 4 years, about how this Kemp-Roth tax scheme was going to promote investment in this country. Well, the program has been in place and business investment has not been promoted. As a matter of fact, those businesses that might otherwise be expected to invest, and we had hoped to have them invest, are scaling down their plans for investment over the next period of a year or so. I do not much blame them when the utilization of equipment, plant capacity, is under 70 percent. The steel industry, for example, is showing a capacity utilization of only 40 percent. How can one expect the private sector to invest when there is that much unused plant and equipment lying around?

So this is not a panacea, as I have stated earlier. We do not expect this to cure the unemployment problem, but it is a step in the right direction, and with the monetary resolution which I have introduced—which I think is probably the more important of the two measures, and which I would hope to call up as an amendment to this bill or to the continuing resolution—which would commend the Fed for taking actions in recent months to bring down the interest rates by lowering the discount rate. That resolution is really the kind of step we ought to take to get this economy growing again because it is only with a healthy and expanding economy that we are going to really put people back to work.

Mr. President, 12 million people are out of work, and either of these proposals is just a drop in the bucket as far as putting 12 million people back to work. But this amendment is at least two drops in the bucket.

I think the way to get this country moving again is to get away from the tight-money, high-interest-rate policy that the Federal Reserve Board has espoused, and which has been supported by the administration in the words of Mr. Stockman himself. "We urged it, we endorsed it, we support it."

Only in that way can the private sector finally begin to grow and invest and put people back to work because it is the private sector that is capable of putting people back to work if it has a chance to grow.

I am glad to see the Federal Reserve moving in that direction. But it was not moving in that direction early this year when I sent a letter, which was endorsed by every Senator on this side who attended the caucus, calling on the President to urge the Federal Reserve Board to relax its tight-money policy. Legislation was introduced by me on behalf of the Members on this side that would require the Federal Reserve Board to institute certain actions, to relax the tight money policy, and to bring down interest rates, and we then began to get action by the Fed.

I was in the midst of a little debate down at the Greenbrier, a so-called debate during the campaign, one of those college-type debates, not really debates, and I got a call from Mr. Volcker. I thought at that moment it was NCPAC or some crank call, but I found out later that it was really Mr. Volcker calling me. He wanted to come to see me. So I got his attention fast. He was gracious enough to ask to come to see me, and I was gracious enough to accept him, and we had a nice talk in my office.

He wanted to know how hard I was going to push that measure. Well, I said "I am not going to push it this year. I see that the Fed is taking steps to relax the tight money policy. It has the tools, it has lowered the discount rate, and it can operate through many other ways to bring down interest rates—Federal fund rates, discount rates, its open market operations, and so on. It is not my desire to make this an election gimmick, so I do not intend to press hard for it before the election. I will wait until after the election and see what continues to happen."

The San Francisco Examiner wrote an editorial saying that, perhaps, it was the legislation, who knows—perhaps it was the legislation that was introduced in the Senate and followed up in the House—that reminded the Federal Reserve Board that it is the creature of the Congress and that the Congress still has the power to step in and to provide guideline policies for the Fed. I understand that Mr. Volcker has been talking with a good many Senators around the Hiill on both sides of the aisle and, perhaps, he has extended his talks to Members on the other side. But he has been very concerned about that legislation. And, rightfully so, he is concerned about the economy. Apparently, he does not propose to stay the course.

But in any event, action has been taken by the Fed to relax the tight money policy, so we have seen the drop in the discount rate and we have seen the drop in the interest rate. And this is the direction in which to go.

I would say to the distinguished Senator from Oklahoma, if we really want to get people back to work, the Federal Reserve Board can go a long way in that direction and is at last moving in that direction, because, with all of the unused plant capacity, we are not going to see much investment. And following the adoption of the Kemp-Roth scheme, much heralded investments were supposed to follow, and we were told to anticipate a great spate of investment, the business community was going to modernize the plants, but we saw just the opposite. We saw plant utilization shrivel and shrink.

So I would say to the distinguished Senator, I am not persuaded by his argument that this legislation would inhibit the private sector from investing money when what we propose to do is simply delay a tax cut for those people in this country who can afford to have a tax cut delayed. If experience is to be a light unto our feet, we have not seen them investing thus far. But we have to do something to begin to put people back to work, and this proposal that we have put forward here is a step in that direction.

There is an old fiddler's tune, "It is a Step in the Right Direction, That is All." It would help the elderly. There is a good farm provision here that would help farmers to increase their exports of grain and fruit and other foodstuffs. There is a provision for retraining displaced workers. There is a soft infrastructure program that would deal with sewer and water systems. And it would replace some of the programs that have been dismantled in recent months which are so necessary to build sewer and water systems and to build the infrastructure in some areas so as to encourage industry and stimulate the economy.

So I would simply say to the Senator that I doubt that this legislation would have any adverse impact on investment, but may indeed, have just the opposite effect.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I understand there still may be one additional speaker on the Democratic side and I think there is a speaker on the Republican side. The Senator from Kansas must necessarily be absent between the hours of 7 and 8. I am not certain we can have a vote before that. We are checking with the majority leader now to see whether or not that can be arranged.

I am wondering, while we are waiting for the majority leader, if I might yield to the Senator from Indiana, who wanted to speak on this proposal. I still need a couple of minutes to speak on it. It may be that we can still vote before or at 7 p.m. if that is satisfactory to the Senator from Indiana. If the Senator wants more time, he may have it.

Mr. QUAYLE. I need 5 minutes.

Mr. DOLE. I yield the floor.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. QUAYLE. Mr. President, I would like to put in perspective the jobs alternative and to talk about two of the key points: Item No. 2, which is the labor intensive community public works program, and also item No. 4, the displaced workers retraining. We just received a copy of the entire bill and we are trying to go through it. But I do have some comments I would like to make about those two particular programs.

Item No. 2, which is the labor intensive community public works program, is identified as a $2 billion program that is going to create 300,000 new jobs. I believe that the question that we must ask ourselves is: Will it work?

This really ought to be rephrased and identified as CETA public service employment, because that is precisely what it is. CETA public service employment has been defeated in this Chamber a couple of times, defeated on the continuing appropriation bill before we adjourned for the election and it was defeated in the budget. It is a program, quite frankly, that gave CETA the bad name. It was really one of the incentives that made many of us that wanted to see real training and employment in this country come up and forced to come up with a different name because of the tarnished reputation and credibility that CETA public service employment had.

Now we are coming back with the same old type of program that we have had in the past that really has not worked and we are calling it some other name, but it is CETA public service employment. I do not believe that the majority in this body wants to see the CETA public service employment come back. I believe that they are on record and hopefully they will follow in the way that they have worked in the past.

Obviously, everybody is for jobs. Nobody is against jobs. Everybody wants to see job opportunities. Nobody likes to see the denial of any job opportunities. But will it work? Do these countercyclical public employment programs work?

If you go back in any kind of historical analysis, it shows that these programs come on line not during the height of the recession but usually after the recession is over. If you go back to any of the public works stimulus or any of the countercyclical programs from the 1960's and through the 1970's, you will see that when they came in and the real creation of the jobs, short-term jobs, came after the recession and in a time of recovery. Unfortunately, Mr. President, we cannot predict when the recovery is going to take place.

Now I know that is very important that we, as a government, concerned as individual Senators, concerned about unemployment, do something about unemployment. There has been some discussion about the interest rates. The distinguished minority leader, the Senator from West Virginia, talked about interest rates. I agree. I am one of those that have worked to bring pressure on the Fed to have a policy that is going to demand lower interest rates so we can see that gap between what the interest rates and inflation rates are, the real interest rates in this country which I believe the Senator and myself have both said are unacceptably high.

They have forced small businesses to fail. They have helped create this unemployment situation. I believe that the chairman of the Federal Reserve has received the message in private conversations with myself, and now I understand with the Senator from West Virginia, with others, with people within the administration, that high interest rates are totally unacceptable, and we cannot have any kind of economic recovery with that.

So the Senators, as part of that Government representing people, concerned about the misery attached to unemployment, have to do something about the problem.

What have we done about the problem? Right before we adjourned, the Congress passed the Job Training Partnership Act which the President signed, a very important piece of legislation, introduced by myself, Senator KENNEDY, Senator HATCH, Senator HAWKINS, Senator PELL, and others, who worked on that on a bipartisan basis, to get it through and have a training and employment program on the Federal level. It dealt with the dislocated worker program. It was the first time that we recognized there was a problem with the dislocated worker program.

We have done that. Now what we have before us is the highway tax bill that is going to try to do something about fixing the highways, fixing the bridges, maintenance, completion of the Interstate System. It will produce some jobs, though not nearly enough. It is not called a job creation bill, although every bill now introduced in this Congress will probably be referred to somehow as a job creation bill because everybody wants job creation, job opportunities, and the hopeful aspect of going back to work.

Further, this CETA public service work program of $2 billion proposed as an alternative has no training in the

program. There is training in the proposed alternative, but there is no training in CETA public service employment. It is a temporary, makeshift job. That gets me to the second point I want to discuss. That is the dislocated worker provision.

In the alternative, according to the figures that I have before me, the proposal is for $200 million.

Mr. President, I circulated to Members of the Senate when I returned after the election, shortly thereafter, a letter saying that I, as one who wanted to see the dislocated worker program implemented sooner than its enactment date of October 1, 1983, would, on the continuing resolution or at some appropriate time, ask for and request the $50 million for that new program.

I have been outdone four times over, $200 million. I want to say that $200 million could not be absorbed by the dislocated worker program that we have just put in place.

I believe one of the fallacies and one of the faults of people who are sincere and dedicated to seeing this program going forward, or any other program from the Federal level, is they say the only way to do it is to just throw a lot of money at it. But $50 million is a rational amount, not $200 million.

I would like to just read to you from the Department of Labor of the State of Michigan, which has a small problem of unemployment, as does my home State of Indiana. Michigan is the top State of unemployment in this Union. I believe it is instructive to look at what they say about what the funding level in the dislocated worker program should be. I quote from the Department of Labor of the State of Michigan.

> The Michigan Department of Labor believes strongly that title III of the Jobs Training Partnership Act should be funded for fiscal year 82 and 83.

And so do I.

> Although funds are required now, the Michigan Department of Labor believes just as strongly that the funds should be made available through a phased-in formula. It has been the Department's observation that a number of past governmental programs have required initial expenditures of funds too rapidly when first authorized. This does not provide the careful planning that is necessary to implementing an effective response. Rather than being able to devote adequate time to initial organization, these programs find themselves under undue pressure to spend. The Michigan Department of Labor would therefore prefer to see title III funded in a rational manner.

Mr. President, I read that to this body with the understanding that we do need to do something about the dislocated worker provision, but I believe that it underscores the problem with the Democratic alternative that is before us. Instead of $50 million, which I believe would be rational, it is $200 million, four times more than the system could properly absorb. One of the problems that we get into in Government programs if you just throw out massive amounts of money is that they do not work. They are forced to go out and try to meet the results very quickly. What I would like to see is a program that would work, a job training program that would work, the creation of jobs that will work.

I believe that this response is the response that we have heard too often, just to wad up a bunch of money and throw it at the problem. I think it was wrong then and I think it is wrong now. Furthermore, I believe that it would really be a cruel hoax to the American public to have some statement that there is a magic solution to solving the unemployment problem in this country.

Unemployment climbed to 10.8 percent in November, continuing a trend which must be brought to a halt. As Congress examines solutions to deal with this facet of our complex economic problems, I would like to urge my colleagues to support a $50 million appropriation level for the newly enacted dislocated worker program, title III of the Job Training Partnership Act. This level of funding would accelerate the implementation of the dislocated worker program. I am offering this as an amendment to the Labor, Health and Human Services, and Education Appropriations for fiscal year 1983, H.R. 7205.

The Job Training Partnership Act was designed to meet the needs of our Nation's structural unemployment problems. Not only does it provide a training program for the economically disadvantaged—title II—but it also has a program to provide assistance to dislocated workers. The continuing resolution currently funds the basic training program for the economically disadvantaged, but it does not fund the dislocated worker program.

We must accelerate implementation of the dislocated worker program because there is evidence of a growing need to assist experienced workers who are unemployed. Throughout 1982, factories and businesses across the country have been closing and workers have been forced into idleness, which will not end even with economic recovery. The Bureau of National Affairs estimates that over 150,000 workers have lost their jobs due to plant closings in the first 9 months of this year alone. Testimony from the Department of Commerce before the Subcommittee on Employment and Productivity estimated a permanent decline of 500,000 jobs in automobile and related employment.

According to Maritn Feldstein of the Council of Economic Advisers, only 30 to 40 percent of the October unemployment was cyclical and the rest was structural. In other words, over 6 million unemployed workers cannot expect to find jobs even with maximum non-inflationary growth in the economy.

Individuals affected by structural changes in our economy are forced to rely on unemployment insurance benefits or their own resources to help them through this difficult time. Dislocated workers have little chance of returning to their former occupations. Many of them have exhausted their unemployment insurance benefits and, eventually, they will exhaust their personal resources as well. Once-productive workers may become dependents of our social welfare programs at great social and economic costs. However, with a minimum amount of assistance, they may once again join the work force as productive citizens.

Under the dislocated worker program, these individuals will receive assistance in job search, pre-layoff assiistance, relocation assistance, and training in jobs skills for which demand exceeds supply. The $50 million appropriation that I propose for this program will be an investment in the future, when millions of more dollars will be saved through decreased public income transfer expenditures and increased national productivity.

RETRAINING DISLOCATED WORKERS: $50 MILLION IS BETTER THAN $200 MILLION

The sum of $50 million will clearly not provide assistance to a large proportion of the dislocated workers but it would be, in my opinion, a serious mistake to increase the size of the appropriation because it is not sufficient to deal with the whole problem. Retraining of dislocated workers is a complex business in which we have little experience. We must mount well-considered programs that will retrain workers for actual job opportunities. We must not just throw money at the problem with the inevitable result that we will get programs that do not work.

It has been suggested that, for fiscal year 1983, $200 million be appropriated for the dislocated worker program. This is twice as much as was proposed in the original Quayle-Kennedy bill. This level of funding raises questions which go beyond the obvious considerations of fiscal constraint. In their enthusiasm for alleviating the problems and suffering of dislocated workers, the supporters of this higher level of funding are overlooking administrative realities regarding implementation of the new Job Training Partnership Act (JTPA). At present, JTPA simply does not have the administrative capacity to efficiently and effectively distribute such a high level of funds.

The JTPA establishes a new delivery system as well as new programs. Fiscal year 1983 will be a transition year during which the new system will be put in place. We have a very short

period of time to accomplish this enormous task. The number of participants in the delivery system has increased and there will be shifts in responsibility and authority. New relationships must be established. Governors, in addition to administering the dislocated worker programs, now have many of the responsibilities that formerly belonged to the Secretary of Labor. The successful establishment of the new service delivery system is essential to the future success of job training programs.

The $50 million appropriation level which I propose would be sufficient to implement the new dislocated worker program without overburdening the system. In the past, one of the factors which inhibited the successful operation of the CETA program was that it was constantly required to adjust to meet Congress changing demands. As the CETA program was adjusting to meet the most recent Federal mandate, Congress would require further changes in response to a new economic situation. It is imperative to the success of JTPA that we not repeat the mistakes that were made with CETA. During the remainder of this fiscal year, our chief goal should be the successful establishment of the new job training system.

States need time to plan for the distribution of funds for dislocated workers programs. Because of the advance budgeting required, many States may not have available the matching funds that are a necessary requirement for receipt of Federal funds under this program. Also the dislocated worker program is a new concept. The problems of dislocated workers are enormous and we are still trying to understand the nature of the problem and remedies to it. Recently, a few, small programs have been set up to explore ways of dealing with the problems of dislocated workers. But we have very little prior experience upon which to build. A look at the models that are available shows that careful planning cannot be overemphasized.

One of the best worker retraining programs is the downriver community conference economic readjustment project in southeastern Michigan. This pioneering program is generally regarded as having been highly successful. In testimony before my Subcommittee on Employment and Productivity, program operators from the Downriver project described the planning that is necessary to provide experienced workers with assistance to reenter the labor force. Witnesses described the network they developed of employers and employment and training agencies. Their program also includes outreach, meetings with management and labor at factories that are closing, orientation, aptitude tests, job-seeking skills workshops, and finally determination about the most appropriate assistance to provide for each individual: direct job placement, classroom training, or on-the-job training. As one witness said, "The manner in which we do this assures marketability of our workers, because we feel an obligation not to set them up again for failure and not to train them in an area where there is not a job."

A look at the beginning of this program shows the time lag between the initial implementation of the program and the expenditure of funds. In fiscal year 1981, the Labor Department obligated $3,825 million to the Downriver project. During fiscal year 1981, less than $1,000 was outlayed. During the first full year of operation—fiscal year 1982—outlays were $2.6 million, less than 70 percent. This was partially explained by the fact that one factory did not close as soon as was expected. But this only highlights the necessity for careful planning.

At this time, the service delivery system is too delicate to meet the demands that would be imposed upon it by funding the dislocated worker program at a $200 million level. With that level of funding would come expectations that a specified number of individuals should receive training. I am afraid that the pressure of that demand would push the system beyond what it is reasonable to expect and the results would be disastrous. It would inevitably result in poor decisionmaking and misexpenditure of funds. In an effort to spend the money within the remaining months of fiscal year 1983, dislocated workers would be hurriedly assigned to training in whatever programs are available, without due consideration being given to the appropriateness or desirability of the training.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. QUAYLE. I yield to the Senator from West Virginia.

Mr. ROBERT C. BYRD. First, on the CETA program, this is not a CETA program. There are different components here than were involved in the CETA program.

First of all, this leaves a tangible product which will benefit communities.

Second, it protects against the employment of persons on a patronage basis. Persons would be employed who are referred only by the U.S. Employment Service, which is, I think, quite different from the way the CETA program worked.

Finally, I would say that the amendment requires expenditures within 90 days and not within 6 months, as the able Senator referred to.

So in these ways and in others it is very different from the CETA program.

The Senator would not find me here proposing a new CETA program along the old lines, under the cloak of a new program. I would simply say that the Senator is wrong when he refers to this program as a new CETA program.

I yield to the Senator from Connecticut.

Mr. QUAYLE. I will be glad to yield to the Senator in a moment.

The reason I identified this as another CETA public service program is that essentially the goals are the same. I believe the goals under he labor intensive community public works program are that you will put people on the public payroll to provide services for State and local government. I believe that is what you are trying to do under this particular part of the $2 billion that says you are going to create 300,000 jobs.

Mr. BRADLEY. Will the Senator yield at that point?

Mr. QUAYLE. I yield.

Mr. BRADLEY. Will the Senator point out where it says that we put the people on the public payroll as opposed to contracting out with the private sector?

Mr. QUAYLE. I will be glad to try to find it. I want to say, on the amendment that I received the amendment, and the staff also received the amendment, about 20 minutes ago. I am going from the past history of these public work programs that we have been talking about. I will try to dig through and find it to see if I am incorrect that the stated goal is again to put people on the public payroll to perform State and local jobs, to provide services for the State and local government. I am talking about item 2, the labor intensive community public works program.

Mr. DODD. Will the Senator yield at that point?

Mr. QUAYLE. I am glad to yield.

Mr. DODD. This proposal has been around now for a good week or more. If the Senator became aware of the particular provisions only in the last 20 minutes and if he is willing to be corrected, let me make it quite clear——

Mr. QUAYLE. I do not believe the amendment has been around for a couple weeks. We just got it about 20 minutes ago.

Mr. DODD. It has never been suggested that this was going to be a CETA program, despite the efforts of the Senator to characterize it as such. This amendment is to use the existing community development block grant program. It will fund existing projects which many communities in Indiana, Connecticut, and other States in the country have had backlogged for some time. It will take those needed programs, and employ skilled workers that are out of work in Indiana and Connecticut. You have 11.4-percent unemployment in Indiana, almost 300,000 people, many of whom can do the jobs that need to be done.

It is not a training program, not just to be done with public sector workers. Where private contracting can be utilized, it will put some of those people to work. That means jobs for roughly 10,000 people in Indiana. Roughly $60 million is to go to Indiana. If we can take this money on a one-time basis, $2 billion, it will help 300,000 of our fellow citizens who have lost their jobs through no fault of their own, who do not need to be retrained, who just want to do jobs that need to be done, jobs that have been identified by our communities. To call this CETA, to call it public welfare, make-work, is just to totally mischaracterize this particular endeavor.

Mr. BRADLEY. Will the Senator yield for further comment. The Senator from Connecticut perhaps?

The Senator from Indiana has stated that this is the old Democratic throw-money-at-the-problem, CETA, public jobs program.

I challenge the Senator, as I did previously, to find where in the amendment it says these have to be public employee jobs. It does not say that. It can be contracted out to the private sector.

I also ask the Senator from Connecticut to give me his opinion on whether these jobs will come online after the recession is over. There are about 12 million people out of work today. Unemployment is close to 11 percent.

Would the Senator say that there would not be a need for these jobs if unemployment dropped to, say, 10 percent?

Mr. DODD. Of course not.

Mr. BRADLEY. Of course not.

Mr. DODD. You have 90 days. These projects have to be started in 90 days.

Mr. BRADLEY. Does the Senator think that unemployment will drop to 5 percent in 90 days?

Mr. DODD. Of course not.

Mr. BRADLEY. Six percent in 90 days?

Mr. DODD. Of course not.

Mr. BRADLEY. Seven percent in 90 days?

Mr. DODD. Of course not.

Mr. BRADLEY. I thank the Senator.

Mr. QUAYLE. We are still trying to figure out in the amendment whether this is mandatory, that they are going to have a pass-through and the private sector is going to hire them or this is optional. I believe, according to staff, that this is perhaps optional; that the private contractors may in fact be part of putting these people on the payroll. I say, if that is the case, then the element of what they call substitution becomes a real problem. Because of the substitution factor, some of these people may be hired anyway. But if they are going to be subsidized, obviously that is an attractive feature and the net result is not 300,000 new jobs. The net result is a lot less than that.

We just finished talking about interest rates. If we are going to spend $2 billion on what I call a public service, CETA-type program, then there is going to be upward pressure on the interest rates.

Furthermore, since it is optional and you give all this money on a one-shot basis, $2 billion, where do you think it is going to go? It is probably going to go to the local governments, the State and local governments, and they are going to be put on the local public payroll and not the private payroll.

Mr. SARBANES. Will the gentleman yield? Why would it be upward pressure on the interest rates?

Mr. QUAYLE. I believe that any additional spending of $5.3 billion, which the Senator is talking about—I think that any time you put in new programs, there is a tendency to aggravate the deficit. I think the deficit is already——

Mr. SARBANES. The substitute more than pays for the $5.3 billion and in fact makes a contribution to reducing the deficit.

Mr. QUAYLE. We are all for reducing the deficit, but if the Senator thinks that the people out there who watch what the Congress does—you pass a new spending program like that, and that is going to increase interest rates.

Mr. SARBANES. Will the Senator yield?

Mr. QUAYLE. I have the time.

Mr. SARBANES. The Senator should address the matter in a logical fashion.

Mr. QUAYLE. I have the time.

Mr. President, who has the floor?

The PRESIDING OFFICER (Mr. DENTON). The Senator from Indiana has the floor.

Mr. QUAYLE. I thank the Chair.

Mr. DOLE. Will the Senator from Indiana yield?

Mr. QUAYLE. Any new spending program of this magnitude, if the Senator does not think that is going to be upward pressure on the interest rates ultimately, I just disagree.

Mr. SARBANES. Will the Senator yield?

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. I do not want to interrupt the debate; I have to be gone for an hour.

Mr. SARBANES. The way it is going, it may go on for an hour.

Mr. DOLE. Right. I just want to make certain that Senators keep this up for a while because I will be back about 8 o'clock. The Senator from Indiana agreed to speak for only 5 minutes, and we appreciate that. But it may be in an area that needs more discussion. As I look at it, we ought to talk about it at least for another hour, and I will be back. Senator BRADLEY is going with me.

Mr. SARBANES addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. BAKER. Mr. President, will the Senator yield to me for a moment?

Who has the floor?

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I will not take but just a moment.

Mr. BAKER. Mr. President, there are reasons why a vote on the Byrd amendment ought not to occur, in my opinion, for 45 minutes to an hour. There are certain Senators who are occupied in committees, and there are strong reasons why we ought to accommodate those requests.

I should like to put a unanimous-consent request, Mr. president, that might expedite matters a little. I have not discussed this with the minority leader, but he is on the floor and perhaps he would consider it.

I ask unanimous consent, Mr. President, that as and when a vote is ordered on the Byrd amendment, it occur not before 8 p.m. tonight.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I will not object.

May I say that the majority leader and the distinguished Senator who manages this bill were quite willing to enter into a time agreement; they have no amendment attached, and to vote up or down. I would be the last to object to this request.

Mr. BAKER. I wonder if we could amend that to make it—I do not know whether everybody has said their piece on this or not—to have the vote at 8 o'clock?

Mr. ROBERT C. BYRD. That suits me. That is fine.

Mr. BAKER. Mr. President, I ask unanimous consent that a vote occur on or in respect to the Byrd amendment at 8 p.m. today.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

Mr. BAKER. I thank all Senators.

Mr. SARBANES addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. SARBANES. Mr. President, I simply want to make the point that the substitute that is before us more than pays for itself, and in fact by placing a cap on the tax benefits to accure to the very wealthy will make a contribution to lowering the deficit.

Mr. ROBERT C. BYRD. Mr. President, may we have order? I think the Senator from Maryland is entitled to be heard on this point,

The PRESIDING OFFICER. The Senator from Maryland should indeed be allowed to be heard.

Mr. SARBANES. Therefore even if one accepts the premise of the Senator from Indiana which was, as I understand it, that there was a direct correlation between the deficit and the interest rates, this proposal in fact will contribute to lowering interest rates by lowering the deficit. In fact, I will ask the distinguished Senator from West Virginia, is it not the case that the revenues raised by the proposal before us more than cover the programs contained therein and in fact over a 3-year period will provide further revenue to address the deficit?

Mr. ROBERT C. BYRD. Yes; I think in the maount of about $5 billion—$19 billion expenditures, $24 billion revenues, to say nothing of the impact on the deficit of putting people to work who will be paying taxes and who will not be receiving food stamps and unemployment compensation.

Mr. SARBANES. That is an additional point. In other words, as far as lowering the deficit is concerned, there is an indirect consequence as well as a direct consequence. I think that ought to be fully understood by the Members of this body.

I thank the Senator.

Mr. ROBERT C. BYRD. Mr. President, I anticipate at least one other statement on this side of the aisle. I suggest the absence of a quorum if no Senator seeks recognition at this point.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, I rise in support of the Byrd amendment and I want to make a few points about why it is extremely important to my State that we adopt it.

First of all, the State of Arkansas uses more gasoline per capita than any other State in the Nation, even Wyoming and Montana and other large States. We use over 850 gallons per year per automobile in my State. Most of this is because our people drive further distances to work than most.

No. 2, we are the second or third poorest State in the Nation. I do not say this as a matter of pride; it is an economic fact.

When the President submitted this bill to Congress he said it would cost about $30 per family. That may be true. I do not quarrel with the President's statistics on a national average. But it is going to cost about $42 to $45 per vehicle in my State, and that means that if you are in a two-car family—and most everybody is because the husband and wife both work trying to keep body and soul together, if they are fortunate enough to have a job at all—the cost is not going to be $30 per family in my State, it is going to be more like $85 per household.

When you consider the fact that the median family income in Arkansas is not $21,000, which is the national average, but between $16,000 and $17,000, I invite your attention to two points: No. 1, that median family in my State that makes between $16,000 and $17,000 a year will receive less than $100 from the third year of the tax cut, and this gasoline tax, which we are about to vote on and, I presume, pass rather overwhelmingly tonight, will cost that same family about $85.

If you are a family of four and your income is $16,000 to $17,000, you are not living in what we call the high-rent district. This income level will barely keep things pasted and sewed together—trying to feed your children and clothe them and pay your utility bills. That is about all you can do on that income.

So, the distinguished Senator from West Virginia comes along and offers an amendment which, if it were submitted to the American people in a referendum tonight, would pass overwhelmingly. It will not pass here tonight. I do not ever like to admit defeat on the front end, but you might as well. All the Senator from West Virginia is saying is:

> Let us cut the third year of the tax cut for those people who make over about $65,000 a year.

That includes this Senator, and I can tell you I will happily forgo whatever I am going to get out of the third year of the tax cut, and every other Senator in this body ought to jump at the chance to forgo his, too, so that we can do this without imposing a regressive tax on the people who are having the toughest time, and let those people who are having the easiest time finance it.

I know it is customary for those people who like this idea to say: "That is populistic. You are playing to the galleries. We know about all you folks over there who love to soak the rich. That is what we have been doing in this country for years, soaking the rich."

Well, I will tell you if that is true it came to an abrupt halt in the summer of 1981. Not only did it come to an abrupt halt but the whole thing did a 180-degree turn, and instead of soaking the rich, we started soaking the working people.

A U.S. Senator, if he does not have another dime of income, will from the Kemp-Roth bill save about $3,500 a year. As W. C. Fields used to say, "That ain't a bean bag"; $3,500 a year, almost $300 a month is what I am speaking about. The Members of the U.S. Senate are going to enhance their pocketbooks as a result of Kemp-Roth, and those who earn the median family income in my State, which is at least half the people, are going to get somewhere around $80 or less out of it for the year, and the magnificent sum for the entire 3-year period of $230.

Yes, a family in my State is going to get $230, and Members of the U.S. Senate are going to get $3,500, and the Senator from West Virginia rightly says:

> Let's even that out. Let us rectify that and make this tax less regressive.

Nobody wants to see the most magnificent highway system in the United States deteriorate. I-40 runs through my State, as it does so many States, because it goes all the way from North Carolina to Los Angeles, and there are parts of it that you can hardly traverse now because it is pockmarked and so rough, and it does need repair. It needs a lot of work.

But this bill is also asking the people of my State to pay a 1-cent tax to subsidize the subway systems of the huge metropolitan areas of this country, and the bill says that the only way we can spend our portion of the 1 cent earmarked for mass transit is on new buses or new rail lines and something else we do not really need much of in Arkansas. We need operating money for most of our mass transit systems, not new buses for "urban" areas.

This bill does not give us much discretion to determine what we need for our mass transit systems in Arkansas. It says, "You will build your infrastructure," and you may get as much as one-half of 1 percent of all the money collected nationally if the Secretary deems it proper. The bill as it is written says right now, unless it is amended, that the Secretary will, insofar as practicable, return this one-half of 1 percent of the mass transit money to each of the States. It does not say he is required to.

I know how big mass transit is in West Virginia—about as big as it is in Arkansas, and that probably applies to about 30 of the 50 States.

So you are asking us to send $12.5 billion for that alone. Bear in mind we are poor folks, and this bill is asking us to give back $12.5 billion every year from the poorest people in this country, and we would not get much of it back.

You can see why I am not exactly rhapsodic about this bill in its present form.

I can vote in good conscience for the Byrd amendment and I can go home and the people of my State will applaud, and applaud loudly. Why, this amendment raises a lot more money than the nickel gas tax does, and it does it in the most painless way possible from the people who can best afford it.

The freedoms of this Nation, the very strength of this Nation, are being eroded and threatened by two things: massive unemployment—this country cannot remain free and it cannot remain strong as long as we are willing to tolerate 12 million people being out of work.

And we cannot remain free and we cannot remain strong as long as we consistently vote to enhance the pockets of the rich and continue to take more from the people who are unemployed and the people who are working and driving long distances to work.

I want the highways to be maintained. I want to do my duty, unpopular as it may be from time to time, and what I think is the best interest of the country. But the President, when he asks me to vote for this gasoline tax bill, is asking for that last pound of flesh, all from the people in my State who can least afford it. If that is populism, I am a populist.

But I can tell you in closing what I said in the very beginning. Submit the Byrd amendment to the American people and let Senator BYRD and me and two or three others debate our side of it, and let the President and as many people you want to put on his side debate his side of it, and you let the American people all push a button like CNN does, and I promise you we will win 2 to 1.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. BUMPERS. I am happy to yield to the Senator.

Mr. ROBERT C. BYRD. It would not take very long for that coal miner in southern West Virginia or nothern West Virginia who has to drive 50 or 60 miles to work and back, it would not take him long to decide. He would not have to hear much debate.

It would not take the taxi drivers, people who operate taxicabs and who make their living by transporting passengers—and, of course, they have to buy gasoline to do that—it would not take them very long to make a decision on this. They would not have to hear much debate.

It would not take the elderly citizens—and one would be surprised at how many of them can drive and do drive—it would not take them very long, because this is going to come out of their pockets.

What about the school boards in the busing of school children? This money is going to be an additional cost to the various school boards across the country.

So it would not take long for the common people—the small businessman who operates a little grocery store and who has to deliver his groceries to his customers, it would not take him very long to make a decision. He is already going to pay more unemployment compensation taxes because of the tax increase enacted earlier this year.

The President said earlier this year to a joint session of the two Houses that there would not be any increase in taxes this year. He said that about three or four times, I remember. I sat there in the House Chamber and listened as he assured the American people that there would not be any increase in taxes. Then there came the legislation supported by the administration to triple the tax on telephones, double the tax on cigarettes. And that is not going to stop many people from smoking, admirable though that goal might be. The cost of airline tickets and airfreight was also increased.

There was not to be an increase in taxes, according to the President, yet he later supported the $89 billion tax increase. And that is being borne by the people in this country who can least afford to bear it. Now we are being asked to place an additional tax on those people who can least afford to bear it. But do not touch—they say do not touch—that third year of the tax cut for those people who can best afford to pay for this kind of program.

I thank the distinguished Senator from Arkansas for his statement. I agree with him that if this were a referendum to be put before the people, they would not have to listen to much of the debate. It would not take long. There would be an overwhelming—overwhelming—adoption of our amendment.

Mr. BUMPERS. Mr. President, if I might close with a simple question: Should Senators, who make $60,000 a year and got an increase of about $3,300 to $3,600 in their income in that tax bill last summer—pay the same amount in gas taxes, about $80, under this bill as those in my State and West Virginia who gained a total of only about $200 or $250 under Kemp-Roth? Do you think that is fair?

It is just that simple. Mr. President, I yield the floor.

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The President pro tempore is recognized.

Mr. THURMOND. The matter about which I am to take up has been cleared with the distinguished majority leader and I see the distinguished minority leader is in the Chamber.

PAYMENT OF LOSSES INCURRED AS A RESULT OF BAN ON TRIS

Mr. THURMOND. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 823.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 823) entitled "An Act to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn, or fiber, and for other purposes", do pass with the following amendment: Strike out all after the enacting clause, and insert: That (a) the United States Claims Court shall have jurisdiction to hear, determine, and render judgment upon any claim for losses sustained by any producer, manufacturer, distributor, or retailer of children's sleepwear, or by any producer, converter, manufacturer, distributor, or retailer of fabric, yarn, or fiber contained in or intended for use in children's sleepwear, (1) if those losses resulted from the actions taken by the Federal Government under the Federal Hazardous Substances Act on April 8, 1977, and thereafter relating to apparel, fabric, yarn, or fiber containing Tris (2,3-dibromopropyl) phosphate, and (2) if such children's sleepwear or such fabric, yarn, or fiber, as the case may be, at the time of its manufacture was subject to the requirements of or was subject to use in compliance with the mandatory Federal flammability standard FF3-71 or FF5-74.

(b)(1) In determining the validity of any claim under this Act and the amount of the losses sustained for which such a claim is brought, the court shall consider the following factors:

(A) The degree to which reasonable alternatives to Tris (2,3-dibromopropyl) phosphate existed at the time the Federal Government established the applicable mandatory Federal flammability standard referred to in subsection (a).

(B) Whether it would have been feasible or reasonable for the claimant to have tested Tris (2,3-dibromopropyl) phosphate for chronic hazards at the time the Federal Government established such flammability standard.

(C) The degree to which the Federal Government or other nationally known researchers tested Tris (2,3-dibromopropyl) phosphate for toxicity or other health hazards and disseminated the results of those tests.

(D) The degree of good faith demonstrated by the claimant in seeking to comply fully with such Federal flammibility standard.

(E) The extent to which a claimant may have relied in good faith upon assurances from suppliers that the products containing Tris (2,3-dibromopropyl) phosphate were safe.

(F) The degree to which the claimant acted reasonably in using Tris (2,3-dibromopropyl) phosphate.

(G) The degree to which the claimant, in good faith, complied with actions taken by the Federal Government under the Federal Hazardous Substances Act on April 8, 1977.

(H) The degree to which the claimant, in good faith, complied with those provisions relating to exports contained in section 14 of the Federal Hazardous Substances Act and section 18 of the Consumer Product Safety Act.

(2) The court may not enter judgment in favor of a claimant under this Act, nor may the Attorney General agree to any settlement with a claimant under this Act, unless the claimant produces proof, to the satisfaction of the court or the Attorney General, as the case may be, that the claimant lawfully disposed of the apparel, fabric, yarn, or fiber with respect to which the claim was brought.

(3) In determining the amount of the losses for which a claim is brought under this Act, the amount of such losses shall not

include lost profits, proceeds from distress sales, attorney's fees, or interest on any loss suffered by any producer, converter, manufacturer, distributor, or retailer of children's sleepwear, or by any producer or manufacturer of fabric, yarn, or fiber.

(c)(1) The measure of losses for any producer or manufacturer of children's sleepwear shall be the cost of producing or manufacturing the sleepwear garment, plus the cost of the fabric, yarn, or fiber used for such production or manufacture, or the cost of such sleepwear, fabric, yarn, or fiber held in stock on the date of the enactment of this Act, less the fair market value, if any, of the sleepwear garment or the fabric, yarn, or fiber. If such garment, fabric, yarn, or fiber was resold after April 8, 1977, but prior to such date of enactment, then the measure of losses shall be the cost of producing or manufacturing the sleepwear garment plus the cost of the fabric, yarn, or fiber, less the proceeds from any such sale.

(2) The measure of losses for any producer, converter, or manufacturer of fabric, yarn, or fiber shall be the cost of producing, converting, or manufacturing the fabric, yarn, or fiber, plus the cost of the raw materials used for such production, converting, or manufacturing, or the cost of such fabric, yarn, or fiber held in stock on the date of the enactment of this Act, less the fair market value if any, of the fabric, yarn, or fiber on such date. If the fabric, yarn, or fiber was resold after April 8, 1977, but prior to such date of enactment, then the measure of losses shall be the cost of producing, converting, or manufacturing the fabric, yarn, or fiber plus the cost of the raw materials used for such production, converting, or manufacturing, less the proceeds from any such sale.

(3) The measure of losses for any distributor or retailer shall be the distributor's or retailer's purchase price for the children's sleepwear, fabric, yarn, or fiber involved, less the fair market value, if any, of such sleepwear, fabric, yarn, or fiber, and less the amount of any reimbursement received for such sleepwear, fabric, yarn, or fiber.

(4) In addition to the losses determined under paragraphs (1), (2), and (3) of this subsection, a claimant may also be compensated for (A) unreimbursed costs of transportation paid for the return of the sleepwear garments, fabric, yarn, or fiber involved, and (B) unreimbursed costs of the lawful disposal of such garments, fabric, yarn, or fiber.

(d) No claim under this Act may be brought as a class action. No claim under this Act may be brought by two or more parties unless damages are claimed to be jointly recoverable or are disputed among the parties.

(e) Upon payment of any claim under this Act, whether or not such payment is the result of a court judgment or a settlement, the United States shall be subrogated to the claimant's rights to recover losses or to assert a claim against any person relating to the subject matter of such claim paid by the United States. The claimant shall take the necessary steps, as determined by the Attorney General, to secure such rights in the United States in order to be entitled to the entry of a judgment by the court or payment under this Act, and the failure of the claimant to take such steps shall constitute cause to deny the entry of such judgment or such payment. The failure of the claimant to take such steps shall not limit or adversely affect the right of the United States to act as subrogee or assignee to the full extent of its payments under this Act. Any purported limitation on the right of the United States to act as assignee or to become subrogated to the rights of a claimant shall be without any effect, to the extent that the United States has made payments under this Act.

(f) Any claim under this Act shall be barred unless commenced within two years after the date of the enactment of this Act.

(g) No person shall have any claim under this Act who, on or after June 14, 1978, (1) exported from the United States any apparel, fabric, yarn, or fiber containing Tris (2,3-dibromopropyl) phosphate which was produced, converted, manufactured, or sold for use in the United States, or (2) transferred any apparel, fabric, yarn, or fiber described in clause (1) to another person with knowledge that such apparel, fabric, yarn, or fiber would be exported from the United States.

(h) Before payment is made on any claim under this Act, the Attorney General shall notify the Administrator of the Small Business Administration of the claim. The Administrator shall, after receipt of such notification, notify the Attorney General as soon as possible of—

(1) any unpaid loans made by the Small Business Administration under the Small Business Act, and

(2) other amounts owing to the Small Business Administration on account of loans made under the Small Business Act,

for the purpose of assisting the claimant on account of losses sustained as a result of the actions taken by the United States under the Federal Hazardous Substance Act on April 8, 1977, and thereafter relating to apparel, fabric, yarn, or fiber containing Tris (2,3-dibromopropyl) phosphate. The Attorney General shall offset, from the amount of the payment on the claim under this Act, the amount of any such unpaid loans or other amounts owing to the Small Business Administration. The amount of any offset under this subsection shall be treated as accrued and paid to the claimant in ten equal annual installments beginning with the first year in which payment on the claim under this Act is made.

(i) Nothing in this Act shall be construed as an admission of fault or liability on behalf of the United States for any personal injury which may hereafter be claimed to arise from exposure to Tris (2,3-dibromopropyl) phosphate.

Mr. THURMOND. Mr. President, I move that the Senate concur in the House amendment.

The motion was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SURFACE TRANSPORTATION ACT OF 1982

The Senate resumed consideration of the bill.

Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, may I inquire is time under the control on our side of the minority leader?

The PRESIDING OFFICER. The only time agreement is for a vote at 8 p.m.

Mr. MOYNIHAN. I thank the distinguished Presiding Officer.

Mr. President, I rise in support of our distinguished minority leader's infrastructure and jobs amendment proposal and would wish to speak briefly to one of the nine major components, that having to do with water and sewer infrastructure repairs. I do this as the ranking member of the Subcommittee on Water Resources of the Committee on Environment and Public Works to say two things:

First, Mr. President, there is no longer any question, our committee has established the fact in great statistical detail and it has been widely publicized in the press and various journals, that our Nation has been disinvesting in its basic infrastructure—the highways, the water systems, the general public facilities—on which the private economy rests in some very physical and calculable way and which the Nation requires in a very considerable extent.

Between 1968 and 1977, public works investment in constant dollars declined at an average rate of 3.7 percent. No one knew this. We were surprised to learn it. We sensed it. It took several years of research to establish it.

By 1980, total public works investment at all levels of government dropped to $26 billion as against the 1970 level of $38 billion. It is the only part of our budget going down and it is of the kind of decline which, after a certain point, becomes proscriptively more expensive.

You could not just paint a bridge for so many years before you have to replace the bridge. You can do the same thing to roads and, in particular, to the water systems, fresh water, treated water, and sewage water. These are below the surface, out of sight, and much too easily out of mind. And they have become disastrously undermaintained in our country.

We have agreed in the Committee on Environment and Public Works that this is a matter of urgency. It is estimated, at a responsible level, that in the next 20 years we are going to have to invest between $75 billion and $110 billion simply to rehabilitate deteriorating urban water systems.

You can fail to do this and you will find it costly beyond your imagining. We have done less of it to a degree which verges on the irresponsible if we concern ourselves with the public good over the horizon, over the next month or the next year.

This amendment provides $1 billion to be distributed according to the Environmental Protection Agency's construction grant program. That is title II of the Clean Water Act. All commu-

nities are eligible and all will receive their funds under the language of the bill which says,

The extensive repair of existing conveyance and distribution facilities including pumping stations beyond the scope of normal maintenance, where facilities are collapsing or structually unsound.

Mr. President, there is an estimated need for $75 billion to $110 billion in outlays over 20 years, but we propose $1 billion over the next year. It is the matter of the greatest urgency.

I see the distinguished Senator from Lousiana is on the floor. I would dare not estimate the needs of the water supply system of New Orleans any more than I would of my own city of New York, or, with the Senator from Rhode Island here, the needs of the city of Providence.

This amendment addresses itself to those needs and has the further important fact, I think, that of all the public works that we will be considering in this legislation none is more labor intensive, none is more capable of being directly put in place, and to do so with persons who are capable of work, who need the work, and doing work that very much needs to be done.

Time is running short. I see my friend from Rhode Island is present. I want to give him all the time he needs.

I thank the Chair.

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. CHAFEE. I thank the distinguished Senator from New York for yielding. I know we vote at 8 p.m. I want to make just a couple of comments in connection with the amendment offered by the distinguished minority leader.

First, addressing the No. 1 item, namely, the water and sewage infrastructure repair, Mr. President, that has problems in itself. There is no question that there exists presently the sewer infrastructure repair mechanism in connection with our waste water treatment programs. They are on the books. The communities and the States know what are their priority items. We have a system of getting the moneys out.

On the other hand, Mr. President, the Federal Government is not now involved in water distribution repairs. We are not in that in any connection, except peripherally through some EPA programs. But there is no summation of what the water system need in the United States of America is. This would involve embarking on an entirely new program.

Overall, Mr. President, this amendment has some meritorious parts to it. I would address particularly the public housing rehabilitation program of $400 million. It is my understanding that there will be moneys provided for that in the continuing resolution.

The increase in the unemployment compensation is something that I have voted for in the past, Mr. President. It is my understanding that there will be a separate amendment offered on that later on this evening or before we are through with the overall jobs-roads program.

Mr. President, it seems to me that the road program that we have before us is an important one. It deserves passage. It does not please any of us completely, but it is a program that provides for repairing our roads and bridges that are sorely in need of repair.

It also provides funds for mass transit, something that those of us from cities are particularly interested in.

That whole program, which barely passed the House of Representatives, and I suspect might well have trouble if we started all over again here, is endangered by this amendment presented by the minority leader. If this amendment should pass, and I do not believe it will, I believe that the entire roads program that we have before us would be in danger of a veto. I do not think that is the kind of risk that we can run.

In addition, Mr. President, I have faults with separate sections of this nine-point program. Some have merits, as I previously indicated. One problem is the threat of veto of the entire roads program. Second is the fact that under point 2 we are going into the so-called labor-intensive community public works program, something we have dealt with previously in the environment and public works program. We found there was no prepared agenda on how to proceed. There was not a priority set forth for the works. It takes a long time to get the moneys out and when the moneys are out, the return effect, the effect on the reduction of unemployment, or the effect of the benefits yielded from these community public works, comes in long after the recession has ended.

Perhaps that will not be true in this instance. Hopefully, this recession will not last too long. But we have had rather unsatisfactory experience with these accelerated public works programs or labor intensive public works programs in the past.

Mr. President, I am prepared to yield the floor.

Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, if no other Senator desires the floor, might I just respond in the friendliest of terms to my friend from Rhode Island when I suggest that the particular title of legislation I addressed myself to, that of water and sewer infrastructure repair, is something needed and urgently needed as much as the road reconstruction, rehabilitation, and resurfacing provisions of the legislation.

They both come from our committee. It is a fact much to be supported that the aid or Federal participation in infrastructure programs, in water programs, seems to be confined to those States west of the Mississippi. That is a source of imbalance in our programs which has also been a reason for their decline. This effort is not shared in the Nation, and increasingly the Congress is unwilling to finance that imbalance.

I hope the Senator will acknowledge, and I am sure he would, that the work needs to be done, whether it be on a countercyclical jobs program or whatever. The work is there, and it needs to be done, it has to be done. In our view, here is an opportunity to begin.

Mr. DOLE. Mr. President, I must oppose this amendment. If we have learned anything in the past 20 years, it is that make-work public sector jobs projects are not the answer to the unemployment problem. There is no reason to expect that this proposal would work any better than its predecessors.

What we need now is a healthy, growing private sector, and I fail to detect anything in this package that would encourage a strong economic recovery. By financing the entire package through higher income taxes, it is likely instead to delay recovery.

The proponents claim that, in addition to the highway and bridge program jobs, their package would provide employment to an extra 330,000. Even if these claims were true, the unemployment rate would be lowered by only three-tenths of 1 percent. In order to lower unemployment to an acceptable level by this method would require a truly massive public works program, exceeding even those of the New Deal. My point is that this is a costly program that could at best have a minor impact on unemployment. Only the private sector is capable of solving the unemployment problem. All of our efforts should be devoted to laying the groundwork for a solid, sustainable recovery.

In Congress, we can best help by holding the line on taxes and spending for unnecessary or low priority programs. Even though this package does not raise the deficit, it will increase income tax rates. This takes us in the opposite direction of where we have been moving the last 2 years. There has been a clear consensus in Congress that income tax rates are too high, and the major thrust of the President's program has been to lower these rates in order to stimulate work and saving. Raising income taxes to pay for programs like this is how we found ourselves in the position we were in 2 years ago. This amendment is a continuation of the old Democratic policies of raising more and more taxes to pay for programs that do not

really help anyone but Democrats running for reelection.

Now, some might claim that this is just a logical extension of the highway and bridge repair program that we are debating. But there are fundamental differences. Those put to work by the highway program will be providing much-needed services. There is a clear consensus that these repairs need to be made, and we should be going ahead with this program even if there were no recession. However, the additional funds called for by this jobs program are specifically for make-work activities of questionable value. There is no guarantee that the funds will be spent wisely on services which are clearly needed, especially if we consider the CETA experience. There is a world of difference between asking those who use the Nation's highways to pay for its essential repairs and maintenance, and raising general tax rates to finance make-work jobs.

In these days of fiscal austerity, we have an obligation to make sure that all tax dollars are wisely spent, be they for defense or community services. In the past 2 years we have asked many worthwhile programs to cut corners. When we are squeezing other domestic programs, it just does not make sense to turn around in a lameduck session and authorize billions for vague projects like pothole repair, sewer rehabilitation, and converting surplus public schools. The potential for this to turn into a $3 billion pork barrel seems high.

One of the most objectionable aspects of this amendment is that it violates the user fee principle which has guided Federal highway financing since the establishment of the highway trust fund in 1956. Since that time, funds flowing into the trust fund have come entirely from highway user taxes, insuring that those who use the highways most pay the greatest share of the cost. This amendment would call for general revenues to finance highway expenditures, violating the highway trust fund principle. This sets a bad precedent.

This amendment also contains a sense of the Congress provision instructing the Federal Reserve to lower interest rates, presumably by printing a lot of money. I will not dwell on the inflationary potential of such a notion, expecially to an economy that has suffered considerable damage from the inflation caused by loose money policies in the 1970's. But it is clearly hypocritical of Congress to produce budget deficits of $180 to $200 billion, and then to point the finger at the Federal Reserve for high interest rates. By the way, in the last 4 months the money supply has increased at an annual rate of 16 percent. The Fed seems to have been trying to do all it can to encourage lower rates, short of actions that would risk rekindling inflation.

A major portion of this amendment is targeted toward aiding the "structurally unemployed." Many workers will not be brought back to work by a general economic recovery because they lack the necessary skills, have been displaced from a declining industry, or live in a depressed region. This is certainly a legitimate concern, as a significant share of the current unemployment problem is due to the erosion of our basic industries. But we need some new approaches to this problem. Structural unemployment has proven to be highly resistant to Government programs which merely throw money at the problem. The administration is expected to submit a major unemployment package to the new Congress. A hastily thrown-together lameduck bill is not the answer. What we need from the administration and Congress is a fresh approach to structural unemployment.

Mr. President, the only answer to unemployment is a healthy, growing economy. Our first priority should be speeding a sustainable, noninflationary recovery by holding the line on low-priority spending. By raising taxes, this package would move us in the opposite direction. It is just the type of unthinking pork barrel program, that has consistently failed to produce the promised results, while piling up higher levels of taxation on the American public. They expect more from us than a return to the failed policies of the sixties and seventies.

Mr. HUDDLESTON. Is it the understanding of the distinguished minority leader that the $37 million designated in the amendment for the abandoned mine reclamation over and above what might be available via other appropriations bills is to be made available to the States under the State reclamation program account within the Abandoned Mine Reclamation Fund?

Mr. ROBERT C. BYRD. That is correct. Most coal producing States now have approved reclamation programs. This money is for the use of these States and would be drawn from the State reclamation program portion of the Abandoned Mine Reclamation Fund.

Also, I would like to reemphasize the point made by the distinguished Senator from Kentucky when he states that this $37 million is in addition to the whatever amounts otherwise available in whatever appropriations vehicle that contains funding for the Abandoned Mine Reclamation Fund.

Mr. ROBERT C. BYRD. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from West Virginia. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arizona (Mr. DECONCINI) is absent because of illness.

The PRESIDING OFFICER (Mr. COHEN). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 44, nays 53, as follows:

[Rollcall vote No. 406 Leg.]

YEAS—44

Baucus	Ford	Metzenbaum
Bentsen	Glenn	Mitchell
Biden	Hart	Moynihan
Boren	Heflin	Packwood
Bradley	Hollings	Pell
Bumpers	Huddleston	Proxmire
Burdick	Inouye	Pryor
Byrd, Robert C.	Jackson	Randolph
Cannon	Johnston	Riegle
Chiles	Kennedy	Sarbanes
Cranston	Leahy	Sasser
Dixon	Levin	Stennis
Dodd	Long	Tsongas
Eagleton	Matsunaga	Zorinsky
Exon	Melcher	

NAYS—53

Abdnor	Garn	Nickles
Andrews	Gorton	Nunn
Armstrong	Grassley	Percy
Baker	Hatch	Pressler
Boschwitz	Hatfield	Quayle
Brady	Hawkins	Roth
Byrd, Harry F., Jr.	Hayakawa	Rudman
	Heinz	Schmitt
Chafee	Helms	Simpson
Cochran	Humphrey	Specter
Cohen	Jepsen	Stafford
D'Amato	Kassebaum	Stevens
Danforth	Kasten	Symms
Denton	Laxalt	Thurmond
Dole	Lugar	Tower
Domenici	Mattingly	Wallop
Durenberger	McClure	Warner
East	Murkowski	Weicker

NOT VOTING—3

DeConcini	Goldwater	Mathias

So Mr. ROBERT C. BYRD's amendment (UP No. 1441) was rejected.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Does the majority leader seek recognition?

Mr. BAKER. Yes, Mr. President, I do seek recognition.

I wish to have order for just a moment.

The PRESIDING OFFICER. Will those Senators standing in the aisle please take their seats?

Mr. BAKER. Mr. President, if I may have the attention of the Senate for a moment, earlier today and on yester-

day afternoon, we made good progress on the Interior appropriations bill.

I see the distinguished chairman of the committee in the Chamber, and I am advised that there is some possibility we may be able to complete action on that appropriations bill in a very short period of time.

Could I be bold enough to ask the chairman if that is correct?

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. McCLURE. It is possible. We have worked out a compromise with respect to the issue that was raised by the Senator from Michigan (Mr. LEVIN) earlier. We have very few, very brief matters that are not substantive in terms of the overall bill but very important to an individual Member here and there to take just a very few moments to complete action on that bill.

Mr. BAKER. How long will it take, may I inquire of the Senator?

Mr. McCLURE. Ten minutes, I believe, will take care of it.

Mr. ROBERT C. BYRD. Mr. President, I wish to have the opportunity to canvass my side to see if there are no further amendments to the bill.

Mr. BAKER. Yes.

Mr. President, I wish to put, but I do not now put, a unanimous-consent request that no amendments be in order except the amendments which the chairman may identify and together, of course, with any that the minority leader may identify and that there be a time limitation of, say, 15 minutes equally divided. I will not put that request at this moment, but if we could see how we get along with that, I think it would be worth the Senate's time to try to complete action on that additional appropriations bill.

Mr. President, I understand that the informal pecking order is that the Senator from Texas (Mr. BENTSEN) will now be recognized to offer an amendment.

Could I inquire of the Senator from Texas, would he be willing at some convenient time to interrupt temporarily so that we could take up this appropriations bill, say, for 15 minutes?

Mr. BENTSEN. I say to the leader that I will be delighted to do that with that understanding.

Mr. BAKER. I thank the Senator.

Mr. President, on that basis, then, I hope the Chair will next recognize the Senator from Texas, and I shall pursue the possibility of completing action on the Interior appropriations and a unanimous-consent agreement to facilitate that.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Texas is recognized.

UP AMENDMENT NO. 1442

(Purpose: To amend the tax tables in the Internal Revenue Code of 1954)

Mr. BENTSEN. Mr. President, I have an amendment at the desk and ask that the clerk state the amendment.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Texas (Mr. BENTSEN) proposes an unprinted amendment numbered 1442.

Mr. BENTSEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the amendment, insert the following:

SEC. —. MODIFICATION OF TAX CUT.

(a) IN GENERAL.—Section 1 of the Internal Revenue Code of 1954 (relating to tax imposed) is amended by striking out subsections (a), (b), (c), (d), and (e).

Mr. BENTSEN. Mr. President, I ask for the yeas and nays on that amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

UP AMENDMENT NO. 1443

(Purpose: To modify the third-year tax cut by changing the effective date to April 1, 1983, to defer 5 percent of the tax cut until there is no deficit in the annual Federal budget, and for other purposes)

Mr. BENTSEN. Mr. President, I have sent another amendment to the desk as a perfecting amendment to the amendment I just called up and ask the clerk to state it.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Texas (Mr. BENTSEN) proposes an unprinted amendment numbered 1443.

Mr. BENTSEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike the last period and insert the following: "and inserting in lieu thereof the following:

"(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and every surviving spouse (as defined in section 2(a)), a tax determined in accordance with the following table:

"FOR TAXABLE YEARS BEGINNING IN 1983 AND THEREAFTER.—

"If taxable income is:	The tax is:
Not over $3,400	No tax.
Over $3,400 but not over $5,500	12% of the excess over $3,400.
Over $5,500 but not over $7,600	$252, plus 13% of the excess over $5,500.
Over $7,600 but not over $11,900	$525, plus 15% of the excess over $7,600.
Over $11,900 but not over $16,000	$1,170, plus 17% of the excess over $11,900.
Over $16,000 but not over $202000	$1,867, plus 20% of the excess over $16,000.
Over $20,200 but not over $24,600	$2,707, plus 23% of the excess over $20,200.
Over $24,600 but not over $29,000	$3,719, plus 26% of the excess over $24,600.
Over $29,900 but not over $35.200	$5,097, plus 30% of the excess over $29,900.
Over $35,200 but not over $45,800	$6,687, plus 35% of the excess over $35,200.
Over $45,800 but not over $60,000	$10,397, plus 40% of the excess over $45,800.
Over $60,000 but not over $85,600	$16,077, plus 44% of the excess over $60,000.
Over $85,600 but not over $109,400	$27,341, plus 49% of the excess over $85,600.
Over $109,400	$39,003, plus 50% of the excess over $109,400.

"(b) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual who is the head of a household (as defined in section 2(h)) a tax determined in accordance with the following table:

"FOR TAXABLE YEARS BEGINNING IN 1983 AND THEREAFTER.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $4,400	12% of the excess over $2,300.
Over $4,400 but not over $6,500	$252, plus 13% of the excess over $4,400.
Over $6,500 but not over $8,700	$525, plus 15% of the excess over $6,500.
Over $8,700 but not over $11,800	$855, plus 18% of the excess over $8,700.
Over $11,800 but not over $15,000	$1,143, plus 20% of the excess over $11,800.
Over $15,000 but not over $18,200	$2,053, plus 21% of the excess over $15,000.
Over $18,200 but not over $23,500	$2,725, plus 26% of the excess over $18,200.
Over $23,500 but not over $28,800	$4,103, plus 30% of the excess over $23,500.
Over $28,800 but not over $34,100	$5,693, plus 35% of the excess over $28,800.
Over $34,100 but not over $44,700	$7,548, plus 38% of the excess over $34,100.
Over $44,700 but not over $60,600	$11,576, plus 44% of the excess over $44,700.
Over $60,600 but not over $81,800	$18,572, plus 49% of the excess over $60,600.
Over $81,800	$28,960, plus 50% of the excess over $81,800.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)) who is not a married individual (as defined in section 143) a tax determined in accordance with the following table:

"FOR TAXABLE YEARS BEGINNING IN 1983 AND THEREAFTER.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $3,400	12% of the excess over $2,300.
Over $3,400 but not over $4,400	$132, plus 13% of the excess over $3,400.
Over $4,400 but not over $6,500	$262, plus 15% of the excess over $4,400.
Over $6,500 but not over $8,500	$577, plus 16% of the excess over $6,500.
Over $8,500 but not over $10,800	$897, plus 17% of the excess over $8,500.
Over $10,800 but not over $12,900	$1,288, plus 20% of the excess over $10,800.
Over $12,900 but not over $15,000	$1,708, plus 21% of the excess over $12,900.
Over $15,000 but not over $18,200	$2,149, plus 25% of the excess over $15,000.
Over $18,200 but not over $23,500	$2,949, plus 28% of the excess over $18,200.
Over $23,500 but not over $28,800	$4,433, plus 32% of the excess over $23,500.
Over $28,800 but not over $34,100	$6,129, plus 36% of the excess over $28,800.
Over $34,100 but not over $41,500	$8,037, plus 40% of the excess over $34,100.
Over $41,500 but not over $55,300	$10,997, plus 45% of the excess over $41,500.
Over $55,300	$17,207, plus 50% of the excess over $55,300.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following table:

"FOR TAXABLE YEARS BEGINNING IN 1983 AND THEREAFTER.—

"If taxable income is:	The tax is:
Not over $1,700	No tax.
Over $1,700 but not over $2,750	12% of the excess over $1,700.
Over $2,750 but not over $3,800	$126, plus 13% of the excess over $2,750.
Over $3,800 but not over $5,950	$262.50, plus 15% of the excess over $3,800.
Over $5,950 but not over $8,000	$585, plus 17% of the excess over $5,950.
Over $8,000 but not over $10,100	$933.50, plus 20% of the excess over $8,000.
Over $10,100 but not over $12,300	$1,353.50, plus 23% of the excess over $10,100.
Over $12,300 but not over $14,950	$1,859.50, plus 26% of the excess over $12,300.
Over $14,950 but not over $17,600	$2,548.50, plus 30% of the excess over $14,950.
Over $17,600 but not over $22,900	$3,343.50, plus 35% of the excess over $17,600.
Over $22,900 but not over $30,000	$5,198.50, plus 40% of the excess over $22,900.
Over $30,000 but not over $42,800	$8,038.50 plus 44% of the excess over $30,000.
Over $42,800 but not over $54,700	$13,670.50, plus 49% of the excess over $42,800.
Over $54,700	$19,501.50, plus 50% of the excess over $54,700.

"(e) ESTATES AND TRUSTS.—There is hereby imposed on the taxable income of every estate and trust taxable under this subsection a tax determined in accordance with the following table:

"FOR TAXABLE YEARS BEGINNING IN 1983 AND THEREAFTER.—

"If taxable income is:	The tax is:
Not over $1,050	12% of taxable income.
Over $1,050 but not over $2,100	$126, plus 13% of the excess over $1,050.
Over $2,100 but not over $4,250	$262.50, plus 15% of the excess over $2,100.
Over $4,250 but not over $6,300	$585, plus 17% of the excess over $4,250.
Over $6,300 but not over $8,400	$933.50, plus 20% of the excess over $6,300.
Over $8,400 but not over $10,600	$1,353.50, plus 23% of the excess over $8,400.
Over $10,600 but not over $13,250	$1,859.50, plus 26% of the excess over $10,600.
Over $13,250 but not over $15,900	$2,548.50, plus 30% of the excess over $13,250.
Over $15,900 but not over $21,200	$3,343.50, plus 35% of the excess over $15,900.
Over $21,200 but not over $28,300	$5,198.50, plus 40% of the excess over $21,200.
Over $28,300 but not over $41,100	$8,038.50, plus 44% of the excess over $28,300.
Over $41,000 but not over $53,000	$13,670.50, plus 49% of the excess over $41,000.
Over $53,000	$19,501.50, plus 50% of the excess over $53,000.

(b) TAX RATES FOR TAXABLE YEARS AFTER FEDERAL BUDGET IS BALANCED.—Section 1 is amended by adding at the end thereof the following new subsection:

"(g) DETERMINATION OF APPLICABLE TAX RATE.—In the case of taxable years beginning in any calendar year after the first calendar year beginning after December 31, 1983, in which ends a fiscal year for which the outlays of the Federal budget do not exceed receipts, the following tables in paragraphs (1), (2), (3), (4), and (5) shall apply in lieu of the tables contained in subsections (a), (b), (c), (d), and (e), respectively:

"(1) MARRIED FILING JOINTLY AND SURVIVING SPOUSES.—

"If taxable income is:	The tax is:
Not over $3,400	No tax.
Over $3,400 but not over $5,500	11% of the excess over $3,400.
Over $5,500 but not over $7,600	$231, plus 12% of the excess over5,500.
Over $7,600 but not over $11,900	$483, plus 14% of the excess over $7,600.
Over $11,900 but not over $16,000	$1,085, plus 16% of the excess over $11,900.
Over $16,000 but not over $20,000	$1,741, plus 18% of the excess over $16,000.
Over $20,200 but not over $24,600	$2,497, plus 22% of the excess over $20,200.
Over $24,600 but not over $29,900	$3,465, plus 25% of the excess over $24,600.
Over $29,900 but not over $35,200	$4,790, plus 28% of the excess over $29,900.
Over $35,200 but not over $45,800	$6,645, plus 33% of the excess over $35,200.
Over $45,800 but not over $60,000	$9,772, plus 38% of the excess over $45,800.
Over $60,000 but not over $85,600	$15,168, plus 42% of the excess over $60,000.
Over $85,600 but not over $109,400	$25,920, plus 45% of the excess over $85,600.
Over $109,400 but not over $162,400	$36,630, plus 49% of the excess over $109,400.
Over $162,400	$62,600, plus 50% of the excess over $162,400.

"(2) HEADS OF HOUSEHOLDS.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $4,400	11% of the excess over $2,300.
Over $4,400 but not over $6,500	$231, plus 12% of the excess over $4,400.
Over $6,500 but not over $8,700	$483, plus 14% of the excess over $6,500.
Over $8,700 but not over $11,800	$791, plus 17% of the excess over $8,700.
Over $11,800 but not over $15,000	$1,318, plus 18% of the excess over $11,800.
Over $15,000 but not over $18,200	$1,894, plus 20% of the excess over $15,000.
Over $18,200 but not over $23,500	$2,534, plus 24% of the excess over $18,200.
Over $23,500 but not over $28,800	$3,806, plus 28% of the excess over $23,500.
Over $28,800 but not over $34,100	$5,290, plus 32% of the excess over $28,800.
Over $34,100 but not over $44,700	$6,986, plus 35% of the excess over $34,100.

(c) CHANGES MADE BY THE HIGHWAY REVENUE ACT OF 1982.—Subsection (a) of section 3402 of such Code (relating to requirement of withholding) is amended—

(1) by striking out subparagraph (B) of paragraph (3) and inserting in lieu thereof the following:

"(B) the amendments made by section 101(a) of such Act, and such modifications shall take effect on July 1, 1982, as if the reductions in the rate of tax under section 1 (as amended by such section) were attributable to a 10-percent reduction effective on such date.",

(2) by adding at the end thereof the following new paragraph:

"(4) CHANGES MADE BY THE HIGHWAY REVENUE ACT OF 1982.—

"(A) ADJUSTMENT IN TABLES.—Notwithstanding the provisions of this subsection, the Secretary shall modify the tables and procedures under paragraph (1) to reflect the amendments made by the Highway Revenue Act of 1982, and such modification shall take effect on April 1, 1983, as if such amendments made a 5-percent reduction effective on such date.

"(B) No changes in revenue by reason of this paragraph.—In prescribing the tables under subparagraph (A), the Secretary shall insure that the amount withheld pursuant to such tables during fiscal year 1983 shall not be less than the amount that would have been withheld for such year if this paragraph had not been enacted.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1982.

Mr. BENTSEN. Mr. President, my amendment is designed to attack head on the deficit in the budget. It will not affect fiscal year 1983. It will not raise that deficit, nor will it lower that deficit, but it will have a dramatic and substantial effect on the forthcoming years.

In the 4 years thereafter it will reduce the deficit by some $76 billion.

All of us remember the bright promises that accompanied the tax cut of 1981, and I voted for that tax cut. Annual growth rates of 4 to 5 percent were projected. Unemployment was to decline by one-half of the levels we last saw in the early 1960's. Inflation was to be corraled, productivity growth was to increase to rival the level of the Japanese and the Germans, and the budget was to be balanced.

This rosy outlook was predicated on the assertion that a wave of savings and investment would shrink the Federal budget deficit; that interest rates would decline drastically and spark a period of very robust growth due to the tax cuts we enacted.

RECORD DEFICITS

What went wrong?

I do not quarrel with the President's desire to decrease taxes, increase defense spending, or even the Federal Reserve's slowing down money growth—the serious miscalculation has been in trying to do it all at the same time and to the degree it was done. The economy could have handled any one of these objectives, perhaps even two out of the three at the same time, but all three at once and to the degree undertaken has been an economic disaster and a major miscalculation. To cut taxes by 25 percent, increase defense spending by compounding 8 percent after inflation accompanied in 1981 by the tightest money policies in 20 years has so skewed our income and expenditures, that they are dangerously out of balance. It is time for that midcourse correction. Does it mean that we give up on cutting back on excess Government spending? Of course not, but it means this by itself will not be enough. Does it mean not increasing our military spending? No, but it does mean we must take more time in achieving that objective. It is as though one had taken three needed prescriptions for three separate ailments, but taken at the same time the interaction of the medicines has laid the patient low.

It definitely means that the implementation of the tax cut scheduled for July 1, one-half of it should be deferred until we achieve a better balance of income and expenditures.

Instead of deficits falling and interest rates sagging, our Federal budget outlook has become of increasing concern.

Our fiscal year 1982 deficit of $110.7 billion was the first deficit ever to exceed $100 billion and was by far the largest in our history.

Excluding the World War II years, the single-year deficit of $110.7 billion for fiscal year 1982 was equal to the total of all the Federal deficits in our history until 1971.

Last year's deficit was twice as large as the peak year deficit of 1943, and almost equaled the entire deficits for 1942, 1943, and 1944.

Even including the war years, only four times in our history have we had a unified Federal budget deficit even one-half as large as th fiscal year 1982 deficit.

In fact, excluding World War II, the deficit in any average month in 1982 was larger than our deficit for any entire year until 1959.

And the future looks even darker. Both CBO and OMB agree that our deficits will grow larger still. CBO is projecting deficits of $150 billion or more in fiscal year 1984 and fiscal year 1985. OMB's chief economist, Lawrence Kudlow, in a talk before the American Enterprise Institute last Wednesday discussed our deficit outlook in detail. The crux of his remarks was that we face annual deficits of $150 billion for the balance of this decade, with a $240 billion deficit likely for 1988. The national debt already exceeds $1.1 trillion. It cost every single American family almost $1,500 last year just to pay interest alone on that debt. If present trends continue, they will have to pay closer to $2,000 this year.

The explosive growth in deficits during fiscal year 1982 and fiscal year 1983 has kept prime interest rates far above levels justified by inflation. Over the last 18 months, the Treasury has been massively preempting savings to finance the Government. In fiscal year 1982, consumers saved slightly less than $150 million—and the Treasury took three-quarters of it. This fiscal year and in calendar year 1983, every dollar and more of individual savings will be required just to finance the deficit—leaving none to continue downward pressure on interest rates and to accommodate a recovery. The credit crunch is so severe that, even in our worst postwar recession, we still see short-term interest rates stuck at 9 percent or better. Long-term rates and mortages remain scarcely affordable at levels of 13 to 14 percent—a full 6 or 7 points above the rate of inflation.

ECONOMIC SLOWDOWN

These deficit-inspired interest rates have brought on our worst recession since the Great Depression:

Twelve million men and women are officially unemployed. If you include the 1.5 million additional men and women too discouraged even to seek work, we really have 13.5 million people unemployed. That number exceeds the 12.8 million people unemployed in our Nation during the peak Depression year of 1933.

My State of Texas and other Sunbelt States are home to tens of thousands of homeless living in shanty and tent cities. They live a near hopeless hand-to-mouth existence, financed by collecting bottles and aluminum cans, plus charity handouts. They have found high unemployment has spread across the Nation.

GNP has increased in only one of the last four quarters. In the most recent quarter, the third-quarter, our GNP was comparable to the size of our Nation's economy in late 1978.

Housing used to be a leading economic sector. It is stumbling along at a 1.1 million-unit pace with no recovery in sight.

The auto industry is still cutting production. Output in December is set at 4 percent below the anemic November level. That bellwether industry will sell barely 5 million cars in all of 1982, compared with last year's depressed level of 6.2 million cars.

The monthly survey of key purchasing agents was published in last Monday's Wall Street Journal. It found that production in November fell again. Fully one in three U.S. firms cut production back in November from their already depressed October levels.

That same survey found that one-half of all firms were laying off even more people in November.

Both the lagging and coincident indicators at the Commerce Department turned down again in October.

Because of layoffs, the average real weekly earnings of working men and women have slumped to a 22-year low. Gross weekly earnings in real dollars in 1982 was the lowest since 1960 and is 20 percent below the peak set in the 1970's.

The steel industry is in genuinely dire straits. The strong dollar unleashed a flood of cheap imports until recently. It is operating at less than half capacity.

Industrial production has fallen in 13 of the last 15 months. It plunged in October to a level last seen in mid-1977—over 60 long months ago. At 68.4 percent of capacity, our plant utilization factor has literally fallen off the Federal Reserve's chart. It is the lowest ever recorded. At the height of our massive bombing efforts in World War II, Germany had a higher plant utilization rate than we do now.

There is a rapidly growing concern that we may not experience the long-awaited recovery in the months immediately ahead. Most economists are not that pessimistic, but all have steadily scaled back their projections for 1983 in recent weeks. And for good reason:

The Wall Street Journal survey of purchasing agents discovered that new orders for goods and services fell again in November. In fact, 36 percent of all firms reported a decline in new orders.

With new orders down, 44 percent of all firms cut inventories again in November, as expectations of a recovery continued to be scaled back.

The Conference Board's annual economic assessment released on December 5 was very gloomy. It projects an

anemic 2.7-percent growth in real GNP during 1983. Such a low rate is barely one-half that usually seen in a recovery, and one would leave unemployment still hovering near 10 percent next summer.

Henry Kaufman of Salomon Bros. in New York is even more pessimistic. He projected a rise in real GNP next year of between 2 and 2.5 percent.

And Alan Greenspan has come in below both of them with a projection for economic growth next year of only 1.9 percent—a rate which would barely permit unemployment to creep below 10 percent in 1983.

INTEREST RATES AND THE DEFICIT

All these very pessimistic projections are from credible economists. Their estimates hinge on the fact that our enormous deficits will not permit interest rates to fall far enough over the next 2 years to spark a robust recovery. Any recovery we have will likely be short lived. It will be quickly choked off by a deficit-driven surge in interest rates as business begins to compete for savings with the Treasury. And we know from sad experience that the Treasury is the biggest and most aggressive hog at the trough.

Last week, short-term business borrowing declined by $1.8 billion as firms paid off more than they borrowed. In fact, since July, the volume of commercial and industrial loans plus commercial paper issued by American business has fallen. On a net basis, they have been paying off more than they borrowed. In effect, American business has not been in our capital markets. Even so, interest rates have scarcely dropped despite a robust expansion in the money supply. Had business this year borrowed the $56 billion it commanded in 1981, the prime interest rate would have been pushed right back up to 1981 levels by the Treasury.

Until recent weeks, many or even all of us had assumed that the deficits were controllable. We had believed that economic growth would generate a revenue windfall able to wipe out the deficits. We are learning differently now, and so is the President and OMB. In fact, OMB analysts confirmed last week that even robust growth of 3.5 percent or more will not reduce future deficits below $150 billion. And the odds are very long indeed that we will never approach a 3.5-percent growth rate unless interest rates fall much further. If Alan Greenspan is correct, we will barely achieve one-half that rate next year.

Put simply, even very strong economic growth will not alone cure the deficit. The deficit must be attacked from several directions. It must be reduced to bring interest rates down. It must be cut or we will not see economic growth sufficient to move us out of this recession and reduce our scandalous level of unemployment.

Cornwallis' troops played "The World Turned Upside Down" as they surrendered to the French and Colonial allies at Yorktown. The realization that economic growth alone will cure the deficits should make us all feel a bit like those British troops. In a real sense of the word, we are at a watershed in our Nation's economic history—a watershed where we must deal with our deficits to achieve growth rather than the other way around.

FISCAL MISMATCH

OMB's Chief Economist, Lawrence Kudlow, made that point strongly last week. We face an annual deficit, he said, of $150 billion to $175 billion under the very best full employment conditions, Anything less than a very strong recovery would see deficits in fiscal year 1984 and beyond of $200 billion and higher. Kudlow concluded that we have a fundamental fiscal mismatch between Government receipts and outlays. Even running at full tilt, outlays will run far ahead of Government revenues.

This fiscal mismatch cannot be entirely corrected by further reductions in domestic and military spending. We must proceed on all fronts, including a deferral of a part of the anticipated 1983 tax cut, to limit the deficit.

DEFICIT REDUCTION

Last summer, Congress voted to recover $150 billion in taxes from fiscal year 1983 through fiscal year 1986. The proposal was passed in bipartisan recognition that the looming deficits need to be reined in. The urgency felt then has become even more pronounced today. We must slash the deficit to send Wall Street the message that interest rates can and will continue falling.

Last summer's tax increase did not harm the thrust of the President's program. It retains its desirable focus on savings and investment. My amendment is more modest than last year's action. And it will not harm the focus of ERTA, either. In fact, it is more of the same—a mid-term correction—a recognition that the exercise of responsible fiscal policy requires adjustments to tax policies as economic conditions dictate. My amendment will increase tax receipts during fiscal years 1984-86 by $55 billion, less than 8 percent of the total revenue reduction achieved by ERTA.

REVENUE IMPACT

Let me review my amendment in detail. I propose to reduce the scheduled July tax cut to 5 percent, while accelerating its effective date to April 1 from July 1.

According to the Joint Tax Committee, my amendment will reduce the fiscal years 1984-86 deficit by $55 billion; it will reduce the fiscal years 1984-87 deficit by $76 billion. Based on the most current OMB and CBO deficit projections, my amendment will reduce these projected deficits by about 10 percent—and do so without jeopardizing our recovery. In fact, econometric work done by the Joint Economic Committee using the data resources model shows that my amendment—by enabling interest rates to fall—will actually aid the recovery more than the scheduled July tax cut.

ECONOMIC STIMULUS

We are counting on next year's 10-percent tax cut to boost us into a sustained recovery. But private forecasts tell a different story. The tax cut will add some $32 billion at an annual rate to the deficit beginning in July. That abrupt July increase in Treasury borrowings will run smack into rising corporate demands for cash to finance the recovery. The result, according to the DRI control run, will be to jerk interest rates back up. They will be put right back on an up-escalator again. As now structured, next July's tax reduction will cut the recovery off at the knees. According to business and Wall Street analysts like Alan Greenspan, it would create only a very weak recovery and reduction in unemployment in 1983.

Deferring one-half of that tax cut has quite a different impact. It will reduce the deficit and enable interest rates to continue falling next year and on through 1985. In fact, in combination with the acceleration in its effective date to April, my deferral of one-half of the tax cut will:

Knock a full percentage rate off the prime rate and the 3-month T-bill rate otherwise projected for fiscal year 1984 and fiscal year 1985.

It will add 100,000 housing starts to the number otherwise projected for fiscal year 1984 and fiscal year 1985.

It will generate real GNP growth of 4.3 percent in 1984 and 3.9 percent in 1985 according to DRI—enough to push unemployment down below 8 percent during the next 2 years.

TAX CUT TIMING

Moving the tax cut ahead to April is important to the recovery. Because the tax cut is held to 5 percent, that acceleration will have no impact on the fiscal year 1983 deficit. Yet, having those extra funds on hand in April will insure that a recovery does, in fact, start early next year—and that it will be a sustainable one, fueled by falling interest rates and the prospects for still lower ones in the year ahead.

WALL STREET AND INTEREST RATES

I said moments ago that this amendment is needed to send Wall Street a message—to let them know that Congress is concerned with our looming deficits—that we have the courage to reduce them.

That message will really go to Main Street and the Federal Reserve as much as to Wall Street. The financial community no less than the Federal

Reserve is appalled with the deficit outlook—an outlook where every dime and then some of individual savings this year and every year in the future must be funneled directly to the U.S. Treasury.

They realize that hopes for a genuine recovery—a sustainable recovery—hinge on reducing these enormous Treasury demands for credit. We must clear the path for private-sector borrowing to finance new inventories and investment and the recovery. That is the only way we can be assured of the recovery next year. It is the only way we can be assured of a recovery lasting beyond next year. And it is the only way we can hope to see the level of new investment generated in this Nation which is needed to compete effectively with our Japanese and German competitors.

Mr. STENNIS. Mr. President, will the Senator yield?

Mr. BENTSEN. I yield to my colleague from Mississippi.

Mr. STENNIS. Mr. President, the Senator has opened a matter that has been of great concern to all of us. I know it has been of great concern to me. I believe that this step he proposes is going to have to be taken and I have decided the sooner the better.

In my reasoning, it is just simple arithmetic. These $200 billion predicted deficits are appalling. But I am convinced that it is entirely possible that it can happen if we do not change direction. And I am fully convinced, too, that it is going to take two directions toward closing down this deficit from opposite ends. We are going to have to touch these entitlements. It is inevitable. It must come and we must work from that end. And I think we overdid the tax reduction in the earlier part of last year.

If we could travel the road back, I think it would take 20 years to get the thing back if we do not do something along that line of making those reductions from that end.

I believe I understand far better now the idea that long-term investments demand this total deficit in the neighborhood of a balanced budget. So I think we just well might bite the bullet further and travel in these two directions and try to bring about these results.

I am going to vote for this amendment and hope it passes now, but I am still almost certain it has to be passed in time.

I thank the Senator for yielding.

Mr. BENTSEN. Mr. President, I yield to the distinguished Senator from West Virginia.

Mr. RANDOLPH. Mr. President, I am grateful for my knowledgeable colleague from Texas yielding to me for just a few moments.

I believe that what the Senator has said—and I have listened very carefully—is well reasoned. I think it is very, very important that we do what is proposed in this amendment.

I pause to say that we have so many interplays today in connection with our economic structure, our unemployment, and high interest rates. This is a practical way to address the rising deficit. By adopting this proposal, it is projected that we can reduce the Federal deficit by a total of $76 billion in fiscal years 1984, 1985 and 1986.

Today, in West Virginia, we have a 13-percent-unemployment rate. We know that means too many people are out of work in West Virginia and throughout the Nation. By reducing the deficit more houses will be constructed and many, many persons will be employed. I urge my colleagues to accept this well-reasoned proposal.

I would appreciate it if my good friend from Texas would add me as a cosponsor of his worthwhile amendment.

Mr. BENTSEN. Mr. President, I would be delighted to have the distinguished Senator from West Virginia added as a cosponsor. I ask unanimous consent that he be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RANDOLPH. Mr. President, I want to share the cosponsorship with others, but recognizing the Senator's leadership in this matter. I am hopeful that this amendment will meet with approval. It is a soundly based and a very clearly explained proposal that I trust Senators can endorse.

I thank the Senator for yielding.

Mr. BENTSEN. Mr. President, I ask unanimous consent that the Senator from Nebraska, Senator EXON, also be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BENTSEN. Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, let me suggest that the amendments are piling up in the front row. We have already disposed of one amendment. We are down to 90-some amendments on the gas tax bill. I know that the majority leader would like to finish this bill this evening betweeen now and morning.

I just suggest that it will be very, very difficult to expedite this bill, so if anybody who may be listening can restrain themselves from offering amendments, it would be helpful. I will talk about this amendment in just a second. I would hope if Members feel compelled to offer amendments that they would give us an opportunity to review the amendments and discuss the amendments, see whether or not they are germane or not germane, whether they cost money or do not cost money, whether they are technical or nontechnical. It would be very helpful as we try to move swiftly on this bill throughout the remainder of the week and the next couple of weeks.

Now to the amendment at hand. I commend the distinguished Senator from Texas. I know that he is a very thoughtful and careful person, a valued member of our committee.

I just say in all honesty that this may be a perfectly good amendment but I would rather not get into a debate on the third year of the tax cut this year. I am confident we will have opportunities next year to debate the third year of the tax cut.

The President suggested earlier publicly that maybe we ought to accelerate the last 10 percent to January 1. There was some concern because that would increase the deficit.

Now the Senator from Texas has a different approach. He would accelerate half of the third year and by that means provide a revenue pickup of, I guess, $21.3 billion between now and 1987.

I would just say in all candor that this change might someday be adopted, and maybe tonight, though I hope not. I think it would certainly cause great concern to the President. He feels very strongly about the third year of the tax cut. He sees, as others see, signs of economic recovery. He does not believe that we should in any way affect the workingman's portion of the tax cut.

Increasing the 5 percent to April might provide some stimulus, but I do not think it would be enough to make much difference.

The group that is having the most difficulty, those whose taxes we are trying to reduce in the third year, are those making between $20,000 and $30,000, the average working man and woman, which we hope to assist with the President's tax bill.

I certainly have the greatest respect for the distinguished Senator from Texas. With tax inflation and with some talk about accelerating the social security tax increase to save social security, we are going to need that full 10 percent just to offset bracket creep and the impact of what might possibly happen when we address social security. Hopefully, we will do that early next year.

So, notwithstanding the persuasive argument of the Senator from Texas, I would hope that we might reject this amendment and preserve all the debate and the amendment and all the other things until we get into next year, 1983.

It just seems to me that if, in fact, we are going to make some progress and pass the bill—and I do not want to in any way cut off debate—we should not accept this amendment. Would the Senator like an up-or-down vote?

Mr. BENTSEN. Yes.

I might say to the distinguished chairman of the committee for whom I have a high regard that I appreciate how tenderly he handled my proposal—perhaps because the day will soon come when he will accept it.

I do not want to infringe on the Senator's time now if he has other comments, though I would like to respond to a couple of points he raised.

One of the reasons I think we cannot wait until next year to adjust the third-year tax reduction is because you are going to have the 1983 withholding tables going out in March. You will lose the time which is absolutely essential and necessary to get these tables prepared and distributed. If we are going to give the stimulus provided by my amendment, we have to do it now, in advance. And, if we want to send that proper message to the financial centers of this country, then we have to do it now as well.

Stop and think in times past how long it has taken us in the Finance Committee and the Ways and Means Committee to act on a major tax bill. We do not complete the process until late summer. Even under the very able leadership of our chairman, I cannot imagine that we would have a tax bill before the March tax schedules and April quarterly payments would be due. It just cannot be accomplished. So you will see not the stimulus that would help get this economy moving again until summer. You would not have the kind of an impact on the financial markets we need now to bring interest rates down when and where we need it.

Mr. President, I think the issue is clearly drawn.

Mr. DOLE. I again thank my distinguished colleague from Texas. Again, I understand the point just made by the Senator from Texas. It is our hope that we can speed up the budget process in 1983, considerably speed up the budget process, and see if we can put together whatever we need to put together and get it through the Congress so that we can help, if we can, achieve the economic recovery that so far has eluded the American people.

It does seem to me that cutting the third installment in half cuts in half the workingman's tax cut, the part of the 1981 tax bill that had the least to do with the wealthy and large corportions. Over 70 percent of the cut goes to those with incomes less than $50,000. I know the Senator from Kansas understands the deficit problem and the Senator from Kansas also understands the commitment the President has made to tax reduction. I do not think anybody quarrels with the fact that at the present time the marginal rates are much too high.

I would hope that we might reject this amendment. I am certain we will have another opportunity next year to discuss in detail tax cuts and revenues, revenue increases, revenue decreases, and spending reductions.

Therefore, Mr. President, I just say I hope we will defeat this amendment and move on to the next one.

Mr. BENTSEN. Mr. President, this is an across-the-board tax reduction. That is the way the President wanted it, and that is the way we are talking about providing the cut under my amendment.

This amendment simply replays the tax cut back to the administration in the same manner in which we received it. It merely cuts it in half.

The important point is that it reduces the deficit. I frankly think, as conditions have developed, that we went too far in 1981 and that it is time for a midcourse correction.

I know sometimes it is hard to swallow one's pride and admit that things did not work out as we had anticipated. But, much has transpired since we passed that 1981 tax cut bill. We obviously did not get all the results we wanted because the tax reduction collided with an increase in defense spending and with the tightest Federal Reserve policies in 20 years. Those three things compounding and interacting together overloaded this economy to a point beyond digestion. It resulted in high unemployment and damage to this economy that will take us a long time to rectify.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, the proposal by the Senator from Texas reflects a concern which I feel deeply. We must restore fiscal responsiblility and undue the enormous damage caused by the ill-timed and poorly conceived tax cuts enacted in 1981. Unfortunately the specifics of the proposal fall short of the mark.

The across-the-board tax cut fails to target relief on middle and working class households who need help during these troubled times and this amendment similary fails to benefit the final installment to the middle and working classes. It also fails to insure that the tax relief will be provided to those whose increased consumption is most likely to provide the stimulus that our economy so badly needs. It is important to recall that higher income taxpayers received a disproportionate a share of the tax cuts provided during the past 2 years. When Senator BENTSEN joined me and over 40 of our colleagues tonight in supporting the Democratic alternative to the administration's plan to increase the gas tax, we cast a vote for a program which could promote such economic growth and fiscal responsibility and assure equitable treatment of all Americans. I hope that my colleagues will join with us in the near future in a constructive program to restore our country's prosperity.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Texas. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the role.

Mr. BAKER. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Maryland (Mr. MATHIAS), the Senator from Wyoming, (Mr. SIMPSON), and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arizona (Mr. DECONCINI), and the Senator from New York, (Mr. MOYNIHAN) are absent because of illness.

The PRESIDING OFFICER (Mr. GRASSLEY). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 40, nays 54, as follows:

[Rollcall Vote No. 407 Leg.]

YEAS—40

Baucus	Exon	Metzenbaum
Bentsen	Ford	Mitchell
Biden	Glenn	Nunn
Bradley	Hart	Packwood
Bumpers	Hollings	Pell
Burdick	Huddleston	Proxmire
Byrd, Harry F., Jr.	Inouye	Pryor

Durenberger	Lugar	Weicker
East	Mattingly	Zorinsky

NOT VOTING—6

DeConcini	Mathias	Simpson
Goldwater	Moynihan	Stevens

So Mr. BENTSEN's amendment (UP No. 1443) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER (Mr. GRASSLEY). The Senate majority leader.

Mr. BAKER. Mr. President, if Senators will permit me, do I understand the Senator from Texas wishes to vitiate the yeas and nays on his first-degree amendment?

Mr. BENTSEN. I wish to vitiate the yeas and nays and then withdraw the underlying amendment.

Mr. METZENBAUM addressed the Chair.

Mr. BAKER. Mr. President, I would like to suggest a procedure now. Earlier today and on yesterday we were able to complete much of the work on the Interior appropriations bill. I am advised now that it is possible for us to complete action on that bill in a very brief time.

UNANIMOUS-CONSENT AGREEMENT

Mr. President, I would like to put a unanimous-consent request at this time, if I may have the attention of the Members. Mr. President, I ask unanimous consent that the pending measure be temporarily laid aside and that the Senate proceed to the consideration of the Interior appropriations bill and that there be a time limitation for debate on that measure as follows:

Five minutes under the control of the distinguished chairman of the Interior Committee, Senator McCLURE; 5 minutes under the control of the distinguished Senator from Virginia (Mr. WARNER); 5 minutes under the control of the distinguished Senator from Arkansas (Mr. BUMPERS); 5 minutes under the control of the distinguished Senator from Michigan (Mr. LEVIN); and 5 minutes under the control of the distinguished Senator from Hawaii (Mr. INOUYE).

Mr. President, I ask unanimous consent that at any time during the consideration of the Interior appropriations bill at the suggestion of the majority leader, after first consulting with the minority leader, the Senate will return to the consideration of the highway bill.

Mr. METZENBAUM. Mr. President, reserving the right to object, and I do not intend to object, I would say to the majority leader that I was on my feet seeking recognition. I have no objection to the Senator's unanimous-consent request, provided I may be accorded the normal privileges accorded any Senator when he is on his feet seeking recognition. When that unanimous-consent request is put, I would appreciate being given the opportunity to be recognized on the floor.

Mr. BAKER. I have no desire to cut out the Senator from Ohio, and I think he will agree that over the years I have tried to be fair with him, and I think by and large we have been fair with each other. But there comes a time when the two leaders must have what the Senate has given them by precedent, and that is the priority right to be recognized, and that is primarily for the purpose of arranging the schedule of the Senate to the maximum convenience of Senators. So I hope the Senator will bear with me from time to time as I find it necessary or desirable to seek recognition, although I may say, as indeed I this time saw my friend from Ohio also seeking recognition.

But I will reassure him now that I have no desire to deprive him of any right, including the right to be recognized to proceed as he wishes.

Mr. LONG. Reserving the right to object, Mr. President, the Senator did not require that the amendments be germane, and I think that should be a part of the unanimous-consent agreement.

Mr. BAKER. I do not think, Mr. President, there is any provision at all that would apply in this case. None was made.

Mr. LONG. The Senator is asking for a limitation of 5 minutes for each person.

Mr. BAKER. For debate.

Mr. LONG. There is no provision relating to amendments as such. Would the bill be subject to amendment?

Mr. BAKER. Mr. President, I assume the bill would be subject to amendment.

Mr. LONG. If there is going to be a limitation on debate, then there ought to be a requirement of germaneness.

Mr. BAKER. I do not think there will be any amendment, to tell you the truth. I think what we are going to have is colloquy and a general discussion of the general situation and then final passage. But I have no objection to that. Indeed, if Senators are agreeable, I will add to my request the request that no amendment be in order.

Mr. LONG. It is all right for me to do it that way, or to require that the amendments be germane.

Mr. BAKER. Let me put it that way first.

Mr. President, I ask unanimous consent that no amendments to the bill be in order.

Mr. JOHNSTON. No other surprises.

The PRESIDING OFFICER. Without objection——

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I have no objection to this, but I want to be sure the Senators whose names were designated indeed are only planning to debate the measure and do not have an amendment in mind and for their protection I will reserve the right to object. I think, Mr. President, that they only want to engage in a colloquy, so I have no objection.

Mr. BAKER. The Senator is correct.

The PRESIDING OFFICER. Is there objection? If not——

Mr. LONG. Mr. President, do we have an understanding that there will either be no amendment, or that amendments have to be germane? It is all right with me either way.

Mr. BAKER. The request now is no amendment be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Now, Mr. President, before I yield the floor, I see the presence of a messenger from the House seeking admission to the Chamber, and I yield so he may be received.

(The Senate received a message from the House of Representatives, which is printed later in today's RECORD under Messages from the House of Representatives.)

Mr. BAKER. Mr. President, may I point out that I am sure everybody recognizes that this is the continuing resolution. It will be referred to the Appropriations Committee. It is my understanding that the Appropriations Committee will meet to consider this matter tomorrow afternoon at 2 p.m.

It is my hope, Mr. President, that we can dispose of this bill before then.

I yield the floor, Mr. President.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1983

The PRESIDING OFFICER. The clerk will report the pending business.

The bill clerk read as follows.

A bill (H.R. 7356) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

The Senate continued with the consideration of the bill.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE. Mr. President, I suggest the Senator from Hawaii be recognized at this time.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUYE. Mr. President, I wish to take this opportunity to thank my colleague, the chairman of the Subcommittee on Interior for his kind consideration of a plea made by my constituents in Hawaii.

At the time the decision was made to delete the amount of $120,000 from the animal damage control research program I can assure the Senate that it was reasonable and understandable. However, since the decision was made the State of Hawaii suffered its worst calamity, the Hurricane Eva, and as a result the sugar crop sustained serious loss exceeding $30 million but because of the salt damage to the crops it may extend for many more years.

So I am most grateful to the Senator from Idaho for his understanding and his promise that this matter will be looked upon with some favor in the conference.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE. Mr. President, I yield myself such time as I may consume.

Mr. President, I thank the Senator from Hawaii. He does have my assurance we will take care of that matter in conference.

Mr. President, I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. McCLURE. Mr. President, I think the Senator from Michigan is seeking recognition with respect to a matter that he and I have discussed.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I thank the Chair and my friend from Idaho.

Earlier today, we had a lively debate about section 108, which is an amendment to the Alaska Lands Act which constitutes legislation on this appropriations bill. I indicated an objection to it at that time for the reason that I just gave.

We have subsequently had some discussion with the managers of this bill. I would like to put a question to both managers of the bill now if I could.

If section 108 prevails in conference—and may I say parenthetically that I hope it does not—but, nonetheless, if it does prevail in conference, will the managers of the bill support language in the report of the conferees as follows:

The Managers direct the Secretary to review the regulations proposed pursuant to Section 1002(d) of Public Law 96-487 to ensure that the statutory prohibition against significant adverse impact on fish, wildlife, and the environment, and the intent of the Congress relative to the meaning of such prohibition is fully complied with and enforced.

Mr. McCLURE. Mr. President, we have reviewed this language, and I give the Senator from Michigan that assurance which he has asked for. I will assure him that I will use every effort in my disposal to see that that language is added to the statement of the managers in the event that section 108 is not stricken.

Mr. LEVIN. Mr. President, while I am asking the Senator from Louisiana, the manager of the bill on our side, whether or not he is able to make a similar assurance, let me say that I would hope that the Secretary of the Interior would, by the time we receive a conference report, whether or not it contains section 108, respond to a letter which five Members of this Senate addressed to the Secretary of the Interior about a month ago. I would hope that that letter is responded to significantly in advance of the receipt of any conference report on this bill.

Mr. JOHNSTON. Mr. President, if I may respond to the distinguished Senator from Michigan, I do not have as much influence with the Secretary of the Interior as my distinguished colleague from Idaho has, but I can assure the Senator that whatever influence I have will be in line with getting a reply to his letter and also seeing that this amendment is fully complied with.

I wish to congratulate the Senator on this language and I wish to congratulate the Senator for having worked this out and letting this bill be voted on by the Senate.

Mr. LEVIN. I thank both of my friends from Louisiana and Idaho.

Mr. President, I yield back the remainder of my time.

Mr. BUMPERS addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. BUMPERS. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, last week, the State of Arkansas suffered a natural disaster three times in dollars the magnitude of any natural disaster ever suffered in my State, $358 million. I have asked the Park Service to give me an estimate of the damage done to the Buffalo National River. It is estimated by some to be as much as $2 million, but the best supporting evidence we have to date is around $800,000.

At this point, I am not prepared to ask for the money to take care of all the damages because we do not know how much it is. But I wonder if the distinguished floor manager and chairman of the Energy Committee would join me in urging the Park Service to begin using such funds as are available to them, and possibly earmarked for other purposes, to start repairing the damage that was done to that park.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. BUMPERS. I am happy to yield to the Senator from Idaho.

Mr. McCLURE. Mr. President, I certainly will join with the Senator in that request. There is a unique situation there. I think that the Park Service should be encouraged to look at that and use whatever funds are necessary to respond to that flood damage.

I will join with the Senator from Arkansas in the request to the National Park Service and to the Secretary of the Department of the Interior.

Mr. BUMPERS. I thank the Senator very much.

Mr. President, I yield to my colleague from Arkansas.

Mr. PRYOR. Mr. President, I rise in support of the position of my distinguished colleague and friend, Senator BUMPERS. The Buffalo National River is truly one of this Nation's most treasured natural resources, and is visited by hundreds of thousands of Americans each year. Recently devastating floods in Arkansas raised the water levels in this river to unprecedented levels, 54 feet above normal in some places, destroying facilities and wreaking general havoc with the river environment. The job in front of us to restore this resource to its natural condition is tremendous and will require much Federal assistance. My colleagues' position is only a start on the cleanup and must be followed up with supplemental funds early next year when we have a clearer picture from the Secretary on the work to be done. I would urge Secretary Watt and Assistant Secretary Ray Arnett to look closely into the problems and needs of the Buffalo National River and provide a summary report to the appropriate committees so that we might address this problem at the earliest practicable time.

In closing, Mr. President, I would urge my colleagues to join in support of Senator BUMPERS' position.

The PRESIDING OFFICER. Who yields time?

Mr. WARNER. Mr. President, I yield myself such time as may be necessary.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I rise on behalf of myself and my distinguished colleague from the Fifth Congressional District of Virginia, Congressman DAN DANIELS. Both of us have a keen interest in the bill for the Appalachian Trail land acquisition. I have spoken to the managers of the bill, and they are quite agreeable to putting into the statement of the managers the following language, which I should like to read into the RECORD:

One of the highest priorities under the Appalachian Trail land acquisition program is an offer by Wintergreen, in Nelson County, Virginia, of 2,800 acres, at an estimated cost of $2,340,000. While a Land Protection Plan has not been develcped for this area, the option to purchase will expire in March, 1983. The National Park Service desires this area and every effort should be made to acquire it before the option expires. Otherwise, Wintergreen is ready to develop the land, and subsequent purchase by the government would be rendered prohibitive. It is recommended therefore that there be no delay in acquisition.

Mr. President, I am grateful to the managers of this bill for including that in their statement.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE. Mr. President, I yield myself such time as I may consume.

Does the Senator from Louisiana request any time on the bill before we get to final passage?

Mr. JOHNSTON. Just 10 seconds to congratulate everyone concerned.

Mr. McCLURE. To congratulate everyone concerned, if we were to list them, would take a long time. I join in the statement of the Senator from Louisiana, and I appreciate his great help.

I know of no other request for time.

Mr. HARRY F. BYRD, JR. Mr. President, I would like to ask just two brief questions.

Mr. McCLURE. Mr. President, I would be pleased to try to respond to the distinguished Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, No. 1, what is the total amount of the bill now before the Senate?

Mr. McCLURE. It is just a few thousand dollars under $7.7 billion in budget authority.

Mr. HARRY F. BYRD, JR. Am I correct in my understanding that it is $841 million over the amount recommended by the President?

Mr. McCLURE. I think that is about correct, but I would point out that the Senate and the House, the Congress, together with the administration, adopted a budget resolution subsequent to the submission of the budget and that budget resolution was signed by the President of the United States. That budget resolution was then allocated to the various subcommittees and the allocation to this subcommittee for the matters that are included in this appropriation bill is $7.8 billion, and we are slightly underneath that figure.

Mr. HARRY F. BYRD, JR. In regard to the budget resolution, the Senator from Virginia felt the budget resolution was much too high and voted against it, so I am not persuaded by the argument that it is under the budget resolution.

What I am interested in is whether it is correct, which the Senator has just stated that it is, that it is $841 million over the President's request?

Mr. McCLURE. Over the original budget request, the Senator is correct.

Mr. HARRY F. BYRD, JR. I thank the Senator from Idaho.

Mr. McCLURE. I thank the Senator from Virginia.

Mr. ARMSTRONG. Mr. President, my purpose in rising today is to draw the attention of my colleagues very briefly to a matter that has long been of keen interest to me and to my fellow Coloradans: the Old MacGregor Ranch.

This historic property consists of 1,200 acres of some of the most spectacular mountain scenery in the country; it lies north of the village of Estes Park, Colo., in the eastern half of Rocky Mountain National Park. The ranch is held in trust for charitable purposes, and is designed to be operated as an historic high country ranch, and for the enjoyment of Colorado's high school and college students, for the entire Nation.

In Colorado's RARE II Act, the Colorado Wilderness Act of 1980, Congress incorporated the ranch within the boundaries of Rocky Mountain National Park. That act also provided that the park boundaries could revert to their previous contours if an interest in the ranch is not purchased by the end of this fiscal year.

The House Appropriations Committee earmarked $4 million in H.R. 7356 for this important acquisition, as part of the account for land and water conservation funds. This item was deleted by the Senate's Interior Appropriations Subcommittee in an attempt to lower the funding ceiling of the land and water conservation account.

The Old MacGregor Ranch is a truly exceptional—and possibly unique—cultural, scenic, and recreational resource; it is located at the gateway to one of this country's most significant and popular national parks. Its acquisition has been actively contemplated by Congress for several years.

The trustees of the property have made the very handsome offer of a scenic easement to preserve the property's original and unspoiled character as inexpensively as possible. This is an unusually fine candidate for acquisition in its own right.

In addition, there are two pressing points which make its acquisition now an urgent and compelling matter, notwithstanding the Appropriation Committee's commendable concern about the overall spending levels in this bill:

First, the ranch is held in trust for charitable purposes alone and is the only property in the trust. This property cannot generate sufficient income without the sale of the easement; I understand the proceeds of this sale will be invested for the future maintenance of the property. It is a continuing hardship to the trust and its beneficiaries for Congress to delay this acquisition any further.

Second, under the terms of the Colorado Wilderness Act of 1980, this generous offer may be withdrawn at the end of this fiscal year. Unless we act today, we may well lose the opportunity to make an outstanding addition to the Nation's scenic and recreational resources.

For all of these reasons, I would urge my colleagues to consider making provision for the acquisition of the MacGregor Ranch easement. I would particularly commend this item to the attention of the distinguished senior Senator from Idaho and the other members of the committee that will take the Interior appropriations bill to conference with the other body. It is my hope that they will be able to find sufficient latitude in the land and water conservation account to accommodate this small but very significant acquisition.

● Mr. NICKLES. Mr. President, I want to express my appreciation to all those individuals who have successfully worked on this legislation to insure a smooth transition of several Federal fossil energy research and development centers from Federal control into the hands of educational institutions and nonprofit institutions. One of these fine centers is located in Oklahoma, the Bartlesville Energy Technology Center. This center has served our Nation for several decades with valuable research and development in all areas of petroleum production and especially has proved itself a leader in enhanced oil recovery.

I look forward to such continued service to the Nation as the Bartlesville Energy Technology Center grows in its new role as the National Institute for Petroleum Research. Language in the appropriations bill will allow the Secretary of Energy to begin negotiations to transfer the center into the hands of the Interstate Oil Compact Commission, a nonprofit institution. Such a transition will allow for improvement and expansion of the center's role and work while at the same time reducing the Federal Government direct involvement and expenditures.

Let me commend the dedicated community leaders in Bartlesville, the employees of BETC, the staff of IOCC, as well as the Assistant Secretary of Energy Jan Mares and his staff who have faithfully and with much effort worked with us to have this language placed in this legislation.

However, as important as this transfer of Bartlesville is, I am compelled to vote against final passage of this bill. Our President initially requested $6.8 billion for this Interior appropriation bill for fiscal year 1983. This bill has expenditures for fiscal year 1983 of $7.6 billion. Because this bill is more than $840 million over the President's initial request I must vote "nay." As I have constantly stated, we must act responsibly by reducing Federal spending and resist the temptation to constantly increase such spending.

If this bill does not pass or is vetoed due to its spending level, I will continue to work toward a legislative solution to the transfer of our fossil energy research and development centers.●

The PRESIDING OFFICER. Do all Senators yield back the remainder of their time?

Mr. McCLURE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. All time has been yielded back.

The bill, having been read the third time, the question is, Shall it pass? On this question the yeas and nays have

been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER), the Senator from Arizona (Mr. GOLDWATER), and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mr. DURENBERGER) would vote "yea."

Mr. CRANSTON. I announce that the Senator from Georgia (Mr. NUNN) and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

I also announce that the Senator from Arizona (Mr. DECONCINI) and the Senator from New York (Mr. MOYNIHAN) are absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced as follows: Yeas 84, nays 9, as follows:

[Rollcall Vote No. 408 Leg.]

YEAS—84

Abdnor	Ford	Melcher
Andrews	Garn	Metzenbaum
Armstrong	Glenn	Mitchell
Baker	Gorton	Murkowski
Baucus	Hart	Packwood

	Nickles	

NOT VOTING—7

DeConcini	Mathias	Zorinsky
Durenberger	Moynihan	
Goldwater	Nunn	

So the bill (H.R. 7356), as amended, was passed.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, the statement of the Committee on the Energy Security Reserve requests a report from the Synthetic Fuels Corporation on actions being taken to resolve several problem areas. In this regard, the President and Chief Operating Officer, Mr. Victor Schroeder, has sought to keep me informed on a continuing basis regarding these problems, some of which were inherited from the previous Board. In requesting this report, the committee seeks to better understand the actions that should be taken to resolve these areas of concern. However, the committee recognizes that this will require a continuing effort. None of us is impressed with the progress that has been made in implementation of the SFC's mandate and all of us seek a means to assure that the statutory mandate is achieved.

Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make any necessary clerical and technical corrections in the engrossment of the Senate amendment to H.R. 7356.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. I move that the Senate insist on its amendments and request a conference with the House of Representatives thereon and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to and the Presiding Officer appointed Mr. McCLURE, Mr. STEVENS, Mr. LAXALT, Mr. GARN, Mr. SCHMITT, Mr. COCHRAN, Mr. ANDREWS, Mr. RUDMAN, Mr. HATFIELD, Mr. BYRD of West Virginia, Mr. JOHNSTON, Mr. HUDDLESTON, Mr. LEAHY, Mr. DECONCINI, Mr. BURDICK, Mr. BUMPERS, and Mr. PROXMIRE conferees on the part of the Senate.

SURFACE TRANSPORTATION ACT OF 1982

The Senate continued with the consideration of the bill.

Mr. BAKER. Mr. President, earlier today, I indicated that after the disposition of the previous amendment to the highway bill and then, subsequently, the disposition of the Interior appropriations bill, I hoped we would proceed next to recognize the Senator from Kansas (Mrs. KASSEBAUM) to offer an amendment to the bill dealing with natural gas. I am advised that the Senator from Ohio wishes to follow after the disposition of the Kassebaum matter. I am prepared at this time to ask unanimous consent that Senator KASSEBAUM be next recognized for the purpose of offering an amendment to the bill dealing with natural gas, and after the disposition of that matter, that the Senator from Ohio be recognized to offer an amendment.

The PRESIDING OFFICER. Is there objection?

Mr. HUMPHREY. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, if we are going to start getting in line, I would like to be third. I have an amendment.

Mr. BAKER. I certainly have no objection to that, Mr. President. I am perfectly happy to add it.

I ask unanimous consent that the Senator from New Hampshire be recognized after the disposition of the Metzenbaum amendment.

Mr. JOHNSTON. Reserving the right to object.

Mr. DANFORTH. Mr. President, I object.

Mr. METZENBAUM. Mr. President, recognizing the priority right of the majority leader to the floor, in the event that his unanimous-consent request is not agreed to, I shall rise for the purpose of sending an amendment to the desk.

Mr. CHAFEE. Will the Senator use his microphone?

Mr. BAKER. Mr. President, I hope the Senator will not do that. Surely, he understood that what I was trying to do was accommodate him. Indeed, I shall do my best to accommodate him after the disposition of this amendment by the Senator from Kansas. Just as I am going to try to help her, I am sure the minority leader will help the Senator from Ohio do that. Between the two of us, we do have the right to priority recognition. We simply have to try to arrange some sort of schedule of proceedings for the Senate. I hope the Senator will not do that.

Mr. METZENBAUM. I shall accommodate the majority leader.

Mr. BAKER. I thank the Senator. I hope the Chair will recognize the Senator from Kansas for the purpose of offering an amendment.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

UP AMENDMENT NO. 1444

Mrs. KASSEBAUM. I thank the Chair.

I would like to continue with a dialog started this afternoon. Senator JEPSEN, Senator DANFORTH, Senator EAGLETON, and I testified yesterday before the committee on this legislation which we believe is enormously important and has its place at this particular point in time in this session. I would like to call up my amendment, which does lie at the desk, and ask the clerk to report it.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Kansas Mrs. KASSEBAUM) proposes an unprinted amendment numbered 1444.

Mrs. KASSEBAUM. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following:

TAKE-OR-PAY CLAUSES

SEC. . Subsection (c)(2) of section 601 of title VI of the Natural Gas Policy Act of 1978 is amended (1) by inserting "imprudence," immediately after "abuse," and (2) by adding the following new paragraph:

"(3) Whenever the Commission, after a hearing had upon its own motion or upon petition of any party, shall find that any gas sales or purchase contract contains a provision which the Commission determines prevents the purchaser from responding to the demands of customers or other market forces by requiring the purchaser to pay for a minimum contract quantity of gas whether or not such gas is taken, the Commission shall have the authority to take such appropriate action as it may deem necessary including the rescission, annulment, or modification of such contract provision.".

TWO-YEAR EXTENSION OF ACT

SEC. . (a) Section 121 of subtitle P of title I of the Natural Gas Policy Act of 1979 is amended—

(1) in the matter before clause (1) of subsection (a) by striking out "January 1, 1985" and inserting in lieu thereof "January 1, 1987"; and

(2) in subsection (c), by striking out "July 1, 1987" and inserting in lieu thereof "July 1, 1989".

(b) Section 122 of such Act is amended—

(1) by striking out subsection (b)(1) and inserting in lieu thereof the following:

"(1) may not take effect earlier than July 1, 1987, nor later than June 30, 1989; and "; and

(2) in subsection (c), by striking out "May 31, 1985" both places it appears and inserting in lieu thereof "May 31, 1987".

(c) Section 123 (a) of such Act is amended by striking out "on or before January 1, 1984, and on or before January 1, 1985," and inserting in lieu thereof "on or before January 1, 1986, and on or before January 1, 1987,".

PRICE FREEZE ON NATURAL GAS

SEC. . (a) Subtitle A of title I of the Natural Gas Policy Act of 1978 is amended by adding at the end thereof the following:

"SEC. 111. PRICE FREEZE ON NATURAL GAS.

"(a) PRICE FREEZE.—Notwithstanding any other provision of law, the maximum lawful price applicable to any first sale of any natural gas in effect on Octobr 1, 1982, shall continue to be the maximum lawful price applicable to such sale for the period starting October 1, 1982, through January 1, 1985. Any first sale of natural gas which has a price lower than the applicable maximum lawful price on October 1, 1982, may increase by the lesser of (i) the rate provided in the contract for such sale; or (ii) the annual inflation adjustment factor as determined in section 101(a)(1); but increases permitted hereunder may not cause the first sale price to exceed the applicable maximum lawful price in effect on October 1, 1982, during the freeze period.

"(b) PRICE FREEZE ON NATURAL GAS NOT COVERED BY WELLHEAD PRICE CONTROLS.—Notwithstanding any other provision of law, the maximum lawful price for the period commencing October 1, 1982, and ending January 1, 1985, for any first sale of natural gas from a well the surface drilling of which began by October 1, 1982, and for which there was no applicable maximum lawful price on October 1, 1982, under this title and shall be contract price specified for deliveries of such natural gas on October 1, 1982, or if there was no contract price specified for deliveries of such natural gas on such date, the maximum lawful price shall be the average of the prices paid on October 1, 1982, for the same category of natural gas from the three nearest wells by surface location.

"(c) EXPIRATION OF PRICE FREEZE.—Following the expiration of the price freeze imposed by this section, the maximum lawful price for any first sale of natural gas for which a ceiling price is specified on October 1, 1982, shall increase from the October 1, 1982, level at the rate specified by this Act for that category of natural gas.".

(b) The table of contents for subtitle A of title I of the Natural Gas Policy Act of 1978 is amended by adding at the end thereof the following:

"Section. 111. Price freeze on natural gas.".

(c) The Federal Energy Regulatory Commission shall take such action as may be necessary, within the 92-day period following the date of the enactment of this Act, to devise and put into effect an incentive procedure for determining the appropriate rate of return that a pipeline company may earn under section 4 of the Natural Gas Act. The purpose of this procedure shall be to stimulate the purchase of the maximum amount of lower-cost gas which is consistent with gas availability and the need for a steady supply.

Mr. DANFORTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas has the floor.

Mrs. KASSEBAUM. Mr. President, I have some further remarks I would like to make on this amendment to explain this legislation.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mrs. KASSEBAUM. Mr. President, I would like to explain my amendment at this point because there are a number of Senators on the floor. It is a complex issue, and I think it might be helpful to have some explanation.

The first section of my amendment seeks to deal with the take-or-pay situation by allowing pipelines to adopt a more balanced mix between low-cost and high-cost gas. The main tool to be used in achieving this goal will be a specific grant of legislative authority to FERC to allow pipelines to modify their take-or-pay obligations in order to permit them to increase their usage of lower cost gas. A prudence standard will be added to the current grounds of fraud, abuse, and misrepresentation contained in section 601 of the NGPA for denying purchased gas adjustments. These two features would work together to disallow the passthrough of purchased gas costs when it could be shown that a pipeline had imprudently failed to avail itself of the opportunity to modify its take-or-pay obligations.

It is important to realize that my amendment will not prevent the passthrough of costs without giving the pipelines the opportunity to modify their take-or-pay obligations. To do so for an extended period of time would clearly be unfair in that it would leave pipelines obligated to the producer, while denying them the mechanism to recover the costs in question.

A prudence standard does not mean a mandate requiring the purchase of only lower cost gas. Nor does it mean the elimination of all take-or-pay obligations.

I feel that is a very important point, Mr. President.

What it does mean is that pipelines should not be increasing their purchases of high-cost gas, at the expense of available lower cost supplies, in the face of falling demand and increasing surpluses.

I fully realize the important function that take-or-pay obligations in reasonable levels serve. That is why I have not adopted the approach of some of my colleagues of abrogating all take-or-pay obligations.

Our natural gas regulatory scheme has traditionally placed the primary responsibility for the long-term balancing of gas supply and demand on the interstate pipelines. Modifications of take-or-pay obligations will return to these pipelines and flexibility necessary to achieve such a balance in the changing gas market of today. No matter what degree of freedom is granted pipelines in their contracting practices, the obligation to their customers to acquire assured long-term supplies of gas under reasonable and favorable terms remains.

The remainder of my amendment will freeze the wellhead price of natural gas at October 1 levels for a period of 2 years. This freeze would consist of three distinct facets. First, for the categories of gas which have a ceiling price set by the NGPA, or currently specified by FERC, no escalation would be allowed in that ceiling price beyond the level achieved on October 1. Contracts for these categories of gas with prices below the lawful ceiling would be allowed to escalate at the lesser of inflation or the rate specified in the contract until reaching the October 1 ceiling level. Second, the wellhead price of gas which does not have a ceiling price would be frozen at the level specified in the respective contracts as of October 1. The last aspect of the freeze would consist of prohibiting FERC from raising the incentive prices, or deregulating, those categories of gas over which they have, or purport to have, such authority. I refer specifically to tight sands and section 109 gas.

The freeze that I am proposing would not affect the price which could be paid for supplies of section 107 gas from a well the surface drilling of which began after October 1. Since any new purchases of such gas would be subject to my newly created prudence standard, the price and frequency of those purchases should be at a more rational level. Indeed, we have

already seen a dramatic softening of the price which new supplies of 107 gas can command. At the same time, I believe that it is important that pipelines be free to pay the price necessary to stimulate and secure 107 supplies if and when they are truly needed.

The effect of this freeze would be to halt that portion of the rate increases which result from the phased decontrol and inflation escalation of the wellhead prices of natural gas. Even though such escalation does not make up the bulk of the increases that we are experiencing, it is a significant portion. It is important that we give some measure of certain relief to the consumer as soon as possible. While no dramatic claims should be made to what that relief would be with this legislation, I think it is an important step. This is vital, not just from the standpoint of easing the extreme financial burden facing consumers, but also in order to help regain the confidence of an extremely skeptical public.

Mr. President, I ask that the question be divided and that a separate vote be taken on each of the following parts of the amendment:

The first vote should occur on the first section of my amendment which relates to the take-or-pay clauses.

The second vote should occur on the remainder of my amendment which relates to the price freeze.

The PRESIDING OFFICER. The Senator has the right to have her amendment divided and the question is divided.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

UP AMENDMENT NO. 1445

(Purpose: To clarify the definition of abuse in the Natural Gas Policy Act of 1978)

Mr. JEPSEN. Mr. President, I send an amendment to the desk in the second degree and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Iowa (Mr. JEPSEN) for himself and Mr. GRASSLEY proposes unprinted amendment No. 1445.

Mr. JEPSEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out the first section of the amendment relating to take-or-pay clauses and insert in lieu thereof the following:

DEFINITION OF ABUSE

SEC. . Section 2 of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301) is amended by adding at the end thereof the following:

"(38) ABUSE.—The term 'abuse' is not limited to misrepresentation but also includes imprudence on the part of the pipeline company and any pipeline company-producer contract which materially prevents the pipeline from responding to changes in customer demand or other market forces. A rebuttable presumption arises that a contract materially prevents a pipeline from responding to changes in customer demand or other market forces if the following contract clauses are found in a producer-pipeline contract:

"(A) Take-or-pay clause which commits the purchaser to pay for a minimum daily contract quantity of gas greater than 70 percent of daily contract quantity on an annual basis whether or not such gas is taken.

"(B) Indefinite price escalator or redetermination clause which is not tied to a recognized and approved economic indicator.

"(C) Most favored nation clause where the purchase price paid by any pipeline to a producer is set by the highest price in a particular production area.

Such a rebuttable presumption also arises if a contract does not include a market-out clause which allows the buyer to escape the contract or to nominate a new lower price if the gas is not marketable at the contract price.".

Mr. JEPSEN. Mr. President, the time has come for Washington to address the problem of drastically rising natural gas prices.

This is evidenced by the fact that there have been about 40 bills introduced in recent weeks on the matter and gas prices have escalated far in excess of the intent of the Natural Gas Policy Act. I think an immediate remedy is called for here.

It is incumbent upon this Congress to fix this made-in-Washington problem before it adversely impacts consumers and businesses across the Nation more than it already has.

Mr. President, simply, this amendment will allow the Federal Energy Regulatory Commission to beef up its review of contracts between gas producers and pipeline companies by expanding the definition of abuse in the Natural Gas Policy Act.

First, my measure would expand the Commission authority to regulate take-or-pay clauses. These clauses force pipeline companies to buy all or a large portion of gas contracted for regardless of changing market demand.

Second, it would expand the Commission authority to regulate indefinite price escalator clauses. These clauses have guaranteed rapid unqualified price hikes for natural gas users.

Finally, this amendment will require market-out clauses to be included in contracts with gas producers. This would insure that pipeline companies would not be forced to continue to buy high-price gas under contract when market prices and demand have decreased.

Mr. President, I fully recognize that there is no quick-fix solution to the natural gas pricing problem but Iowans have seen their natural gas prices increase nearly 100 percent in the last 3 years and they have a right to expect that the conservation efforts and natural forces in the marketplace work properly and favorably in their behalf. Clearly that is not the situation now.

By expanding the authority of the Federal Energy Regulatory Commission we can begin the necessary modifications of the Natural Gas Policy Act to correct the current imbalance. The Natural Gas Policy Act has permitted gas prices to increase. It is only fair that it be changed to permit prices to decrease.

This amendment works within the existing regulatory framework which has been established for years. It presents few extra regulatory burdens and creates no new layer of bureaucracy. All it does is facilitates the operation of market forces to price gas so it can be sold, and I should note that both producers and pipelines are in the business to sell gas and unsold gas does no one any good.

This amendment makes it incumbent on pipelines to organize their business affairs in an economic way. It mandates that they rid themselves of contracts that contain open-ended pricing provisions, the outcome of which is indeterminant and there is little relation to the mainstream of business economics and market forces.

It mandates that they find ways out of contracts that specify prices so high that gas cannot be sold under current market conditions and that mandates that they obtain a modicum of flexibility in the take-or-pay area.

The bottom line here is that pipelines have to find their way out of contracts that burden them with gas that cannot be sold. They are then forbidden from continuing practices in the future that would cause a repeat of the current mess. With reduced takes of high-cost gas market-out provisions and the end to indefinite pricing provisions, gas in the current mix that is priced above market clearing levels would fall.

Producers unable to market new gas discoveries because they have been crowded out by the depressing effect of excessively expensive gas would find markets. Everyone would find benefits here. As overpriced gas would be eliminated, prices would at a minimum stop rising at current rates, which are five times the general rate of inflation, and more gas would be available.

Mr. President, the amendment that I have proposed very simply broadens the FERC's authority to deal with the term "abuse" which is now presently limited to fraud or misrepresentation. The amendment addresses a take-or-pay clause and says that a take-or-pay clause would commit the purchaser to pay for a minimum daily quantity of gas greater than 70 percent of daily contract quantity on an annual basis,

whether or not such gas is taken. In other words, take-or-pay clauses have been around for a long time, and they are part of the real economic world in the area of the distribution of gas, and this particular section just simply says that we should put some type of a blow-off valve, so to speak, that would, in fact, provide for an out in the current economic situation when circumstances dictate so.

It also specifies that the indefinite price escalator or redetermination clause which is not tied to a tried and recognized indicator, in other words, in plain English, just the arbitrary raising of gas prices to whatever the traffic will bear at that given time or whatever the circumstance, which has no relationship to economic indicators or economic circumstances today, arbitrarily raising of gas prices is an abuse.

Then finally the most-favored-nation clause where the purchase price paid by any pipeline to a producer is set by the highest price in a particular area: Mr. President, here is one area where, as in many of the other areas, the sum of the pipeline companies and the people who have entered into contracts for the distribution of natural gas frankly have used the Natural Gas Policy Act of 1978 to maintain artificially high prices, and when you say you have a region where there are a number of gas-producing wells and you say, as the Natural Gas Policy Act of 1978 now says, that the highest price in that particular region is the price all of them must receive, that has not anything to do with the free enterprise system or the law of supply and demand.

In fact, what my amendment does is to say that particular thing is also subject to just commonsense, and if they do not use commonsense and good prudent judgment and use the prudent man rule, then it is an abuse.

Finally, it provides that all contracts should have a market-out clause which allows the buyer to escape the contract or to nominate a lower price if the gas is not marketable at the contract price.

I hesitate, as a businessman coming from the private sector, to get into and to lay on the backs of the private sector directions and dictates as to how they should conduct their business. I have indicated very early on this year that in the direction the natural gas prices were taking in my particular State, we had announcements practically on the same day or within 24 hours of each other where we had a large, well over 30 percent, increase in natural gas prices. We have an announcement simultaneously that for the quarter they have record high profits for the gas pipeline company and, at the same time, reading stories continually that there is a glut of natural gas which is available.

When you have a perceived or real surplus of gas available, when you have a perceived or real all-time high amount of profits, and when you have real announcement of a tremendous increase in the cost of natural gas, I do not blame folks for getting emotionally upset, and believe me they get emotionally upset when they read and put these three areas together, and that has been the case.

I wish that the private companies would have done what prudent men and commonsense would have dictated they do, and that is in 1978 when the Natural Gas Policy Act was brought into being, there was a set of circumstances where people, it was projected, were going to have a natural gas shortage, and there was concern about this, and they put together an act that was supposed to stimulate and provide an incentive to produce gas for this Nation, this country, for our people. It was well meant, well intentioned. But like many things the Government gets involved in when they try to take over things that the private sector either ought to be doing or generally does to itself, they do not do a very good job, and in this particular instance the Natural Gas Policy Act of 1978 was so constructed that, frankly, many companies unfortunately have taken and used this hiding behind it, in a manner of speaking, to artificially pump and sell high-priced gas when, in fact, there was much lower priced gas available not only in their own storage capacities but in gas wells that are capped all over this country.

So, Mr. President, my amendment is a direct step, not a giant step, but a direct step forward, to immediately provide for some direction and some overview and some enforceable encouragement for gas companies, the distribution of natural gas companies, and producers, and so on, to get together and provide for as much as possible so that the law of supply and demand will work to bring gas prices down to a level where you have the economic indicators that in the private sector have always served us well, and that is the law of supply and demand.

It is contrary to everything I believe in to bring Government involvement into the private sector, but I am sorry to say they have asked for it and it is time now to do something about it.

This will send a signal, without being punitive in nature or certainly stepping up and saying, for example, no take or pay because take or pay has been around a long time. It does not say how they must design their market-out clauses. That is for prudent men and women and people in the industry to design and put into contracts. They can do that.

It does say you cannot arbitrarily, just because you may have a monopoly in a given area, raise gas prices way out of the realm of reality in price, and it does say that the ridiculous situation where you absolutely preempt any chance of free enterprise and the law of supply and demand to play a role, where you have a favored-nation clause where the purchase price paid by any pipeline to the producer is set by the highest price in a particular production area, that is something that should not happen in our free enterprise system.

Mr. President, I thank the Chair and I respectfully hope and urge Senators to adopt this amendment. It is one that, as I say, is not punitive in nature but will start to move and move directly and probably move more swiftly to getting things done that, unfortunately, these companies should have been doing themselves a long time ago.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. SPECTER. Mr. President, I rise in support of the amendment of the distinguished Senator from Kansas and also the amendment of the distinguished Senator from Iowa.

It is my view that the factual basis has been established for a real emergency on gas prices. That has been apparent to me from the evidence that I have seen in the Commonwealth of Pennsylvania on my trips through the State, and from numerous correspondence received from home consumers as well as business users.

The hearings which were held by the Energy Committee on Monday of this week provided further evidence of this very serious situation.

A week ago Monday, on behalf of the Northeast-Midwest coalition of Senators and in my capacity as co-chairman of that group, I introduced legislation which had been drafted by the Northeast-Midwest Institute. Because there are so many amendments pending at the present time to the gas bill, I do not think it appropriate to introduce that legislation as an amendment at this time, but rather to speak in support of the amendment which has been offered by the Senator from Kansas, and the similar amendment thereto offered by the Senator from Iowa.

It is my judgment that an emergency situation does exist so that it is appropriate to provide for extraordinary remedies on existing contracts.

Within the scope of the legislation proposed, it is my view that there is ample latitude for FERC's taking care of those producing companies that would be threatened by financial hardship or bankruptcy if certain take-or-pay contracts were abrogated.

It may well be that we face a factual situation on the balancing of bankruptcies; that is, balancing of the bankruptcy of some producers with the bankruptcy of some small businesses, such as the one in Pottsville,

Pa., employing a few hundred people, whose gas rates are up some 40 percent.

It is estimated that Pennsylvania will lose some 50,000 jobs in the next year if there is not some relief from the escalating natural gas costs.

The balancing of bankruptcies is also at issue with the consumers. There are some 1.8 million households, for example, in the Commonwealth of Pennsylvania which are heated by natural gas.

It is my sense that it is constitutional to have this approach, that there are precedents for the kind of an emergency situation presented where health and welfare calls for the abrogation of contracts. And it is my legal judgment that it is appropriate to change some contracts and not others where there may be financial hardship for some producers, that the factual situation underlying would withstand a challenge in terms of equal protection of the law because there is a rational basis for the distinction of treatment.

For these reasons, I rise in support of the amendments which are on the floor. If there were more time and an opportunity for further deliberation, I would seek an opportunity to introduce as an amendment the legislation which I introduced a week ago Monday. Because of the limitation of time and the fact that it is now 10:41 and we are approaching a session passed midnight, perhaps substantially past midnight, the same issue can be achieved through the amendments which are now on the floor. And if the amendment by the Senator from Kansas is successful, and the amendment of the Senator from Iowa is successful, it may be that I will advance an additional amendment at a later time on this gas bill. But for the moment I wish to speak in support of the pending measure.

I thank the Chair and I yield the floor.

Mr. JOHNSTON addressed the Chair.

The PRESIDING OFFICER. The junior Senator from Louisiana is recognized.

Mr. JOHNSTON. I thank the Chair.

Mr. President, I think it was H. L. Mencken who said, "For every complicated problem there is a simple solution, and it is always wrong."

Well, I can promise the Senate that this very simple three-page, half-baked amendment is completely and totally wrong. Would it not be wonderful if we could take a complicated subject like natural gas that took years—not weeks, not months but years—to resolve and then was resolved badly, if it could be resolved with a magic wand, three pages long, one day's hearings, and we could solve all the problems?

Well, Mr. President, I think everybody in this Chamber knows that that is not so. We have got some problems with natural gas. We have been crying out for a solution in natural gas now for some months. I have had legislation pending for months in the Senate Energy Committee. We have had hearings on it. I can tell you that the solutions are not clear, not to the producers, not to the pipelines, not to the consumers, not to the whole panoply of people involved, because they are complicated and difficult problems and they involve moving targets—such as what are the prices in NGPA; what are the market forces?—and they are all intersecting and changing constantly.

But, Mr. President, to bring up, as I say, a three-page, half-baked amendment—which, by the way, has changed since yesterday's hearing. This is not the same amendment that was offered yesterday. I guess the changes in relationship were made after some of the faults were pointed out. But there are some new faults in it which have not been heard.

Let me just give for my colleagues some of the very obvious problems with it. The first problem is this will not help the consumer, Mr. President. The average price for the consumer in this country is $5.61 per million Btu's. But if you look at the price rise in the last year, which has been 95 cents, only 11 cents to 15 cents of that price rise was due to take or pay and 10 cents to 17 cents was due to price rises under NGPA. These are not my figures, these are the figures of the Department of Energy, the Energy Information Agency.

What does this mean? It means during the last year that less than 5 percent of the cost of natural gas to the consumer was due to take or pay or price rises under the NGPA. So if you could roll all of that back, which you cannot do, but if you could do all of that, you would get the handsome sum of 5-percent savings for the average consumer in the United States.

Mr. LONG. Will the Senator yield for a question?

Mr. JOHNSTON. Yes.

Mr. LONG. You say that you get a savings, a 5-percent savings on a customer's bill or a reduction of 5 percent on the price increases that occurred during the last year?

Mr. JOHNSTON. If you could eliminate all of that price increase, it would be about 5 percent of the total consumer bill. If you could eliminate all of the increase out of the $5.61 total, it would be about 25 cents.

Mr. LONG. So, assuming that you broke the existing contracts, abrogated all existing contracts, froze all the prices, did everything you can do in this amendment to the producer, having done all of that, out of every $5.61 you might bring the price down by 25 cents.

Mr. JOHNSTON. That is correct.

Mr. LONG. I thank the Senator.

Mr. DOMENICI. Will the Senator yield for another question?

Mr. JOHNSTON. Yes.

Mr. DOMENICI. By when do you think they could get the 5 percent; how soon?

Mr. JOHNSTON. Well, they have access to the FERC. The FERC docket now for the fastest kind of cases is over 2 years. I figure there are 20,000 producers, roughly, and I do not know what percent of those have take-or-pay contracts. Each one would have access to the FERC, and the prices would not come down under take-or-pay without access and full hearings before the FERC. So you could say sometime between 2 years and 10 years, if they were ever heard at all, you might finally get this 5 percent and by that time the NGPA would probably be—well, at least deregulation on January 1, 1985, would have already taken place.

Mr. DOMENICI. So if they are talking about relief by January or February, the Senator thinks it might be January or February 1985?

Mr. JOHNSTON. 1985 or 1990, seriously speaking, because under these provisions, you cannot abrogate these take-or-pay provisions until you go to the Commission, until either the Commission on its own hook or someone else, some other party, goes to the Commission and has an evidentiary hearing.

Now, by the way, I invite my colleagues to look at the standard by which the FERC would take this action. If the Commission determines that it prevents the purchaser from responding to the demands of customers—now just what does that mean, responding to the demands of customers or other market forces? Now I suppose that is defined somewhere in the Federal code what market forces are or demands of customers. But this is the new language adopted here put in this bill without any explanation as to what it means. But that is the standard that FERC is supposed to use to determine whether to lower and abrogate a lot of contracts.

Now what is the FERC supposed to do? It has the authority, not the requirement, to take such appropriate actions as it may be deemed necessary, including the rescission, annulment, or modification of such contract provision.

Now I do not know whether that would pass muster under the fifth amendment to the Constitution, but I think it is very doubtful to give to the FERC complete authority with no standards, other than something like market forces or responding to the demands of customers.

Mr. President, the problem with natural gas in very complicated. You see what has happened in natural gas is so many of these old contracts—and some of the old ones have a price as low as 26 cents an mcf—some of those are either terminating by the length of the contract or the gas has run out. And that is being replaced by what? Sometimes by section 107 gas, deregulated, which has drawn prices as high as $9.50 mcf, up from 26 cents to $99.50; or by LNG, which is unregulated and, by the way, not reached by this bill. They let LNG from abroad come in—oh, do not touch Algerian LNG. You roll back the American producer, abrogate his contract, but please be careful with the blue-eyed Arabs from Algeria, and please do not mess with the Canadians.

We brought this up in the hearing and they said, "Yes, those are serious problems but we cannot deal with that right now. We just do not have time."

Well, Mr. President, they do not have time and they do not solve the problem. The problem, Mr. President, is indeed very, very serious.

One of the things they asked when they waved their magic wand here is within 90 days the FERC shall take such actions as may be necessary within a 90-day period to devise and put into effect an incentive procedure to determine the appropriate rate of return that a pipeline company may earn under section 4 of the Natural Gas Act.

Do you realize the breathtaking import of this language? Somehow, within 90 days, we are going to give FERC the right to come in with a whole new standard, which we do not define, as to what a pipeline ought to earn.

What direction are they supposed to use? We are creating, by this, the FERC as a superlegislature that I guess could say 4 percent plus inflation, which is what we use in the NGPA for section 102 gas, or they could say they are entitled to just and reasonable. They could determine anything under this. They do not have any direction at all.

Mr. President, that is what we are doing. That language is inserted here somewhere and there has not been any hearing on this at all. So far as I know, this was not in the bills introduced yesterday.

Mr. President, nobody says anything much about the so-called intrastate pipelines, but my State of Louisiana has intrastate pipelines, principally; Oklahoma has them, I think Kansas has some, Texas has a great many, and New Mexico has some.

Intrastate pipelines are not subject to these restrictions. Customers all over the country are entitled to these great protections but not in Texas, Louisiana, Oklahoma, and other States that have intrastate pipelines. Why not? I will be honest to tell you, if it is a good thing I do not know why intrastate pipelines were left out, other than the fact that this amendment, I guess, was drawn sometime between the hearing yesterday and the time it came on the floor today and it was an oversight.

Mr. President, this is an amendment that will cause more problems than it would correct. In fact, it would not correct any problems. It is not going to help the consumers. What we would have, if we adopt this amendment, would be a grand and glorious mess, decades or at least years of litigation in the FERC and in the Federal courts. In the process, who gets it in the neck? The consumer because the consumer is not helped on his gas bill, but he is badly hurt because you are not going to get anybody to drill for gas so long as you have the uncertainty that this kind of legislation would produce.

That is what brought us to the NGPA the last time. We realized no drilling was taking place with respect to natural gas. We hit a peak in natural gas production about 1957 and it came down, down, and down ever since, until we passed the NGPA. With all its faults and warts it still has resulted in a great deal of drilling and it has resulted this year, for the first time, in more additions to reserves than we had consumption.

The reason for that is at least with all its faults it gave some predictability as to what prices would be.

All you would get under this amendment is a ticket to the courthouse, a ticket to years of litigation. What would happen if we passed this? You have a lot of rigs stacked right now. I predict virtually every gas rig in the country would be stacked while they wait for the Supreme Court finally to rule on the constitutionality of it, waited for FERC to determine what is a fair price, and waited for this whole thing to unravel years later. In the process, the country would be in very bad shape.

Mr. President, I have been very patient in this Senate on what I consider to be some really very important pieces of legislation that unlike this natural gas legislation has had hearings, has come through the Senate Energy Committee in the case of one amendment, and has been passed on the floor of the Senate in the case of other amendments. If this legislation is to be considered by this Senate, I think that we ought to consider at least the coal slurry pipeline. I think there is a great deal of other legislation that ought to be considered as a higher priority than this bad legislation.

If if sounds like I do not intend to let this matter come up for a vote, then you heard me right. The reason I do not want it to come to a vote, Mr. President, is I think a lot of our colleagues would be embarrassed if they seemingly had to vote against the consumer. The consumer is supposed to be helped by this half-baked idea that will not hold water legally.

It is like a lot of the votes on the floor of the Senate. You vote yea or nay and you are hurt back home with your constituents.

Well, I want to help my fellow Senators by sparing them the political pain of having to vote on such a bad amendment. Therefore, I hope in the process to accomplish something important. That is to pass first of all a coal slurry pipeline amendment. We have a number of really excellent amendments here that I am quite serious about.

Mrs. KASSEBAUM. Will the Senator yield for a question?

Mr. JOHNSTON. I will yield for a question reserving my right to the floor.

Mrs. KASSEBAUM. I would like to ask the Senator from Louisiana about this half-baked idea. Is he speaking to my amendment? [Laughter.]

Mr. JOHNSTON. I do not want to say anything unkind about someone so effective and attractive.

Mrs. KASSEBAUM. The Senator mentioned changing the language. My amendment has never changed since I first introduced it at the beginning of the session in November.

Mr. JOHNSTON. I guess it just looks different today; it sounds different. [Laughter.]

Mr. LONG. Will the Senator yield?

Mrs. KASSEBAUM. I yield to my colleague without losing my right to the floor.

Mr. LONG. Would this amendment say that a take-or-pay contract is null and void, or does it say that it might be null and void?

Mrs. KASSEBAUM. It says that the FERC has the authority to either declare it null and void or to modify it in some unnamed way after, of course, they determine whether or not it affects demands of customers or other market forces.

Mr. LONG. Then assuming that a producer and a buyer are bound today by a so-called take-or-pay contract, can the Senator say whether the contract is going to be binding or not binding, if this amendment is agreed to?

Mr. JOHNSTON. You absolutely could not tell whether it is binding or not until you waited your turn in FERC, which would now take you more than 2 years. With all the cases that would be filed, it would probably take far more than 2 years.

Mr. LONG. Would the Senator explain for the benefit of the Senate what is a take-or-pay contract?

Mr. JOHNSTON. That is when you buy a quantity of gas under a contract

provision which requires you to pay for the gas whether you take it or not.

Mr. LONG. Is it not usually the case in a take-or-pay contract if a purchaser chooses not to take the gas and pays for it, he has the privilege of taking the gas at a later date?

Mr. JOHNSTON. That is correct.

Mr. LONG. So it would be more accurate to call it a take-or-pre-pay? It is not intended in most cases, at least, that the purchaser will receive the gas, but if he does not take it, let us say, in the year he expected to take it, you can usually expect an adjustment in price at a future date?

Mr. JOHNSTON. That is entirely correct. I might say as a matter of practice that many of the large producers and many of the large pipelines are calling in their producers now and saying, "Look, we need relief from these take-or-pay contracts," and they are getting it.

They are getting it because they are threatening litigation and many of the producers need the cash flow so they are going along with it. They also recognize that the FERC may deal with this matter. In fact, the FERC is supposed to have a policy statement tomorrow on the subject of take-or-pay contracts.

Mr. LONG. Will the Senator yield further? Is it not so that in the absence of a take-or-pay provision, or something similar to that, the legal relationship would be such that the seller has obligated himself to sell his gas exclusively to a purchaser but the purchaser has no obligation to take it; basically the seller is obligated to sell everything he has and the purchaser has no obligation to buy anything at all?

Mr. JOHNSTON. You mean under this legislation?

Mr. LONG. Assuming that the contract says, as it usually says, that the seller is agreeing to sell all of his gas, at least for a period of years, but without a take-or-pay provision or some other provision saying how much the purchaser is going to buy, would that not leave the purchaser in the position that he is not required to take any at all?

Mr. JOHNSTON. The Senator is correct.

Mr. FORD. Will the Senator from Louisiana yield for a question?

Mr. JOHNSTON. Yes, I yield for a question.

Mr. FORD. There is one thing that bothers me somewhat about the take-and-pay or the take-and-prepay contract as the Senator from Louisiana mentioned.

Say I am a producer and I enter into a contract with you to furnish you x number of whatever I produced, and it is a take and prepay or whatever. Then I become obligated to the bank based on the contract you and I enter into. If we then come in and alter that contract, where does that leave me with my obligation to the financial institution? Am I out in the cold? Where are we as it relates to that kind of negotiated contract with you as the purchaser and me with the financial institution because I have a contract to lay down on the table that says I have this much income?

Mr. JOHNSTON. If the FERC said after a hearing on the merits that the contract was abrogated, then it would just be tough luck as far as you were concerned because you would still owe your money to the bank. You just would not have the income that the take-or-pay provision would produce.

Mr. FORD. Let us say I am bankrupt then. Would the financial institution lose money also?

Mr. JOHNSTON. The financial institution would also lose its money.

I think the practical effect would be you would not reach that point of the FERC ruling because the FERC would be absolutely inundated and would not have time to handle that matter.

Mr. FORD. What if I am one of the first ones to be considered by the FERC?

Mr. JOHNSTON. What would happen is banks would not lend money for drilling proposals any more. Across the country virtually none of the banks would lend you any more money if you did not have a take-or-pay contract. That means that the cash flow of these producers would be effectively stopped, just as if the FERC prevented the contract in the first place.

Mr. FORD. The point I make is that I have already entered into a contract, and we come in and give an opportunity to change that and that leaves innocent parties, in my opinion, holding the bag somewhere.

Mr. JOHNSTON. That is right.

Mr. FORD. And it is either the producer or the financial institution. The purchaser does not have any cash then. He just follows the law.

Mr. JOHNSTON. That is correct. And pending a hearing on this thing before the FERC, the bank probably would not renew that loan.

Mr. BOREN. Will the Senator yield?

Mr. JOHNSTON. Yes, I yield.

Mr. BOREN. Following up on what the Senator from Kentucky and the senior Senator from Louisiana asked in their questions of the Senator, when this Senate acted on the Natural Gas Policy Act some years ago, there was a decision made, was there not, because of the tremendous shortage of natural gas in the country that we should through the law provide certain incentives for deep gas, for example, tight sands gas to be developed, and therefore it was deregulated? Is that not true?

Mr. JOHNSTON. That is correct, the deep gas below 15,000 feet was to be deregulated.

Mr. BOREN. So we had this Congress saying, as a matter of policy—and it made a decision that I did not endorse at the time because I thought we should deregulate all gas and not certain categories, but this Congress decided to deregulate certain categories of gas. In fact, it was the most expensive categories of gas to explore for and produce.

Now, once that was done, is it not also true that there were a lot of companies then induced to go out and, say, for example, in the Deep-ended Arco Basin in Oklahoma, drill those wells down below 15,000 feet, some of those wells costing as much as $10 million and $12 million just in terms of drilling? And is it not also true that if there had not been the take-or-pay contract, if there had been no guarantee whatsoever, that having sunk $12 million into a hole that deep and that expensive to drill that those wells would never have been drilled in all likelihood if they had not been able to get assurance, as the senior Senator from Louisiana said just a minute ago, that that gas would be purchased? They could not afford to go to the bank, as the Senator from Kentucky said, to borrow let us say, $12 million to drill one deep gas well. They could not have afforded that on a contract that said I will sell you all the gas you want to buy but you do not have to buy anything from me. Could they have afforded to drill this well? Would they have drilled it if there was not this mechanism to protect them?

Mr. JOHNSTON. The Senator is absolutely correct. That well would never have been drilled.

If I may point out one thing that is curious about this proposal, as I read it, it may freeze the prices of so-called 107 deregulated gas. But that is one category of gas that has been coming down in price. It has come down in price from as high as $9.50 to $5 and $6, some cases below that.

Mr. BOREN. It has fallen so rapidly that, for example, in my home State the number of rigs drilling in the State exploring for gas has dropped from over 900 operating at the beginning of the year to less than 350 drilling and operating as of last week.

It would be interesting to go back through the record to determine which Members of this body voted at the time against deregulation of all gas and voted for that policy of deregulating the deep gas so that we can induce those producers to go in and drill those deep wells for the sake of active reserve and borrow that money from the bank. I am very discouraged to hear Members of this body saying, "Well, leave those people high and dry that we induced to go borrow that money and drill those wells."

I ask the junior Senator from Louisiana, is there any provision in this bill,

is there any appropriation, any kind of save harmless clause to provide the funds to guarantee those loans to the banks for those companies that will now be forced into bankruptcy and will have no cash flow? If the take-or-pay clause is abrogated, is it not true that nearly all those deep wells will be immediately shutdown, those pipelines will no longer purchase from them? They will no longer have any cash generated to meet those loans?

Is there provision in the bill, I ask the junior Senator, that has an appropriation in it to keep faith with those people that this Congress induced to go out and drill those wells and borrow that money from the banks? I wonder if the Senator from Kansas and the Senator from Iowa have provided the funds or the loan guarantees in this bill to stand behind those who were induced by earlier Congressional action to drill those wells?

Mr. JOHNSTON. There is, of course, no relief at all for the bankrupt producer.

You can sometimes say, "Well, the producers are all rich."

They are not all rich, and there are a lot of them that are in very tough shape right now as far as cash flow is concerned. A lot of them are going into receivership, and into chapter XI, because the price of some of their gas, particularly the 107 gas, has come down dramatically while the expense of drilling has gone up. The market is down, they cannot sell some of the gas, and they are in tough shape.

What we are going to do is take a rather sick industry now—and believe it or not it is very sick—and give it a death blow and not accomplish anything in the meantime.

Mr. BOREN. I think it should be very obvious that the Senator from Louisiana is not crying wolf. If anyone has followed the case of the collapse of the Penn Square Bank in Oklahoma City, which was primarily involved with loans in the deep-ended Arco Basin. I think they would see the effects of what a very rapid decline in deep gas prices would mean. If we were to abrogate all those contracts and totally choke all cash flow to those people who made those investments, I think what the Senator from Louisiana has said would undoubtedly come to pass.

I want to go back to a point he made earlier. Is it not true that the vast majority of the increase in price to the consumer has come about—we are all concerned with that—because of the great decline in the volume of gas going through that pipeline?

In other words, the decline in the end-use demand for that gas—I would like to ask the Senator again, what was the percentage of the increase in price to the consumer that is attributable to the decline in volume of gas going through the pipeline? In other words, the decline of end-use demand for the gas?

Mr. JOHNSTON. Of the 95 cent rise during the last year, almost 60 percent of it was due to Canadian gas, LNG, and a change in the pipelines' and utilities' tariffs. By "change in tariffs," I meant that as the industrial load went down, the consumers had to pay a larger percent of the cost of operating the pipeline. That was about 60 percent of the increase due to the consumer.

Mr. BOREN. So the foreign producer, in essence, changes in prices paid to foreign producers, have been responsible for about 60 out of the 95-cent increase?

Mr. JOHNSTON. No, I say that the 60 cents includes increases for foreign producers of LNG and the Canadian price increases and you also have a change in the mix of tariffs. That is to say that, with the recession, you have less industrial load so the same pipeline expense is spread over more consumers and fewer industries. That is 60 percent.

Mr. BOREN. So those three items together—the LNG, the Canadians, and the reduced volume of industrial use due to the recession, at least in part—those three things together caused, really, about two-thirds or more of the increase in price we have experienced.

Mr. JOHNSTON. About 60 percent.

If I may, the Senator raised the question of the Penn Square Bank a moment ago. I invite his attention to a statement of the Independent Petroleum Association of America, along with a long list of other independent producers, given by Danny H. Conklin, who appeared yesterday before the Committee on Energy and Natural Resources, who said that if these provisions were adopted, new well drilling would come to a virtual standstill. That is No. 1.

Second, he said:

A precipitous move to violently alter those contracts overnight would, in my opinion, result in several more Penn Squares throughout the Southwest. I alert you to this, because even if you decide you don't care what happens to producers holding worthless contracts, you might think about innocent people who are hurt when a financial institution collapses.

That is from the IPAA and I do not think that is an overstatement at all. That is what effect this provision would have—without at the same time helping the consumers.

Mr. BOREN. I certainly agree with the Senator. I would like to express my concern.

He just talked about the fact that if we could do something about LNG and do something about Canadian prices, we would have a great impact upon the consumer. Also, if we could do something to increase the volume of domestic gas—because if that volume were increased, more of it would be lower cost gas that would come into the pipeline if we had a higher volume of use.

One of the other things, of course, besides the recession that has impacted, has it not, has been the Fuel Use Act and the fact that the Fuel Use Act has made it virtually impossible to expand the number of customers for natural gas, that action having taken place back in the days when we were relying on false information that the country was running out of natural gas?

Should we be really concerned about getting the volume up to the price where we improve the cost mix for the consumer? Should we not also be concerned about reconsideration of the Fuel Use Act and perhaps expanding the number of industries and utilities that might be able to use that?

Mr. JOHNSTON. The Senator is exactly correct.

A few years ago it used to be, when we came to natural gas, it was a contest between consumers on the one hand and the producers on the other hand. The question was how we divided the pie—did we give more to the consumers or more to the producers?

If that was a correct statement a few years ago, it is decidedly not correct today. The situation is much more complicated, as the Senator, through his questions, suggests.

The consumer interest, I can tell the Senator, is not to pass this legislation. If you really want to hurt the consumer, pass this legislation, because we might, over a period of years, reduce the price 5 percent if we could reach all the price rise in the last year from this bill. But we would stop drilling in its tracks; we would have Penn Squares all over the country, we would have confusion in the gas market so that no new wells would be drilled.

Mr. BOREN. Is it not also true that if we wanted to look at improving the mix of natural gas prices, at least in the long-range view, we also have to ultimately consider the deregulation of all gas, that that would probably do more to bring all gas down to a moderate level across the board, at least as far as production from this point forward is concerned? So if we are talking about a comprehensive solution, we certainly ought to take the time also to examine the impact that deregulation across the board would have so we do not have such high-priced categories.

Would it not be true—I would like to ask the Senator from Louisiana about his experience from work on the committee. We heard about the consumer. We have just heard that if we are truly concerned about doing something for the consumer, we ought to be looking at the Fuel Use Act; we ought to be looking at the potential deregulation might have in terms of

changing the cost mix; we ought to be looking at the impact of Canadian gas; we ought to be looking at LNG. We should not be, therefore, narrowing the case down to only 5 percent of the problem. And even at that, by just narrowing it down to 5 percent of the whole increase question, we are hinging it on something that is going to take 2, 3, 4, maybe 10 years to solve, not only because of the regulatory morass, but also because of the constitutional questions raised in the impairment of the obligation of the contract.

Would the Senator not think that, by taking action on this narrow sphere, it makes it all the more difficult to get the kind of comprehensive solution that we need that will be very much in the interest of the consumer and the producer alike so that we can have long-range supplies that are adequate for the consumer at reasonable prices?

Are we not defeating ourselves? Are we not defeating the very consumers that we are supposed to be looking after by trying to take a little fragmentary part of this, making it less likely that we will deal with the overall problem, that we will take over the areas where the impact on the consumer really rests? Are we not reducing our chances of helping the consumer in the usual way by acting precipitately on this?

Mr. JOHNSTON. The Senator puts his finger directly on the problem, as usual.

Mr. President, I have a parliamentary inquiry to make.

The PRESIDING OFFICER. The Senator will state it.

Mr. JOHNSTON. Is this bill itself not amendable in two degrees—the House bill?

The PRESIDING OFFICER. Two perfecting amendments are in order.

Mr. JOHNSTON. Is it not also true that any perfecting amendments to the bill itself will be voted on before the amendments by the distinguished Senator from Kansas and the distinguished Senator from Iowa?

The PRESIDING OFFICER. The Senator is correct.

Mr. JOHNSTON. Mr. President, I have here some very worthy amendments, including several pertaining to busing, the Public Utility Holding Company Act repeal, the Clean Air Act, coal slurry pipeline rights of way, and also some natural gas legislation. But I think I have made the point that I am prepared to put in all of these amendments. I am not only prepared to, but anxious to, and I might even get the cooperation of the majority leader, who has promised me the first shot on the coal slurry pipeline.

Mr. President, I see the majority leader giving his characteristic smile, which says to me that he wants to table this whole subject matter and put it off to another day. I ask if that is what he has in mind?

Mr. BAKER. Mr. President, I confess I do have that in mind, but I think the distinguished Senator from Kansas (Mr. DOLE) wishes to be heard first. I shall not try to answer until he has that opportunity.

Mr. JOHNSTON. I shall yield to the Senator from Kansas.

Mr. DOLE. Did the Senator have in mind considering all these amendments en bloc in his package?

Mr. JOHNSTON. No. I wanted to consider them one at a time, and I think the Senator from Kansas had a very good idea and that was to divide each one of them up into its component parts.

Mr. BAKER. Mr. President, I have a better idea.

Mr. DOLE. Could I follow that? Maybe it was discussed earlier. We were gone.

Assuming the Senator from Louisiana and others who have spoken are correct that these amendments really do not accomplish much this year, are the other Senators prepared to help us when it comes to low-income energy assistance, because our costs have gone up 35 to 40 percent? The one thing that will help us this year is increasing the amount for low-income energy assistance. Can we obtain some support from the Senator from Louisiana and others who are concerned about the overall impact or the failure of impact of the amendments now pending?

Mr. President, those of us who represent Midwestern States certainly understand that natural gas prices are rising too fast. Kansas natural gas consumers along the cities service pipeline have been hit with dramatic price increases the past 2 years, and in the Kansas City metropolitan area the burner tip price of natural gas has increased by 41.9 percent between October of 1981 and October of this year.

These rapid and often unexpected price increases have become an intolerable burden on many households, particularly low-income families and those suffering from unemployment. It is some consolation to Kansas City consumers that their natural gas bills remain among the lowest in the country. To illustrate this point, as well as the 135-percent increase in cost over the past 4 years, I shall request that recent data compiled by the Congressional Research Service be inserted in the RECORD at the end of my remarks.

Regardless of the relative cost of fuel throughout the country, rising prices are a hardship which Congress must and should address. As winter fast approaches, my primary aim is to find a proposal which will help consumers this year during the winter of 1982-83. Many of us have been looking for solutions for months, and several of my colleagues have introduced legislation to freeze natural gas prices and abrogate "take-or-pay" contracts which keep consumer prices high even during times of surplus supply. I commend the efforts of Senators KASSEBAUM, DANFORTH, and EAGLETON to address a serious problem and bring it to Senate consideration before winter begins.

However, I believe it is crucial that we face the facts, that we not fool ourselves into thinking we are helping the consumer when we in truth are not. I am concerned that the proposals before us today, however well-meaning, will not lower prices or provide relief in the months of winter to come.

There is only one way to help those most severely harmed by cold weather and fuel prices beyond their budget. We can help the poor who are unable to afford high-cost gas by increasing the funding for the low income energy assistance program, and we can help them this winter. Congress has authorized and appropriated $1.875 billion for payments to needy citizens unable to pay their utility bills.

This program has meant more than $16 million to my State of Kansas in fiscal 1982. These are not large payments. In Kansas the average recipient was provided $133 last year to keep his home warm. In many cases that money allowed families to remain in their homes, and in some cases that money meant the difference between life and death.

In fiscal 1983, my State of Kansas expects to receive only $15.8 million just as prices are increasing by 35 percent. Kansas is responding by tightening up the benefits and eliminating many needy families from the program. To compound matters, the administration is discussing further reductions in funding for fiscal 1984.

If we are really serious about easing human suffering in the face of significant increases in costs, Congress should make every effort to increase funding for the only program which will help consumers this winter.

I join my colleagues in their concern at the impact of "take-or-pay" clauses and the noncompetitive impacts of the Natural Gas Policy Act. I share their conviction that Congress must act to correct these inequities to insure that natural gas sells for its fair price. Since rapid action now will do little to help this winter, I urge my colleagues to schedule a review of natural gas pricing policy for early next year. Only significant reform can correct the system.

I ask unanimous consent that the material be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AVERAGE RESIDENTIAL PRICE OF NATURAL GAS IN SELECTED URBAN AREAS AND REGIONS: NOVEMBER 1978–OCTOBER 1982 [1]

Area and region	Average price, (cents per therm) [3]		Percentage change	
	November 1978	October 1982	November 1978 to October 1982	October 1981 to October 1982
U.S. city average [2]	30.4	60.2	98.0	20.4
Anchorage, Alaska	16.7	18.0	7.8	−5.8
Atlanta, Ga.	34.9	60.2	72.5	6.7
Baltimore, Md.	39.7	70.6	77.8	18.7
Boston, Mass.	45.0	85.1	89.1	9.7
Buffalo, N.Y.	30.4	66.1	117.4	39.5
Chicago, Ill.–northwestern, Indiana	27.9	46.0	64.9	8.5
Cincinnati, Ohio, Kentucky, Indiana	28.8	61.2	112.5	33.9
Cleveland, Ohio	26.7	54.8	105.2	28.6
Dallas-Fort Worth, Tex.	24.8	66.5	168.2	69.6
Denver-Boulder, Colo.	26.9	66.2	146.1	60.3
Detroit, Mich.	29.6	51.1	72.6	15.9
Honolulu, Hawaii	127.4	217.0	70.3	−0.7
Houston, Tex.	32.0	51.4	60.6	21.2
Kansas City, Missouri-Kansas	21.3	50.1	135.2	41.9
Los Angeles-Long Beach, Anaheim, Calif.	22.3	55.7	149.8	8.3
Miami, Florida	61.7	76.8	24.5	−2.5
Milwaukee, Wis.	30.9	61.8	100.0	18.9
Minneapolis-St. Paul, Minnesota-Wisconsin	29.5	58.8	99.3	31.5
New York, N.Y.–northeastern, New Jersey	55.4	96.6	74.4	19.4
Northeast Pennsylvania	46.0	71.2	54.8	14.1
Philadelphia, Pa.–New Jersey	43.0	77.8	80.9	37.7
Pittsburgh, Pa.	24.8	46.2	86.3	22.6
Portland, Oregon-Washington	39.6	69.0	74.2	8.2
St. Louis, Missouri-Illinois	32.0	59.9	87.2	24.0
San Diego, Calif.	23.9	61.1	155.7	36.4
San Francisco-Oakland, Calif.	20.3	49.1	141.9	−6.7
Seattle-Everett, Wash.	38.8	77.1	98.7	5.0
Washington, D.C.-Maryland-Virginia	42.7	73.6	72.4	23.3
Northeast region	42.6	80.2	88.3	22.4
North Central region	28.3	52.7	86.2	20.3
South region	33.6	63.6	89.3	27.5
West region [2]	22.9	54.9	139.7	14.1

[1] The urban areas identified are Standard Metropolitan Statistical Areas (SMSAs) or consolidated areas as defined by the Bureau of Labor Statistics.
[2] Honolulu, Hawaii is not included in the U.S. city or West region average price.
[3] One therm is the quantity of gas supplying 100,000 Btu's of energy.
Note.—Compiled by CRS using Bureau of Labor Statistics data.

Mr. JOHNSTON. I did not have nearly as much sympathy for low-income energy assistance until the Senator put it quite the convincing way he just did. I think it is looking better and better. I think we might find some support for that kind of approach.

Mr. BAKER. Mr. President, I have no desire to cut off anyone, but it seems to me that we have reached the place where we should address the issue at hand.

I move to table——

Mr. DANFORTH. Mr. President, will the Senator yield?

Mr. BAKER. I withhold the motion.

Mr. DANFORTH. Mr. President, I do not want to delay this either, but I do think that my colleague, Senator EAGLETON, and I would wish to address the subject at least briefly.

Mr. EAGLETON. Briefly.

Mr. DANFORTH. Maybe 2 or 3 minutes each.

Mr. BAKER. Mr. President, I withhold the request.

I yield.

Mr. EAGLETON. Mr. President, I shall be brief. I thank the majority leader for his courtesy.

Mr. President, I rise in support of the Kassebaum natural gas price freeze amendment. It is very similar to my gas freeze bill which is cosponsored by Senators DANFORTH, SASSER, SARBANES, METZENBAUM, RIEGLE, and LEVIN.

Mr. President, I know of few issues in recent years which have stirred more public outcry than runaway natural gas prices.

This groundswell of public discontent and demand for relief should come as no surprise to anyone who heats with natural gas. The average home heating bill has jumped 92 percent in the last 4 years. The pricing of natural gas today is a clear case of consumers getting the shaft while some producers get the big profits.

Citizens read about producers of cheap gas who have been forced to shut in their wells because of a tremendous glut on the gas market. At the same time, they are receiving gas bills that portend to increase far more this year than they have in painful years past. Although nationally, gas prices are expected to rise 20 to 25 percent, many areas will be socked by hikes of up to 60 percent.

Mr. President, one does not have to be an economist to know that when prices skyrocket during the period of oversupply something is scandalously wrong. If anyone is in doubt of that, I invite them to come to my office to read the thousands of letters I have received in just the last few weeks from shocked and outraged customers. If anyone doubts that there is something wrong within that industry, I invite them to spend a few minutes talking with small gas producers who have been driven out of business because the gas they have to sell is too cheap.

A number of other Senators have heard the call for action. Accordingly, we are offering a simple amendment to freeze gas prices where they are for 2 years. We recognize that a freeze is a far cry from being a panacea for all the problems that now plague the gas market. This freeze is intended to give consumers some rate relief while Congress works to secure a more permanent solution.

Under this measure, the maximum prices that producers will be able to demand from pipeline companies for most natural gas during the next 2 years will be frozen at the maximum levels existing under the Natural Gas Policy Act (NGPA) on October 1, 1982.

In the case of deregulated natural gas produced from a well drilled prior to October 1, 1982, the maximum lawful price will be the contract price for such gas on October 1, 1982. For any deregulated natural gas produced from wells drilled prior to October 1, 1982, but which was not covered by a contract, the maximum lawful price will be the average price on October 1, 1982, for deregulated natural gas produced from the three nearest wells covered by contracts on that date.

This measure sets no maximum lawful price for deregulated natural gas produced from wells drilled after October 1, 1982. As you know, there is an excess supply of natural gas today. If normal market forces work, contract prices for this new deregulated natural gas should not come close to the unreasonably high levels we have recently seen. Pipelines now have no incentive to pay $7 or more for such gas when much cheaper gas is readily available. While I am not convinced that any categories of natural gas should be deregulated, I believe we can safely leave a relatively small amount of so-called high cost gas deregulated while we fully evaluate the NGPA over the next 2 years.

I must emphasize at this point that this bill does nothing to impair existing contracts setting prices lower than those prices permitted by the NGPA. Nor does it prevent future contracts between producers and pipelines setting prices below the maximum levels set by this bill. I firmly believe that pipelines are under an obligation to bargain for the best prices possible for natural gas.

As you know, the purpose of this amendment is to provide some immediate relief to our Nation's gas consumers. The 98th Congress can then take the careful, thorough look at gas regulation which I believe is urgently needed.

I am hopeful that we will be able to reexamine and revamp gas regulation by the time the price freeze implemented by this amendment expires. However, in light of previous congressional efforts to deal with comprehensive energy legislation, I am not confident this can be done. For this reason, this freeze legislation pushes the NGPA deadlines back for 2 years until 1987. If Congress fails in its duty to rewrite gas law by the end of 1984, we simply cannot allow prices for more than half of our natural gas production to go through the roof. The indefinite price escalators and most favored nation clauses in many natural gas contracts virtually guarantee that this will happen. Extending the NGPA 2 more years gives us a backstop in case no positive congressional action is taken.

In short, this amendment will simply create a hiatus in the spiraling price of gas while the Energy Committees determine what has gone wrong in the gas market.

If there are Senators in this Chamber who refuse to admit that Americans are unduly burdened by skyrocketing gas bills, if there are Senators who actually believe that there are no inadequacies in the regulatory apparatus, if there are Senators who cannot bite the bullet and say "Hold everything, there's something very wrong here," then let those Senators stand

up and be counted. Let the consumers of this land judge their representative's vote against this amendment for what it is: A vote to let a bad situation get worse on the backs of struggling citizens.

No, this amendment will not cure all the ills of the gas market. Nor will it cause an immediate drop in consumer gas bills. It will, however, moderate future price hikes and, perhaps more important, it will act as a catalyst for thorough congressional review of the gas situation.

Mr. President, the last go-around at natural gas legislation in the mid-1970's was a timely endeavor, to say the least. I hope for all concerned that this time around the issue will be addressed more expeditiously. One way or the other, it is not fair to perform our review of the gas situation without mitigating the gas price escalations that are now crushing consumers.

We must act now to freeze gas prices and urge the appropriate committees to thoroughly evaluate and revamp troublesome aspects of gas law.

I urge my colleagues to look at the economic hardship that has increased measure for measrue with gas price hikes in their home State and across the country. I urge my colleagues to recognize that it is high time to stop these enormous gas price hikes and re-evaluate the gas situation.

I urge my colleagues to vote for fairness and for their constituents. I urge them to vote for the gas price freeze provision in this amendment.

Mr. President, I am also supportive of the take-or-pay contract provision in the Kassebaum amendment. Senator DANFORTH and I were joined by a number of other Senators in introducing take-or-pay legislation that I believe would do more for consumers. I would prefer to see that legislation brought before the Senate. However, under the present circumstances, which do not appear to make consideration of our take-or-pay measure possible, I support the Kassebaum take-or-pay provision.

Mr. President, I would like to take a few moments to talk about the need for action on the take-or-pay issue.

Mr. President, natural gas customers are staggering under the burden of higher and higher natural gas prices at a time when natural gas supplies are plentiful. For many, the choice this winter will be between food and fuel.

In many parts of the United States, expensive gas is flowing through the interstate pipelines while less costly gas production is shut in. Cheap gas is not being produced and brought to market while expensive gas flows freely.

The take-or-pay provision in many natural gas contracts is one reason that consumers are paying far too much for natural gas today. These contract provisions are forcing higher rates; they are forcing expensive gas into our homes and businesses while cheap gas remains in the ground. I believe these contracts are clearly contrary to public policy. There is simply no good reason to allow these provisions to operate in the current natural gas market.

Take-or-pay contracts require the purchaser of natural gas pipelines to take from the producer high volumes of natural gas, or pay the producer if the gas is not taken. These contracts compel the pipeline to continue pumping high cost gas into their systems—even when cheaper gas is available—or if they buy the cheaper gas, they must still pay the producers for the high cost gas even though it is not produced and delivered through the pipelines.

Whatever the gas situation, consumers never seem to fail to take it on the chin. When gas is scarce, he pays more, and when gas is plentiful, he pays more. Market forces are not working, and they surely cannot begin to work unless we do something now about these take-or-pay provisions.

Mr. President, there are some who say that the complex subject of natural gas legislation must be thoroughly analyzed and a comprehensive solution developed. I do not disagree. But the hardships caused by take-or-pay provisions are apparent to everyone, and the remedy is clear. I believe that Congress must declare these provisions contrary to public policy and render them null and void except in extraordinary circumstances.

But the gas consumers of America cannot wait for all of the problems to be studied and solved. Congress cannot wait until the warm, humid days of summer to deal with a crisis that is upon us this winter. Ratepayers must have relief now. It is not necessary to accept for even 1 more day a system which tells us that rates must go up while cheap gas is available but not being produced.

Mr. President, I urge my colleagues to enthusiastically support this amendment with the knowledge that it is not a solution to all of the ills of a sick market, but it is a good solid start.

Now I wish to rebut at least four points that were raised in the debate by Senator JOHNSTON and Senator BOREN, the Alfonse and Gaston of natural gas.

No. 1, Senator JOHNSTON pointed out, after piercing cross-examination from Senator LONG of Louisiana, that all that this amendment would save the consumer is a piddling little 5 percent on their total gas fuel bill.

The Gas Service Co. of Kansas City, a reputable concern, says that if effective take-or-pay legislation is passed, it will save consumers 25 to 30 percent on their gas bill. The gas price to Kansas City residential gas users is $5 per mcf. Twenty-five percent of $5 is $1.25.

Point 2, and Senator KASSEBAUM got up to rebut this but did not get the opportunity—the freeze section is a cap, not a hold.

The freeze section reads, if my reader can find me the language—there it is, line 25, page 2:

> The maximum lawful price applicable to any first sale * * *

So this measure mandates a cap—prices in the future can drop well below the cap. This amendment does not lock in high prices in perpetuity.

As to point 3, on the question of the constitutionality of abrogating take-or-pay contracts, let me just give one brief quote from the Permian Basin Area rate case, the U.S. Supreme Court 1967:

> Although the Natural Gas Act is premised upon a system of private contracting * * * the Commission has plenary authority to limit or proscribe contractual arrangements that contravene relative public interest.

which leads me now to my final point on which I conclude.

Much has been said by the Senator from Oklahoma and the Senator from Louisiana about the majesty, the beauty, the sanctity of this wonderful thing called NGPA, the Natural Gas Policy Act of 1978.

Senator BOREN was not here but had he been here when the NGPA was voted on—he was here in spirit—he would have voted for it. It was such a magnificent document.

I think the Senator from Louisiana, after working on it for years and months, voted for it. It was such a magnificent document.

Section 314 of that sacred act abrogates a whole bunch of contracts.

I did not hear Senator JOHNSTON get up and talk about what was going to happen as a result of abrogating all of those contracts back in 1978.

Mr. JOHNSTON. Mr. President, will the Senator yield?

Mr. EAGLETON. I yield.

Mr. JOHNSTON. I voted against it.

Mr. EAGLETON. Oh, he voted against it. Good for him.

Mr. BOREN. Mr. President, will the Senator yield?

Mr. EAGLETON. He redeemed my faith.

Mr. BOREN. Mr. President, will the Senator yield?

Mr. EAGLETON. I yield.

Mr. BOREN. I testified against it, but I wonder how the Senator from Missouri voted on that bill?

Mr. EAGLETON. I unfortunately voted for that dog, and I am here tonight to expiate my sin. Confession is good for the soul.

But section 314 does more abrogating on one page of a Federal statute than any other similar page I have ever read. So let us not be conned about this abrogation business.

I should also point out that under the Kassebaum amendment the Commission (FERC) can "take such appropriate action as it may deem necessary."

This means that a gas producer who has a take-or-pay contract on which a bank loan is based can raise that point with the Commission and the Commission can give equitable relief if that is actually the case. Indeed, I am sure there would be some cases where gas producers who went out and borrowed to the hilt based on a take-or-pay contract would most certainly merit equitable relief.

It is not Senator KASSEBAUM's intention nor mine, nor Senator DANFORTH'S, to drive anyone into bankruptcy. But those cases would be the exception and not the rule.

I thank my colleague.

Mr. BAKER. Mr. President, do I understand now from the Senator from Missouri that he wishes to speak?

Mr. DANFORTH. Briefly.

Mr. BAKER. Mr. President, I ask unanimous consent that I may yield without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Missouri.

Mr. DANFORTH. Mr. President, I thank the majority leader.

I wish to pay my compliments to Senator KASSEBAUM and Senator JEPSEN for the work that they have done on this bill.

I, along with Senator EAGLETON, Senator SARBANES, Senator RIEGLE, Senator BOSCHWITZ, and Senator DIXON, had intended to propose a somewhat different approach to solving the take-or-pay contract problem, and it was my view and is my view that the approach that we would have followed is better, plainer, and quicker than the one proposed by Senator KASSEBAUM and Senator JEPSEN.

It was our view that we should not simply delegate to FERC the authority to abrogate these contracts but Congress itself should abrogate take-or-pay contracts with the exception that if the contracts had been pledged for loans to a bank prior to the date of the bill then FERC could remove the abrogation and let the contract go through.

We felt that this was a simpler way to do it and that it was a stronger and quicker way to do it.

But the difference between Senator JEPSEN and Senator KASSEBAUM, on one hand, and the rest of us on the other hand, was really a matter of approach. It was not a matter of end result or what we wanted to accomplish with this legislation.

Mr. President, the simple facts are these:

Last year 8,000 residents of the Kansas City area in Missouri and Kansas had their natural gas disconnected. They are now without natural gas service. They are dependent on natural gas to stay warm. This winter it is estimated that that number will increase from 8,000 to somewhere between 10,000 and 12,000.

We have heard so much about the plight of these poor producers who are so dependent on their take-or-pay contracts.

How about the poor people who cannot pay their bills? Who is going to feel sorry for them and what is going to be done about them and how are we going to explain tabling this amendment other than it is going to be filibustered? How are we going to explain tabling this amendment, Mr. President? How are we going to explain to our constituents that we are denying them access to 50-cent gas which is now being kept in gas fields in Kansas and forcing them to consume gas which is being sold at $5, $6 a thousand cubic feet?

That is the aberration, Mr. President, and that is what we seek to address in this amendment.

Mr. BAKER. Mr. President, in just a moment I want to yield under the special circumstances, special conditions, to the Senator from Oklahoma, the Senator from New Mexico, and the Senator from Iowa. But before I do so, let me say one word in respect to the very excellent and elegant remarks by the Senator from Missouri.

I have no quarrel with his logic, and I understand and appreciate and admire his special concern for those who are acutely distressed by the cost of gas. But the question was put, how are we going to explain tabling this amendment? I would respectfully suggest, Mr. President, that one way you are going to explain it is I do not know why it should be on a highway bill. The other is we have to get on with the business of the Republic, and we should address this issue, and indeed I will try to find a way to address this issue but, Mr. President, not on this bill at this time. That is the way I would hope to do it because I have long since reconciled myself to the understanding that I cannot solve all of the world's problems in a single piece of legislation, and that it falls to the duty of the leaders of the Senate to try to do the country's business in the best way we can.

Mr. President, I ask unanimous consent that I may yield 3 minutes to the Senator from Oklahoma for the purpose of making a statement, and without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. Mr. President, I thank the majority leader.

I certainly think that now is not the time for this legislation. We had hearings yesterday, which I sat in on and listened to my good friends and colleagues who were advocating such legislation.

I understand their desire to do something, but I certainly believe that if one looks at the whole issue of natural gas, which takes more than 1 day and certainly should not be done at 11:30 at night, you realize if we do just this one thing, that it would be wrong and actually, in the long run, would do more damage than good. In the long run, this amendment will hurt consumers much, much more than it will benefit them.

There are two main elements to this amendment, one abrogates take-or-pay contracts and the other is a price freeze. Neither will have any significant impact on the consumer in the short run, and both will have a disastrous effect on consumers in the future.

So I urge my colleagues not to go along with my good friends, Senator KASSEBAUM, Senator JEPSEN, Senator DANFORTH, and Senator EAGLETON.

I think it would be very shortsighted and it would be the wrong thing for the Senate to do. If by chance the tabling motion does not pass I can assure the Senate that we will be on this amendment for a great length of time.

Mr. BAKER. Mr. President, I ask unanimous consent that I may yield 1 minute to the Senator from New Mexico without losing my right to the floor.

Mr. DOMENICI. Mr. President, I thank my distinguished leader.

We are being asked to vote on legislation intended to restrain natural gas prices either by a temporary price freeze or through congressionally mandated contract modifications.

There is no doubt that serious and legitimate concerns have prompted demands for immediate relief from the gas price increases projected for this winter.

There is also no question that serious financial hardship has been imposed on many citizens and businesses in certain States such as Kansas and Missouri.

However, even the most basic analysis of the proposal we have before us suggests that it simply will not provide the relief it promises, and that it may have unintended long-term consequences.

According to preliminary Department of Energy estimates, freezing natural gas prices would provide consumer relief amounting to a mere 2 percent, and that reining in contracts' take-or-pay language would bring 1 or 2 percent more.

If we are talking about relief of 2 to 4 percent, we are not talking about a level of relief that's going to solve the kinds of problems that the sponsors of this proposal have in mind.

In the mid-1970's, when we last faced serious shortages of natural gas,

these shortages brought about great hardship.

The Congress responded at that time with short-term stop-gap legislation that was not only ineffective in helping the people and businesses most in need, but probably aggravated the problem.

I am convinced that if we pass a freeze on the price of gas for a year or two, or legislatively mandate changes to legal contracts, that we guarantee a gas shortage down the road.

The existing law was enacted after months of careful consideration and negotiation. It is not perfect.

Recent developments in some regions need careful scrutiny. However, before we take any legislative action, we must identify precisely the problem we seek to address and fashion a remedy that will clearly achieve the result we seek.

Freezing wellhead prices, or fixing contracts, may not even address the root of the problem.

Each State and each region is served by a combination of gas utilities which, in turn, may be served by several natural gas pipelines, each with its own unique set of gas supply sources, contractual obligations, and market requirements.

Accordingly, any generic legislative action will have differing impacts in the various regions of the country. What may be effective in one region may produce adverse consequences in another.

During the remaining days of this short session, we lack sufficient time to ascertain the long-term impacts of the amendment before us.

I urge you to resist the impulse to take immediate action. We must recognize that any congressional action motivated by the need to correct short-term market conditions must be carefully balanced against the risks of returning to gas shortage conditions and imposing severe economic hardships on gas consumers.

Mr. President, I ask unanimous consent that a Dear Colleague letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON ENERGY
AND NATURAL RESOURCES,
Washington, D.C., December 8, 1982.

DEAR COLLEAGUE: During the next few days you may be asked to vote on legislation intended to restrain natural gas prices, either by a temporary price freeze or through Congressionally mandated contract modifications. We ask you to join us in opposing any piecemeal natural gas legislation at the present time.

There is no doubt that serious and legitimate concerns have prompted demands for immediate relief from the gas price increases projected for this winter. However, even a preliminary analysis of the pending proposals suggests that they simply will not provide the relief they promise, and they may have unintended long-term consequences.

The existing law was enacted after months of careful consideration and negotiation. It is not perfect. Recent developments in some regions need careful scrutiny. However, before we take any legislative action, we must identify precisely the problem we seek to address and fashion a remedy that will clearly achieve the result we seek. Freezing wellhead prices, or fixing contracts, may not even address the root of the problem.

Identifying the precise problem or problems unfortunately is not a simple task. Each state and each region is served by a combination of gas utilities which, in turn, may be served by several natural gas pipelines, each with its own unique set of gas supply sources, contractual obligations, and market requirements. Accordingly, any generic legislative action will have differing impacts in the various regions of the country. What may be effective in one region may produce adverse consequences in another.

During the remaining days of this post-election session, we lack sufficient time to ascertain the long-term impacts of the pending legislative proposals. However, the Congress has begun that analysis. The Committee on Energy and Natural Resources convened a hearing on Monday, December 13, 1982, to review current market conditions and the factors contributing to those conditions.

We urge you to resist the impulse to take immediate action. We must recognize that any Congressional action motivated by the need to correct short-term market conditions must be carefully balanced against the risks of returning to gas shortage conditions and imposing severe economic hardships on gas consumers.

HENRY M. JACKSON,
Ranking Minority Member.
J. BENNETT JOHNSTON,
JAMES A. MCCLURE,
Chairman.
LOWELL P. WEICKER, JR.,
PETE V. DOMENICI,
MALCOLM WALLOP.

Mr. DOMENICI. I would say to my good friend, the distinguished Senator from Missouri, that a very simple answer to his question is that it just will not work. We could pass legislation that is before us and the overwhelming compelling evidence that is there will indicate there will be little or no relief during this winter to any consumers of the United States and even if the 25 percent decided about a part of Kansas City is true, that obviously could not occur in January, February, March, or April of this year by the compelling testimony, and that gives us time to try to do something that really works.

If it works at all, the compelling evidence is it might have a 4-percent effect on this Nation, and it seems to me we can certainly spend 2 or 3 months rather than 2 or 3 hours trying to accomplish that.

I thank the distinguished leader.

Mr. BAKER. Mr. President, I now ask unanimous consent that I may yield to the Senator from Iowa without losing my right to the floor for the purpose of making a statement.

Mr. GRASSLEY. Mr. President, I rise in strong support of the amendment just offered by my distinguished colleague from Iowa regarding the important issue of natural gas. The current natural gas situation has done much to reinforce the appropriateness of my decision as a Member of the House of Representatives to vote against the Natural Gas Policy Act of 1978.

We are all very much aware of the severity of the natural gas pricing problem. The Senate has heard numerous discourses on the critical need to address the current natural gas situation, and there is certainly no shortage of legislative remedies to address the problem. The Senate Committee on Energy and Natural Resources held hearings Monday to explore the options pending before Congress.

My belief is that we must focus on producer-pipeline contracts, many of which are no longer representative of today's market conditions. Such an approach would help correct current market anomalies whereby gas prices continue to soar even though gas is plentiful. Furthermore, high priced gas is being produced and distributed while lower cost gas is being underproduced or even shut in. Since a great deal of this paradox stems from the aforementioned contracts we must appropriately target the contracts for legislative action. Granted, the vast majority of the most onerous gas contracts were entered into during a period of time in which the prime consideration of pipelines, distributors, and consumers was assurance of a continuous supply of natural gas. However, the prevailing conditions during the mid 1970's are no longer the case today.

This amendment will specifically focus on contractual provisions which have created the most distortions. By broadening the Federal Energy Regulatory Commission's authority to disallow certain cost passthroughs on the basis of an expanded definition of abuse under section 601(c) of the Natural Gas Policy Act, we can restrain some of the gas hikes consumers see in their gas bills. Specifically, the statutory definition of abuse would include imprudence and would further set up a rebuttable presumption regarding a pipeline's responsibility to respond to changes in customer demand or market forces. The new definition of abuse would include cost increases attributable to take-or-pay clauses for gas quantities in excess of 70 percent; indefinite price escalators which are not tied to recognized economic indicators, most-favored nation clauses; and those contracts which do not include a marketout clause.

Passage of this amendment does not in any way preclude adoption of more comprehensive legislation during the

98th Congress. The natural gas industry, the Senate Energy and Natural Resources Committee and consumer advocacy groups have all demonstrated a willingness to address the problems of the natural gas pricing structure in a complete fashion next year. The administration has also sent preliminary signals that it is on the way to developing a package of legislation for congressional consideration.

I certainly hope that the fervor in which this lameduck Congress focused on this issue carries over into the next session. In the interim, my good friend and I feel compelled to try to extend some assistance to sufferers of soaring gas prices. A "wait-until-next-year" posture offers little solace to those individuals faced with paying this month's gas bill. The sense of urgency cannot be overstated; and I urge the favorable consideration of this amendment.

ACTION NEEDED TO SLOW NATURAL GAS PRICE INCREASES

Mr. SASSER. Mr. President, I have joined with my distinguished colleagues, Senator EAGLETON and Senator DANFORTH, in sponsoring legislation that would place an immediate cap on the runaway cost of natural gas in this country. This amendment that is being offered recognizes first and foremost that we cannot stand idly by and allow these steady price hikes to bankrupt our people.

The amendment that is being offered today does not attempt to destroy these purchase gas contracts. The amendment that my colleagues are offering attempts to return an element of flexibility to the contractual process. It is intended to provide an overriding sense of fairness to a contractual process by which we are all affected.

Mr. President, we cannot afford any further delays in this matter. We need to take immediate action to protect consumers from the escalating cost of natural gas. Under the present structure of the Natural Gas Policy Act of 1978, the longer we wait to tackle the problem, the higher will be the cost to the natural gas consumer nationwide.

The price of natural gas is skyrocketing out of control. Since the enactment of the Natural Gas Policy Act of 1978, the price of natural gas for the residential consumer nationwide has risen a whopping 98 percent. More than 42 million Americans, including 453,968 Tennesseans, have felt the devastating impact of these escalating natural gas prices.

Mr. President, consumers should not be held economically liable for the present natural gas glut. Consumers should not be forced to choose between paying their grocery bills or heating their homes. But, unless we act soon, I believe this is precisely the situation toward which we are fast approaching.

Nearly 5 years ago, we faced a situation of heightened oil prices and a shortage of natural gas reserves. Pipeline companies and producers, partially in response to this situation, entered into long-term gas purchase contracts. Now, market conditions no longer require the continued need for these long-term agreements.

Mr. President, consumers in many parts of this country face 20- to 30-percent increases in their gas bills this winter. In Tennessee, the cost of natural gas has more than doubled within the last 2 years. Gas which cost the residential consumer $31.95 per month 2 years ago in Memphis now costs that same consumer $74.09. That is a 132-percent increase. This price trend not only is occurring in Memphis, but in Nashville, Knoxville, Chattanooga, and all over this Nation.

Mr. President, it is no secret to any of us what is at the core of these price increases—long-term purchase gas contracts between the pipeline companies and the producers. These take-or-pay contracts purport to respond to the oil crisis of the later 1970's. At that time, perhaps they did. However, these contracts totally disregard the adverse impact of their rigid terms on our Nation's natural gas consumer. Mr. President, these contracts must be modified.

Mr. President, I recognize that it is, indeed, no simple matter to renegotiate these contracts. I think we all recognize and respect the ultimate sanctity of the contract. But it is in the public interest that we should attempt to modify these purchase gas agreements so that they conform to prevailing market conditions.

In modifying these contracts by this amendment, Mr. President, we will be assuring that these contracts are fair, just, and equitable to natural gas consumers. Current take-or-pay contracts are diametrically opposed to this fundamental concept. The runaway cost of natural gas is proof of this.

Mr. President, I would ask my colleagues to heed the urgency of the moment and amend the Natural Gas Policy Act of 1978 along the lines of the Kassebaum and Danforth-Eagleton amendments.

Mr. JEPSEN. Mr. President, I ask unanimous consent to have printed in the RECORD a letter I have received from Robert F. Tyson, director, Iowa Energy Policy Council, dated November 8, 1982.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NOVEMBER 8, 1982.

Hon. ROGER W. JEPSEN,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR JEPSEN: The Iowa Energy Policy Council strongly supports the legislation you have introduced to help consumers weather rapidly increasing natural gas prices. Iowans' average winter gas bills nearly have doubled since 1979 and may double again by 1986.

A major cause for the continued rise in natural gas prices is the provisions in long-term contracts between gas producers and pipeline companies. These long-term contract provisions are fixing a market price which bears no relationship to today's market conditions.

The price of natural gas will continue to rise due to a diminishing supply. But the market price is not operating freely due to contract provisions. Pipeline companies cannot afford to bear the excessive prices created by these provisions. The pipelines pass high prices along to consumers. Iowans are reaching the financial limits of their ability to pay these bills. Already over 77,000 Iowa households (197,000 people) require financial help to pay their fuel bills.

Long-term natural gas contracts between producers and pipeline suppliers were negotiated at a time of high demand, low supply, and regulated low price. In 1973, regulation boosted prices and encouraged development of greater supplies. Now we have a surplus of natural gas and a diminishing demand, but the provisions of long-term contracts still hold the price of gas high. These provisions, termed take-or-pay, lock suppliers into taking and paying for a specified volume of gas, at regulated prices, regardless of whether or not the gas is needed. As demand falls, as it has, the price of gas increases even faster. Northern Natural Gas, a major Iowa pipeline company, recently reported spending approximately $123 million on take-or-pay contract provisions, up $55 million from the previous year. That cost Northern's Iowa consumers nearly $25 million, essentially for gas which is not needed.

In addition to take-or-pay provisions, natural gas may be contracted with price escalator and most favored nation contract clauses after 1985. These clauses would allow gas producers to set prices at 110 percent of the price of NP6 fuel oil and/or to the highest price within a region. The Energy Policy Council is concerned that these provisions will have the same effect as take-or-pay provisions to artificially set prices.

These provisions hurt pipelines nearly as much as consumers, even though most of the price increases are passed through to consumers. We are reaching a point at which the market can bear no more. Industries which have dual fuel ability are switching from gas; consumers are conserving as much as possible. With long-term contract clauses and resulting artificially high prices, the pipeline companies are as endangered as the consumer. We need to keep our supply lines for energy healthy if we hope to continue to enjoy some economic growth, let alone heat our homes.

The Energy Policy Council and I urge the success of legislation which limits imprudence on the part of the pipeline and any pipeline-producer contract which materially prevents the pipeline from responding to changes in customer demand or other market forces. This limit includes take-or-pay clauses of greater than 70 percent of daily contract quantity on an annual basis, indefinite price escalator clauses, and most favored nation clauses. Also, contracts should include a market-out clause.

The typical Iowa family already spends about 20 percent of its take home pay on energy. Without this legislation, the Energy Policy Council projects no end to rapidly increasing natural gas prices, a threat to our energy market, and a financial burden from

which business and homeowners may not be able to recover.

Sincerely,

ROBERT F. TYSON,
Director.

Mr. BENTSEN. Mr. President, all of us, I am sure, share the deep concern expressed by our colleagues from Missouri and about the serious problems that have resulted from 30 years of distorting, counterproductive regulation of natural gas prices.

Some have argued that take-or-pay contracts, negotiated at a time when natural gas was in short supply, have helped drive prices sharply higher during a time of gas surplus and created the prospect of increased energy bills for millions of Americans this winter. I do not, however, accept the proposition that we can correct the complex problems of regulation with a quick fix, ill considered proposal to abrogate take-or-pay clauses and rollback prices.

Mr. President, it is precisely that sort of reflex intervention in the marketplace over the years that has produced the nightmare of regulated energy policies and prices.

As the Senate Energy Committee learned in hearings this week on natural gas, it is impossible for proponents or opponents to state with any precision what would result from passage of these amendments. We could be setting the stage for new gas shortages and even higher prices for the consumers we seek to assist. As one who has been fighting the effects of energy regulation for more than a decade I say to my colleagues from Missouri that I am prepared to work with them to find equitable, comprehensive solutions to the very real and complex issues involved in gas pricing. I am not, however, prepared to support ad hoc, one shot initiatives that have not been reviewed or assessed by the appropriate committees of the Senate.

One of my major concerns, Mr. President, is that if we abrogate take-or-pay provisions in existing and future gas contracts, we will make future drilling of natural gas extremely difficult to finance. Financial institutions will be reluctant to advance money to producers without some assurance that their natural gas will be sold. Therefore, while in the near term, this might appear to be an attractive alternate, I believe that we will damage our long-term commitments to consumers by preventing the orderly financing of future drilling.

The Senate is considering these amendments, Mr. President, because the manager of America's pipelines exercised their business judgment in signing so-called take-or-pay contracts to assure long-term supplies of natural gas for their consumers. A few years ago there was very little criticism of such contracts because gas was in short supply. Today, however, some blame increasing energy costs to the consumer at least in part on take-or-pay clauses and a price rollback.

If these proposals are accepted by the Senate, the primary victim, will be the producers, not the pipeline companies. Exploration for energy is already down 40 percent from the levels of a year ago, and I seriously question whether it is sound energy policy to drain further resources from our producers at this time, particularly when we do not know the answers to the following questions:

To what extent would abrogation of take-or-pay clauses disrupt the actual gas supply at the peak of the heating season? Will we have to renegotiate natural gas supply contracts? With no assurance of future purchases by the pipelines, would incentives remain for producers to sign long-term contracts for supply?

Do we want to encourage a boom and bust cycle in natural gas prices and foster spot shortages at a time of abundant supply? Despite assurance of an evidentiary review by the FERC for producers who would be forced into default by the amendment, there is no avoiding the fact that many producers will be caught in a financial squeeze of very serious dimensions if this legislation is passed. Is that sound energy policy?

Mr. President, I am fully prepared to join in seeking realistic and workable solutions to natural gas pricing problems. Those solutions will not, however, be hastened by applying band-aid solutions and side-stepping the important questions I have outlined above. For that reason I urge my colleagues to join me in tabling these amendments so that we can move forward in the next Congress and take a close look at the full array of issues surrounding natural gas regulation.

Mr. CHAFEE. Mr. President, I am pleased to support my colleague, the Senator from Kansas, in this amendment that I believe would create competitive conditions in natural gas pricing, by providing that take-or-pay clauses can be abrogated. As the Senator knows, I have introduced, with Senator PELL, a bill that would accomplish the same objective.

As we approach the coming winter, we face an extraordinary, perhaps unprecedented, situation. Simultaneously, we are experiencing a surplus of natural gas, a surplus so large that excess supply is being wasted; at the same time, the prices that gas consumers must pay are rising, particularly in the Northeast and the Midwest, at dramatic rates. Clearly, therefore, market forces in natural gas are not functioning.

To find the cause of this problem, we look immediately to the 1978 Natural Gas Policy Act. I voted for this act because I believed that phased decontrol of natural gas would lead to greater supplies, and ultimately to an end of Government control of this market. While it stimulated new supplies, however, the act contained requirements which have again caused a distortion of the gas market.

By setting ceilings on the prices of certain categories of new gas and by providing that increased prices may be passed through the distribution stream to ultimate consumers, the act forces price increases. In part, this effect is achieved through what are called take-or-pay clauses in the pipelines' contracts with producers, and in contract provisions which mandate automatic increases in price.

Mr. President, in my view the correct response to this problem is not to attempt now to halt the gradual decontrol of gas. This one element of certainty should be maintained because even under limited decontrol there has been a rush of supply. We do not wish to take steps now that would create such uncertainties among producers that would cause them to cease exploration and potentially again result in severe supply shortages. It is my strong belief that now that we have set out on the course of decontrol, we should permit the decontrol process to unroll.

Rather, Mr. President, I believe that we should now, as an immediate step, look to the contracts between the pipeline companies and the producers. As I have said, these contracts, which require that pipelines buy gas at high prices while ignoring lower priced gas which is subsequently wasted or stored, have forced serious hardship. I believe that we should adopt this amendment because it would permit pipeline companies to abrogate the take-or-pay and escalator clauses in their contracts with the producers. In doing so we would give the pipelines the power to renegotiate their contracts with the producers in much more realistic price terms, thus hopefully providing immediate relief to gas consumers.

● Mr. PELL. Mr. President, I am pleased to join with my colleagues, Senators KASSEBAUM, DANFORTH, and EAGLETON in urging immediate action by Congress on the problem of the abrupt rise in natural gas prices for consumers this winter. As my colleagues may be aware, I joined with Senator JOHN CHAFEE last week in introducing legislation (S. 3088) to address the problem of natural gas pricing.

Throughout the New England States, including Rhode Island, and many other States across the Nation, consumers are being forced to pay unreasonably high prices for natural gas due in large part to a provision in the Natural Gas Policy Act of 1978 which requires pipelines having a take-or-pay clause in their contracts with natural gas producers to accept high-priced

gas even though lower priced gas may be available from the same gas producers.

In my opinion, the sudden increase in the cost of natural gas for consumers this winter should not exist considering today's depressed natural gas market conditions. As a result of vigorous energy conservation on the part of consumers, general domestic economic conditions and our favorable weather conditions thus far, the nationwide demand for natural gas, along with other fuels, is down dramatically. These factors combined have resulted in a significant surplus of natural gas supplies across the Nation.

Unfortunately, however, these same factors have failed to cause the natural gas market to respond to the current conditions of oversupply. Natural gas prices, instead of becoming more competitive, have risen to excessive levels for consumers—all primarily as a result of the take-or-pay contracts. Without question, this complex contract issue is one which is unfair to consumers and deserves the immediate attention of Congress.

Mr. President, I understand that a discussion of only certain provisions of the Natural Gas Policy Act at this time is highly controversial and will not respond to the broader concerns of my colleagues troubled over provisions of the act enacted in 1978. I understand their desire to review the entire Natural Gas Policy Act legislation as soon as possible in view of the uncertainties facing the natural gas industry.

I support a full and early discussion of these concerns at both the Federal and local levels during the 98th Congress. I hope, however, that prompt attention by Congress on the take-or-pay issue will not be delayed because of the complex issues and concerns over the Natural Gas Policy Act. Consumers across the country should not be penalized any further with high natural gas bills because of congressional inaction. I urge my colleagues to repeal the take-or-pay clause for the benefit of consumers this winter.

Mr. McCLURE. Mr. President, I am strongly opposed to the amendment. My opposition certainly is not grounded on any notion that the Congress should ignore the rapidly increasing prices of natural gas and the resulting financial hardships being imposed on large numbers of natural gas consumers in many parts of the country. Rather, I am opposed to the amendment because it would seriously jeopardize our long-term natural gas supplies.

Furthermore, the amendment would create consumer expectations that could not be met. A freeze of wellhead prices would nevertheless permit substantial increases in prices of gas at the burner tip. If the purpose of the amendment is to reduce or restrain retail gas prices, then it falls far short of meeting that objective.

The amendment would impose a 2-year freeze on the wellhead prices of gas that existed on October 1, 1982. The amendment also provides that when the price freeze expires on January 1, 1985, the monthly escalation of ceiling prices for gas subject to price controls would resume from their October 1, 1982, level. In addition, the price controls currently scheduled to expire on January 1, 1985, would be extended for 2 years, as would the price controls on "shallow" 103 gas, now scheduled to expire on July 1, 1987.

A 2-year freeze on wellhead prices would have a devastating psychological impact on all producers, and a serious financial impact on many producers. In each case, the result would be a reduction in the financial incentive of producers to explore for and develop new gas supplies. A price freeze would deprive producers of revenues they had anticipated when wells were drilled. Producers would then shy away from gas drilling because of fear of more Federal intervention. Moreover, a price freeze would mean that producers would receive declining real prices for their gas production. A decline in real prices would be a blunt reminder to gas producers and investors that in spite of the price incentives created by the Natural Gas Policy Act of 1978, they still cannot count on receiving a fair rate of return on their investments. Producers, either on their own initiative or because of lack of capital, would undoubtedly reduce drilling activity, and eventually, the result could be new gas shortages.

I would like to turn now to the second major deficiency of the amendment—the fact that a wellhead price freeze would not freeze consumer prices. This can be easily illustrated by Department of Energy data. Between July 1981 and July 1982, average residential gas prices rose by 95 cents per million cubic feet. A price freeze would have eliminated only 10 cents to 17 cents of this increase.

This conclusion is derived from a breakdown of the overall residential price increase into its various cost components. Of the 95 cents increase, only 39 cents was attributable to increased domestic producer revenues. The other 56 cents was the result of increases in pipeline and distribution costs, and the costs of LNG and gas imports. Of the 39 cents in additional revenues received by producers, only 10 cents to 17 cents would have been affected by a wellhead price freeeze. The remainder of the increase in producer revenues, according to DOE studies, was caused primarily by changes in the mix of gas taken by pipelines. For example, gas from old wells is priced much lower than the incentive prices afforded new wells. As old wells are depleted, pipelines must replace these gas supplies with higher priced gas from new wells.

Finally, Mr. President, I would point out that a wellhead price freeze, to the extent it affects consumer prices at all, would not have an immediate beneficial impact on most consumers. The effect of the freeze would be delayed by operation of PGA's, the purchased gas adjustment mechanism. In general, PGA's are filed on a semiannual basis, and the bulk of the pipeline companies have already put their winter rates in effect. Consumers served through these companies would not see the impact of the freeze until late spring, when the next PGA becomes effective.

Mr. President, I also oppose the amendment of the Senator from Kansas on the ground that its provisions seeking to tightly proscribe the use of take-or-pay provisions in contracts between producers and pipelines are both unwarranted and counterproductive. The restriction on the use of these provisions would not achieve the intended results—namely a reduction in gas prices for consumers—and in fact it would instead likely result in both diminished gas supplies and higher gas prices. The reasons for these consequences are several.

First, as a standard industry operating procedure, contracts for the sale of natural gas from new discoveries are entered into before these reserves are developed and rendered deliverable to the pipeline buyer. After contracting, producers are continuously making substantial investments over the life of the contract to begin production and to maintain the deliveries contracted for. Thus, without the assurance of minimum levels of cash flow, the financial risk to producers of such investments would be prohibitive and, as a result, they would be more reluctant to both develop new gasfields and to enter into long-term contracts. Moreover, while this would have a significant adverse input on the operations of the major oil companies, the impact on independent producers would be staggering.

Second, in order to raise the capital necessary to drill gas wells, producers need an assured income stream against which they can borrow money from banks. Without a contractually stipulated take-or-pay provision, a producer's revenues could fluctuate wildly from day to day and month to month. Thus, take-or-pay provisions are necessary in order to assure producers with the minimum cash flow necessary to both service their debt obligations and to borrow money from banks to undertake future drilling operations. Again, the impact of the amendment on the operations of many independent producers could be sufficiently adverse to

cause serious reductions in gas production.

Third, without take-or-pay provisions, producers would undoubtedly need higher gas prices in order to self-insure themselves against demand fluctuations in the gas market. This insurance would take the form of not only higher wellhead prices, but also shorter term producer/pipeline contracts.

Thus, it is evident that take-or-pay contractual provisions are important not only to producers, but also to pipelines and gas consumers. Without the long-term commitment of supplies to a given pipeline and distribution system, it would be difficult to raise the capital necessary to build the gas transportation system. Moreover, even if capital were available, banks would undoubtedly demand a "risk premium" which would further increase the cost of gas.

In summary then, as a general proposition the elimination of take-or-pay contractual provisions would likely increase the wellhead price of gas; it would similarly reduce new exploration and development activities; it would shorten the length of producer/pipeline contracts; and it would increase the cost of gas transportation and distribution facilities—in other words, consumers would pay more for their gas and have a less reliable supply. Clearly these are results that the authors of this amendment do not intend or desire.

Mr. President, I would like to turn now to a few of the specific problems with the take-or-pay provisions of the pending amendment.

The amendment seeks to limit the use of take-or-pay provisions in producer/pipeline contracts by allowing the FERC upon its own motion, or upon the petition of any party, to "take such appropriate action as it may deem necessary." Clearly, this would confer upon the FERC extraordinary powers that are not well defined or limited in scope. Further, it is worth noting that the amendment would allow any person to petition the FERC for action under this provision, not just the producer, the pipeline, or the pipeline's customers. This would undoubtedly result in a massive caseload for the FERC, because there are literally tens of thousands of producer/pipeline contracts that are potentially subject to FERC review under this section. As I doubt that the FERC could handle the burden of this requirement in a timely manner, I am concerned about the potential impact of the resulting chaos on domestic gas production.

Mr. President, it is for these reasons that I would urge my colleagues to reject this amendent. There is no clear evidence that this amendment would help gas consumers, and logic would lead us to conclude that it may do far more damage than good.

I ask unanimous consent to have printed in the RECORD a letter from Secretary of Energy Hodel, dated December 14, 1982, and selected comments made by witnesses at the committee hearing.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF ENERGY,
Washington, D.C., December 14, 1982.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to your inquiry as to the Administration's position regarding amendments currently pending before the Senate to address problems plaguing natural gas customers and the industry generally.

The Administration shares the concerns raised by consumers throughout the country regarding escalating fuel bills. We are aware that various structural problems created by governmental regulation are causing or contributing to gas marketing distortions which are being criticized extensively by a wide spectrum of gas consumers, distributors, transporters and producers. These problems have resulted in a number of proposals being offered by several Senators to fix one or more of these individual situations. We are supportive of the principle that these problems must be corrected since they are producing distortions which are not in the current or long-run best interest of gas consumers.

Having been involved in a review of natural gas policy for some time now, the Administration also is aware that the solution to these problems involves many very complicated interactions between gas producers, financial markets, distributors, transporters and consumers. We think that any solution to the problems identified by the Senators to date must involve addressing other interrelated problems.

For this reason, it is the recommendation of the Administration that the Congress not enact any of the pending amendments during the current session. We would recommend that they be dealt with as part of a comprehensive approach, and it is our intention to consult with the Congress early next session concerning solutions to this very complicated problem.

Sincerely yours,

DONALD PAUL HODEL.

SELECTED COMMENTS MADE BY PRIVATE WITNESSES AT THE COMMITTEE ON ENERGY AND NATURAL RESOURCES' DECEMBER 13, 1982, HEARING ON "CURRENT CONDITIONS IN THE NATURAL GAS MARKET"

COMMENTS WITH RESPECT TO A PIECEMEAL APPROACH TO NATURAL GAS

Natural Gas Supply Association: "We believe that enactment of piecemeal solutions to this most complex problem, even for a short time, could result in more, not less, damage to the nation's consumers and to the industry that has been built to supply them with this commodity."

American Gas Association: "We believe that fuel aid is the very best remedy that Congress can pass this session for rising fuel costs this winter."

United Distribution Companies: "In our considered judgment, your Committee should deal with the whole natural gas situation and all its problems in comprehensive fashion through one coordinated statute. Any attempt to solve single situations, however bad, on a piecemeal basis, may only set in motion other problems not now apparent and provide no long term relief for utility service and consumers."

"In truth, all major pricing problems now plaguing this industry are interrelated and feed one upon another. So, we most respectfully recommend that your Committee hear and consider all aspects and recommend to Congress that comprehensive legislation which will surely set this industry on a sound course for the long term future."

Interstate Natural Gas Association of America: "The problems presently facing our industry and the Nation relating to natural gas pricing, supply and demand, do not lend themselves to an emotional "quick fix," regardless of how well intended. Before embarking on any legislative remedies, it is imperative that the problems be thoroughly explored and understood. There is simply not time in the lame duck session for the Congress to develop an appropriate record upon which to base comprehensive legislation."

"We must avoid precipitous legislative action which could quickly turn today's surplus into tomorrow's shortage."

Coalition of Intrastate Pipelines: Today we appear before you, however, to demonstrate that no matter how appealing these proposals may appear to be in the shortrun, they will aggravate our long-term problems and those of the industry as a whole. They are not likely to result in the immediate temporary consumer price relief which has motivated the introduction of such bills. In fact, enactment of some of these proposals may have just the opposite effect by interfering with a renegotiation process that is already occurring throughout the industry, whereby pipelines and producers are beginning to adjust contracts to reflect current market conditions, i.e., slack demand and market clearing prices on some pipeline systems. In addition, they would create great potential of future supply problems and possible negative consequences that none of us can predict.

It is our strong hope that the Congress will address natural gas policy comprehensively as soon as possible. The situation continues to grow worse and we strongly believe it will not be remedied by any piecemeal, temporary measures.

Process Gas Consumers: As consumers, we are concerned about the impact of higher gas prices on our businesses, our customers, and our employees. But it is precisely that concern which leads PGC to *support comprehensive legislation* to deal with the serious defects in the NGPA and the resulting harmful distortions in natural gas markets.

The PGC respectfully urges that the Senate decline to adopt the kind of myopic, "quick fix" proposals which have recently been advanced and, instead, turn its attention to consideration of natural gas legislation which will deal boldly and comprehensively with the problems now facing the gas industry and gas consumers.

Petrochemical Energy Group: "Work is going on to develop legislative proposals that would address, in a comprehensive way, the problems plaguing natural gas markets, problems which will become more serious over time. We believe such a solution promises far greater benefits for gas consumers, including industrial consumers, than any of the quick fix proposals, all of which are

likely to make the longer term problems worse."

COMMENTS WITH RESPECT TO A RESTRICTION ON THE USE OF TAKE-OR-PAY PROVISIONS IN PIPELINE/PRODUCER CONTRACTS

Natural Gas Supply Association: "A second group of proposals would abrogate or restrict the operation of take-or-pay clauses. . . . Those who advocate this "quick fix" see take-or-pay clauses as the root cause of higher gas prices, despite evidence that total abrogation of take-or-pay clauses would have minimal or no impact on residential gas bills."

Independent Petroleum Association of America: "Producers are voluntarily adjusting take-or-pay provisions of individual contracts. Any threat of a Congressional "meat-axe" approach to those provisions would almost certainly make voluntary actions more difficult.

"If in fact, Congress did take action to abrogate those provisions, it is very likely that unless new contract provisions were developed to assure some type of cash flow from new wells, new well drilling would come to a virtual standstill."

"A precipitous move to violently alter those contracts overnight, would, in my opinion, result in several more Penn Squares throughout the Southwest."

Interstate Natural Gas Association of America: "Although there is a widespread impression that take-or-pay clauses are a major contributor to gas price increases, there is no publicly available data on the extent to which such clauses are affecting gas prices today."

Coalition of Intrastate Pipelines: "There is no question that intrastate pipelines, just as interstate pipelines, could benefit by being relieved of certain take-or-pay obligations by not having to raise the money to make the payments. However, if take-of-pay clauses are outlawed, how are we going to be able to bargain for new gas supply? What is the quid pro quo for negotiating an assured deliverability and long-term contract, items we must have to assure our customers under our own long-term contracts that we will be able to deliver the gas we have contracted with them to provide? It is not going to take the producer long to figure out that any agreement we might make to take a minimum amount will be unenforceable, if this legislation stands up. The question then becomes, will there be any new gas supply to purchase. And even if there is, how can we seek the long-term new gas supplies we need to replace our depleting reserves and assure the integrity not only of our gas commitments but also the security of our financial commitments. Once the surplus is exhausted, and it will be soon as the economy turns around, or later through depletion, what will we do?"

Process Gas Consumers: "Although PGC agrees that pipelines' take-or-pay obligations are unreasonably high in many contracts negotiated under the NGPA, PGC also recognizes that take-or-pay clauses provide producers (particularly independents), with some income stability and the cash flow needed to finance new exploration and development. Adopting this measure would, therefore, cause an immediate reduction in exploration and development and then eventual shortages. Inevitably, industrial users will be the first to bear the brunt of those shortages; but everyone will feel them next in the form of layoffs and possible plant closings."

Petrochemical Energy Group: "Those who seek to outlaw take-or-pay clauses threaten to destroy gas markets and supplies in exchange for only temporary and only possible relief."

COMMENTS WITH RESPECT TO A WELLHEAD PRICE FREEZE

Natural Gas Supply Association: "Piecemeal legislation such as the wellhead price freeze proposal would institutionalize these present distortions, which are leading to very high prices for some consumers while creating low, subsidized prices for others. Price controls create excess demand, retard supply development, and lead to shortages."

"Although these proposals represent an effort to hold down consumer price increases, we believe that these proposals will, in fact, have no effect on the factors which have caused 82% to 90% of consumer price increases. In fact, the effect of a price freeze at the wellhead would aggravate some of these other more significant factors within a few years."

"In short, if the price freeze proposals had been enacted in 1981, only 10¢ to 17¢ of the 95¢ increase experienced last year by residential users would have been eliminated."

"In our judgment a wellhead price freeze through 1985 will have severe adverse consequences on supply and will perpetuate and aggravate current market disorders. The most serious consequence of a price freeze will be its impact on the intermediate and long term supplies available for the consumers 3-5 years (and longer) from now."

Independent Petroleum Association of America: "Any price freeze, while freezing low prices from going higher, presumably would freeze high prices so they couldn't go lower. Many contracts, including high cost contracts, have "market out" clauses which allow for the reduction of prices when market conditions change. Those clauses are currently being activated and many contract prices are being reduced."

American Gas Association: "We do not believe that plans to freeze wellhead prices will help consumers this heating season."

Coalition of Intrastate Pipelines: "The stated intent of some of these proposals is immediate relief for consumers this winter. Under current regulatory procedures, even if expedited by statute, it is extremely unlikely that contracts could be analyzed and modified, resulting in modification to PGA's and surcharge adjustments, in time to offer relief in January and February when it will be needed the most."

Process Gas Consumers: "While we are no more anxious than anyone else to see our gas bills increase, we are ready and willing to pay true free-market prices for gas becuase we anticipate that such prices will be more stable—and lower in the long run—than would be the case under the NGPA."

"Freezing prices . . . would be an invitation, if not an order, for renewed gas shortages. It would severely undermine exploration and development for new reserves and, at the same time, send a signal to users to increase consumption. Remember that, overall, reserves have declined since passage of the NGPA."

Petrochemical Energy Group: "Those who appear before this Committee to urge a freeze on producer prices or to compel the FERC to review the purchasing practices of the interstate pipelines as an emergency device to bring down gas prices are doomed to disappointment, even if they succeed totally with their legislation."

Mr. PERCY. Mr. President, I am voting reluctantly tonight in favor of the majority leader's motion to table the Jepsen and Kassebaum amendments on national gas. The gasoline tax bill before us is estimated to provide 320,000 jobs to our Nation's unemployed—many of whom are in my own State of Illinois. It is absolutely critical that this job creating bill passes before the Senate recesses. A number of Senators are determined to prevent this jobs bill from passing during this Congress if any nongermane amendments are attached such as the Kassebaum and Jepsen gas amendments. I, therefore, feel compelled to vote to get on with consideration of this important jobs bill.

However, I continue to believe strongly that Congress must move forward at the earliest possible time with legislation to respond to rising National gas prices. It is true, as my colleagues from Kansas and Iowa, have stated, that because of problem in the current regulatory system, gas prices are higher than they should be. This problem of take-or-pay contracts must be addressed. Recently I cosponded with a group of Northeast and Midwestern Senators a bill to deal with this problem. This bill provides a mechanism to insure that any cost savings from adjustments in contracts are passed on to consumers.

The problem of overpriced gas imports must also be addressed. I recently intervened in a case before the Federal Energy Regulatory Commission (FERC) involving the importation of overpriced liquefied natural gas. Much of this LNG is headed to central Illinois. Working with other Members of the Illinois delegation, we were successful in postponing further gas hikes this winter due to the importation of this LNG. But this problem is not going to go away. We continue to import gas, and particularly LNG at prices well above market prices and most domestic gas prices. I intend to offer a bill shortly which will address this problem.

Over the past few months, I have been working with my Illinois constituents to develop the best solution to the problem of rising natural gas prices. I hope to continue such discussions in the future.

In the meantime, we must pass this jobs bill in the Congress.

Mr. BAKER. Now, Mr. President, if no other Senator seeks the opportunity to speak, I move to lay on the table division I of the Kassebaum amendment, and I ask for the yeas and nays on the motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee to lay on the table division I of the Kasse-

baum amendment. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Maryland (Mr. MATHIAS), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Hawaii (Mr. MATSUNAGA) is necessarily absent.

I also announce that the Senator from Arizona (Mr. DECONCINI), and the Senator from New York (Mr. MOYNIHAN) are absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 56, nays 38, as follows:

[Rollcall Vote No. 409 Leg.]

YEAS—56

Armstrong	Garn	Murkowski
Baker	Glenn	Nickles
Baucus	Gorton	Nunn
Bentsen	Hart	Packwood
Boren	Hatch	Percy
Brady	Helms	Pryor
Burdick	Hollings	Quayle
Byrd, Harry F., Jr.	Huddleston	Randolph
	Inouye	Roth
Byrd, Robert C.	Jackson	Schmitt
Cannon	Johnston	Simpson
Chiles	Laxalt	Stafford
Cochran	Leahy	Stennis
Cohen	Long	Stevens
Cranston	Lugar	Symms
Denton	Mattingly	Thurmond
Domenici	McClure	Tower
East	Melcher	Wallop
Ford	Mitchell	Warner

NAYS—38

Abdnor	Eagleton	Levin
Andrews	Exon	Metzenbaum
Biden	Grassley	Pell
Boschwitz	Hatfield	Pressler
Bradley	Hawkins	Proxmire
Bumpers	Hayakawa	Riegle
Chafee	Heflin	Rudman
D'Amato	Heinz	Sarbanes
Danforth	Humphrey	Sasser
Dixon	Jepsen	Specter
Dodd	Kassebaum	Tsongas
Dole	Kasten	Zorinsky
Durenberger	Kennedy	

NOT VOTING—6

DeConcini	Mathias	Moynihan
Goldwater	Matsunaga	Weicker

So the motion to lay on the table UP amendment No. 1444 (part I) was agreed to.

Mr. JOHNSTON. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CLOTURE MOTION

Mr. BAKER. Mr. President, I send a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The assistant legislative clerk proceeded to read the cloture motion.

Mr. RANDOLPH. Mr. President, is the Senator from West Virginia in order to ask to be included as a signatory of the cloture motion?

Mr. BAKER. Yes, Mr. President. Mr. President, I ask unanimous consent that the Senator from West Virginia may be included as a signatory on both motions.

The PRESIDING OFFICER. Without objection, it is so ordered.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on an amendment in the nature of a substitute, to be proposed by the Senator from Tennessee (Mr. BAKER), to H.R. 6211, the Surface Transportation Assistance Act of 1982.

Howard H. Baker, Jr., Rudy Boschwitz, Strom Thurmond, Ted Stevens, Warren Rudman, Arlen Specter, Robert Dole, Slade Gorton, John H. Chafee, Bob Packwood, Robert T. Stafford, S. I. Hayakawa, Richard G. Lugar, James A. McClure, Dan Quayle, Frank H. Murkowski, David Durenberger, and Jennings Randolph.

CLOTURE MOTION

Mr. BAKER. Mr. President, I send a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on H.R. 6211, the Surface Transportation Assistance Act of 1982.

Howard H. Baker, Jr., Rudy Boschwitz, Strom Thurmond, Ted Stevens, Warren Rudman, Arlen Specter, Robert Dole, Slade Gorton, John H. Chafee, Bob Packwood, Robert T. Stafford, S. I. Hayakawa, Richard G. Lugar, James A. McClure, Dan Quayle, Frank H. Murkowski, David Durenberger, and Jennings Randolph.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, what is the question before the Senate?

The PRESIDING OFFICER. Division II of the amendment offered by the Senator from Kansas.

Mr. BAKER. Mr. President, if I could have the attention of the Senate for a moment, I do not know how much more debate there is on division II or whether proposals may be made in respect to it, but I would hope we are close to the time when we can proceed with the disposition of it.

I am prepared to make a tabling motion against division II. I do not wish to cut off any Senator in any remarks, any motion, or amendment he may wish to offer. But at this time, I would hope that they could come forth with any request that they may have because otherwise I would like to go ahead and make a motion to table.

Mrs. KASSEBAUM. Mr. President, I think we have debated rather extensively already. I would have no further comments to make.

Mr. NICKLES. Mr. President, I would like to offer a few comments on division II.

Mr. BAKER. Mr. President, I ask unanimous consent that I may yield to the Senator from Oklahoma for the purpose of a statement without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, could I inquire of the Senator, could we have a time limitation on that?

Mr. NICKLES. If the majority leader can maintain control over the floor, the time of 3 minutes would be satisfactory.

Mr. BAKER. Mr. President, I ask that the Senator be recognized for 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. Mr. President, I thank the majority leader for his cooperation. He has been very cooperative in working with many of us in some very difficult negotiations.

Mr. President, division II of the Kassebaum amendment deals with a price freeze on natural gas.

Mr. President, could we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order.

Mr. NICKLES. Mr. President, what this would do to section 2 of the bill we will be voting on would be a price freeze on natural gas. This would be freezing in a lot of the inequities that brought about the gas pricing problems that we find today. Those inequities are set up in the NGPA.

We have 23 different pricing categories for natural gas. Natural gas is a single substance. It is the same, and I do not care whether it comes from a deep well, a shallow well, an old well, a new well, by an independent or a big producer, all of which have different categories, but all of which have the same product—natural gas.

We look at gas costing 23 cents and the same product costing $9.50. Incidentally, Mr. President, that gas that was costing $9.50 now costs in some of the uncontrolled areas $3.27. So there has been a dramatic drop in prices in deep or uncontrolled natural gas prices.

Mr. President, I hope that we will move to table the Kassebaum amendment because it would only be freezing some inequities and it would also cost the consumer in the long run.

Mr. BAKER. Mr. President, I ask unanimous consent to yield 30 seconds

to the Senator from Virginia for the purpose of a statement only, without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Mr. President, all of us in this body are greatly concerned about the problems many people are having paying their natural gas bills. And we are well aware that these problems are especially pressing now that winter has descended upon us in earnest. Therefore, it is no surprise that legislation is being offered to try to bring some relief to natural gas consumers.

The goal, Mr. President, I applaud. The legislative vehicle, however, I must oppose at this time.

Mr. President, on Monday of this week, the Energy and Natural Resources Committee held what I hope is the first of many hearings on the Natural Gas Policy Act—for the very purpose of determining what and who is responsible for these drastically escalating prices. What is obvious as a result of this week's hearing, Mr. President, is the lack of consensus of how remedies impact various consumers and industries.

It is because of this complexity, and for several other reasons, that I have deep reservations about Congress attempting to resolve rising prices on a piecemeal basis. I am not convinced that the proposed remedies, well-intentioned as they are, will have the intended results.

In addition, I am concerned that the measure before us in effect places the blame for rising gas prices squarely on the shoulders of the Natural Gas Policy Act.

I would disagree that the NGPA is entirely at fault. The responsibility for natural gas prices and natural gas supplies resides with all of the affected parties—not only the Congress, but also the State public utility commissions, the Federal Energy Regulatory Commission, gas producers, pipelines, distributors, and the consuming end users. Together, all must work toward the goal of providing relief to gas consumers from unreasonable, irresponsible energy costs this winter.

In my opinion, Mr. President, consumers are doing their part to hold down their costs by voluntarily cutting back on their consumption of the fuel.

However, Mr. President, in our eagerness to do our very appropriate part in addressing this problem, let us not pass measures which, far from solving the problem, in fact actually aggravate an already bad situation.

That, Mr. President, is exactly what I am afraid this measure to freeze natural gas prices would do. I know it is appealing. It sounds so simple. If the prices are getting too high, why not freeze them. No more problem.

However, this country has already had enough experience with trying to impose price controls in a market-oriented economy to know that they do not work. And it is not just that they are ineffective: the problem is actually made worse because with prices frozen, the motivation to conserve is reduced and more natural gas is consumed. Plus, with a cap on prices, producers do not produce as much as they would otherwise, which means less natural gas available. It does not take much to see what the eventual result will be: shortages.

Mr. President, I believe it important to emphasize today that we in this Senate have an overriding responsibility to assure adequate supplies of energy are available in the United States. I am greatly distressed by the rising gas prices, but we must never lose sight of a much more disastrous possibility—no gas at any price. I consider this price freeze proposal one which could increase our dependence on foreign supply—and I cannot endorse a measure in direct opposition to our national strategy of energy sufficiency.

To my colleagues who want some action taken immediately to relieve particularly our low and fixed income Americans from these prices—I agree with you that action must be taken. I do not believe at this last minute in our waning days of the 97th Congress that we should legislate a band-aid for a patient who needs surgery.

I recommend three actions be taken, however, Mr. President. The natural gas consumers are demanding relief now. It is my opinion that the natural gas industry must voluntarily take steps to alleviate hardships and renegotiate contracts.

Before our Energy Committee's hearing on Monday, I was encouraged by several assurances from various companies that they were already in the process of renegotiation for lower gas prices. Since the hearing, I have heard from two more companies regarding their voluntary renegotiations.

But even the natural gas industry's efforts are not enough. I believe the Federal Energy Regulatory Commission must take every action available to them under the law to reduce the gas prices and to expedite the review of voluntary renegotiations so that this winter, relief is available.

Third, Mr. President, I will be offering a measure to assist those Americans who are on fixed incomes and who qualify for low income energy assistance, but due to lack of funds, are unable to be assisted this winter. This we can do this session, and we can prevent thousands and thousands of Americans from freezing this winter.

So, Mr. President, in the crush of trying to finish up for Christmas, let us not take the hasty and ill-advised step that some are urging of imposing a legislative freeze on natural gas prices. We have had too many bad experiences with this type of approach. Let us responsibly consider all of the badly needed remedies in the 98th Congress, but let us take the action that assures our countrymen will not freeze this winter because they are economically unable to pay their bills.

In my opinion, if we freeze natural gas prices today, we will be freezing homes or schools or factories tomorrow.

Mr. BAKER. Mr. President, I ask unanimous consent that I may yield 3 minutes to the Senator from Nebraska for the purpose of a statement only without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Nebraska is recognized.

[The following proceedings occurred after midnight:]

Mr. EXON. Mr. President, I thank the Chair and I thank the majority leader.

Exactly 12 hours ago the Senator from Nebraska sought recognition to make the longwinded speech that I am about to make. I am going to take 3 minutes. I will proceed at this time.

Mr. President, I wish to commend the Senate Energy Committee for holding hearings yesterday on the current problems in the natural gas market. I believe that the forces of supply and demand are certainly not at work in this market, and I am hopeful that the Congress will address this issue after a careful examination.

I was privileged to address the committee at yesterday's hearing to express concerns about this problem. In particular, I brought to the committee's attention the impact which rising natural gas prices have not only on residential home heating costs but the cost of agricultural production as well. Crop drying, irrigation, fertilizer, and propane costs are all influenced by the natural gas market.

Mr. President, I request that a copy of my statement to the Energy Committee be printed in the RECORD along with the sense of the Senate resolution that I offered and suggested in the Energy Committee yesterday.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR J. JAMES EXON

Mr. Chairman, and members of the energy committee, I appreciate this opportunity to participate in the committee's hearing today on the natural gas market. As you know, this issue is important to my State and other Midwestern States which not only depend on natural gas for home heating in the winter, but also depend on this energy resource to support agricultural production. Crop drying, propane, and fertilizer prices are all greatly influenced by the natural gas market.

Last April, the Congressional Research Service completed a study which I had requested regarding the impact of soaring nat-

ural gas prices on the farming sector. This report stated that accelerated or full decontrol of natural gas prices, which the administration had been contemplating at that time, would add up to $2.5 billion to farm production expenses over the next three years.

I need not remind the members of this committee, many of whom are from agricultural states, that the farm economy is in dire straits, experiencing near depression levels in activity. Commodity prices are failing to keep pace with rising production costs of which energy is a major component.

With the rush to deregulation in many industries it was assumed that consumers would benefit. This has not been the case in the gas industry.

In agriculture we recognize that one reason for drastically low farm prices is our production or at least our ability to market profitably our production. For example, grain prices are ruinous to producers because of a real or assumed over-production.

That is described as the "free market, free enterprise system at work." If that be true, why is it that the same theory does not apply to the natural and bottled gas industry?

It may be that despite ever-increasing and certainly plentiful gas supplies the "take it or pay" contracts of recent years are the true culprit of today's price increases.

Last March, I appeared before your committee outlining my concerns. I attached a copy of my presentation for the record and your information and I further present a report from the Congressional Research Service of April 29, 1982, which I requested on price increases in the industry as it affects agriculture and, of course, generally the same consequences are felt by consumers in general.

Nearly all of the Nation's consumers are feeling price hikes of up to 25% in some cases for home heating costs in their gas bills this winter. These price increases are certainly puzzling in view of the current market conditions. The Federal Energy Regulatory Commission has reported that, nationwide, pipelines have about 10% more gas available over last year. In addition, wellhead purchases of natural gas have fallen on the average by 2% from last year. Yet, according to the Department of Energy, consumer prices have risen at least an average of 17% over last year.

Unless this is a part of the "new economics," the normal forces of supply and demand do not seem to be working here. Under supply surplus conditions, burner-tip prices should trend downward.

The Congress must certainly make supreme efforts to determine where the responsibility lies for the "non-market" behavior of natural gas prices. The Natural Gas Policy Act of 1978 established maximum lawful ceiling prices only for certain categories of natural gas. The act did not dictate that these ceiling prices actually be the contract price for natural gas. Contract prices for natural gas can be lower than the ceiling prices established by the act.

I am not certain whether the NGPA has encouraged the present anomaly in the law of supply and demand, or whether the industry itself, both pipelines and producers, have failed to adjust to a partially deregulated natural gas market. These are questions to which the Congress must seek answers, and soon, before we tamper further with the natural gas market.

I would emphasize further, that along with the freedom which accompanies deregulation efforts, goes the responsibility which the pipelines and producers of natural gas bear to act on this problem without the Government stepping in to do so unless there is no other way. The failure of the industry to anticipate the market and adjust to changes in that market can only build a case for the forces of "reregulation." Proposals to freeze natural gas prices and to cap prices on already deregulated gas have a strong appeal in the face of our current economic problems.

Last March, I testified before this committee, and raised the question to the industry as to what it was doing to prepare for the advent of decontrol. At that time last March, I asked the industry whether it was waiting for the Government to tell them what to do next, or whether the industry was taking the initiative to negotiate and resolve among the pipelines and producers the multitude of contractual difficulties and supply problems. In addition, at that same hearing I brought to the committee's attention a Merrill Lynch study which suggested that gas prices may well have already reached "market clearing levels." To date, I know of only a handful of pipelines and producers who are focusing upon this problem and are renegotiating contract prices and supplies.

In closing, this Senator from Nebraska is anxious to hear from the witnesses and the committee on the causes and possible remedies for the current natural gas market problem. Unfortunately, it appears that the Congress can do little for consumer's heating bills in the near term, except to offer a small glimmer of hope for the long-term, that the industry will meet the challenges of partial deregulation head on.

Effects of Natural Gas Decontrol on Farming Costs and Income

Increases in natural gas prices due to accelerated or full decontrol of natural gas wellhead pricing are likely to have a noticeable effect upon the costs of production in farming. The likelihood that these additional costs can be recovered by the farmer in the market for farm products, however, is small. On the one hand, increases in wellhead prices of natural gas are likely to be passed through both by gas pipelines supplying this fuel to farmers and by producers of nitrogenous fertilizers, which attempt to set prices on the basis of costs. On the other hand, as a seller of farm products, the farmer receives a price determined by the vagaries of present and expected shifts in demand and supply in an open market. This price is unlikely to reflect changes in gas prices in the short run. Thus, it is quite possible that farmers will be caught in a profit squeeze owing to higher costs of production incurred by rising natural gas prices. This report presents an analysis of the effects of alternative natural gas pricing schemes on costs of production in wheat and corn farming, based on scenarios involving decontrol commencing in 1982 developed by the U.S. Department of Energy.

Production costs could rise from 1980 to 1983 by about 11 cents per bushel of corn and about 7 cents per bushel of wheat under an accelerated decontrol pricing mechanism, and by about 12 cents per bushel of corn and 7 cents per bushel of wheat under immediate or full decontrol of natural gas wellhead prices. Under the present pricing provisions of the Natural Gas Policy Act (NGPA), costs of raising corn would rise by about 3 cents per bushel from 1980 to 1983, and costs of raising wheat by 2.3 cents per bushel. The decontrol scenarios involve an increase of between 55 and 60 percent in the natural gas component of farming costs over what the farmer would incur under NGPA in 1983. If, as we suspect, farmers could not pass these costs through to buyers of farm products, these costs would absorb an additional 3 percent of farm cash receipts in 1983 under accelerated decontrol, and 7 percent of farm cash receipts in 1983 under immediate decontrol.

I. Effects of Natural Gas Price Decontrol on Costs of Production in Corn and Wheat Farming

A. Effects on costs

Under NGPA, the cost of natural gas embodied in a bushel of corn could rise from 11.6 cents in 1980 to nearly 14.7 cents in 1983; under accelerated decontrol, it could rise to 22.8 cents in 1983, and under full and immediate decontrol, to 23.5 cents. The costs of natural gas embodied in a bushel of wheat could rise from 10.2 cents in 1980 to 12.5 cents in 1983 under NGPA and to 19.1 cents in 1983 under accelerated decontrol and 19.2 cents in 1983 under accelerated decontrol.

These estimates are presented in Table 1. They have been obtained using U.S. Department of Energy (DOE) natural gas pricing scenarios and resulting DOE projections of natural gas prices. These prices were applied to technical gas input data furnished by The Fertilizer Institute, the American Gas Association, and the Council for Agricultural Science and Technology. Acreage and yield projections developed by Data Resources Incorporated (DRI) were employed to project effects into the future. A fuller discussion of the methodology is contained in the Appendix to this report.

Under all three natural gas pricing scenarios, the natural gas component of corn and wheat farming costs will increase, but at different rates and trajectories. Under NGPA, these costs of corn production increase at an annual rate of 8.2 percent from 1980 through 1983, or by 1.03 cents per bushel per year. Under accelerated decontrol, the annual rate of increase is calculated to be 25.3 percent; however, this increase is the result of a 63-percent surge in natural gas costs in 1982, and a 9-percent increase in 1983. Under full or immediate decontrol, the annual rate of increase in natural gas costs rises to 26.5 percent; as in the case of accelerated decontrol, this increase results from a surge in 1982 of some 82 percent. In 1983, natural gas costs embodied in a bushel of corn increase by less than one cent, or 1 percent, under immediate decontrol.

The natural gas component of the costs of wheat production follows paths similar to those of corn under the natural gas pricing scenarios. Under NGPA, the natural gas component of wheat production costs rises at an annual rate of 7.0 percent, or by 0.6 cents per pushel per year on average from 1980 through 1983. Accelerated decontrol would permit these costs to rise at an annual average rate of 23.3 percent, including a surge of 59 percent in 1982, and a subsequent change in these costs of 8.5 percent in 1983. Under immediate decontrol, natural gas costs would increase at an annual rate of 23.5 percent with a 69.4-percent surge in 1982 and a 2-percent increase in 1983.

The differences in the trajectories of costs under accelerated and immediate decontrol are due to the fact that accelerated decontrol constrains the adjustment to "free market" pricing in 1982 and leaves part of the release from control to 1983. Immediate

and full decontrol removes all controls at once, allowing the price to adjust fully upon their removal.

TABLE 1.—EFFECTS OF NATURAL GAS PRICE DECONTROL ON FARM PRODUCTION COSTS OF CORN AND WHEAT

[Cents per bushel]

Year	Direct onfarm costs, cost of natural gas [1]		Natural gas component of fertilizer costs		Total natural gas component of farm production costs	
	Corn	Wheat	Corn	Wheat	Corn	Wheat
A. Continuation of present policy—NGPA [2]						
1980	3.5	([3])	8.1	10.2	11.6	10.2
1981	4.0	([3])	8.9	11.1	12.9	11.1
1982	4.4	([3])	9.5	11.8	13.9	11.8
1983	4.7	([3])	10.0	12.5	14.7	12.5
B. Accelerated decontrol in 1982 [2]						
1980	3.5	([3])	8.1	10.2	11.6	10.2
1981	4.0	([3])	8.9	11.1	12.9	11.1
1982	6.9	([3])	14.1	17.6	21.0	17.6
1983	7.6	([3])	15.2	19.1	22.8	19.1
C. Full decontrol in 1982 [2]						
1980	3.5	([3])	8.1	10.2	11.6	10.2
1981	4.0	([3])	8.9	11.1	12.9	11.1
1982	8.1	([3])	15.1	18.8	23.2	18.8
1983	8.2	([3])	15.3	19.2	23.5	19.2

[1] Irrigation and crop-drying.
[2] Department of energy scenarios.
[3] Not relevant, as irrigation and crop-drying operations are not typical for wheat production on a national level.

Source: Calculated by CRS using data furnished by U.S. Department of Energy, Data Resources Inc., the Fertilizer Institute, and the American Gas Association.

The dominant element of rising natural gas costs in farming is in fertilizers, and, in particular, nitrogenous fertilizers. Natural gas, which is a raw material or feedstock input to the production of these fertilizers (as opposed to a processing fuel), accounts for about one-third of the cost of nitrogenous fertilizers made from ammonia, according to one estimate.[1] Assuming fixed rates of application of fertilizer per acre [2] and a complete passthrough of embodied natural gas costs to farmers, rising natural gas prices would have a significant effect upon fertilizer prices and, therefore, upon farming costs.

Direct, on-farm production costs [3] due to natural gas decontrol become over time a somewhat larger share of total gas inputs in wheat and corn production. In the production of corn, they accounted for about 30 percent of total natural gas input costs per bushel in 1980, rising to 32 percent in 1983 under NGPA, 33 percent under accelerated decontrol, and 35 percent under immediate decontrol. In wheat production, direct, on-farm costs of natural gas are negligible owing to the fact that wheat acreage is normally not irrigated or further dried after harvest.

The analysis assumes that about 10 percent of all acreage under corn is irrigated, and that natural gas is used as a primary fuel for pumping on about half of the irrigated acreage (54 percent).[4] The other energy sources include: electricity (27 percent), liquified petroleum gas (9 percent), diesel (7 percent), and gasoline (4 percent). It is likely that gas would be the primary fuel only in those locations where it can be obtained at or near wellhead prices. Indeed, the U.S. Department of Agriculture reports that seven states (Texas, Kansas, Arizona, New Mexico, Nebraska, Oklahoma, and Colorado) account for 94 percent of total consumption of natural gas used for irrigation.[5] Under these circumstances, the natural gas component of total costs would be somewhat higher than projected in these states, and lower than projected in other states.

B. The suppliers of natural gas used on farms

The sellers of natural gas used on farms consist mainly of ammonia producers, ammonia being a major source of nitrogenous fertilizer, and of either gas producers or interstate and intrastate natural gas pipelines. The structure of these sources of supply is such that the cost of natural gas used by farmers can be determined effectively by suppliers.

Only 110 companies operating 152 plants are identified as producers of nitrogenous fertilizers in the United States by the 1977 Census of Manufacturers. The industry is characterized by a high degree of concentration, such that a small number of producers account for a significant share of the total output of the industry. The four largest, which operate 18 plants, account for nearly 34 percent of the value of total shipments of the industry. The eight largest companies, which operate 29 plants, account for nearly 54 percent of the value of industry shipments. Most of the companies are small; about 55 percent of the companies account for less than 2 percent of total industry shipments.[6] This degree of concentration of production in a small number of firms implies that the largest companies have some capability to influence the price of fertilizers. In any event, industries of this nature tend to price on a basis related to costs, and prices of fertilizer are likely to reflect the decontrol of wellhead prices of the important natural gas inputs.

One analyst, Professor Gardner of the University of Maryland, notes that many of those companies are located in states in which favorable intrastate rates for natural gas can be obtained.[7] He suggests that, under NGPA, these companies could face difficulty in obtaining future supplies of natural gas, as reserves in these states are depleted and demand of the higher priority residential sector increases.[8] An Energy Information Administration study concludes that there is a tendency for intrastate rates to approach the levels of interstate rates for natural gas.[9] Therefore, it is possible that the cost of the gas component of nitrogenous fertilizers could rise significantly, and, given the structure in the industry, be passed on to users of fertilizer, the farmers.

Pipelines supplying natural gas purchased for direct, on-farm application must be expected to pass through the full increase in wellhead prices under decontrol. The pipelines constitute the only economically and technologically feasible way to transport large volumes of natural gas. While wellhead prices vary according to local circumstances of demand and supply, and prices in new contracts are "rolled in" with lower prices in old contracts to make up the regulated price and to end users, the big wellhead price increases with decontrol would quickly be reflected in the users' price. The farmer consumes so little natural gas that he would have little possibility to influence prices.

II. MARKET PRICES AND STRUCTURE FOR CORN AND WHEAT, 1980–83

A. Market prices

DRI projects that corn and wheat prices paid at the farm will be rising from 1981 through 1983. These projections are presented in Table 2. If they prove to be correct, corn prices, after falling 19 percent in 1981, are expected to increase from $2.50 per bushel in 1981 to $3.09 in 1983, an annual rate of 11.2 percent. Wheat prices, which fell by 4 percent in 1981, are projected to increase from $3.88 per bushel in 1981 to $4.18 in 1983, a rise of nearly 4 percent.

B. Market structure

The market for farm products generally is characterized by a large number of sellers. The U.S. Department of Agriculture estimated the total number of farms in the United States in 1980 to be 2.4 million, 88 percent of them having sales of less than $100,000.[10] At least 934,000 farms produce some wheat; at least 1.5 million farms produce corn and other feedgrains.[11]

In addition to domestic producers, foreign sources of supply are substantial. DRI estimates that Canada, Australia, and Argentina will account for about 6 percent of world production of feedgrains, and the Soviet bloc countries will contribute 21 percent of total world production of these crops in 1982.[12] With respect to wheat production, DRI projects the U.S. contribution to world supply in 1982 to be 15 percent of the total.[13]

TABLE 2.—DRI PROJECTIONS OF CORN AND WHEAT PRICES PAID AT FARM 1080–83

[Dollars per bushel]

Year	Corn price	Wheat price
1980	$3.10	$4.06
1981	2.50	3.88

[1] Bruce Gardner, "The Impact of Natural Gas Deregulation on the Farm and Food Sector" (A report prepared for the Natural Gas Supply Association, 1982), p. 10.

[2] Various estimates of sensitivity to the price of fertilizer suggest that this assumption has merit. Estimates of the price elasticity of demand for nitrogenous fertilizer are low. DRI estimates that a 1 percent increase in nitrogen fertilizer prices would result in a 0.27 percent reduction in the quantity demanded. See, DRI, Agriculture Review, Summer 1981, p. 62. Also, Gardner estimated that a 1 percent increase in nitrogenous fertilizer price would result in a percentage reduction in demand in the range of 0.33 to 0.41. See, Gardner, op. cit., pp. 15 f.

[3] These costs are incurred mainly for irrigation and crop-drying. Pesticides do embody natural gas; however, according to the Council for Agricultural Science and Technology, the share of the energy component of pesticides in total energy use in farming is approximately 1 percent. See, Council Report No. 68. "Energy Use in Agriculture," 1977. p. 13.

TABLE 2.—DRI PROJECTIONS OF CORN AND WHEAT PRICES PAID AT FARM 1080–83—Continued

[Dollars per bushel]

Year	Corn price	Wheat price
1982	2.83	3.94
1983	3.09	4.18

Source: DRI Agriculture Review, Winter 1981.

These data are important as they demonstrate that the individual seller is so small that determination of market prices is a function of the marketplace. The single farmer is a price-taker, unable to influence the market price. The farmer cannot pass through to buyers of farm products additional costs of production resulting from changes in natural gas pricing. The farmer lacks the market power to recover the higher cost of production which can be imposed upon him by his suppliers who do have this market power. He can only hope to benefit from unforeseen factors, such as increased foreign purchases, that would boost farm prices, or from government policies that could have the same effect.

III. EFFECTS OF NATURAL GAS PRICE DECONTROL ON CORN AND WHEAT FARM INCOME

In 1982, accelerated natural gas price decontrol could cost corn and wheat farmers $610 million dollars in constant 1972 dollars (i.e., after adjusting for inflation). In 1983, this cost would rise to $730 million. The costs resulting from immediate decontrol would amount to $790 million in 1982 and $1.80 billion in 1983. These estimates are the difference in each year between the value of farm cash receipts less natural gas expenditures under the decontrol scenarios and the value of these net receipts under continuation of NGPA.

Under accelerated decontrol, it is estimated that net cash receipts from corn and wheat farming in 1982 net of natural gas costs would amount to $21.65 billion dollars in 1972 constant dollars. They represent 97.3 percent of the $22.26 billion in farm cash receipts from corn and wheat which would be realized under NGPA. In 1983, net cash receipts would rise to $24.67 billion, 97.1 percent of the $25.40 billion which would be realized under continuation of current NGPA policy. These dollar values of farm cash receipts, total expenditures for natural gas, and farm cash receipts less natural gas expenditures are presented in Table 3.

Under immediate decontrol, net farm, cash receipts would amount to $21.47 billion in 1982, or 96.5 percent of the $22.66 billion which would be realized under NGPA. In 1983, these receipts would rise to $23.60 billion or 92.9 percent of the amount which would be realized under NGPA.

TABLE 3: EFFECTS OF NATURAL GAS PRICE DECONTROL ON CORN AND WHEAT FARM CASH RECEIPTS, 1980–83

[Billions of dollars in 1972 prices]

Year	Gross farm cash receipts	Expenditures for natural gas [1]	Gross cash receipts less natural gas expenditures
A. Current policy—NGPA			
1980	$20.83	$0.94	$19.89
1981	22.16	1.26	20.90
1982	23.49	1.23	22.26
1983	26.77	1.37	25.40
B. Accelerated decontrol			
1980	20.83	0.94	19.89

TABLE 3: EFFECTS OF NATURAL GAS PRICE DECONTROL ON CORN AND WHEAT FARM CASH RECEIPTS, 1980–83—Continued

[Billions of dollars in 1972 prices]

Year	Gross farm cash receipts	Expenditures for natural gas [1]	Gross cash receipts less natural gas expenditures
1981	22.16	1.26	20.90
1982	23.49	1.84	21.65
1983	26.77	2.10	24.67
C. Immediate decontrol			
1980	20.83	0.94	19.89
1981	22.16	1.26	20.90
1982	23.49	2.02	21.47
1983	26.77	3.17	23.60

[1] Total production multiplied by gas cost per bushel from table 1. Calculated by CRS using data from table 1 and DRI Agriculture Review, Winter 1981.

Farm cash receipts net of natural gas costs increase under all three scenarios but by most under NGPA. Under NGPA, net farm cash receipts from corn and wheat farming rise by 27.7 percent in the period 1980 through 1983. Under accelerated decontrol, the percentage increase is 24.0 percent; and under immediate decontrol, the percentage change is 18.7 percent.

However, under all natural gas pricing scenarios, the farmer's income position is eroded, assuming that other costs maintain their relative shares of cash receipts. The effect of NGPA is to increase in 1983 the share of gross farm cash receipts accounted for by natural gas expenditures as compared with 1980. In 1983, these expenditures are estimated to be 5.1 percent of gross farm cash receipts in corn and wheat farming; in 1980, the share was 4.5 percent. Under both accelerated and immediate gas price decontrol, the farmer's net income position also worsens in 1983, assuming that other costs maintain their shares. The share of natural gas expenditures in gross farm receipts rises to 7.8 percent under accelerated decontrol, and to 11.8 percent under immediate decontrol.

IV. CONCLUDING COMMENTS

The estimates developed in this analysis clearly indicate that changing natural gas pricing policy would result in higher costs of production and, effectively, a lowering of net farm incomes. Buying inputs of natural gas in markets in which the farmer has little or no influence on input prices, and selling products in markets in which the individual farmer also has no control over price, there is little likelihood that the farmer can recover higher input costs by passing them through to consumers. Thus, the farmer's income is "squeezed" by higher natural gas prices resulting from policy changes.

APPENDIX—METHODOLOGY

I. NATURAL GAS PRICING SCENARIOS

All three scenarios are those developed by U.S. Department of Energy and published in: U.S. Department of Energy. Two-Market Analysis of Natural Gas Decontrol. Appendix A to "A Study of Alernatives to the Natural Gas Policy Act of 1978." Report No. DOE/P E-0033, November, 1981.

The NGPA scenario assumes continuation of current pricing policy in which only certain categories of natural gas would be decontrolled in 1985. It allows for partial application of incremental pricing rules, and assumes a real world oil price of $32.73 in 1980 dollars escalating at an annual rate of 3 percent.

The accelerated decontrol scenario assumes decontrol commences in 1982. Decontrol would be partial, applying only to the price categories of gas being deregulated under NGPA. There would be no incremental pricing. Oil prices are as in the NGPA scenario.

Immediate decontrol commences in 1982 and applies to all domestic gas. There is no incremental pricing.

The wellhead and industrial prices for those industries exempt from incremental pricing, including chemicals, are projected to be per thousand cubic feet (Mcf):

	1980	1981	1982	1983
NGPA:				
Wellhead	1.81	2.09	2.27	2.42
Industrial	2.71	2.97	3.15	3.33
Accelerated:				
Wellhead	1.81	2.09	3.56	3.92
Industrial	2.71	2.97	4.69	5.08
Immediate:				
Wellhead	1.81	2.09	4.19	4.27
Industrial	2.71	2.97	5.02	5.11

II. PROJECTIONS OF ACREAGE, FARM PRODUCT PRICES, AND FARM CASH RECEIPTS

All projections of acreage, farm product prices, and farm cash receipts are those estimated by Data Resources Incorporated and published in DRI. Agriculture Review, Winter, 1981.

III. TECHNICAL ASSUMPTIONS

Fertilizer application rates, obtained by telephonic communication from the Fertilizer Institute and the American Gas Association, are assumed to be 137 pounds of nitrogen per acre of corn and 58 pounds per acre of wheat. Approximately 21,000 Btu's of natural gas are required per pound of nitrogen. Based on yields per acre planted, the natural gas content of a bushel of corn is approximately 0.03 Mcf and, for wheat, 0.04 Mcf. Approximately 97 percent of all corn acreage is estimated by the Fertilizer Institute to be fertilized. Approzimately 70 percent of all what acreage is fertilized.

Nitrogenous fertilizers are used in conjunction with other types of fertilizers, and are not substitutes for them.

Inputs of natural gas in irrigation and crop-drying operations were derived from estimates of the Council on Agricultural Science and Technology, as published in its report, No. 68: Energy Use in Agriculture (1977). The volumes of gas used in these applications were derived from data in the Oak Ridge Associated Universities Report: ORAU—160—Industrial Energy Use Data Book.

IV. ADDITIONAL ASSUMPTIONS

Five percent of acreage in corn is irrigated using natural gas as a primary fuel.

Purchases of natural gas for direct use are made at wellhead prices.

The price of natural gas embodied in fertilizer is completely passed through to the consumer.

RESOLUTION

Whereas, the Natural Gas Policy Act of 1978 has succeeded in its basic purpose of encouraging the development of domestic natural gas supplies; and

Whereas, delivered natural gas prices in many areas of the country have already increased to levels competitive with the price of alternate fuels; and

Whereas, many existing long-term natural gas purchase contracts between producers and pipelines were entered during a period

of supply shortage and need to be renegotiated; and

Whereas, many such contracts contain provisions which allow increases in wellhead gas prices, but do not allow decreases; and

Whereas, such contractual commitments prevent the price of natural gas from increasing or decreasing as appropriate to reflect market conditions; and

Whereas, both the Senate and the House of Representatives have, through extensive hearings, focused gas industry attention on the problem of supply-demand imbalance in the gas industry; and

Whereas, not all pipelines and producers have responded to a changing natural gas market and initiated efforts to renegotiate contract provisions to be more responsive to actual market conditions; and

Whereas, those pipelines and producers which have initiated efforts to renegotiate contract provisions to be more responsive to actual market conditions should be encouraged to continue their efforts; and

Whereas, gas producers and pipelines may be able to effect a demand-supply balance through such renegotiations and thus avoid the need for Congress to legislate in this area: Now, therefore, be it

Resolved, that it is the sense of the Senate that natural gas producers and natural gas pipelines should be encouraged to recognize that delivered prices for natural gas are already competitive with the price of alternate fuels in many regions, and to renegotiate producer-pipeline contracts to respond to changing market conditions in order to provide an orderly transition to a deregulated market; and

Be it further resolved, that it is the sense of the Senate that unless such renegotiation takes place in a timely fashion, the Congress should take such steps as may be necessary to resolve the impasse over contracts in order to protect natural gas consumers from unwarranted price increases, and to provide for an orderly transition to a deregulated natural gas market.

Mr. EXON. Mr. President, that ends my remarks that I have attempted to get recognition to present for the last 12 hours. I thank all of my colleagues. I yield the floor.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER (Mr. RUDMAN). The majority leader.

Mr. BRADLEY. Mr. President, I must rise in opposition to division II of the amendment offered by the Senator from Kansas. She has performed a valuable service; she has highlighted for the entire Senate the problem that many of us from the Northeast have been living with for some time: high natural gas prices. These prices are rising for a number of reasons:

The Natural Gas Policy Act of 1978 gradually raises ceiling prices on some categories of natural gas;

Some pipeline companies signed contracts in the mid-1970's that require them to take high cost gas even though lower cost gas is now available;

More high cost gas—both deep gas and imported gas—is being burned; and

The price of gas is now above the cost of industrial use fuel oil (residual fuel); this means some firms have switched to oil from gas, thereby reducing the number of customers to pay for the large fixed costs of pipelines.

The Northeast always pays more for natural gas. We also pay more for oil. Homeowners in the Middle West are now paying $4, $5, and $6 per thousand cubic feet of gas. We in New Jersey are paying over $7/Mcf. Heating oil, which heats as many homes as natural gas in my State, costs over $8/Mcf in gas equivalent. It is these high costs of natural gas and home heating oil that has prompted us in the Northeast along with others to be active and vocal supporters of low-income energy assistance and low-income weatherization programs. I am pleased to cosponsor the amendment to increase the low-income energy assistance authorization to be offered by the Senator from Missouri.

As a member of the Energy Committee, I look forward to next year when I intend to play an active role in a careful examination of the natural gas market and the NGPA. Early next year we will examine options designed to allow competition to push natural gas prices down. I fully expect that the take-or-pay contracts will be addressed as a part of the package of proposals designed to rationalize the gas market.

This is the way the Senate ought to legislate—carefully, seriously and thoroughly. For this reason I must oppose division II of this amendment.

Further I am informed that it would be April before this amendment would bring any pure relief for consumers. So we will have time to consider the matter in the Energy Committee.

Mr. BAKER. Mr. President, I move to table division II of the Kassebaum amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. HUMPHREY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Is there a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll to ascertain the presence of a quorum.

The bill clerk proceeded to call the roll.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the motion to table. The yeas and nays have been ordered. The clerk will call the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Maryland (Mr. MATHIAS), and the Senator from Connecticut (Mr. WEICKER), are necessarily absent.

Mr. CRANSTON. I announce that the Senator from New York (Mr. MOYNIHAN), and the Senator from Arizona (Mr. DECONCINI), are absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 62, nays 33, as follows:

[Roll Call Vote No. 410 Leg.]

YEAS—62

Abdnor	Ford	Mitchell
Armstrong	Garn	Murkowski
Baker	Glenn	Nickles
Baucus	Gorton	Nunn
Bentsen	Hart	Packwood
Boren	Hatch	Percy
Boschwitz	Hayakawa	Pressler

NOT VOTING—5

DeConcini	Mathias	Weicker
Goldwater	Moynihan	

So the motion to lay on the table Division II of Mrs. Kassebaum's amendment (UP No. 1444) was agreed to.

UP AMENDMENT NO. 1446

Purpose: To provide that only steel manufactured in the United States is used in the construction of highways.

Mr. METZENBAUM. Mr. President, on behalf of myself, Senator ROBERT C. BYRD, Senator RIEGLE, Senator HUDDLESTON, Senator SASSER, and Senator RANDOLPH I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM) for himself and Mr. ROBERT C. BYRD, Mr. RIEGLE, Mr. HUDDLESTON, Mr. SASSER, and Mr. RANDOLPH proposes an unprinted amendment numbered 1446.

The bill clerk proceeded to read the amendment.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection?

Mr. HEINZ. Mr. President, reserving the right to object, I wish to have the amendment fully read.

The PRESIDING OFFICER. The clerk will continue reading the amendment.

The amendment as read by the bill clerk is as follows:

At the appropriate place in the amendment insert the following:

BUY AMERICAN STEEL

SEC.— (a) Chapter 3 of title 23, United States Code, is amended by adding after section 324 the following new section:

"§ 325. Buy American steel.

"Nothwithstanding any other provision of this title or any other law, none of the funds authorized to be appropriated for highway construction may be obligated or expended on any project in which steel manufactured outside the United States is used.".

(b) The analysis of chapter 3 of such title is amended by adding at the end thereof the following:

"325. Buy American steel.".

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. METZENBAUM. I yield to the Senator from Idaho without losing my right to the floor.

I ask unanimous consent that I may yield to the Senator from Idaho for what I understand is the offering of a resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, what is the question?

The PRESIDING OFFICER. The question is the Senator from Ohio asked unanimous consent that he might yield to the Senator from Idaho for the purpose of offering a resolution without losing his right to the floor.

The Senator from Idaho.

Mr. McCLURE. Mr. President, I thank the Senator from Ohio and I thank other Members.

SENATE RESOLUTION 515—RELATING TO THE NEED TO PROVIDE NATURAL GAS CONSUMERS WITH RELIEF FROM RAPIDLY INCREASING NATURAL GAS PRICES

Mr. McCLURE. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE), for himself, Mr. EXON, Mr. JOHNSTON, Mr. WARNER, Mr. DOLE, and Mr. ROBERT C. BYRD, proposes a resolution (S. Res. 515) relating to the need to provide our Nation's natural gas consumers with immediate and long-term relief from rapidly increasing natural gas prices, by taking a number of actions to reduce or restrain such price increases, and by providing financial assistance to low-income consumers of natural gas.

The text of the resolution follows:

S. RES. 515

Whereas, residential and commercial consumers of natural gas in some parts of the country are facing rapidly increasing gas prices;

Whereas, natural gas prices have increased to the extent that many consumers are unable to pay their monthly gas bills;

Whereas, natural gas prices are increasing at a time of reduced demand and ample short-term supplies of deliverable gas; and

Whereas, average natural gas prices are not adequately responding to these changed market conditions and are imposing financial hardships on this Nation's natural gas consumers:

Now, therefore be it

Resolved, that it is the sense of the Senate that the Federal Energy Regulatory Commission should utilize its statutory authority to proceed immediately to review those administrative actions, in view of the current escalation of natural gas prices, that could result in the modification of certain standard provisions in pipeline-producer gas purchase contracts, such as take-or-pay, indefinite price escalator, and most-favored-nation clauses.

Be it further resolved, that it is the sense of the Senate that natural gas pipeline companies and natural gas producing companies should jointly and immediately initiate efforts to renegotiate immediately the provisions of their gas purchase contracts relating to volumes and prices of gas, particularly, take-or-pay, indefinite price esclator, and most-favored-nation clauses, in order to conform such provisions to changing conditions in the natural gas market and thereby reduce the rapid escalation of natural gas prices; and

Be it further resolved, that it is the sense of the Senate that available appropriations for direct financial assistance should immediately be provided on an expedited basis, to low income consumers of natural gas pursuant to the low-income energy assistance program established by title XXVI of the Low-Income Home Energy Assistance Act of 1981.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. McCLURE. I yield.

Mr. ROBERT C. BYRD. Mr. President, will the Senator enter my name as a cosponsor?

Mr. McCLURE. Mr. President, I ask unanimous consent that the Senator from West Virginia (Mr. ROBERT C. BYRD) be named as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I believe that Senator DOLE is listed as a cosponsor as well.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. McCLURE. Mr. President, I did not interrupt the reading because I wanted every Member to know exactly what was in this resolution.

We have already seen the tabling motion on two amendments that deal with this question. I think that certainly the pattern has been established as to what the Senate will do with respect to amendments that call for immediate intervention in the marketplace.

I did not participate at length in that debate, but I do believe that one thing came out very clearly in the hearings that we held, and that is that the attempt to adjust price by mandatory statutory mechanisms would be too late to do any good this winter.

But there are three things that can be done that would be of some assistance.

First, FERC has some authority to look at some of the take-or-pay and other provisions. We suggest in this resolution that they get about doing that.

Second, we suggest that the companies that are involved undertake to renegotiate contracts where possible. I think we should encourage them to renegotiate where it is possible for them to come to voluntary agreements.

I think a number of those companies will find it in their own best interest to renegotiate those contracts, and I want to encourage them to do so.

Third, it expresses the sense of the Senate that we deal with the problem immediately by fuel assistance to people who simply cannot pay their bills. We need to take a close look at that, and this is a sense of the Senate that it is something we want to look at. Perhaps we will do better a little later in this bill or before this lame-duck session ends.

I am pleased to have the cosponsorship of the various other principals who have been involved in this debate today, and I hope we can adopt the resolution without much delay.

Mr. JOHNSTON. Mr. President, will the Senator yield?

Mr. McCLURE. I am happy to yield to the Senator from Louisiana.

Mr. JOHNSTON. Mr. President, as a cosponsor of this resolution I think it is an excellent resolution. It deals precisely and in a very appropriate way with the evils that were sought to be addressed by the Kassebaum amendment.

It goes as far as we could possibly go at this time which is to ask FERC to take such actions as they may to deal with this problem of take-or-pay contracts and we expect they will do that. As a matter of fact, they are dealing with that very question at this time and we expect some kind of advice out of them tomorrow when they are supposed to report on take-or-pay.

I ask only one thing from my distinguished colleague. That is that I have been asked for just a few minutes by some of my colleagues here to have their staff carefully check it out. I am sure there is no problem with it. But if we could let the debate continue before it is passed I think that will give us plenty of time.

Mr. McCLURE. I thank the Senator from Louisiana.

Mr. President, I ask unanimous consent that the Senator from Texas (Mr. BENTSEN) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, before yielding further, let me suggest also that as the Senator from Nebraska (Mr. EXON) said a moment ago; he recommended action similar to this when he testified before the Energy Committee, and I wish to give him full credit for having urged that action before the Committee on Energy and Natural Resources at our hearings. We went just one step further than his amendments did by urging FERC to take the action or to initiate the action that we have suggested here. Otherwise, it parallels very closely the suggestion that Senator EXON had made.

Mr. President, I also ask unanimous consent that Senators COHEN and SIMPSON be added as cosponsors.

The PRESIDING OFFICER (Mr. RUDMAN). Without objection, it is so ordered.

Several Senators addressed the Chair.

Mr. MITCHELL. Mr. President, will the Senator yield for a question?

Mr. McCLURE. I would be happy to yield.

Mr. MITCHELL. The resolution refers to low-income energy assistance for those consumers who use natural gas for heating.

The Senator is aware, I am sure, that there are some regions of the country in which home heating oil is primarily used and that in those areas tremendous price increases are now being experienced as are being experienced in the natural gas area, and which have not only been experienced this winter but during other winters.

I hope it is the Senator's intention by this resolution not to exclude from that regions of the country that have been suffering from this for two or three heating seasons now.

Mr. McCLURE. I might say to the Senator I am not at all unaware of the fact that there are some areas of the country which do not consume natural gas. Certainly in the area of New England, in which home heating oil is the primary or major source of fuel for heating—aside from wood which has grown in importance in recent years—home heating oil prices have risen.

However, the topic we have been discussing for the last several hours here has been the escalation of natural gas prices.

I might just indicate that in my region of the country, that in my State the distribution company has just applied to the regulatory commission for a decrease in the home consumer rate for natural gas. That springs from the fact that we get most of the natural gas in the Northwest from Canada. We have been essentially deregulated for quite a little while, paying these high prices, which are much higher prices than many other areas of the country. But we are not seeking any special relief either in this resolution or otherwise. But I am not unmindful, and I do not think we ought to read this as saying we are not going to take a look at that problem with respect to the other forms of energy.

Mr. MITCHELL. If I may make one further comment, the real effort here will be when Congress determines the level of appropriations for the fiscal year 1984 budget for the low-income assistance program, and I hope very much that the concern expressed here tonight by so many people about the adverse effect on consumers, that we are not talking here about any appropriations that will carry over until next year because in the past 2 years it has been a very, very difficult fight with not a great deal of support from many of the people who are now expressing concern over the plight of the people suffering from the lack of low-income energy assistance. I hope very much this will be remembered when we get to that budget contest sometime early next year.

I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

Mr. NICKLES. Mr. President, will the Senator yield?

Mr. McCLURE. I am happy to yield.

Mr. NICKLES. The Senator has three things in substance; One was asking the FERC to see what they could do to renegotiate some contracts in take-or-pay. Could the Senator give us a little more detail as to what that involves?

Mr. McCLURE. The resolution has three resolve clauses. The first one deals with what the FERC can do under existing statutes, and we are suggesting that they look to what might be done with respect to their actions that could result in modification of certain standard provisions in pipeline-producer gas purchase contracts, such as take-or-pay, indefinite-price escalator, and most-favored-nation clauses. They have the authority to do that already.

The question with respect to renegotiation is expressed in the second resolve clause of the resolution.

Mr. NICKLES. I understand the second. What authority does FERC have right now? Can they go in and mandate these contracts for renegotiation?

Mr. McCLURE. I am not talking about renegotiation. The Senator stopped me just before I said that.

Mr. NICKLES. OK.

Mr. McCLURE. The second clause urges companies, where possible, to sit down and renegotiate, if they find it in their best interest to do so, to come up with a renegotiated contract that deals with some of the inequities within the market that some people perceive now. I think if they sit down in a serious mode of renegotiation of those contracts they will do so.

But we are not suggesting, and I am not suggesting, that the FERC has the authority to order them to do so.

Mr. NICKLES. I understand the Senator, and I have no problem with the second resolve clause. I do have some question on the first resolve clause which says that the Federal Energy Regulatory Commission should utilize its statutory authority to proceed immediately to review those administrative actions in view of the current escalation of natural gas prices that could result in modification of certain standard provisions in pipeline-produced gas purchase contracts, such as take-or-pay, indefinite-price escalator, and most-favored-nation clauses.

What authority do they have that they can modify these contracts?

Mr. McCLURE. Might I say to the Senator from Oklahoma that this resolution does not attempt to delineate what their existing statutory authority is. I want to make that clear first.

We are asking them to use whatever their statutory authority is to look at the administrative actions that could result in those kinds of modifications. You would have to look at all of the entire Federal energy regulatory body of law that is on the books today. We are not attempting to vary that.

Mr. NICKLES. I have some reservations about that, and in view of the fact that I know the chairman of the Energy Committee is aware that the Federal Energy Regulatory Commission has been stacked with backlogs, they have been slow and they have a great deal of work to do, I have reservations about that, and if we can postpone discussion of that and maybe move to the third part, I would like to do so.

The third resolve clause states:

It is the sense of the Senate that available appropriations for direct financial assistance should immediately be provided on an expedited basis, to low-income consumers of natural gas pursuant to the low-income energy assistance program established by title XXVI of the Low-Income Home Energy Assistance Act of 1981:

Does that have an implication that the Appropriations Committee is disposed to add additional money or look for it in some other way?

Mr. McCLURE. Mr. President, if the Senator will yield, let me suggest to the Senator that there is a large quantity of money that already is carried over and an additional appropriation, which is prepared, which would aggregate, I believe my memory is correct, to some $1.8 billion that would be available in actions either already taken in the Congress or contemplated to be taken yet in this lameduck session, either in the Appropriations Act or with the continuing resolution.

We want to take a close look at that to determine whether that will be sufficient as an identified source of funding that might be available to increase that funding if indeed, after looking at it, we believe that $1.8 billion would not be adequate.

But I think one of the things we must be very concerned about is that we do not set in motion here something that will not have any results for 2 or 3 months. The people who are having trouble are people who are having trouble now, and they will not be helped very much to talk about some income assistance to them in April or May if their gas is cut off in December or January. So we are asking that the administration take a look at the administrative mechanisms that will get that money to them quickly in time to respond for what to many of them is a real emergency right now.

Mr. NICKLES. I thank the Senator.

Parliamentary inquiry, Mr. President. Who has the floor?

The PRESIDING OFFICER. The Senator from Idaho has the floor subject to a unanimous-consent agreement in which the floor goes back to the Senator from Ohio.

Mr. NICKLES. Parliamentary inquiry. If this resolution would proceed further, it would be my intention to discuss it, and I am not sure that that would be possible or agreed to by the Senator from Ohio.

Mr. McCLURE. I am not quite certain I understood what the Senator from Oklahoma just said.

It is my hope, and I hope we can get to a vote on this so that we can get back to the Senator from Ohio. I did not intend by this action to delay consideration of the amendment of the Senator from Ohio, but certainly it is not my desire to cut anyone off. However, I had not anticipated that this expression of good will on the part of the Senate was going to lead to an extended discussion by those who did not want to express good will.

Mr. DENTON. Mr. President, will the Senator from Idaho yield for a question?

Mr. McCLURE. I would be happy to yield for a question.

Mr. DENTON. I presume the Senator means by "available appropriations," unexpended appropriations, those appropriations already made which are as yet unexpended in each State.

Mr. McCLURE. Might I say to the Senator there are some moneys available for immediate expenditures because they are left over as unexpended funds. Second, there is that action which will be taken or is expected to be taken in the appropriations measures now pending either in the appropriations bill or the continuing resolution which we hope to act upon tomorrow, which would add to that amount of money.

Mr. DENTON. That explanation I think will suffice for the record in terms of determining what is meant by these words. But I would suggest that the term "available appropriations should immediately be provided" might better be substituted by some different language. I do not think it is that clear, but I yield to the Senator by virtue of our previous conversation.

Mr. McCLURE. I believe it is clear, from the standpoint of appropriations language, that applies both to the carryover money which is there now and that amount of money which might be provided in appropriations actions, be it by the appropriations bill directly or the continuing resolution.

Mr. DENTON. I yield to the Senator in that knowledge of the interpretation. I just wanted to make sure that is what it meant.

The PRESIDING OFFICER. The question is on the resolution offered by the Senator from Idaho (Mr. McCLURE).

Mr. BOREN. Mr. President, I reluctantly will vote against the McClure resolution. Clearly a way most be found to moderate the large increases to consumers in natural gas prices. As one Senator, I plan to work hard for meaningful policy changes which will help consumers. I also support funding for low-income energy assistance at reasonable levels to help those who cannot protect themselves against price increases.

The resolution, however, does not seem balanced in the action which it urges. It focuses only on a narrow part of the problem without referring to the need to reevaluate the Fuel Use Act and consideration of the broader context of natural gas pricing.

The curtailed use of natural gas by industries has forced the residential consumers to pay higher rates.

The full range of natural gas policy options should be considered. The resolution does not seem to me to provide any real hope for consumers while it can be interpreted as discriminating against certain classes of producers.

NATURAL GAS

Mr. McCLURE. Mr. President, there is no doubt that serious and legitimate concerns have prompted demands for immediate relief from the gas price increases projected for this winter. However, a careful analysis of the pending proposal suggests that, if enacted, it could be disastrous.

Although the legislation is intended to provide immediate assistance to hard-pressed gas consumers, there is no assurance whatsoever that the proposal will achieve its stated objective. Moreover, it could cause irreparable harm to gas consumers in the long term.

For example, if Congress were to impose a freeze on wellhead prices, the result could be a devastating psychological impact on gas producers. Such a price freeze would be an abrupt reversal of the price incentive policy adopted by the Congress when it enacted the Natural Gas Policy Act of 1978. A price freeze could seriously reduce or even destroy the incentives of some producers to invest capital in the development of new domestic gas supplies.

If the Congress requires the modification of pipeline producer contracts by altering take-or-pay clauses, the result undoubtedly will be a massive shift of natural gas sales among producers. Many small, independent producers would be compelled to permanently cease operations because of lost sales resulting from abrogated contract provisions. Many would be forced to default on their bank loans because of unanticipated reductions in their gas sales revenues. New bank failures, similar to the collapse of the Penn Square Bank, may be the inevitable result.

Before the Congress takes any legislative action, it must identify the causes of the natural gas price increases that have prompted the pending proposals. Unfortunately, that is not a simple task. Each State and each region is served by a combination of natural gas pipelines, each with its own unique set of gas supply sources, contractual obligations, and market requirements. Accordingly, any generic legislative action will have differing impacts in the various regions of the country. What may be effective in one region may produce adverse consequences in another.

During the remaining days of this postelection session, we lack sufficient time to ascertain fully the benefits and detriments of the pending legislative proposals. However, the Congress has begun that analysis. The Committee on Energy and Natural Resources on Monday, December 13, 1982, held a hearing to review the current conditions in the gas market and the factors contributing to those conditions.

I urge my colleagues to resist the impulse to take immediate action. We cannot afford to legislate on a piecemeal basis. We must recognize that any congressional action motivated by the need to restrain gas prices must be carefully balanced against the risks of returning to gas-shortage conditions and imposing severe economic hardships on gas consumers.

Mr. DANFORTH. Mr. President, I ask for the yeas and nays on the resolution.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. NICKLES addressed the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. Mr. President, we have had a lot of discussion today, but I do not think we have had a full discussion on natural gas. It seems as if it wants to come up repeatedly. I did have some reservations about the resolution, particularly the first part of the resolution that basically asked the FERC—I will just read it exactly.

The Federal Energy Regulatory Commission should utilize its statutory authority to proceed immediately to review those administrative actions, in view of the current escalation of natural gas prices, that could result in the modification of certain standard provisions in pipeline-producer gas purchase contracts, such as take-or-pay, indefinite price escalator, and most-favored-nation clauses.

I personally do not support a resolution that would ask the FERC to do whatever they could do to intervene in contracts. A lot of discussion has been on take or pay. I would like to talk about take or pay. And maybe different Members of the Senate do have a little more knowledge of what a take-or-pay contract is and possibly we should go into a little more length and detail on indefinite price escalator and most-favored-nation clauses.

Actually, the term "take-or-pay" is misleading; it really should be "take-or-prepay." That is, a prepayment is made today for gas to be delivered later. The makeup feature of take or pay has been largely ignored in recent discussions of natural gas issues.

In the early years of the gas industry, there was no need for take-or-pay provisions. Gas was a comparatively valueless byproduct of oil production, and it was sold whenever a market happened to be available, usually to a nearby gasoline plant. But with the advent of large diameter, long-distance pipelines and greater demand for gas, gas itself could be explored for, developed, and produced as a valuable commodity. With gas as the major product on a lease, it had to carry the burden of all the costs of exploration and production; and for this there was real need for a steady, reliable flow of income to the producer. Take-or-pay was the method which buyers and sellers developed to achieve this.

Next to the pricing provisions, the most important provisions of a gas sales contract are those which specify the quantity of the gas to be purchased. The producer wants to sell his gas as rapidly as his wells will produce it and the pipeline can take the gas into its facilities. Hence, he tries to contract to require the buyer to take as high a percentage of the capacity of his wells to deliver gas as he can. During the shortage period in the late 1970's, pipeline buyers, who needed more gas than they could buy and were curtailing their customers, were willing to sign long-term contracts providing for high percentage "takes" from the producer. In many cases the producers drilled additional wells to enable the gas to be produced at a more rapid rate to meet the urgent pipeline demand.

From the viewpoint of the pipeline, it is desirable to get as many gas reserves contracted to the pipeline as possible in order to protect the long-term supply security of the pipeline and its customers. That need must be considered with—or balanced against—the short-term need to meet all the current demands of its customers. Thus, the pipeline buyer must adjust its gas purchase program to continually assure its long-term supply, while at the same time assuring itself that it has enough gas to meet all of its customers' demands, but not too much gas so that it would be found to violate the "take" or quantity provisions of its contracts with its various producers. The take-or-pay requirements of his contract are the producer's only protection against predatory buying practices of a pipeline, which could, absent this provision, tie up a producer's reserves under a long-term contract and then refuse to permit their production by refusing to take the gas into its system. This was the very practice that the clause was initially designed to prevent. After ali, in most cases there are not too many potential buyers close enough to offer to purchase a new gas supply.

It is important to keep in mind that in talking about "producers" or "sellers" we are not talking about a single company or even a small group of companies. Instead, pipelines buy from thousands of producers and have individual contracts with each one. It would not be fair, logical, or "in the public interest" for a pipeline to favor one producer over another, taking one person's gas while leaving another's in the ground. In fact, if two or more producers are selling gas from the same reservoir, the gas will move underground through the rock to the wells which are producing—and away from wells which are shut-in. This means that the producer whose wells are not producing can actually have his gas drained away by another producer whose wells are producing.

Furthermore, a producer, especially a small producer, needs a steady income from his wells in order to pay his fixed costs, operating costs, and taxes. In many instances, the steady income from existing production provides the collateral on which a producer borrows money to continue to drill wells to explore for and develop new gas.

It is assumed that the existence of a take-or-pay provision is solely for the benefit of the seller. But a buyer has a real interest in keeping an assured supply. Without take-or-pay, long-term contracts for gas supplies would be rare, leaving buyers with the inability to finance pipelines and attract markets. And the level of take-or-pay will in part determine the number of wells to be drilled on a lease and the size of surface facilities to be installed, which in turn affect the volume of gas available to the purchaser on any given day.

A take-or-pay provision is designed to meet the needs of both the producer and the pipeline. It provides that the buyer must take a minimum quantity of gas, on a daily, monthly, or annual basis, but, if he does not take this quantity of gas, he must pay the producer as if he had taken it. This does not mean that the pipeline pays more money for less gas. The reason is that the pipeline has a right to "make up" the deficiencies in takes, either at no cost or by payment of a small price differential if the price of the gas has increased between the time the payment is made and the gas is taken into the system. Thus, in the normal course of events, the pipeline is able to operate its system with necessary flexibility, increasing or decreasing its takes as demands of its customers vary, because of weather conditions, economic changes, and so forth. The producer receives a steady minimum income to meet his operating costs, taxes, and other obligations. And the pipeline's customers only see the carrying charges on take-or-pay amounts, not the full amounts paid, in their rates.

We can speculate what the gas industry might be like without take-or-pay provisions. Since take-or-pay is a tradeoff for long-term commitments, producer-pipeline contracts would be significantly of shorter duration. Surely there would be a major change in pipeline financing, requiring more equity participation, shorter amortization periods and, presumably, higher rates to offset the greater risks of loss of gas supply. Producers could be expected to develop properties more slowly and perhaps to demand higher prices in return for the uncertainties of cash flow. Short-term, spot sales could lead to shortages on one pipeline system with adequate supplies in others. In short, chaos could supplant stability—and the consumer is the loser.

One of the early methods used to set the amount of take-or-pay was to relate the amount to be taken or prepaid—the daily contract quantity or DCQ—to the amount of original recoverable reserves covered by the contract. Thus, a DCQ or 1 Mcf per day for each 10,000 Mcf of reserves would theoretically deplete the reserves in about 27 years. The 1 for 10,000 formula in time gave way to 1 for which 8,000 took about 22 years, and 1 for 7,300 which took about 20 years. Other reserve based formulas were used as well.

But problems developed in basing average daily takes on reserves. One

was the inexact nature of reserve estimation; engineers of buyers and sellers often disagreed on just what the recoverable reserves were. Sometimes, arbitration was the only way to resolve differences. In any event, having to agree on reserves every year or two resulted in an inefficient use of technical personnel.

Of even greater significance was the need of pipelines, not so much for long-term supplies, which were sorely needed, too, but for gas immediately to serve their markets. But the interstate pipelines, unable to compete for new supplies in price, found they were able to compete by offering higher take-or-pay levels.

What then developed was a switch from reserve-based take-or-pay levels to a method which gave buyers more gas and sellers more cash for development. That was the use of a percentage of daily gas deliverability to establish the DCQ level. Deliverability is easily determined and redetermined by actual tests, not by estimation, an advantage in time and manpower to both buyers and sellers, and also those who were financing the deal. The actual percentage to be used was negotiated by the parties, and it has varied extensively depending on many factors, including the number of wells to be drilled, the size of optimum surface facilities, the capacity of the buyer's pipeline, and the buyer's need for gas. In general, the percentage ranged from a low of 33⅓ to a high of 90 percent. The weighted average percentage was probably around 80 percent. The time over which the take-or-pay obligation was to be met was sometimes a day or a month but most frequently a year. The time for makeup also varied, but, since the FPC mandated at least a 5-year makeup for sales under the Natural Gas Act, the 5-year makeup term spread to intrastate sales as well. Makeup over the remaining term of the contract—and sometimes beyond that—was not infrequent, however.

Problems are now being experienced by some pipelines because the two objectives of the pipeline purchaser find themselves in conflict with each other. Many pipelines are experiencing a deliverability surplus due to the fact that the demands of their customers are less than the pipelines anticipated due to the economic recession and the reduction in prices of fuel oil, which competes with gas in many markets. At the same time, these pipelines have a continuing need to buy gas to meet their long-term needs, 5 to 15 years from now. Thus, pipelines are increasingly finding themselves potentially liable under the take-or-pay provisions of their contracts to pay for gas which they cannot currently take into their systems.

This fact is not a cause for panic or precipitous or ill-considered congressional action. The operations of the industry and the clauses themselves will correct this problem, if it is a problem, over a fairly short period of time. This is so, because:

First. The makeup provisions of the gas sales contracts will allow the pipelines to receive gas supplies which they have paid for in the future, at a time more convenient to the pipeline.

Second. The buying practices of the pipelines in new contracts will reflect the surplus deliverability situation, and the new contracts will have lower percentage take requirements and more liberal makeup clauses than earlier contracts. In extreme situations, the pipeline may simply suspend new purchases until some of the take-or-pay balances are made up.

Third. If situations become too extreme, producers will renegotiate these requirements on an individual contract basis to avoid pipeline hardship.

Fourth. In any event, any problem that exists will disappear when the Nation's economy revives.

Much of the criticism of the take-or-pay clause comes about because of the many different prices at which natural gas, a fungible and homogeneous commodity, is sold. This is true, not because of the contracting practices of producer and pipeline, but because of Federal regulation. Prices paid for gas in the various NGPA categories vary widely, from 45 cents per MMBtu to over $9.00. These prices vary between fields, between producers, and between individual wells—and sometimes even in the same well. It is inevitable in such a system that, at times, some 45 cent gas will be shut in, and paid for, while more expensive gas is purchased by the same pipeline due to contract obligations and system demands and pressures. This is not done because the pipeline wants to pay more for its gas supply; on the contrary, it wants to do just the opposite in order to conserve its markets, meet regulatory objections, and so forth. But the pipeline cannot arbitrarily shut in some fields because they are high priced, or for any other reason and produce others. It must meet its contract obligations in each field with each different producer.

The solution to the problem is not, as some suggest, to tinker with a single part of the contracts entered into between the producer and pipeline. Rather it is to abolish, or reduce, the artificial and meaningless price differentials imposed by law and regulation upon gas from varying vintages, sources, and sellers.

Over the years, there have been some suggestions that the use of take-or-pay provisions, freely negotiated to suit the needs of buyers and sellers, was somehow improper. Indeed, the Federal Power Commission twice considered the desirability of take-or-pay provisions. In each case, the FPC concluded that such provisions were necessary in the industry and that the level of take-or-pay was to be best left to the parties to a contract.

Again today, take-or-pay, without mentioning the makeup related to it, is being blamed for the perceived ills in gas markets. With demand for gas reduced because of general economic conditions, take-or-pay provisions will work to do exactly what they were designed to accomplish—they give producers assured cash flows, provide a cheap alternative to storage by pipelines, and provide a cushion of prepaid gas for make up when the pipelines need it.

Notwithstanding contractual take-or-pay obligations, individual sellers are reaching accommodations with their buyers in relaxing those provisions. This is being done in recognition of the unique circumstances in today's marketplace. This is clear evidence that, just as price signals are being received by producers about interfuel competition, demand signals are being read. The free operation of market forces is working—working far better than a legislative solution to a nonexistent take-or-pay problem.

Mr. President, if I might ask the chairman of the Energy Committee a question, in the first section, the resolve section, which we talked about, in the opinion of the chairman would this be asking or mandating that the FERC would be going in and reviewing contracts, trying to find any contracts that had take-or-pay provisions, and interceding in those contracts to try to eliminate those provisions?

Mr. McCLURE. Will the Senator yield?

Mr. NICKLES. Certainly.

Mr. McCLURE. Let me say to the Senator that I do not mean to imply in the language any more than the language says. The language says that we think FERC should utilize its statutory authority to proceed immediately to review those administrative actions in view of the current escalation of natural gas prices that could result in the modification of certain standard provisions, and so on. It does not mandate them to anything. It does not even ask them to do anything that is not now provided for by law.

Mr. NICKLES. Here I am, an independent producer. I have a contract that has take-or-pay on a well. Does that mean that they would be able to tell me—I do not know how they can do it constitutionally—that that portion of the contract need be abrogated?

Mr. McCLURE. I am not sure that the Senator wants to press me to the point of trying to interpret the law to indicate what I believe FERC can do under the existing statute because I might give an answer that would be a

little different than the Senator would desire.

I think it would serve his purposes and certainly mine better if we simply indicated that FERC has certain statutory authority under existing statute. What we do in this resolution does not expand or contract that authority. Whatever authority they have they have under existing statute. The action that we are taking in this resolution does not change that one iota.

Mr. NICKLES. I thank the Senator.

Mr. McCLURE. I would answer the Senator in that way rather than try in a detailed explanation to define what FERC authority is because I think that would lead us into some other areas that perhaps would not be as pleasing to the Senator from Oklahoma.

Mr. NICKLES. I thank the Senator. It is not my real intention to try and waylay his resolution. I did think it was important that we have some additional information put into the RECORD.

The PRESIDING OFFICER. The question is on agreeing to the resolution. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Utah (Mr. HATCH), the Senator from Maryland (Mr. MATHIAS), and the Senator from Connecticut (Mr. WEICKER), are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. STENNIS), is necessarily absent.

I also announce that the Senator from Arizona (Mr. DECONCINI) and the Senator from New York (Mr. MOYNIHAN), are absent because of illness.

The PRESIDING OFFICER (Mr. ARMSTRONG). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 90, nays 3, as follows:

[Rollcall Vote No. 411 Leg.]

YEAS—90

Abdnor	Dodd	Johnston
Andrews	Dole	Kassebaum
Armstrong	Domenici	Kasten
Baker	Durenberger	Kennedy
Baucus	Eagleton	Laxalt
Bentsen	East	Leahy
Biden	Exon	Levin

NAYS—3

Boren	Long	Nickles

NOT VOTING—7

DeConcini	Mathias	Weicker
Goldwater	Moynihan	
Hatch	Stennis	

So the resolution (S. Res. 515) was agreed to.

The preamble was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. HATFIELD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SURFACE TRANSPORTATION ACT OF 1982

The Senate continued with the consideration of the bill.

UP AMENDMENT NO. 1446

(Subsequently numbered amendment No. 5008.)

The PRESIDING OFFICER. Under the previous order, the Senator from Ohio is recognized.

Mr. BAKER. Mr. President, will the Senator from Ohio yield to me on condition that he not lose his right to the floor, that the interruption not count as a second speech under the appropriate rule and that he be rerecognized after I put a question to him and perhaps a unanimous-consent request.

Mr. METZENBAUM. I yield.

Mr. BAKER. Mr. President, I make that unanimous-consent request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Senator.

Mr. President, the Metzenbaum amendment is now pending. It is now 1:22 a.m. in the morning.

Could I inquire of the Senator from Ohio, first, how long he would anticipate debating this measure and particularly whether or not he thinks we could complete action on it this evening.

Mr. METZENBAUM. Hopefully we could dispose of the amendment rather briefly. It is a buy-American amendment. I think we could probably dispose of it in not more than a half-hour, maybe even 20 minutes.

Mr. BAKER. I thank the Senator.

Mr. President, on this side I know there are Senators who have a particular interest in this measure. Could I inquire of any Member as to his intentions to debate this matter and how long that might take?

Mr. CHAFEE. Mr. President, this is a very important subject, and I think it needs considerable discussion. I do not believe we could conclude it in anywhere near the time the Senator is thinking about, if I think I know what he is thinking.

Mr. LEAHY. Whatever he is thinking.

Mr. CHAFEE. Whatever he is thinking about takes longer than that.

Mr. BAKER. Whatever I am thinking about.

[Laughter.]

Mr. BAKER. Mr. President, I am beginning to get the impression that folks want to go home, and I also have the impression, I must say to my friend from Ohio, it is not likely that we can get a disposition of this measure tonight.

Could I inquire, then, under those circumstances, since almost surely we will not get a vote on or in relation to this amendment this early this morning, whether or not he wishes to proceed with the debate or whether perhaps he would like to be recognized first after we resume consideration of this bill later today.

Mr. METZENBAUM. Mr. President, after seeing the looks on my colleagues I think it might be advisable if we came back later in the morning with the understanding that the Senator from Ohio would be the first recognized to proceed.

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate next resumes consideration of this bill the Senator from Ohio be first recognized for the purpose of continuing debate on the pending question and that the interruption not appear as a second speech for the purposes of the rules of the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, I do not contest the pressing need to rehabilitate, repair, and complete our Nation's transportation system. I cannot, however, accept the package currently before the Senate as the best means of meeting that need.

First, many States, including Texas, already have gas tax increases under consideration for next year to meet their highway maintenance needs. Seventy-five percent of the Nation's 4 million miles of roads are the responsibility of State and local government and do not come under the authority of the Federal highway program. A proposal to raise the State gasoline tax by 5 cents a gallon is expected to be introduced in the Texas Legislature next month. It is estimated that Texas needs to spend between $1 billion and $2 billion more each year on highway improvements and maintenance. When States raise their own gasoline tax, they can use the money from that increase to meet their most urgent priorities, determined at the local level without the multitude of Federal rules and regulations. An increase of 5 cents a gallon in the Federal tax will undermine the States own capacities to raise

tax revenues needed for their road systems and infrastructure repair.

Mr. President, I also oppose this measure because it does not meet the needs of the Texas highway system for repair and rehabilitation, while it requires major industries in my State such as agriculture, trucking, and retail business to suffer real threats to their future productivity and profitability.

This bill would impact adversely in a significant way on the agricultural economy, not only in my State but in those of many of my colleagues. Even with the exemptions provided for agriculture under the bill, the cost of transportation for getting commodities to market would result in increased production costs to farmers and ranchers at a time when farm income is already depressed. It will increase the final price of agricultural products in domestic and foreign markets, thus lessening the competitiveness of this vital sector of our economy.

Small business and retailers will also be hurt by this new tax. In 1981, Texas retailers had sales of nearly $80 billion, more than New York and second only to California. This 125-percent increase in the gas tax will reduce the amount of money consumers can spend on retailers' goods and services. Indeed, given the fact that service industries are labor intensive and that highway construction is more capital intensive, this allocation of consumer resources could result in less jobs, not more.

Since the inception of the Federal highway trust fund in 1956, Texas has received back only 76 cents for each $1 contributed by State motorists. While contributing $8.5 billion to the fund during those 26 years, Texas has recieved allocation of $6.5 billion—a shortfall of $2 billion. In fact. Texas was last in the Nation in 1981 in the ratio of payments to allocation. Whereas the guarantee of 85 percent in the bill would be an improvement for my State, I note that this provision results from an increase in authorization levels in the bill rather than an adjustment in the allocation formula for the 50 States.

Mr. President, contrast this unfair return with these undisputed facts: First, Texas was first in total Federal primary highway mileage; second, Texas was first in total Federal rural and urban highway mileage; and third, Texas was first among the States in 1981 in average daily traffic volume on interstate highways.

Texas needs a fair share to maintain and build new roads. According to the Texas Good Roads and Transportation Association, Texas should spend about $2.5 billion a year to build and maintain the State's roads. Texas contains 3 of the 10 largest population centers in the Nation, all of which are experiencing phenomenal growth, and the State population is estimated to increase from 14 million to 21 million by the year 2000, resulting in at least a 55-percent increase in traffic. The Texas Good Roads and Transportation Association conservatively estimates that the State will require $51 billion over the next 20 years to keep Texas' system up to standard and to meet growth demands. Yet in the face of these needs, Texas motorists have been giving back nearly 25 cents on each energy $1 they paid in gas taxes.

Along with the administrative costs of a Federal program directed out of Washington comes the cumbersome baggage of regulations and guidelines not necessarily attuned to local needs. Most onerous of these is the Davis-Bacon Act, which inflates the cost of Federal projects by mandating artificially high labor costs. Current Federal highway law requires application of Davis-Bacon rates only to initial construction. This bill before the Senate, as well as the House-passed version, extends the application of Davis-Bacon to reconstruction, rehabilitation, resurfacing, and restoration (4R) projects. By their very nature, 4R projects lack the initial construction element. Davis-Bacon increases the cost of all Government contracts, including this highway proposal. Indeed, if the Davis-Bacon Act was repealed, the Federal Government would save $1 billion annually, or about 20 percent of the amount of extra Government revenues that this tax increase bill would raise.

Mr. President, I also cannot agree with imposing yet another tax on the overburdened American taxpayer at this time. Our domestic entitlement programs remain out of control and have increased from 30 percent to 50 percent of all Federal spending in the last 20 years. We are living beyond our means domestically, and our Nation's industrial base and productivity are being eroded by a Government that claims an ever-increasing share of our Nation's gross national product. In short, I support modernization of our transportation system. But rather than impose another tax increase to pay for it, I believe we should further analyze and reorder our domestic spending priorities and choose those programs to be funded that we can afford as a nation.

Mr. President, I have recounted the specific reasons that I cannot lend my support to this legislation. I recognize both the tremendous need for highway rehabilitation and the impetus that this would offer for the construction industry, but this bill, which would seriously hamper other major industries while giving a short return on the dollar investment, is not the answer.

Mr. BAKER. Mr. President, there will be no more RECORD votes at this time in the morning.

AGRICULTURAL ACT OF 1982—S. 3074

Mr. COCHRAN. Mr. President, yesterday the Committee on Agriculture, Nutrition, and Forestry approved S. 3074, the Agricultural Act of 1982.

In view of the time considerations attendant with this legislation, the committee is not filing a written report.

However, on behalf of the committee I am making available to the Senate a statement explaining the legislation, including a section-by-section analysis, and a copy of the bill as reported.

I ask that these materials be printed immediately following my remarks.

The materials follow:

EXPLANATION OF S. 3074, AS REPORTED

SUMMARY OF MAJOR PROVISIONS

S. 3074 as amended provides the following:

1. Authorizes a payment-in-kind ("PIK") land diversion and conservation program for 1983 and 1984 crops of wheat, feed grains, upland cotton, rice, and other nonconserving crops (excluding sugar cane, sugar beets, tobacco, and peanuts). Under the "PIK" program—

payments would not be subject to current law restrictions on the resale of CCC stocks or payment limitations;

producers would be required to divert acreage from production to conservation uses and to comply with other terms specified by the Secretary;

payments would be made by CCC by delivery to producers of commodities or warehouse receipts, in cash, or by other methods determined by the Secretary;

the value of commodities received by producers could not be less than 75 percent of the basic county loan rate for the commodity involved;

commodities received by producers could not be put under the annual commodity programs;

not more than 50 percent of the eligible acreage for a crop in a county can be diverted, in one year;

all producers of a crop for which a PIK is authorized for 1983 will have the opportunity to participate on an equal basis in the program;

adjustments in program yields are authorized for producers who practice double-cropping;

consolidation of farm acreage bases is allowed;

normal marketings are protected; and

protection is provided for tenants and sharecroppers.

2. Provides that commodities may be tendered at no cost to exporters, users, and foreign nations to encourage foreign market development for U.S. commodities. Under the export "PIK" program—

domestic users are provided equal treatment relative to foreign purchasers and users in cases where domestic users may be disadvantaged as a result of the program;

CCC will use qualified stocks to encourage increased use and avoid displacing usual marketings of the United States; and

CCC will tale reasonable precautions to prevent resale or transshipment of commodities.

3. Expands current authority (to donate stocks of dairy products to needy persons in foreign countries) to include donations of other CCC agricultural commodities and products thereof, and authorizes the use of CCC commodities under titles I and III of P.L. 480, in addition to programmed levels.

4. The Secretary is encouraged to make available eligible products from CCC stocks directly to processors who contract with school lunch authorities.

5. Allows the CCC to sell extra long staple cotton to maintain and expand export and domestic markets for such cotton.

6. Encourages the Secretary of Agriculture to donate or sell abroad at least 50,000 metric tons of CCC dairy products in each of fiscal years 1983-85.

BACKGROUND AND NEED

In recent years, large supplies and weak demand have resulted in low prices for farm commodities. These same low prices have also resulted in large outlays for commodity price support programs. The result has been the build-up of excessive stocks both by the Commodity Credit Corporation and in the farmer-owned reserve.

There are a number of reasons why crop surpluses are so large, the principal of which is increased production. Over the past decade, many factors have propelled production upward. Among them, easy credit, heavy capital investment, rising prices and price supports, increased farm exports, acreage expansion, yield-boosting technology, and excellent weather in 1981 and 1982 in the United States and other key areas of the world.

On the other side of the supply-demand equation, weak demand is a global problem. It results from widespread recessions, the rising value of the dollar, and instability in Eastern Europe, Mexico and other traditional export markets. Furthermore, embargo related losses, East-West political tensions, and unfair trade practices have hurt export potential for farmers.

All of this has placed a tremendous stress on our farm economy. In addition to weak world demand, reduced exports, soaring stocks, and depressed farm prices, farmers have also had 3 years of poor farm income, a drop in farmland prices, costly credit, and solvency problems.

Government outlays for farm programs are skyrocketing. Outlays have tripled in 1 year from approximately $4 billion dollars in 1981 to an estimated $12 billion dollars in 1982. Without a change in farm program policy, outlays for Fiscal Year 1983 could climb higher, and reserve stocks and farm program costs could increase markedly.

On November 17, 1982, Secretary of Agriculture John Block met with members of the Senate Committee on Agriculture, Nutrition, and Forestry to discuss the outlook for the farm economy. At this meeting, the Secretary discussed the possibility of instituting a payment-in-kind (PIK) program for the 1983 crop year.

As proposed by the Secretary, a PIK program would operate as a paid diversion program, with farmers given grain from surplus stocks in return for their agreement to reduce production by specified amounts. The PIK program would be operated in addition to already announced price support programs for the 1983 crops of wheat, feed grains, upland cotton, and rice.

The immediate effect of such a program would be to reduce existing stocks of surplus commodities, and to reduce future outlays by the Commodity Credit Corporation. USDA estimates savings from a 2 year PIK program at $3 billion dollars over 3 years.

After a period of discussion and opportunity for questions, Secretary Block indicated that he believed that such a program could largely, if not totally, be carried out under existing authorities, but that legislative assistance would be helpful and clarify matters in several areas.

On December 3, 1982, Senators Cochran and Huddleston introduced S. 3074, "The Agricultural Act of 1982". This bill included expanded authority for the operation of a domestic PIK program, as well as authority for an export PIK program, and donation measures.

A hearing on S. 3074 was held by the Subcommittee on Agricultural Production, Marketing, and Stabilization of Prices on December 9, 1982. Testimony was received from farmers, farm organizations, and others. Secretary Block testified and answered questions on the Administration's approach to a PIK program.

Also on December 9, President Reagan announced his support for the operation of a PIK program for the 1983 crop year.

Subcommittee markup on S. 3074 was held on December 13, 1982. The subcommittee favorably reported S. 3074, with amendments, to the full committee.

On December 13, 1982, the full Committee on Agriculture, Nutrition, and Forestry met to consider S. 3074, as reported from subcommittee. Eight amendments were accepted, and the Committee in the presence of a quorum unanimously agreed to report S. 3074, as amended.

GENERAL EXPLANATION

Special payment-in-kind (PIK) land conservation program

The bill, as amended, would provide that the Secretary of Agriculture may carry out a special payment-in-kind (PIK) land conservation program for the 1983 and 1984 crops. Under the program, producers who divert acreage from production and carry out soil and water conservation practices on that acreage would receive payments in kind. Eligible producers would be those who produce wheat, feed grains, upland cotton, rice, or other nonconserving commodities designated by the Secretary (not to include peanuts, tobacco, sugar beets, or sugarcane).

Under the program, producers would receive an amount of commodities equal to the number of acres diverted from production multiplied by a percentage of the normal yield as established by the Secretary. For example, a corn farmer may have a typical crop yield of 100 bushels per acre. If the Secretary were to provide 75 percent of normal yield for PIK participants, the farmer would receive 75 bushels per acre for each acre diverted under this program.

In order to encourage participation, the Secretary would be authorized to adjust the percent of yield offered to producers to participate in the program in order to compensate for reduced yields resulting from double cropping.

The Secretary may also take bids from producers for land to be diverted, but for the 1983 crops, before using a bid procedure the Secretary must offer all producers a specified percentage of yield for participating in the program and allow producers to sign up for it.

Payments under this program shall be made by the delivery of actual commodities, the transfer of warehouse receipts, or by some other method determined by the Secretary, which could include cash payments.

In no case could the value of commodities received by the producer fall below 75 percent of the basic county loan rate during the marketing year in which the commodities are received by a producer. The Commodity Credit Corporation would be authorized to make cash payments if necessary to assure that the producer receives this amount. Commodities must be made available in such a way as to minimize any adverse effect on normal marketings, and PIK commodities may not again be placed under Government loan.

In order to protect farm suppliers and other businesses in any local area, the total acreage diverted from production for a particular commodity in any county may not exceed 50 percent of the total acreage base for the commodity in that county in any year. The Secretary is required to provide adequate safeguards to protect the interests of tenant farmers and sharecroppers.

The Secretary is also authorized to allow producers to consolidate their acreage bases among farms under the PIK program.

Under the payment-in-kind concept, a farmer could receive government-owned commodities in return for reducing production of surplus crops. The intent is to provide farmers assistance, to utilize our market-depressing surpluses, and to reduce farm program costs.

American farmers have produced record crops of major grains for 2 years in a row. Record production in addition to high inventories is causing low farm prices.

The PIK program will help remedy both factors. Inventories will be reduced as CCC commodities are distributed in the form of in-kind payments to producers for participating in farm programs. New production will also be reduced because a farmer must remove a percentage of his acreage base from production in order to qualify for program benefits. An effective PIK program will reduce surplus stocks and strengthen farm prices.

In the interest of promoting orderly marketing, the Committee supports program provisions discussed during the markup session that (1) would extend to participating producers payment by the Commodity Credit Corporation for storage costs to commence with the issuance of PIK certificates to the point of sale or through the end of the marketing year whichever comes first and (2) would cause PIK certificates to be issued on a staggered schedule based on normal harvest times in individual States. Of course, payment for storage under PIK would apply only when the producer is incurring the cost of storing the grain.

EXPANSION OF UNITED STATES AGRICULTURAL MARKETS

The first section of title II of the bill authorizes the Secretary of Agriculture to tender, at zero cost, commodities acquired by the Commodity Credit Corporation through its price support operations to United States exporters and users, and foreign purchasers, to encourage development, maintenance, and expansion of markets for U.S. agricultural commodities and their products.

The intent of this program is to increase the volume of agricultural commodities and products thereof and products produced using the commodities moving into foreign markets to reduce the amounts of these commodities in government stocks and to develop, maintain, and expend foreign mar-

kets. The Commodity Credit Corporation could provide commodities held by the CCC to U.S. exporters, users, or foreign purchasers as an incentive to foreign customers to purchase additional U.S. commodities above the level of normal marketings. For example, if a foreign purchaser that normally purchases a given quantity of a specific commodity agrees to purchase additional quantities, then an amount equal to some portion of the addition purchases could be provided at no cost to the foreign importer. In additional, it is contemplated that the Secretary could provide commodities or products even though purchases are less than normal marketings in cases where such bonuses would contribute to maintaining or expanding U.S. markets.

Such bonus agricultural commodities could serve to reduce the overall cost of U.S. commodities to foreign purchasers and thereby the competitiveness of United States products. Commodities provided under the program could offset the use of export subsidies by competing exporting nations.

The bill requires that equal treatment be provided to domestic purchasers and users of U.S. agricultural commodities on the same basis as foreign purchasers and users that receive U.S. commodities and products where the importation of a manufactured product made, in whole or in part, from a commodities made available for export under this provision would place domestic users of the commodity at a competitive disadvantage. In such a case in order to assure that domestic purchasers or users are not disadvantaged by the importation of a foreign manufactured product made, in whole or in part, from a commodity made available for export under the program, domestic purchasers or users would be eligible for receipt of a like amount of commodities or products.

In providing this authority the Committee does not want to worsen the problem now faced by the cotton industry resulting from foreign manufactured cotton products coming into the United States and competing unfairly with domestic products. Accordingly, the bill provides that the program shall be carried out in a manner that gives equal treatment to domestic users of U.S. agricultural commodities. In the case of cotton, this would be the processor, manufacturer, or other user who opens the bale of raw cotton. Any action taken by the Secretary under this provision, with respect to exports of cotton, is to be accompanied by comparable action for domestic users.

The bill, as amended, also provides that commodities or products shall be provided in such a manner so as to encourage increased utilization and avoid displacing normal sales. Commodities are not to take the place of domestic or foreign commercial sales or be reexported.

Expanded Authority for Use Abroad of Commodity Credit Corporation Stocks

Section 416 of the Agricultural Act of 1949 provides the Secretary of Agriculture the authority to donate surplus dairy products to needy persons in foreign countries. The bill, as amended, extends the authority for food donations under section 416 of the Agricultural Act of 1949 to other agricultural commodities and products acquired by the Commodity Credit Corporation. The commodities or products would be donated through foreign governments and public and private nonprofit humanitarian organizations for the assistance of needy persons outside the United States.

In order to facilitate movement of these donated commodities to needy individuals, the CCC may pay reprocessing, packaging, transporting, handling, and other charges, including ocean freight for overseas delivery, associated with the donated commodities or products.

Because the United States Government conducts food donation programs under other legislative authority, the provision requires the Secretary of Agriculture to ensure that donations under this authority complement, and are coordinated with, other United States foreign assistance programs, such as the Agricultural Trade Development and Assistance Act of 1954 (P.L. 480).

This provision would also permit increased exports of CCC surplus commodities under titles I and III of the Agricultural Trade Development and Assistance Act of 1954, and such exports would be in addition to the level of assistance programmed under that Act.

Distribution of surplus commodities

The bill as amended provides additional authority to the Secretary of Agriculture for the disposition and use of CCC-owned agricultural commodities.

Current law provides that surplus commodities owned by CCC may be distributed through certain food and nutrition programs. The bill provides that the Secretary shall encourage use of the commodities by contracting with private companies to have commodities processed into finished food products. The end products would then be used by eligible recipients, who would pay the cost of processing.

The intent is to increase consumption of surplus commodities by providing schools and other eligible recipients the opportunity to have bulk commodities from the Department of Agriculture processed into desired end food products at their own expense. For example, donated cheese might be processed into tacos, pizza, or other items.

The provision places no obligation on individual schools or States. Such processing, however, would provide schools with additional options for using free, bonus USDA commodities.

CCC sales of extra long staple cotton

The bill, as amended, allows the Commodity Credit Corporation to sell its stocks of extra long staple (ELS) cotton at such price levels as the Secretary determines appropriate to maintain and expand export and domestic markets for such cotton. Currently, the minimum price at which ELS cotton can be sold for unrestricted use is 115 percent of the loan rate as provided under the Agricultural Act of 1949. Removal of this restriction on the sale of extra long staple cotton will provide the Secretary with greater flexibility to effect the reduction of surplus stocks while at the same time allowing extra long staple cotton to be more competitive in both domestic and export markets.

Disposition of dairy products

The United States is currently storing large quantities of dairy products purchased under the dairy price support program. With the likelihood that sizeable quantities of the stored dairy products will not be resold in the domestic market because of restrictions in law prohibiting resale below certain price levels, it behooves the United States to export as much of its dairy surplus as possible in order to reduce Government outlays and recover expenditures made by the Commodity Credit Corporation in purchasing dairy products. Other nations export large quantities of dairy products into the world market either with the aid of subsidies or by donations.

Under the bill, the Secretary is encouraged to donate, or to export at the best price possible, at least 50,000 metric tons of dairy products during each of the fiscal years 1983 through 1985. In addition, the Secretary is required to report semiannually to Congress on the status of such donations and sales.

The Committee encourages the Secretary to take aggressive action in the area of U.S. dairy product exports.

Presidential report on the status of negotiating a new long-term grain sales agreement with the Soviet Union

The bill requires the President to report to Congress by December 31, 1982, on the reasons for maintaining the measures announced on December 29, 1981, postponing entering into negotiations on a new long-term grains agreement with the Soviet Union.

After the imposition of martial law by the military government in Poland on December 13, 1981, the United States took a number of trade-related actions to demonstrate its displeasure.

On December 29, 1981, the Reagan Administration announced specific measures to convey its disappointment with the involvement of the Soviet Union in the imposition of martial law in Poland. Included among the measures taken by President Reagan at that time was the announcement that the United States would postpone negotiations on a new long-term grains agreement with the Soviet Union. This position has remained in effect, and the Committee provision would elicit the reasons for the continuation of that position.

SECTION-BY-SECTION ANALYSIS

TITLE I—SPECIAL PAYMENT-IN-KIND LAND CONSERVATION PROGRAM

Special payment-in-kind land conservation program

Section 101 adds a new section 501, effective for the 1983 and 1984 crops, to the Agricultural Act of 1949.

New section 501(a) provides that, notwithstanding any other provisions of the Agricultural Act of 1949, for the 1983 and 1984 crops of wheat, feed grains, upland cotton, rice, and other nonconserving commodities designated by the Secretary (excluding sugarcane, sugar beets, tobacco, and peanuts), the Secretary may formulate and carry out a special payment-in-kind land conservation program to encourage producers to reduce production of agricultural commodities and promote conservation. Under the program, producers who divert farm acreage from the production of agricultural commodities and devote the diverted acreage to conservation uses, subject to any terms and conditions determined appropriate by the Secretary, would receive in-kind payments from the Secretary. This section also clarifies that payments made under the program for the diversion of wheat, feed grain, upland cotton, and rice acreage would not be subject to the restrictions on the resale of CCC stocks when a farmer-owned reserve program is in effect or to any other provisions of law that are applicable to any of the annual programs for the 1983 and 1984 crops of these commodities.

New section 501(b) provides that, in order to be eligible for a payment under this section, a producer who participates in the pro-

gram for any crop must divert from production to conservation uses, in a manner consistent with requirements established by the Secretary, the acreage of cropland on the farm that the producer agrees to place in the program for that crop and must comply with other terms and conditions specified by the Secretary.

New section 501(c) directs the Secretary to limit the total acreage diverted from production for a particular crop under the program in any county so as to minimize any adverse effect of the program on the economy of the county or any local community located therein. In determining the total acreage to be diverted, however, the Secretary is further directed to ensure that not more than 50 percent of the acreage of any commodity in a county eligible for diversion under the acreage reduction provisions of the Agricultural Act of 1949, including the program authorized in this section, is diverted from production in any year.

New section 501(d)(1) requires that in-kind payments shall be made for acreage on a farm diverted from production for a particular crop and devoted to conservation uses under the program. The payment would be offered to producers in an amount of the commodity involved equal to the number of acres so diverted from production times a percentage of the program yield for the farm for the commodity involved as the Secretary determines is appropriate to ensure adequate participation in the program for the particular crop.

New section 501(d)(2) provides that as an alternative to the procedure in paragraph (1), in order to encourage adequate participation under the program the Secretary is authorized to determine the amounts of a commodity payable to producers under the program through the submission of bids by producers or by any other process that the Secretary determines appropriate. For the 1983 crops, however, the Secretary must offer all eligible producers of a particular crop the opportunity to participate in the program on an equal basis before any bidding procedure can be used to determine producer participation for a commodity.

New section 501(d)(3) requires the Secretary to make equitable adjustments, to the extent the Secretary finds appropriate, in payments under this section in cases where a producer practices double cropping, and where participation in this program for one commodity reduces the acreage that may be planted to the second commodity. The purpose of the adjustments under this subection would be to account for the reduction in the second commodity.

New section 501(d)(4) provides that where practicable, the Secretary may allow the consolidation of base acreages among farms for a commodity involved in the program to encourage participation in the program. This provision would, for example, permit a producer with two farms having the same amount of corn base acreage on each farm to make the required diversion under the program on a single farm.

New section 501(e) provides for the method of payment to be used by the Commodity Credit Corporation under this program. Payment would be made (1) by the Commodity Credit Corporation by the delivery of the commodity involved to the producer at a warehouse or other similar facility located in the county in which the farm is located or such other location as agreed to by the Secretary and the producer; (2) by the transfer of negotiable warehouse receipts; or (3) by such other method determined to be appropriate by the Secretary, including sale of the commodity in commercial markets, in order to enable the producer to efficiently and expeditiously receive possession of the commodity or a cash payment, as determined by the Secretary, in lieu thereof. The Secretary is directed to take appropriate steps, as necessary including the making of cash payments, to ensure that the value of the commodity received by a producer under the program, during the marketing year in which the commodity is received, is not less than 75 percent of the basic county loan rate for the particular commodity.

This subsection also requires the Secretary, to the extent feasible, to ensure that payments are made to producers participating in this program on a schedule and under such terms and conditions as the Secretary determines will minimize any adverse effects of the program on the normal marketings of the commodity involved and will not cause the market prices for the commodity to fall below levels that the Secretary determines to be fair and equitable.

This subsection further provides that commodities received by producers under the program may not be placed under loan or purchased under the annual commodity programs under the Agricultural Act of 1949. This same restriction also applies in the case of negotiable warehouse receipts or other evidences of ownership of the commodity received by producers under the program.

New section 501(f) provides that the requirements established by the Secretary, with respect to acreage to be devoted by a producer to conservation uses, shall ensure protection of such acreage from weeds and wind and water erosion. The Secretary may permit, under terms and conditions prescribed by the Secretary, all or any part of the conservation acreage to be devoted to sweet sorghum, hay and grazing, or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

New section 501(g) provides that a farm operator desiring to participate in this program for a crop shall execute an agreement with the Secretary providing for participation not later than a specific date as prescribed by the Secretary. The agreement may be terminated or modified by mutual agreement by the Secretary and the producers on the farm, if the Secretary determines that such action is necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

New section 501(h) provides that the Secretary is authorized to make payments available to producers, who have failed to comply fully with the terms and conditions of the program, in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

New section 501(i) provides that the Secretary is authorized to issue regulations to carry out the provisions of this section.

New section 501(j) provides that the Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

New section 501(k) requires the Secretary to provide adequate safeguards under the program authorized by this section to protect the interests of tenants and sharecroppers, including provision for sharing payments on a fair and equitable basis.

New section 501(l) provides that the provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignments of payments) are to apply to payments under this section.

New section 501(m) provides that the authority and program authorized under this section are in addition to, and not in place of, any authority granted to the Secretary or the Commodity Credit Corporation, under any other provisions of law.

TITLE II—EXPANSION OF MARKETS FOR, AND THE DISPOSITION OF, UNITED STATES AGRICULTURAL COMMODITIES

Expansion of United States agricultural markets

Section 201 adds a new section 1209A to the Agriculture and Food Act of 1981.

New section 1209 (a) authorizes the Secretary of Agriculture, notwithstanding any other provision of law, to formulate and carry out an export expansion program under which commodities acquired by the Commodity Credit Corporation through price support operations may be tendered at no cost to United States exporters, United States users, and foreign purchasers to encourage development, maintenance, and expansion of markets for United States agricultural commodities and the products thereof.

New section 1209(b) provides that in carrying out the program authorized by this section, the Secretary is to—

(1) take such action as may be necessary to ensure that the program provides equal treatment to domestic and foreign purchasers and users of United States agricultural commodities in any case where the importation of a manufactured product made, in whole or in part, from a commodity made available for export under this section would place domestic users of the commodity at a competitive disadvantage;

(2) ensure insofar as possible that any use of Commodity Credit Corporation stocks for the purposes of the program authorized in section 1209A(a) be made in such manner as to encourage increased use and avoid displacing usual marketing of the United States; and

(3) take reasonable precautions to prevent the resale or transshipment to other nations, or use for other than domestic use in the nation to which stocks of the Commodity Credit Corporation are shipped, of the stocks of the Corporation made available to export participants in the program.

New section 1209A(c) requires the Secretary of Agriculture to carry out the program authorized by this section through the Commodity Credit Corporation.

New section 1209A(d) authorizes the Secretary of Agriculture to issue such regulations as the Secretary deems necessary to carry out this section.

New section 1209A(e) provides that the authority provided in section 1209A(a) shall be in addition to, and not in place of, any authority granted to the Secretary of Agriculture or the Commodity Credit Corporation under any other provision of law.

Expanded authority for the use abroad of Commodity Credit Corporation stocks

Section 202 amends section 416 of the Agricultural Act of 1949 to expand the authority of the Commodity Credit Corporation to use agricultural commodities acquired by

the Corporation in foreign donation programs. Section 416 currently authorizes the donation of dairy products through foreign governments and public and non profit private humanitarian organizations for the assistance of needy persons outside the United States and the payment by the Commodity Credit Corporation of reprocessing, packaging, transporting, handling, and other charges, including the cost of overseas delivery, with respect to commodities so donated. Section 202 of the bill would expand this authority to include other agricultural commodities and products thereof.

Section 202 also amends section 416 to provide that agricultural commodities acquired by the Commodity Credit Corporation may also be used to increase the level of agricultural exports under titles I and III of the Agricultural Trade Development and Assistance Act of 1954 consistent with the purposes of that Act, and shall be in addition to the level of assistance programmed under that Act.

Improved distribution of surplus agricultural commodities

Section 203 amends section 1114(a) of the Agriculture and Food Act of 1981. Section 1114(a) provides that whenever Government stocks of commodities are acquired under the price support programs and are not likely to be sold by the Commodity Credit Corporation or otherwise used in programs of commodity sale or distribution, such commodities shall be made available without charge or credit to nutrition projects under the authority of the Older American Act of 1965, to child nutrition programs providing food service, and to food banks participating in the special nutrition projects established under section 211 of the Agricultural Act of 1980. Section 203 of the bill provides that whenever a commodity is made available without charge or credit under this authority, the Secretary of Agriculture shall encourage consumption thereof through agreements with private companies under which the commodity is processed into end products for use by eligible recipients, with the expense of the processing to be borne by the recipients.

Commodity Credit Corporation sales of extra long staple cotton

Section 204 amends section 407 of the Agricultural Act of 1949 to provide that notwithstanding any other provision of section 407, effective beginning 30 days after enactment of this provision, stocks of extra long staple cotton held by the Commodity Credit Corporation may be sold for unrestricted use at such price levels as the Secretary determines appropriate to maintain and expand export and domestic markets for such cotton. Generally, under the current provisions of section 407 of the Agricultural Act of 1949, the Commodity Credit Corporation may not sell any extra long staple cotton for unrestricted use at less than 15 percent above the current support price for cotton plus reasonable carrying charges. The provision in the bill would allow the Corporation to sell its stocks of extra long staple cotton at prices less than this level.

Disposition of dairy products

Section 205 encourages the Secretary of Agriculture to donate abroad, or to sell for export at the best price obtainable, at least 50,000 metric tons of dairy products owned by the Commodity Credit Corporation, during each of the fiscal years 1983 through 1985. Section 205 also requires the Secretary to report to Congress semiannually on the status of such donations and sales.

Presidential report on status of negotiating a new long-term grain sales agreement with the Soviet Union

Section 206 requires the President to report to Congress by December 31, 1982, on his reasons for maintaining the measures announced on December 29, 1981, postponing negotiations with the government of the Soviet Union on the terms and conditions of a new long-term grain sales agreement.

S. 3074

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Agricultural Act of 1982".

TITLE I—SPECIAL PAYMENT-IN-KIND LAND CONSERVATION PROGRAM

SEC. 101. Effective for the 1983 and 1984 crops, the Agricultural Act of 1949 is amended by adding at the end thereof a new title V as follows:

"TITLE V—SPECIAL PAYMENT-IN-KIND LAND CONSERVATION PROGRAM

"SEC. 501. Notwithstanding any other provision of this Act—

"(a) To encourage producers to reduce excessive production of agricultural commodities and promote soil and water conservation, the Secretary may formulate and carry out a special payment-in-kind land conservation program for the 1983 and 1984 crops. Under the program, the Secretary shall make special payments in kind available to producers who divert farm acreage from the production of agricultural commodities and devote such acreage to conservation uses, subject to such terms and conditions as the Secretary determines appropriate. Payments under this section may be made available for the diversion of (1) wheat, feed grain, upland cotton, and rice acreage, without regard to section 110 of the Agricultural Act of 1949 and any other provisions of law that are applicable to any of the annual programs for the 1983 and 1984 crops of such commodities, and (2) farm acreage devoted to other nonconserving commodities designated by the Secretary (excluding sugarcane, sugar beets, tobacco, and peanuts) for inclusion in the program.

"(b) To be eligible for a payment in kind, a producer who participates in the program for any crop—

"(1) must divert from production and devote to conservation uses, in accordance with requirements established by the Secretary, the acreage of cropland on the farm the producer agrees to place in the program for that crop; and

"(2) must comply with other terms and conditions specified by the Secretary.

"(c) The Secretary shall limit the total acreage diverted from production for a particular crop under the program in any county so as to minimize any adverse affect of the program on the economy of the county or any local community therein. In this connection, the Secretary shall ensure that not more than 50 per centum of the acreage of any commodity eligible for diversion under this Act in any county is diverted from production in such county in any year.

"(d)(1) Payment shall be in kind for acreage on a farm diverted from production for a particular crop and devoted to conservation uses under the program in an amount of the commodity involved equal to the number of acres so diverted from production multiplied by a percentage of the program yield for the farm for the commodity involved, as established by the Secretary, that the Secretary determines appropriate to ensure adequate participation in the program for the crop involved.

"(2) Notwithstanding the provisions of paragraph (1) of this subsection, the Secretary may, to encourage adequate participation under the program, determine the amounts of a commodity payable to producers in accordance with agreements under the program through the submission of bids by producers in such manner as the Secretary may prescribe or such other means as the Secretary determines appropriate, except that, for the 1983 crops, prior to entering into any bidding procedure for a commodity, the Secretary shall offer all eligible producers of a particular crop the opportunity to participate in the program on an equal basis.

"(3) In cases where a producer practices double cropping, and where participation in this program for one commodity reduces the acreage that may be planted to the second commodity, the Secretary shall, to the extent the Secretary determines appropriate, make equitable adjustments in the payment made under this section to account for the reduction in the second commodity.

"(4) Where practicable, the Secretary may allow the consolidation of base acreages among farms to encourage participation in the program.

"(e) Payments shall be made by delivery by the Commodity Credit Corporation of the commodity involved to the producer at a warehouse or other similar facility located in the county in which the farm is located or such other location as agreed to by the Secretary and the producer, by the transfer of negotiable warehouse receipts, or by such other method determined by the Secretary as appropriate, including sale of the commodity in commercial markets, to enable the producer efficiently and expeditiously to receive possession of the commodity or, in lieu thereof, a cash payment, as determined by the Secretary. The Secretary shall take such steps as may be necessary, including the making of cash payments, to ensure that the value of the commodity received by a producer under the program, during the marketing year in which the commodity is received, is not less than 75 percent of the basic county loan rate for the particular commodity. The Secretary shall, to the extent feasible, ensure that payments are made to producers participating in any program under this section on such schedule and under such terms and conditions as the Secretary determines will minimize any adverse effects of the program on the normal marketings of the commodity (to which the producer is entitled as payment) and will not cause the market prices for such commodity to fall below levels that the Secretary determines to be fair and equitable. Commodities received by producers under the program may not be placed under loan or purchased under the annual commodity programs under this Act, nor may negotiable warehouse receipts or other evidences of ownership of the commodity received by producers under the program be used in such annual commodity programs.

"(f) The requirements established by the Secretary under clause (1) of subsection (b) of this section, with respect to acreage to be devoted to conservation uses, shall ensure protection of such acreage from weeds and wind and water erosion. The Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of such acreage to be devoted to sweet sorghum, hay and grazing, or the produc-

tion of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not affect farm income adversely.

"(g) An operator of a farm desiring to participate in the program for a crop under this section shall execute an agreement with the Secretary providing for such participation not later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producers on the farm, terminate or modify any such agreement if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(h) If a producer fails to comply fully with the terms and conditions of the program authorized by this section, the Secretary may, nevertheless, make payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(i) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(j) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(k) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers, including provision for the sharing, on a fair and equitable basis, of payments made under this section.

"(l) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignments of payments) shall be applicable to payments made under this section.

"(m) The authority and program under this section shall be in addition to, and not in place of, any authority granted to the Secretary or the Commodity Credit Corporation, or any program, established under any other provisions of law.".

TITLE II—EXPANSION OF MARKETS FOR, AND THE DISPOSITION OF, UNITED STATES AGRICULTURAL COMMODITIES

EXPANSION OF UNITED STATES AGRICULTURAL MARKETS

SEC. 201. The Agriculture and Food Act of 1981 is amended by inserting after section 1209 a new section as follows:

"EXPANSION OF UNITED STATES AGRICULTURAL MARKETS THROUGH THE USE OF COMMODITIES ACQUIRED BY THE COMMODITY CREDIT CORPORATION

SEC. 1209A. (a) Notwithstanding any other provision of law, the Secretary of Agriculture may formulate and carry out an export expansion program under which commodities acquired by the Commodity Credit Corporation through price support operations are tendered at no cost to United States exporters, United States users, and foreign purchasers to encourage development, maintenance, and expansion of markets for United States agricultural commodities and the products thereof.

"(b) In carrying out the program authorized by this section, the Secretary shall—

"(1) take such action as may be necessary to ensure that the program provides equal treatment to domestic and foreign purchasers and users of United States agricultural commodities in any case where the importation of a manufactured product made, in whole or in part, from a commodity made available for export under this section would place domestic users of the commodity at a competitive disadvantage;

"(2) ensure insofar as possible that any use of Commodity Credit Corporation stocks for the purposes of the program authorized under this section be made in such manner as to encourage increased use and avoid displacing usual marketings of the United States; and

"(3) take reasonable precautions to prevent the resale or transshipment to other nations, or use for other than domestic use in the nation to which stocks of the Commodity Credit Corporation are shipped, of the stocks of the Commodity Credit Corporation made available to export participants in the program.

"(c) The Secretary of Agriculture shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(d) The Secretary of Agriculture may issue such regulations as the Secretary deems necessary to carry out this section.

"(e) The authority provided in this section shall be in addition to, and not in place of, any authority granted to the Secretary of Agriculture or the Commodity Credit Corporation under any other provision of law.".

EXPANDED AUTHORITY FOR THE USE ABROAD OF COMMODITY CREDIT CORPORATION STOCKS

SEC. 202. Section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431) is amended by striking out the last two sentences and inserting in lieu thereof the following: "Such dairy products and other agricultural commodities and products thereof acquired by the Commodity Credit Corporation may also be donated through foreign governments and public and nonprofit private humanitarian organizations for the assistance of needy persons outside the United States, and the Commodity Credit Corporation may pay, with respect to commodities and products thereof so donated, reprocessing, packaging, transporting, handling, and other charges, including the cost of overseas delivery. To ensure that any such donations for use outside the United States complement, and are coordinated with, other United States foreign assistance, such donations shall be coordinated through the mechanism designated by the President to coordinate assistance under the Agricultural Trade Development and Assistance Act of 1954 and shall be in addition to the level of assistance programmed under that Act. Agricultural commodities acquired by the Commodity Credit Corporation may also be used to increase the level of agricultural exports under titles I and III of the Agricultural Trade Development and Assistance Act of 1954 consistent with the purposes of that Act and shall be in addition to the level of assistance programmed under that Act.".

IMPROVED DISTRIBUTION OF SURPLUS AGRICULTURAL COMMODITIES

SEC. 203. Section 1114(a) of the Agriculture and Food Act of 1981 is amended by inserting at the end of the first sentence thereof the following new sentence: "Whenever a commodity is made available without charge or credit, the Secretary of Agriculture shall encourage consumption thereof through agreements with private companies under which the commodity is processed into end products for use by eligible recipients, with the expense of the processing to be borne by the recipients.".

COMMODITY CREDIT CORPORATION SALES OF EXTRA LONG STAPLE COTTON

SEC. 204. Section 407 of the Agricultural Act of 1949 is amended by adding at the end thereof the following new sentence: "Notwithstanding any other provision of this section, effective beginning thirty days after the enactment of this sentence, stocks of extra long staple cotton held by the Commodity Credit Corporation may be sold for unrestricted use at such price levels as the Secretary determines appropriate to maintain and expand export and domestic markets for such cotton.".

DISPOSITION OF DAIRY PRODUCTS

SEC. 205. The Secretary of Agriculture is encouraged to donate abroad, or sell for export at the best price obtainable, at least 50,000 metric tons of dairy products owned by the Commodity Credit Corporation, during each of the fiscal years 1983 through 1985. The Secretary shall report semiannually to Congress on the status of such donations or sales.

PRESIDENTIAL REPORT ON STATUS OF NEGOTIATING A NEW LONG-TERM GRAIN SALES AGREEMENT WITH THE SOVIET UNION

SEC. 206. The President shall report to Congress by December 31, 1982, on his reasons for maintaining the measures announced on December 29, 1981, postponing negotiations with the government of the Soviet Union on the terms and conditions of a new long-term grain sales agreement.

Amend the title of the bill so as to read: "A bill to establish a special payment-in-kind land conservation program, expand markets for United States agricultural commodities, and for other purposes.".

PENTAGON POLYGRAPH TESTS

Mr. CRANSTON. Mr. President, several weeks ago I requested that the Government Operations Subcommittee on Civil Service, Post Office, and General Services hold hearings on the implications of a proposed Pentagon directive expanding the use of polygraph tests for its employees, defense contractors, and even Government workers in other departments.

My good friend from Alaska and the chairman of that subcommittee, Senator STEVENS, was most accommodating. Unfortunately, because of unavoidable scheduling conflicts the hearing he had planned to hold today was canceled. I thank the Senator from Alaska for his efforts on this matter.

The provisions of the Pentagon's proposed draft for expanding the use of polygraph tests raise serious questions about the Federal Government invading the privacy and violating the constitutional rights of its employees, as guaranteed by the Bill of Rights.

The rights of individual liberty and of privacy go to the very heart of our democracy. They distinguish our system of government from totalitarian regimes.

I object to the indignity of randomly subjecting Government employees to lie detector tests simply to satisfy the concern that someone, somewhere within the vast bureaucracy of the Pentagon, is leaking information. What

are the odds of discovering who may have leaked information? Obviously, the purpose of random testing would be to intimidate Federal employees by threatening their livelihoods. Former President Nixon understood this type of threat. Nixon wanted to give 1,500 employees polygraph tests to stop White House leaks in 1971. "I don't know anything about polygraphs," Nixon said, "but I know they'll scare the hell out of people."

Defense Secretary Caspar Weinberger is trying to out-Nixon Nixon. He wants the power to subject 15,000 to 20,000 people—in and out of Government—to lie detector tests.

Has the Department of Defense ever caught any spies by using the polygraph test? If so, how many? None of the literature I have seen on the intelligence community has identified even one such case. Has the Department ever identified a spy who had earlier passed a polygraph examination? According to the Puzzle Palace, there have been three in the National Security Agency. Finally, has the Pentagon ever conducted a scientific study to determine whether polygraph tests are reliable at detecting deception or whether they pose the risk of false accusation? Apparently the last such study, done in 1962, was inconclusive. Congress ought to have these questions officially answered before the administration tries to wire-up innocent people.

Over the past decade, several congressional committees and subcommittes have concluded that the polygraph test has yet to demonstrate either its validity or reliability in differentiating between truth and deception. In the words of former Senator Sam Ervin, who opposes the use of these devices for Federal employment, "what is recorded is not the subject's veracity but his psychological responses to an examiner's questions and the graphs recorded are worthless unless 'interpreted' by the examiner. It is his judgement and not some demonstrated physical fact that determines the truthfulness of the individual's response.

The new directive would affect people's jobs, what kind of jobs they will have and whether, in fact, they will have jobs at all. Lie detector tests are unreliable and will never prove to be successful devices for protecting the security of our Nation. This is massive witchhunt machinery—no more, no less.

Under the proposed directive the Pentagon could apparently intimidate people without regard to whether, in fact, a national security interest exists. Under the current directive, the Department has used the polygraph test on only two occasions, according to a recent General Accounting Office report. One of these was ordered by Deputy Secretary of Defense Frank C. Carlucci in an unsuccessful effort to discover who informed the press last January about an internal Defense Department study. That study concluded it would cost $750 billion more than publicly announced to implement President Reagan's 5-year rearmament program. Those news articles did not involve matters of national security, but very much involved issues of paramount public interest.

We cannot allow a situation to develop where Federal employees must relinquish their constitutional freedoms in order to keep their jobs.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 9:39 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has agreed to the amendment of the Senate to each of the following bills:

H.R. 3942. An act to amend the Commercial Fisheries Research and Development Act of 1964; and

H.R. 6204. An act to provide for appointment and authority of the Supreme Court Police, and for other purposes.

The message also announced that the House has agreed to the amendments of the Senate to the following bill:

H.R. 6758. an act to authorize the sale of defense articles, defense services, and unclassified defense service publications to United States companies for incorporation into end items to be sold to friendly foreign countries.

The message further announced that the House has passed the following bills, without amendment:

S. 1444. An act to authorize the Administrator of General Services to donate to State and local governments certain Federal personal property loaned to them for civil defense use, and for other purposes;

S. 1681. An act to designate the southern Nevada water project the "Robert B. Griffith Water Project";

S. 2034. An act to designate the lock and dam known as the Jones Bluff Lock and Dam, located on the Alabama River, as the "Robert F. Henry Lock and Dam"; and

S. 2710. An act to establish the Charles C. Deam Wilderness in the Hoosier National Forest, Indiana.

The message also announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res 130. Concurrent resolution expressing the sense of the Congress that the advancement of science and technology in the communications and electronics industry is vital to the needs of the United States.

The message further announced that the House disagrees to the amendments of the Senate to the bill (H.R. 7144) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes; agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints, Mr. DIXON, Mr. NATCHER, Mr. STOKES, Mr. WILSON, Mr. LEHMAN, Mr. WHITTEN, Mr. COUGHLIN, Mr. GREEN, Mr. PORTER, and Mr. CONTE, as managers on the part of the House.

The message also announced that the House has passed the following bill, with an amendment, in which it requests the concurrence of the Senate:

S. 823. An act to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn, or fiber, and for other purposes.

The message further announced that the House has passed the following bills, each with amendments, in which it requests the concurrence of the Senate:

S. 816. An act to amend the Clayton Act to limit the circumstances under which foreign governments may sue for violations of the antitrust laws, and for other purposes;

S. 835. An act for the relief of Jerry L. Crow;

S. 1407. An act to amend title 39, United States Code, by strengthening the investigatory and enforcement powers of the Postal Service by authorizing inspection authority and by providing for civil penalties for violations of orders under section 3005 of such title (pertaining to schemes for obtaining money by false representations or lotteries), and for other purposes;

S. 2059. An act to change the coverage of officials and the standards for the appointment of a special prosecutor in the special prosecutor provisions of the Ethics in Government Act of 1978, and for other purposes; and

S. 2355. An act to amend the Communications Act of 1934 to provide that persons with impaired hearing are ensured reasonable access to telephone service.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 4491. An act to exempt the United States Capitol Historical Society from certain taxes;

H.R. 5906. An act to amend title III of the Outer Continental Shelf Lands Act Amendments of 1978 to clarify provisions relating to claims, financial responsibility, and civil penalties;

H.R. 6120. An act to reauthorize the Deep Seabed Hard Mineral Resources Act for fiscal years 1983 and 1984.

H.R. 6519. An act to amend title 5, United States Code, to allow student interns of the Internal Revenue Service to have access to certain information required by such students in the performance of their official duties;

H.R. 6957. An act making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1983, and for other purposes;

H.R. 6993. An act to revise, codify, and enact without substantive change certain general and permanent laws related to transportation as subtitle I and chapter 31 of subtitle II of title 49, United States Code, "Transportation"; and

H.R. 7378. An act to codify without substantive change recent laws related to money and finance and to improve the United States Code.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 432. Concurrent resolution expressing the sense of the Congress on the situation in Poland and calling for a determined policy aimed at ending the repression of the Polish people.

ENROLLED BILL SIGNED

At 11:08 a.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the Speaker has signed the following enrolled bill:

S. 764. An act to provide for protection of the John Sack Cabin, Targhee National Forest in the State of Idaho.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

At 4:00 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House agrees to the amendments of the Senate numbered, 2, 3, 4, 5, 6, 7, 8, 11, 12, 13, 19, 20, 21, 22, 23, 24, 25, 28, 29, 32, and 35 to the bill (H.R. 6056) to make technical corrections related to the Economic Recovery Tax Act of 1981, the Crude Oil Windfall Profit Tax Act of 1980, and the Installment Sales Revision Act of 1980; it agrees to the amendments of the Senate numbered 1, 10, 17, 26, 30, 31, 33, 34, 36, and 37 to the bill, each with amendments, in which it requests the concurrence of the Senate; that it agrees to the amendment of the Senate to the title of the bill, with an amendment, in which it requests the concurrence of the Senate, and that the House disagrees to the amendments of the Senate numbered 9, 15, 18, 24, and 27 to the bill; it insists on its amendments to the amendments of the Senate, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. ROSTENKOWSKI, Mr. GIBBONS, Mr. RANGEL, Mr. STARK, Mr. CONABLE, Mr. DUNCAN, and Mr. ARCHER as managers of the conference on the part of the House.

The message also announced that the House agrees to the amendment of the Senate to that text of the bill (H.R. 5121) to improve the collection of Federal royalties and lease payments derived from certain natural resources under the jurisdiction of the Secretary of the Interior, and for other purposes, with an amendment, in which it requests the concurrence of the Senate, and that it agrees to the amendment of the Senate to the title of the bill.

The message further announced that the House agreed to the amendment of the Senate to the text of the bill (H.R. 5470) to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness, with an amendment, in which it requests the concurrence of the Senate, and that it agrees to the amendment of the Senate to the title of the bill.

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 5238) to amend the Federal Food, Drug, and Cosmetic Act to facilitate the development of drugs for rare diseases and conditions, and for other purposes, with an amendment, in which it requests the concurrence of the Senate.

The message further announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 7316. An act to establish the National Park System Visitor Facilities Fund, and for other purposes.

At 6:19 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House agrees to the amendments of the Senate numbered 2, 3, and 4 to the bill (H.R. 7093) to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income; it agrees to the amendment of the Senate numbered 1 to the bill, with an amendment, in which it requests the concurrence of the Senate, and agrees to the amendment of the Senate to the title of the bill.

At 9:38 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 631. Joint resolution making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes.

ENROLLED BILLS SIGNED

At 11:14 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the Speaker has signed the following enrolled bills:

S. 1444. An act to authorize the Administrator of General Services to donate to State and local governments certain Federal personal property loaned to them for civil defense use, and for other purposes.

S. 1681. An act to designate the southern Nevada water project the "Robert B. Griffith Water Project".

S. 1894. An act to permit Indian tribes to enter into certain agreements for the disposition of tribal mineral resources, and for other purposes.

S. 2034. An act to designate the lock and dam known as the Jones Bluff Lock and Dam, located on the Alabama River, as the "Robert F. Henry Lock and Dam".

S. 2710. An act to establish the Charles C. Deam Wilderness in the Hoosier National Forest, Indiana.

The enrolled bills were subsequently signed by the President pro tempore (Mr. THURMOND).

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 4491. An act to exempt the United States Capitol Historical Society from certain taxes; to the Committee on Governmental Affairs.

H.R. 6519. An act to amend title 5, United States Code, to allow student interns of the Internal Revenue Service to have access to certain information required by such students in the performance of their official duties; to the Committee on Governmental Affairs.

H.R. 6993. An act to revise, codify, and enact without substantive change certain general and permanent laws related to transportation as subtitle I and chapter 31 of subtitle II of title 49, United States Code, "Transportation"; to the Committee on the Judiciary.

H.R. 7378. An act to codify without substantive change recent laws related to money and finance and to improve the United States Code; to the Committee on the Judiciary.

H.J. Res. 631. Joint resolution making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes; to the Committee on Appropriations.

HOUSE BILLS PLACED ON THE CALENDAR

The following bills were read the first and second times by unanimous consent, and placed on the calendar:

H.R. 6957. An act making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1983, and for other purposes;

H.R. 7316. An act to establish the National Park System Visitor Facilities Fund, and for other purposes.

HOUSE CONCURRENT RESOLUTION REFERRED

The following concurrent resolution was read, and referred as indicated:

H. Con. Res. 432. Concurrent resolution expressing the sense of the Congress on the situation in Poland and calling for a determined policy aimed at ending the repression of the Polish people; to the Committee on Foreign Relations.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, December 14, 1982, that he had presented to the President of the United States the following act:

S. 764. An act to provide for protection of the John Sack Cabin, Targhee National Forest in the State of Idaho.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-4659. A communication from the Acting Secretary of State transmitting, pursuant to law, a report on payments during the previous month to private individuals or corporations in satisfaction of assurance agreements or payment of loan guarantees with respect to loans made and credits extended to the Polish People's Republic; to the Committee on Foreign Relations.

EC-4660. A communication from the Acting Assistant Legal Adviser for Treaty Affairs of the Department of State, transmitting, pursuant to law, copies of international agreements, other than treaties, entered into by the United States within the previous 60 days; to the Committee on Foreign Relations.

EC-4661. A communication from the District of Columbia Auditor transmitting, pursuant to law, a copy of a letter in relation to a report entitled "Followup to Audit of the Board of Elections and Ethics"; to the Committee on Governmental Affairs.

EC-4662. A communication from the Secretary of Housing and Urban Affairs transmitting, pursuant to law, the semiannual report on the activities of the Office of Inspector General of HUD; to the Committee on Governmental Affairs.

EC-4663. A communication from the Assistant Secretary of the Interior for Indian Affairs transmitting, pursuant to law, a proposed plan for the use and distribution of the Hoopa Valley Tribe judgment funds; to the Select Committee on Indian Affairs.

EC-4664. A communication from a certified public accountant transmitting, pursuant to law, an audit of the Veterans of World War I of the United States of America, Inc., for fiscal year ended September 30, 1982.

EC-4665. A communication from the Assistant Attorney General of the United States, Antitrust Division, transmitting, pursuant to law, a report on "Competition in the Coal Industry"; to the Committee on the Judiciary.

EC-4666. A communication from the Chief Judge of the United States Court of Appeals transmitting, pursuant to a resolution adopted by the Judicial Conference of the United States, a report relative to the the workload of circuit and district judges within the District of Columbia Circuit; to the Committee on the Judiciary.

EC-4667. A communication from the Executive Director of the Committee for Purchase from the Blind and Other Severely Handicapped, transmitting, pursuant to law, the annual report on the activities of the Committee during the fiscal year ended September 30, 1981; to the Committee on Labor and Human Resources.

EC-4668. A communication from the Comptroller General of the United States transmitting, pursuant to law, the report on the access to records problem encountered by the General Accounting Office at the Department of the Air Force; to the Committee on Governmental Affairs.

EC-4669. A communication from the Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, a report on a decision to convert the base operations support function at the Naval Weapons Center, China Lake, Calif., to performance under contract; to the Committee on Armed Services.

EC-4670. A communication from the Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, a report on a decision to convert the custodial services function at the Naval Amphibious School, Little Creek, Va., to performance under contract; to the Committee on Armed Services.

EC-4671. A communication from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report on the conversion of the grounds maintenance function at the Navy Public Works Center, San Diego, Calif., to performance by contract; to the Committee on Armed Services.

EC-4672. A communication from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report on the conversion of the custodial services function at the Navy Regional Medical Center, Philadelphia, Pa., to performance by contract; to the Committee on Armed Services.

EC-4673. A communication from the Administrator of the Panama Canal Commission, transmitting, pursuant to law, a report on an accident in the canal; to the Committee on Armed Services.

EC-4674. A communication from the U.S. Trade Representative, transmitting, pursuant to law, a report on a Presidential determination with respect to the issuance of motor carrier authority by the Interstate Commerce Commission, to the Committee on Commerce, Science, and Transportation.

EC-4675. A communication from the Secretary of the Federal Communications Commission, transmitting, pursuant to law, a report on certain hearings held before the Commission; to the Committee on Commerce, Science, and Transportation.

EC-4676. A communication from the Secretary of Energy, transmitting, pursuant to law, a quarterly report on the strategic petroleum reserve, dated November 15, 1982; to the Committee on Energy and Natural Resources.

EC-4677. A communication from the Secretary of the Interior and the Secretary of Agriculture, transmitting jointly, pursuant to law, the annual report on the Youth Conservation Corps for fiscal year 1981; to the Committee on Energy and Natural Resources.

EC-4678. A communication from the Inspector General, Department of the Interior, transmitting, pursuant to law, the annual report on the financial condition of the Government of Guam for fiscal year 1981; to the Committee on Energy and Natural Resources.

EC-4679. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Sharing the Cost of Making Federal Water Project Feasibility Studies—A Financial Alternative"; to the Committee on Environment and Public Works.

EC-4680. A communication from the Chairman of the Nuclear Regulatory Commission, transmitting, pursuant to law, a report on the nondisclosure of safeguards information by the Commission for the quarter ended September 30, 1982; to the Committee on Environment and Public Works.

EC-4681. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report containing legislative recommendation with respect to the coverage of additional optometrists' services under medicare; to the Committee on Finance.

EC-4682. A communication from the Chairman of the Foreign Claims Settlement Commission, transmitting, pursuant to law, the annual report of the Commission for calendar year 1981; to the Committee on Foreign Relations.

EC-4683. A communication from the Secretary of Education, transmitting, pursuant to law, a report on the Department's one-time computer match of records of defaulted loans under student loan programs and records of currently employed and retired Federal personnel; to the Committee on Governmental Affairs.

EC-4684. A communication from the Assistant Attorney General for Administration, transmitting, pursuant to law, a report on a Privacy Act system of records; to the Committee on Governmental Affairs.

EC-4685. A communication from the Secretary of Defense, transmitting, pursuant to law, the eighth semiannual report on audit, inspection, and investigative operations in the Department of Defense for the period ending September 30, 1982; to the Committee on Governmental Affairs.

EC-4686. A communication from the Assistant Secretary of the Department of the Interior transmitting draft of a proposed bill to authorize settlement of a claim of the Shoalwater Bay Indian Tribal Organization; to the Select Committee on Indian Affairs.

EC-4687. A communication from the Deputy Assistant Secretary-Indian Affairs (Operations) transmitting, pursuant to law, all adjusted or eliminated reimbursable charges of the Government of the United States existing as debts against individual Indians or tribes of Indians; to the Select Committee on Indian Affairs.

EC-4688. A communication from the Chairman of the Administrative Conference of the United States transmitting, pursuant to law, the 1981 report of the conference; to the Committee on the Judiciary.

EC-4689. A communication from the adjutant general of the Military Order of the Purple Heart transmitting, pursuant to law, the financial audit of the Military Order of the Purple Heart of the U.S.A., Inc.; to the Committee on the Judiciary.

EC-4690. A communication from the Commissioner of the Immigration and Naturalization Service transmitting, pursuant to law, notification of a withdrawal of deportation case presently before Congress; to the Committee on the Judiciary.

EC-4691. A communication from the Commissioner of the Immigration and Naturalization Service transmitting, pursuant to law, waivers for the second half of fiscal year 1982; to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-1265. A resolution adopted by the Senate of the Commonwealth of Pennsylvania; to the Committee on Agriculture, Nutrition, and Forestry;

"RESOLUTION

"Whereas, The Secretary of the United States Department of of Agriculture will implement a 50 cent deduction on milk prices on December 1, 1982 as a means of reducing the milk surplus; and

"Whereas, The assessment would place additional economic burdens on Pennsylvania's 15,500 dairy farmers without solving the real problem of surplus milk production; and

"Whereas, The initial assessment would take approximately $45,000,000 from dairy farmers in the State's economy; therefore be it

"Resolved, That the Senate of the Commonwealth of Pennsylvania strongly urges the Congress of the United States to take action to delay implementation of the 50 cent per hundredweight assessment on dairy farmers to give the dairy industry and Congress sufficient time to develop a program to more realistically deal with milk surplus; and be it further

"Resolved, That copies of this resolution be sent to the presiding officers of each House of the Congress of the United States and to each Senator and Representative from Pennsylvania in the Congress of the United States."

POM-1266. A resolution adopted by the General Assembly of the Commonwealth of Pennsylvania; to the Committee on Appropriations:

"RESOLUTION

"Whereas, The unemployment rate for the Commonwealth of Pennsylvania is 11.3% and some counties have rates which far exceed the average for the State; and

"Whereas, In certain areas of this Commonwealth, one out of every four workers is unemployed; and

"Whereas, The bridges, roads and mass transit systems of the Nation are in need of repairs and renovations; and

"Whereas, This Commonwealth is fourth in the number of bridges and total miles of highways which are adversely affected by the harsh winter weather prevalent in the area; and

"Whereas, Public Works Programs have had positive results in the past; and

"Whereas, Public Works spending plans could be justified solely on the need to repair our faulty transportation system; and

"Whereas, These projects need to be done regardless of the unemployment rate and doing these projects now gives us the perfect way to reduce high unemployment; therefore be it

"Resolved, (the House of Representatives concurring), That the General Assembly of the Commonwealth of Pennsylvania hereby memorializes Congress to appropriate funding as quickly for an Accelerated Public Works Program, which will be established by the Commonwealth of Pennsylvania and all other states, to reduce unemployment, upgrade our bridges, roadways and missing links in Federal and State programs; and be it further

"Resolved, That copies of this resolution be delivered to the President of the United States, the Speaker of the House of Representatives, the President pro tempore of the Senate and each Senator and Congressman from Pennsylvania"

POM-1267. A petition from a citizen of North Adams, Massachusetts urging the Congress to make our dollar "good as gold" by supporting Senate bill 6 or return America's currency to the gold standard; to the Committee on Banking, Housing, and Urban Affairs.

POM-1268. A petition from the National Shipbuilding Conference of the Metal Trades Department, AFL-CIO, concerning redress of a grievance on behalf of American shipyard workers; to the Committee on Commerce, Science, and Transportation.

POM-1269. A resolution adopted by the City Council of Niagara Falls, New York, opposing any attempt to limit the regulatory and contractual powers exercised by local governments with respect to cable television franchises; to the Committee on Commerce, Science, and Transportation.

POM-1270. A resolution adopted by the Lake County Parks and Recreation Department of Crown Point, Indiana, urging Congress to authorize the construction of a small boat marina in Lake County, within the West Unit of the Indiana Dunes National Lakeshore Park, to be named "The Adam Benjamin, Jr., Memorial Marina"; to the Committee on Energy and Natural Resources.

POM-1271. A resolution adopted by the Republican Governors Association urging the Federal Government to provide maximum flexibility to the States to assist them in their efforts to implement innovative financing mechanisms with which to rebuild our public works infrastructure; to the Committee on Environment and Public Works.

POM-1272. A resolution adopted by the Assembly of the State of California; to the Committee on Environment and Public Works:

"HOUSE RESOLUTION No. 81"

"Whereas, the Environmental Protection Agency has revised its air quality regulation declaring that vessels are, indeed, mobile sources of emission; and

"Whereas, the Environmental Protection Agency has declared that the burden of emission control should not be placed on terminal operators who have little or no control over the emissions of vessels that call at their terminal; and

"Whereas, the United States Coast Guard holds the primary responsibility for vessel regulation, including safety requirements, of both foreign and American flagships; now, therefore, be it

"Resolved by the Assembly of the State of California, That consistent, cost-effective national regulations applicable to all vessels should be developed, eliminating any possible discriminatory local or state regulations that can disrupt foreign maritime commerce; and be it further

"Resolved, That cost-effective national regulation is needed to maintain low marine transportation cost, keeping the United State Merchant Fleet competitive with foreign vessels; and be it further

"Resolved, That lengthy debates and even litigation resulting from state challenges of its ability to control vessel emissions by imposing design and operation requirements on vessels is fraught with serious legal and foreign relations ramifications; and be it further

"Resolved, That the United States Coast Guard, in conjunction with the appropriate international maritime concerns, should diligently pursue the development of rational, uniform regulations for the control of ship emissions that are consistent with both the actual need to reduce vessel emmissions and the technological, economic, and safe operational constraints with ship design and operation; and be it further

"Resolved, That the Chief Clerk of the assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, to the United States Coast Guard, to the State Air Resources Board, and to appropriate air quality management districts."

POM-1273. A resolution adopted by the Legislative Council of the State of Arkansas; to the Committee on Finance:

"INTERIM RESOLUTION 81-74 EXPRESSING OPPOSITION TO THE ENACTMENT BY CONGRESS OF "THE PUBLIC EMPLOYEES PENSION PLAN REPORTING AND ACCOUNTING ACT OF 1982" (PEPPRAA).

"Whereas, legislation proposing the enactment of "The Public Employee Pension Plan Reporting and Accounting Act of 1982" has been introduced in the Congress of the United States in the form of H.R. 4928 and H.R. 4929 (Senate companion Bills S2105 and 2106); and is still pending in the House Rules Committee and Ways and Means Committee; and

"Whereas, the Arkansas General Assembly has already expressed its opposition to PEPPRAA in a resolution dated June 18, 1982, and maintains its position against federal regulation of state and local retirement systems for the reasons given at that time; and

"Whereas, The Arkansas Legislative Council and the Joint Budget Committee have reviewed the financial position of our state retirement systems and are satisfied not only that they are financially strong, but also that our state retirement laws providing for reporting and disclosure and prudent management of these trusts will continue to assure the proper administration of these systems; and

"Whereas, the proposed federal legislation poses a serious usurpation of the sovereign powers of the state and local governments which were reserved to them under the Separation of Powers provision of the Constitution of the United States; Now therefore,

"Be it resolved by the Legislative Council of the State of Arkansas: That the Arkansas Legislative Council and the Joint Budget Committee, acting in behalf of the Arkansas General Assembly, respectfully declares their opposition to the passage of the proposed Public Employees Pension Plan Reporting and Accounting Act of 1982 or any other similar Act or variation thereof. Be it further resolved:

"That copies of this Resolution shall be furnished to the President of the Senate and the Speaker of the House of Representatives of the United States Congress, and to all members of the Arkansas Congressional

Delegation, with the request that this Resolution be officially entered in the CONGRESSIONAL RECORD as a memorial to the Congress of the United States. Be it further resolved:

"That the members of the Arkansas Congressional Delegation are urged to use the full influence of their office in opposing the further consideration or enactment of this or similar legislation as being contrary to the interests of the government of the State of Arkansas and its local political subdivisions and of the federal system."

POM-1274. A resolution adopted by the Republican Governors Association supporting the "Technology Education Act of 1982"; to the Committee on Finance.

POM-1275. A resolution adopted by the Republican Governors Association urging the Congress to enact legislation to postpone for a period of one year the requirement for the registration of municipal bonds: to the Committee on Finance.

POM-1276. A resolution adopted by the City Council of Niagara Falls, New York, urging Congress to repeal those portions of the Tax Equity and Fiscal Reponsibility Act of 1982 which raise the costs of borrowing for municipalities; to the Committee on Finance.

POM-1277. A resolution adopted by the people of Multnomah County, Oregon, calling on the Federal Government to end all military aid to the government of El Salvador and to withdraw all military personnel from that country; to the Committee on Foreign Relations.

POM-1278. A petition from a citizen of Columbus, Ohio, urging the Congress to pass "the Gay Bill of Rights"; to the Committee on the Judiciary.

POM-1279. A petition from a citizen of St. Petersburg, Florida, urging Congress to study censure of the U.S. Supreme Court, and impeachment of the Montgomery County, Maryland, Circuit Court; to the Committee on the Judiciary.

POM-1280. A resolution adopted by the City Council of the City of Elizabeth, New Jersey, urging Congress to keep open the 5th Preference Quota in immigration rules and regulations; to the Committee on the Judiciary.

POM-1281. A resolution adopted by the Senate of the Associated Students of the University of Hawaii at Manoa supporting the national legislation of Senator Spark M. Matsunaga creating a United States Academy of Peace; to the Committee on Labor and Human Resources.

POM-1282. A petition from a citizen of Irwin, Pennsylvania concerning the 1982 Senatorial election in Pennsylvania; to the Committee on Rules and Administration.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. COCHRAN, from the Committee on Agriculture, Nutrition, and Forestry, with an amendment in the nature of a substitute, and an amendment to the title:

S. 3074. A bill entitled the "Agricultural Act of 1982".

By Mr. STAFFORD, from the Committee on Environment and Public Works, without amendment:

S. Res. 498. Resolution prohibiting the sale of the U.S. Custom House at Bowling Green in New York City.

By Mr. STAFFORD, from the Committee on Environment and Public Works, without amendment:

S. Res. 514. An original resolution ordering a space needs study of Social Security Data Processing Center in Wilkes-Barre, Pennsylvania, including a site survey for proposed relocation thereof, and for other purposes.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. SIMPSON, from the Committee on Veterans' Affairs:

Harry N. Walters, of Virginia, to be Administrator of Veterans' Affairs.

By Mr. ROTH, from the Committee on Governmental Affairs:

Geoffrey M. Alprin, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for a term of fifteen years; and

Virginia L. Riley, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of fifteen years.

By Mr. HATCH, from the Committee on Labor and Human Resources:

Edward M. Elmendorf, of Vermont, to be Assistant Secretary for Postsecondary Education, Department of Education.

(The above nomination was reported from the Committee on Labor and Human Resources with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. TOWER, from the Committee on Armed Services:

W. Paul Thayer, of Texas, to be Deputy Secretary of Defense.

Mr. TOWER. Mr. President, from the Committee on Armed Services, I report favorably the following nominations: Francis C. Coleman, Perry A. Lambird, David I. Olch and James F. X. O'Rourke to be Members of the Board of Regents of the Uniformed Services University of the Health Sciences, Rear Adm. Crawford A. Easterling, U.S. Navy, to be vice admiral, Rear Adm. Henry C. Schrader, U.S. Navy, to be vice admiral, Gen. Frederick J. Kroesen, U.S. Army, (age 59) to be placed on the retired list, Gen. Glenn K. Otis, U.S. Army, to be reassigned in his current grade to a position of importance and responsibility designated by the President, in the Air Force Reserve there are 19 appointments to the grade of major general and below (list begins with Dan C. Mills), in the Air Force there are 31 appointments to the grade of major general (list begins with Clarence R. Autery), in the Army there are 36 appointments to the grade of major general (list begins with Archie S. Cannon), Rear Adm. Thomas R. Kinnebrew, U.S. Navy, to be vice admiral, in the Air Force there are 3 appointments to the grade of major general (list begins with James E. Dalton), Lt. Gen. William R. Richardson, U.S. Army, to be general, Maj. Gen. Fred K. Mahaffey, U.S. Army, to be lieutenant general and Senior Army Member of the Military Staff Committee of the United Nations, Maj. Gen. Bennett L. Lewis, U.S. Army, to be lieutenant general and Col. John E. Major and Col. Billy Johnson, U.S. Army, to be brigadier generals. I ask that these names be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, in addition, in the Regular and Reserve of the Air Force there are 32 appointments/promotions to the grade of colonel and below (list begins with Robert R. Thunker), in the Air Force Reserve there are 20 transfers from the National Guard to the grade of lieutenant colonel (list begins with Bruce C. Bechtel), in the Navy and Naval Reserve there are 50 permanent appointments to the grade of captain and below (list begins with Gary A. Avery), in the Navy and Naval Reserve there are 49 permanent appointments to the grade of commander and below (list begins with Ernst P. Frage), in the Air Force there are 1,316 appointments to the grades and dates of rank to be determined by the Secretary of the Air Force (list begins with Larry D. Abney), in the Air Force there are 180 appointments to the grade of second lieutenant from the Reserve (list begins with Glenn E. Adams), in the Navy and Naval Reserve there are 50 permanent appointments to the grade of captain and below (list begins with Tracy A. Adams), in the Air Force Reserve there are 39 promotions to the grade of colonel (list begins with Ralph W. Applegate), in the Navy and Naval Reserve there are 24 appointments to the grade of captain and below (list begins with Mark R. Achenback) and in the Navy and Naval Reserve there are 27 permanent appointments/promotions to the grade of captain and below (list begins with Stanford P. Sadick), in the Air Force there are 11 permanent promotions to the grade of lieutenant colonel and below (list begins with Marion J. Hardy), in the Air Force Reserve there are 20 promotions to the grade of lieutenant colonel (list begins with Thomas F. Astaldi), in the Navy and Naval Reserve there are 41 permanent appointments to the grade of commander and below (list begins with Michael A. Fox), and in the Navy there are 1,157 permanent appointments to the grade of captain and below (list begins with Richard M. Dunbar). Since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of October 20, October 22, November 5, November 15, November 22, and December 7, 1982, at the end of the Senate proceedings.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. DODD:

S. 3097. A bill to require the Secretary of Housing and Urban Development to administer a demonstration program for assisting communities and nonprofit organizations in providing emergency shelters; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. BENTSEN:

S. 3098. A bill for the relief of James A. Ferguson; to the Committee on the Judiciary.

By Mr. DOMENICI:

S. 3099. A bill to direct the Secretary of the Interior to release certain restrictions contained in a previous conveyance of land to the city of Albuquerque, New Mexico, and to authorize the Secretary of Agriculture to make certain land transfers; to the Committee on Energy and Natural Resources.

By Mr. STAFFORD. (for himself and Mr. THURMOND) (by request):

S. 3100. A bill to modify the authority for the Richard B. Russell Dam and Lake project, and for other purposes; to the Committee on Environment and Public Works.

By Mr. D'AMATO:

S. 3101. A bill to amend Section 103(b)(3) of the Internal Revenue Code; to the Committee on Finance.

By Mr. BENTSEN:

S. 3102. A bill to amend title 28 of the United States Code to set up a regime of repose for certain archeological and ethnological material and cultural property; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. STAFFORD:

S. Res. 514. Resolution ordering a space needs study of Social Security Data Processing Center in Wilkes-Barre, Pennsylvania, including a site survey for proposed relocation thereof, and for other purposes; from the Committee on Environment and Public Works; placed on the calendar.

By Mr. McCLURE (for himself, MR. EXON, MR. JOHNSTON, MR. WARNER, MR. DOLE, and MR. ROBERT C. BYRD):

S. Res. 515. Resolution relating to the need to provide our Nation's natural gas consumers with immediate and long-term relief from rapidly increasing natural gas prices, by taking a number of actions to reduce or restrain such price increases, and by providing financial assistance to low-income consumers of natural gas; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DODD:

S. 3097. A bill to require the Secretary of Housing and Urban Development to administer a demonstration program for assisting communities and nonprofit organizations in providing emergency shelter; to the Committee on Banking, Housing, and Urban Affairs.

TEMPORARY EMERGENCY SHELTER DEMONSTRATION PROGRAM ACT OF 1982

● Mr. DODD. Mr. President, today I am introducing a bill to provide emergency shelters for homeless children and adults in this country.

Day after day in newspapers across the country, we read the tragic stories of increasing numbers of homeless Americans. A recent report by the U.S. Conference of Mayors describes the plight of thousands of younger and older Americans evicted from their homes and now living in tents, cars, and cardboard boxes. Some are fortunate enough to be sheltered by rescue missions run by churches and charitable organizations. Yet such accommodation is growing scarcer and scarcer as the ranks of the homeless swell.

Social services directors in countless States predict that thousands more will be driven to the streets before this winter is over, stretching hard-pressed rescue missions far beyond their capacities. In New York City, for example, there are five public shelters now overcrowded with 3,700 people who have no place else to go. Due to ever rising unemployment rates and cutbacks in assistance programs, city officials expect at least 1,500 additional residents to seek emergency shelter. Yet none will be available. New York City's experience will be duplicated in cities from Detroit to Houston and from Boston to Los Angeles.

This bill authorizes $50 million to be used to allow nonprofit organizations to convert vacant buildings into temporary shelters for the homeless. Such organizations will then have the responsibility for operating the emergency shelters for a period of from 3 to 10 years, depending upon the size of the grant awarded. HUD will administer this demonstration program, allocating money to areas with greatest numbers of homeless. Congressman VENTO has introduced identical legislation in the other body.

Mr. President, the vast majority of the new homeless want to work. Many are well-educated, some with Ph. D.'s. Many are single parents in charge of supporting their children. Most have never been without shelter before in their lives.

We have a responsibility to aid these victims of skyrocketing unemployment and cutbacks in social services, young and old alike, to ignore their plight would be singularly unAmerican.

Among those whom Emma Lazarus' words, inscribed on the Statue of Liberty, invited to America were tempest-tossed homeless from abroad.

Today those tempest-tossed homeless live within our own shores and desperately need decent shelter.

I urge my colleagues to join with me in sponsoring this legislation as a means of aiding private groups to do just that.

I ask unanimous consent that the full text of the "Temporary Emergency Shelter Demonstration Act of 1982" be printed in the RECORD. I also ask unanimous consent that an article from the Wall Street Journal, November 12, 1982, be printed it its entirety in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3097

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Temporary Emergency Shelter Demonstration Program Act of 1982".

DEMONSTRATION PROGRAM

SEC. 2. (a) The Secretary of Housing and Urban Development (hereafter in this Act referred to as the "Secretary") shall, to the extent provided in section 5, carry out a demonstration program for the purpose of assisting communities or nonprofit organizations in providing shelter for individuals who are subject to life-threatening situations because of their lack of housing.

(b) The demonstration program referred to in subsection (a) shall provide that—

(1) the Secretary shall make grants to communities or nonprofit organizations for the purpose described in subsection (a);

(2) any nonprofit organization may apply for such assistance only on the basis of an application approved by the community in which the project involved is, or is to be, located;

(3) such grants shall be made on a competitive basis, taking into consideration—

(A) the extent of need for emergency housing in the area where the project involved is, or is to be, located;

(B) in the case of any nonprofit organization, the extent of the need for funding by such organization;

(C) the extent of non-Federal assistance to be provided with respect to the project involved, including in-kind contributions by volunteers;

(D) in the case of any nonprofit organization, the demonstrated capacity of such organization to establish and maintain the project involved; and

(E) any other terms and conditions prescribed by the Secretary to carry out the project involved in an effective, expeditious, and efficient manner;

(4) such grants may be used for the purpose of rehabilitating existing structures in order to provide basic shelter, maintaining structures providing such shelter, and paying for utilities of such structures, and for other purposes (other than salaries and administrative expenses) prescribed by the Secretary consistent with the purpose of this Act; and

(5) in the case of any structure that is rehabilitated with assistance under this Act, such structure shall be used for emergency housing for at least three years, or at least ten years in any case in which the rehabilitation involved is substantial.

REGULATIONS

SEC. 3. The Secretary shall issue regulations with respect to the demonstration program established in section 2 not later than ninety days after the date of the enactment of this Act.

REPORT TO CONGRESS

SEC. 4. The Secretary shall submit to the Congress (1) not later than April 1, 1983, an interim report concerning the demonstration program established in section 2; and (2) not later than December 1, 1983, a final report concerning such program.

FUNDING OF DEMONSTRATION PROGRAM

SEC. 5. Of the additional authority approved in appropriation Acts and made available during fiscal year 1983 pursuant to section 5(c) of the Housing Act of 1937, the Secretary shall utilize $50,000,000 to carry out the provisions of this Act.

[From the Wall Street Journal, Friday, Nov. 12, 1982]

THE DISPOSSESSED—HOMELESS NORTHERNERS UNABLE TO FIND WORK CROWD SUN BELT CITIES

THEY GATHER IN TENT TOWNS AND 'CARDBOARD CAMPS'; SCAVENGING FOR SURVIVAL—SOUP KITCHENS AND SUICIDES

(By George Getschow)

HOUSTON—Some 30 miles from the center of this sprawling Sun Belt city, on the banks of the San Jacinto River, is a community that came into existence some six months ago. It now has about 250 residents, most of whom came from other states, and is continuing to grow week by week.

Its name is found nowhere among real-estate ads. Indeed, it has no official name. Neighbors, however, call it Tramp City U.S.A. because its residents sleep in tents, cook on campfires and collect aluminum cans for a living.

Those who live here deeply resent being called tramps. Most are displaced families from depressed Northern states who have lost their jobs, exhausted their unemployment benefits and trekked south in search of work, only to find such work is no longer available. "We have no job, no money and no place else to go," says William Loveall, whose family drifted to the tent community from Detroit two months ago after their real-estate business collapsed and their saving evaporated.

DIRE STRAITS

Stirring a pot of beans simmering on his campfire, Mr. Loveall surveys the poor and tattered people around him and discusses reports that local merchants and homeowners regard the tenters as a collection of ne'er-do-wells. "A lot of locals think we love it out here," he says. "They don't realize just what a fix we're in."

Across the U.S., tens of thousands of families and individuals are in a similar fix. Not since the mass economic distress of the Great Depression, which drove the nation's destitute into tin-and-tent towns called Hoovervilles, have so many working-class people suddenly found themselves in such dire straits. President Reagan has urged the 11.6 million Americans who are officially unemployed to "hang in there" until the economy recovers. But many of the nation's jobless have nothing left to hang onto.

A recent report by the U.S. Conference of Mayors says thousands of families have been evicted from their homes and are living in cars, campgrounds, tents and rescue missions. The report notes that federal welfare programs that would have once kept such families afloat have been sharply cut back and adds that many more of the nation's "new poor" will spill onto the streets after the 26 weeks of their unemployment benefits expire.

It is a situation that is affecting towns and cities across the country. In New York, officials say the city's five public shelters, now jammed with 3,700 people, won't be able to accommodate the 1,500 more expected this winter. In Detroit, a new 45-bed shelter was filled the first night it opened. In Cleveland, Depression-style soup kitchens that once catered to skid-row loners have been revived and expanded to serve whole families.

BITTER HARVEST

But nowhere is the ugly specter of the homeless poor more shocking than here in the Sun Belt, which is reaping the bitter harvest of unemployment from all over the country. "I swear it looks like 'The Grapes of Wrath' around here," says Virginia Cuvillier, director of Houston's Travelers Aid Society. In the last 12 months, the society has seen 22,000 transients, mostly from Indiana, Ohio and Michigan.

Lured by tales of unlimited employment opportunities and the refuge of warmer weather, the jobless are streaming into the "promised land" in groaning jalopies, packed with bedsprings and babies, in numbers that may exceed even the highest estimates of 50,000 a month. But in an ironic twist from the '30s, when tens of thousands of Okies fled their barren farmlands in the dust bowl for fruitless vineyards in the West, today's migrants are mostly Northerners headed for the now-sputtering oil fields of Oklahoma, Texas, Colorado and other states.

In Galesburg, Ill., for example, a city of about 35,000 hard hit by an epidemic of plant closings and layoffs, there are at least 900 vacant homes. "Hundreds of families packed up and headed for the oil fields," says Howard Martin, the director of Galesburg's Salvation Army. "They get there and find that the jobs have dried up, but they can't return because they have no homes or jobs to return to."

"DON'T COME HERE"

Some Sun Belt cities have been trying to put out the message that the area no longer is the land of opportunity they once boasted about. "We now say to the unemployed people from Michigan, Ohio and Indiana, 'Don't come here, we don't have jobs,'" says Clyde Cole, director of the Tulsa (Okla.) Chamber of Commerce.

But for many, the message doesn't get through. Tulsa now has several thousand transients stranded in campgrounds or under bridges. Downtown Denver has filled up with so many homeless people that they have begun overflowing into the prosperous suburbs of Lakewood and Arvada. And even in a smaller oil town like Abilene, Texas, whose population is about 104,000, there may be 5,000 people living in tents, abandoned buildings and cardboard boxes, says June Benigno, executive director of the Abilene mental-health association.

Outside Houston, the community called Tramp City U.S.A. was organized with the help of the Rev. Ray Meyer, a local preacher, and is located on state property. With assistance from six volunteers, Mr. Meyer retrieves food that has been discarded by grocery stores and vegetable stands, cleans it up and delivers it to the tent people. Residents provide their own tents.

Newcomers to the community are welcomed by Barbara Tolbert, recently appointed "town greeter" by Mr. Meyer because she and her four children have been residents for four months and she knows everyone well. Mrs. Tolbert offers the new arrivals some food, finds them a space to set up housekeeping and even helps them enroll their children in school. She also gives them a manual entitled "How to Survive in the Out of Doors," written by Mr. Meyer.

A typical newcomer is Dave Johnson, who lost his job and home in Gary, Ind., after the steel mill that employed him shut down. He arrived in Texas with this pregnant wife, Donna, two children and high hopes of finding work. "At home, all you ever hear about are all the jobs down here," he tells Barbara Tolbert. She replies: "I hate to disillusion you, but"—she points to a parking area filled with out-of-state license plates—"that's what everybody else here heard, too."

The problems facing these homeless legions in the Sun Belt grow apace with their numbers. Not the least of those problems is the frontier philosophy pervading much of the region that "you take care of yourself and your own," says John Hansan, executive director of the Washington, D.C.-based National Conference on Social Welfare. Because of that attitude and because the Sun Belt hasn't faced widespread unemployment and poverty before, Mr. Hansan says, public and private philanthropic agencies to help the poor and needy are in desperately short supply in many Sun Belt cities.

And the supply is getting shorter; some cities in the region are closing down private shelters, hoping the homeless will go away.

Phoenix, Ariz., for example, in the past year has condemned three shelters and several soup kitchens and has passed a slew of ordinances that, among other things, make it a crime to sleep in the parks at night or lie down on the sidewalks during the day. The reason for those actions was to make room for downtown renewal projects and to insure that "panhandlers and derelicts," as many citizens call them, wouldn't spoil the success of those projects.

The Arizona Republic, Phoenix's morning daily, and many of its readers supported the city's actions. "We Didn't Tolerate Prostitutes, Why Tolerate Bums?" the newpaper asked in an editorial headline. A letter to the editor from a reader made this observation: "If a stray dog is found wandering the streets, it is picked up and put to sleep. Unfortunately, we cannot put these 'human animals' to sleep, but we surely should not support and encourage their way of life."

According to Louisa Stark, a Phoenix anthropoloigist, the city's cold shoulder has pushed many of the city's 3,300 homeless out of private shelters and public parks into jails or "cardboard camps" outside the city. Wallace Vegors, assistant park manager of Lake Pleasant Regional Park, a county facility about 30 miles from downtown Phoenix, says that "lots" of people are permanently camping" in the park and in the surrounding desert.

Others have settled on federal land near the city of Mesa, 17 miles from Phoenix. James Forrest, assistant director of the Mesa Chamber of Commerce, says the city has asked the federal rangers to get the homeless campers to move out, "but they

chase them out one day and they come back the next." He adds: "As long as they don't bother anybody, we don't do too much about them."

The problem will doubtless worsen as Phoenix pushes ahead with its downtown redevelopment, Louisa Stark says. As new offices and shops replace cheap hotels and apartments, she says, "more and more people are becoming homeless because they can't find anything else they can afford."

Ambitious urban-renewal projects in southern California are also shrinking the supply of cheap housing. "Lots of longtime indigents are landing on the streets, but so are a whole new class of people—families from Michigan and Ohio that are flooding into the area," says Michael Elias, who operates a family shelter in Orange County.

There is little public sympathy for the county's 15,000 homeless, Mr. Elias says. The city of Irvine, for example, recently voted to build a $3.5 million animal shelter for stray pets. "But the city won't donate a dime for the homeless," Mr. Elias says, "because they see them sleeping under bridges and assume they must be bums."

LITTLE COMPASSION

Even in Houston, a relatively prosperous city in the heart of the Bible Belt, there is little compassion for the growing horde of economic refugees pouring in from out of state. Kay White, a social worker who has been criticized within her own church for using church funds to aid destitute transients, says: "A lot of churches will help their own people, but as far as the Yankees go, they aren't welcome."

Joseph Williams, a laid-off landscaper from New York's Long Island, knows the feeling. Stranded on the steps of the Catholic Charities relief agency with his wife, Cornelia, and their four young children, Mr. Williams, a Catholic, says the family has no shelter for the night. The agency, he says, told us if we were foreign refugees they could help us; otherwise we'd have to go someplace else. "But where can we go? We don't have a car or money to pay for a hotel room. There's no work, and there's no family shelter here." (There is one free shelter for men; but most nights, it's so crowded that it has to turn away as many people as it can take in. The other shelters charge as much as $5 a night, an impossible sum for many.)

So after dark, when the downtown has been deserted by those more fortunate than they, the homeless drift in, filling the parks and fighting for space in abandoned buildings. One dilapidated downtown building is so full, in fact, that its tenants have hung home-made doors with padlocks to protect their occupancy.

The increasing presence of these ragged vagrants panhandling on the streets and loitering in the library (where they go to clean up and read their hometown newspapers), has aroused fear and anger among downtown shoppers and office workers. But the police say there is very little they can do about the situation. "How can you control it?" asks Patrolman Thomas Joyner. "The city is overflowing with these people, and it's getting worse every day. Besides, it's kind of hard to crack down on them when all they're trying to do is survive."

Patrolman Joyner adds that "there's been an upswing in pretty crime in the downtown area," such as stealing food from grocery stores and breaking into vending machines. "If someone doesn't have a job or any money, and they've got families to feed," he says, "they're going to steal if they have to to feed them."

The problem is particularly acute here and in other Texas cities because what welfare assistance there is in the state is limited to "unemployables"—and most homeless adults, regardless of their circumstances, are considered employable. Furthermore, the homeless can't even get food stamps because they don't have a local address. "It's a horrible Catch-22," says David Austin, a professor of social work at the University of Texas. "Many of these homeless people are half-starved, yet they aren't eligible for stamps."

One such "employable" is Ronald Larson, a 30-year-old plumber from Chicago who a few months ago lost his job, his car, his savings and, finally, his home. His family moved in with relatives, and he hopped freight trains looking for work. Now he finds himself standing in a church-sponsored soup line in Houston with 200 other homeless men, women and children, suffering from hunger and depression and staring into a future that he sees as hopeless. "If it weren't for my family," he says, "I probably would have pulled the trigger long ago."

Some of Houston's homeless survive by scavenging garbage bins in the back of fast-food chains. Others sell their blood at prices of about $7 to $10 a pint. Two such donors are Kenneth Harris, a 48-year-old laid-off hotel manager from Portland, Ore., and his wife, Mary. "We can't find work. We don't qualify for any assistance. So what else can we do?" asks Mr. Harris as he stands in a waiting room with at least 300 other donors. To survive, he says, he has sold his car and even his wife's wedding ring. He adds: "My blood is all I got left."

The plight of the homeless has caused some to turn their children over to county welfare agencies. "It really pulls at your heart to see these parents give up thier kids in order to provide a better life for them," says Carl Boaz, who runs Harris County's Child Welfare Emergency Shelter.

VIOLENT BEHAVIOR

Others turn to alcohol, violent behavior and even suicide. "They see new skyscrapers and shopping centers going up, and they think there's plenty of work here," says the Rev. George Grant, a minister from nearby Humble who has dealt with five suicides in a local tent community. When the homeless don't find work, Mr. Grant says, they react like a little child who has planned a magnificent birthday party but no one shows up. "It just blows them away," the minister says.

Another source of anxiety for the homeless is the threat of local vigilante groups who chase them off with shotguns and sirens. With local unemployment rising, Mr. Grant says, the vigilantes fear that they too might come to share the fate of their tent neighbors.

In "Tramp City U.S.A.," residents constantly feel the disdain of the local population. Some children refuse to go to school, having been called "river rats" by their more prosperous peers. Many of the families have also refused to go to church after one family in the community was turned away at a local parish for wearing dirty clothes.

The Rev. Ray Meyer tries to bring the Gospel to the homeless. But it isn't easy, he says, explaining: "These tent people are mostly middle-class people who've suddenly lost everything they've worked for, and they're angry at God." So rather than preaching, he sings songs, accompanying himself on his guitar. "Trouble has tossed you here and there, so now you don't even care," he sings. "You look for help at every place, but now there isn't anywhere else to go. Ah ... but it seems like you're living in so much hell."●

By Mr. DOMENICI:

S. 3099. A bill to direct the Secretary of the Interior to release certain restrictions contained in a previous conveyance of land to the city of Albuquerque, N. Mex., and to authorize the Secretary of Agriculture to make certain land transfers; to the Committee on Energy and Natural Resources.

ALBUQUERQUE LAND PARCELS

● Mr. DOMENICI. Mr. President, today I am introducing a bill which will release certain restrictions on a previous conveyance of land to the city of Albuquerque, N. Mex.

In 1963, the city of Albuquerque received two parcels of land from the U.S. Government to be used for city recreational purposes. As part of the official conveyance of the land the patent contained so-called reverter language. That is, if the city of Albuquerque attempted to use the land for a purpose which was not allowed under the laws, ownership of the land would revert back to the U.S. Government.

Currently, the city of Albuquerque is in the process of trading the two isolated 1.25-acre tracts of land that they acquired in 1963 for two other parcels of land of equal value which adjoin some 6 acres of existing city-owned land. With this exchange the city can group several acres for use as a first-class park.

However, under existing law, the exchange cannot be accomplished because of the provisions of the 1963 conveyance. If exchanged, the 1.25-acre parcels would revert back to ownership by the Federal Government.

This legislation would remove the reverter clause from the two parcels that were conveyed in 1963 which would allow the exchange to proceed.

However, in order to protect the rights of the public the reverter clause would be established on the two new parcels which the city would receive in the exchange.

The bill also imposes several other restrictions on the city that insures the public well-being is protected including requirements regarding a development plan for the proposed recreational area and a requirement that the city must consumate the exchange before title to the lands will be permanently transferred.

I believe that this bill is a good answer for the predicament the city of Albuquerque is in when they attempt to use good land management judgment. It will provide the city with a fine recreational area in a part of the city where it is needed while at the same time, it protects the integrity of

the laws under which the original land transfer was made.●

By Mr. BENTSEN:

S. 3102. A bill to amend title 28 of the United States Code to set up a regime of repose for certain archeological and ethnological material and cultural property; to the Committee on the Judiciary.

CULTURAL PROPERTY AND REPOSE ACT OF 1982

● Mr. BENTSEN. Mr. President, I am today introducing the Cultural Property Repose Act of 1982. It creates for archeological and ethnological material and cultural property that has been held in the United States for 5 years or more a regime of repose against claims of foreign governments. It would bar a foreign state from bringing or maintaining an action in any State or Federal court, where the action is to recover such property after it had been in the United States for 5 or more years. The legislation is necessary because in my State of Texas some foreign nations are attempting to exploit loopholes in State statutes of limitation—which may apply in Federal actions as well—to attempt the recovery of items, or damages for the theft of such items, that have been held in the United States for many years. Furthermore, the proposed act furthers the purposes of other, current legislative initiatives.

On September 21, 1982, the Senate Finance Committee reported favorably H.R. 4566, title II of which consisted of implementing legislation for the Convention on the Means of Prohibiting and Preventing the Illicit Import, Export, and Transfer of Ownership of Cultural Property. Title II establishes principles for the control of trade in archeological and ethnological materials, as well as certain other cultural material. A companion bill (S. 2963), introduced in the Senate of September 28, 1982, would reverse the holding in *United States* v. *McClain,* 593 F. 2d 658 (5th Cir.), cert. denied 44 U.S. 918, (1979). Specifically, S. 2963 would provide that it would be insufficient to make out a violation of the National Stolen Property Act even to knowingly and unlawfully export archeological or ethnological material from a country that has made a universal claim to ownership of such materials. The proposed Cultural Property Repose Act would complement these pieces of legislation, by setting up a system of repose in civil actions similar to that established by H.R. 4566 as it implements the United Nations convention and by S. 2963 for criminal actions.

Recognizing that S. 2963 and title II H.R. 4566 are the result of careful compromise, I feel sure that upon reflection the Judiciary Committee will find this bill will aid, rather than impair, this progressive compromise. I urge its serious consideration at the earliest possible time.●

By Mr. STAFFORD (for himself and Mr. THURMOND) (by request):

S. 3100. A bill to modify the authority for the Richard B. Russell Dam and Lake project, and for other purposes; to the Committee on Environment and Public Works.

MODIFICATION OF RICHARD B. RUSSELL DAM AND LAKE PROJECT

● Mr. STAFFORD. Mr. President, on behalf of the administration, I am pleased to introduce a bill directing the Army Corps of Engineers to provide electrical power to a town in South Carolina. Because of his great interest in this issue, I am very pleased that the distinguished President pro tempore of the Senate (Mr. THURMOND) is a cosponsor of the bill.

Mr. President, I ask unanimous consent that a copy of the bill, together with a copy of the transmittal letter, be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3100

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Richard B. Russell Dam and Lake Project, authorized by the Flood Control Act of 1966 (80 Stat. 1420), is hereby modified to authorize the Secretary of the Army, acting through the Chief of Engineers, to provide such power to the City of Abbeville, South Carolina, as the Secretary determines to be necessary to mitigate the reduction in hydroelectric power produced at the city-owned hydroelectric plant at Lake Secession cause by the construction and operation of the Project. Such power shall be provided to the City for a period not to exceed the remaining service life of the city-owned hydroelectric plan as part of the operational requirements and costs of the Project under such terms and conditions as the Secretary, in consultation with the Secretary of Energy, determines to be appropriate. The Secretary of Energy is authorized to provide assistance in the delivery of such power.

DEPARTMENT OF THE ARMY,
Washington, D.C.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is a draft of legislation "To modify the authority of the Richard B. Russell Dam and Lake Project, and for other purposes."

The Office of Management and Budget advises that, from the standpoint of the Administration's program, there is no objection to the presentation of this proposal for the consideration of the Congress. It is recommended that the proposal be enacted by the Congress.

Purpose of the legislation

The purpose of the proposed legislation is to authorize the Secretary of the Army, acting through the Chief of Engineers, to provide such power to the City of Abbeville, South Carolina, as the Secretary of the Army determines to be necessary to mitigate the reduction in hydroelectric power produced at a City-owned plant caused by the construction and operation of the Richard B. Russell Dam and Lake Project (the Project). The power would be provided to the City without charge for a period not to exceed the remaining service life of the City's plant as part of the operational requirements and costs of the Project under such terms and conditions as the Secretary of the Army, in consultation with the Secretary of Energy, determines to be appropriate.

The City of Abbeville owns and operates a hydroelectric power plant at Lake Secession upstream from the Project on the Rocky River, a tributary of the Savannah River. Impoundments from the Project will generally raise the level of the Rocky River, adversely affecting the operation and maintenance of the City-owned plant. In addition, the rise in water levels will make it impossible to generate as much power at the Lake Secession plant as would have been the case without the Project.

Existing legislation (Section 111 of the Rivers and Harbors Act of 1958, as amended) provides discretionary authority to the Chief of Engineers to protect and preserve the integrity, at Federal expense, of facilities owned by a government agency and utilized in the performance of a continuing governmental function when such facilities would otherwise be adversely affected or threatened by construction of any Federal water resources development project. Pursuant to this authority, the Chief of Engineers intends to undertake certain construction efforts to remedy the impediment to the operation and maintenance of the City's plant. However, Section 111 only envisions construction of remedial works; it does not authorize providing power to mitigate for power losses attributable to the Federal project.

The situation at Abbeville has been closely studied and it has been determined that the cost of remedial construction for power losses is prohibitively high. Estimates of the cost of any construction efforts to correct the power generation problem and allow energy generation as before are in the range of $3 Million to $20 Million. Further, the construction options considered involve state of the art technology and offer no guarantee of success.

The legislation recommended is equitable in that it strives to place the City on the same footing as prior to construction and operation of the Project by providing power from an existing source in a cost effective manner.

Cost and Budget Data

Enactment of the proposed legislation is not expected to have any significant impact on the budgetary requirements of the Department of the Army. The costs associated with this proposal, including the cost of the power delivered and any incidental increases in the operating expenses associated with the actual delivery of the power, will be treated as a part of the joint costs of the project to be allocated among all project purposes. These costs, currently estimated to be approximately $20,000 per year over the remaining service life of the city's plant, are far below the estimated costs of any remedial construction effort to mitigate for power losses.

Environmental and Civil Rights Impacts

Enactment of the proposed legislation will not have any significant environmental or civil rights impacts.

Sincerely

WILLIAM R. GIANELLI,
Assistant Secretary of the Army
(Civil Works).●

Mr. THURMOND. Mr. President, I am pleased to join with my distinguished colleague from the State of Vermont in introducing legislation today at the request of the Reagan administration.

This bill would modify the Richard B. Russell Dam and Lake project so as to authorize the Secretary of the Army to provide such hydroelectric power to the city of Abbeville, S.C., as is necessary to offset any reduction in the amount of power generated at the municipality-owned facility at Lake Secession caused by the construction and operation of the project.

Mr. President, the city of Abbeville has long operated its own hydroelectric power generating facility at Lake Secession. This facility provides low-cost electric power to the people of the city of Abbeville and surrounding communities.

The city of Abbeville and its citizens were enticed to support the Richard B. Russell Dam and Lake project in part upon the promise of the U.S. Army Corps of Engineers that they would be provided power from the project at a cost comparable to that generated by their own facility to compensate for any loss of generating capacity at that facility resulting from the construction and operation of the project. Once the project had gotten well underway, however, the Corps of Engineers determined that they lacked the statutory authority to make good on this promise under the legislation authorizing the construction and operation of the project.

Mr. President, suffice it to say that this revelation had a devastating impact on the confidence of the city and its people in the Corps of Engineers, and caused grave misgivings about the benefits of the project. Many felt as if they had been purposefully mislead into supporting the project, and would now have to pay dearly for this deception.

Mr. President, I do not intend by my remarks to intimate that the Corps of Engineers acted in bad faith in misrepresenting their authority in this matter. I do believe, however, that the time has now come for this situation to be corrected, since the impoundment of the waters at the project should begin reducing the generating capacity of the Lake Secession facility within less than a year.

Mr. President, the legislation being introduced today does no more than give the Secretary of the Army the authority to live up to the commitment made some time ago by the Corps of Engineers. It is intended to modify the legislation authorizing the Richard B. Russell dam and Lake project only so far as is necessary to authorize the Secretary to provide the city of Abbeville a kilowatt hour of power for every kilowatt hour by which the construction and operation of the project reduces the generating capacity of the Lake Secession facility. In this way, all parties involved will find themselves in exactly the same positions as they had originally contemplated.

Mr. President, I hope this noncontroversial legislation introduced at the request of the Reagan administration can be quickly enacted.

By Mr. D'AMATO:

S. 3101. A bill to amend Section 103(b)(3) of the Internal Revenue Code; to the Committee on Finance.

LOW-COST POWER FROM NEW YORK STATE POWER AUTHORITY

● Mr. D'AMATO. Mr. President, I am today introducing a bill which would permit the New York State Power Authority to fulfill its statutory mission of bringing the benefits of lower cost power and energy from its generating facilities to people throughout the State of New York. It is now seriously impeded from doing so by Federal regulations promulgated under section 103(b)(3) of the Internal Revenue Code.

Unlike virtually every other public utility agency in the United States, the Power Authority of the State of New York—which has been in existence for nearly five decades—owns no distribution facilities of its own. Therefore, it is forced to market the output of its facilities through the various public and private utility companies in the State for delivery to the ultimate consumers. The State's seven private utility companies serve more than 95 percent of the electric load in New York.

Industrial development bond (IDB) restrictions, however, treat sales to such utility companies for delivery to the ultimate consumers as sales to "nonexempt persons," even though the power sold to these utility companies is delivered to the ultimate consumers with no markup on the purchase price. Under present law, a maximum of 25 percent of the output generated by facilities financed with tax-exempt bonds may be sold to "nonexempt persons." Consequently, the power authority's ability to market the output of its facilities to the vast majority of the electrical consumers in New York State has been substantially frustrated.

The bill I am introducing today would require that the State's private utility companies be treated as exempt persons under the Internal Revenue Code solely for the very limited purpose of remarketing, without markup or profit, their purchases of the output and their use of the generating facilities owned and financed by the Power Authority of the State of New York. By virtue of such authority ownership and financing, no investment tax credits or accelerated depreciation benefits would be available to any private person or company using the output of these facilities.

The New York State Power Authority is different from similar agencies in other States. It is not authorized to own any transmission facilities. It is required to sell its power at wholesale. It is by far the oldest such authority in the Nation and it is actually mandated by a 1957 Federal statute to sell 445,000 kilowatts of hydroelectricity each year to a specific New York State utility. While the authority's State charter states that it is desirable and reasonable for the authority to sell its power to all of the utilities in the State, this is impossible given current IDB law and regulations.

This bill is essential to insure the maximum benefit to the citizens of New York from the use of the power authority's existing and proposed generating facilities. This bill would permit the authority to make sales of electricity from new and recently built facilities and to continue sales to utilities from the old ones if they should be rebuilt or enlarged. The January 1, 1970, date would assure that uniform rules would apply to the output of all of the authority's facilities.

This bill, which has a negligible effect upon Federal revenues, is vital to my State. It is needed to keep the rates consumers pay for publicly generated power reasonable. I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3101

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

Section 1. Application of section 103(b)(3) to certain entities. For the purposes of section 103A(b)(3) of the Internal Revenue Code of 1954 (relating to the definition of "exempt person"), the term "exempt person" shall include a regulated public utility having any customer service area within a state served by a public power authority which was required as a condition of a Federal Power Commission license specified by an Act of Congress enacted prior to the enactment of Section 107 of the Revenue and Expenditure Control Act of 1968 (Public Law 90-364) to contract to sell power to one such utility and which is authorized by state law to sell power to other such utilities, but only with respect to the purchase by any such utility and resale to its customers of any output of any electrical generation facility or any portion thereof or any use of any electrical transmission facility or any portion thereof financed by such power authority and owned by it or by such state, and provided that by agreement between such power authority and any such utility there shall be no mark-up in the resale price charged by such utility of that component of the resale price which represents the price paid by such utility for such output or use.

Sec. 2. The provisions of Section 1 hereof shall apply to obligations issued on or after

January 1, 1970 to finance any facility or portion thereof referred to in said Section.●

ADDITIONAL COSPONSORS

S. 2150

At the request of Mr. LEVIN, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of S. 2150, a bill to amend the Social Security Act to provide that the amount of any unnegotiated social security check shall be returned to the trust fund from which the check was issued.

S. 2247

At the request of Mr. PACKWOOD, the name of the Senator from Minnesota (Mr. BOSCHWITZ) was added as a cosponsor of S. 2247, a bill to amend the Tariff Schedules of the United States to permit the duty-free entry of certain footwear for use in the Special Olympics program.

S. 2355

At the request of Mr. CANNON, the name of the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 2355, a bill to amend the Communications Act of 1934 to provide that persons with impaired hearing are insured reasonable access to telephone service.

S. 2847

At the request of Mr. COCHRAN, the name of the Senator from Minnesota (Mr. BOSCHWITZ) was added as a cosponsor of S. 2847, a bill to provide for an Indian housing program for construction and financing of housing for Indians, and for other purposes.

S. 3016

At the request of Mr. DIXON, the name of the Senator from Connecticut (Mr. DODD) was added as a cosponsor of S. 3016, a bill to provide for the public financing of general elections for the United States Senate, and for other purposes.

S. 3047

At the request of Mr. KASTEN, the name of the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of S. 3047, a bill to repeal the withholding of tax from interest and dividends and to require statements to be filed by the taxpayer with respect to interest, dividends, and patronage dividends.

S. 3048

At the request of Mr. THURMOND, the names of the Senator from Nebraska (Mr. EXON), the Senator from Virginia (Mr. HARRY F. BYRD, JR.), and the Senator from Wisconsin (Mr. KASTEN) were added as cosponsors of S. 3048, a bill to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic and other products with intent to cause personal injury, death, or other harm.

S. 3060

At the request of Mr. HATFIELD, the name of the Senator from Connecticut (Mr. DODD) was added as a cosponsor of S. 3060, a bill to amend section 7(b) of the Wild and Scenic Rivers Act.

S. 3064

At the request of Mr. ROTH, the name of the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 3064, a bill to amend the Tax Reform Act of 1976 to extend, for an additional 4 years, the exclusion from gross income of the cancellation of certain student loans.

S. 3065

At the request of Mr. PRYOR, the names of the Senator from Arkansas (Mr. BUMPERS), and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of S. 3065, a bill to establish in the Department of State the position of Under Secretary of State for Agricultural Affairs.

S. 3071

At the request of Mr. DANFORTH, the names of the Senator from Massachusetts (Mr. KENNEDY), the Senator from Massachusetts (Mr. TSONGAS), the Senator from Maryland (Mr. SARBANES), the Senator from Michigan (Mr. RIEGLE), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Pennsylvania (Mr. SPECTER), the Senator from Rhode Island (Mr. PELL), the Senator from New Jersey (Mr. BRADLEY), the Senator from Ohio (Mr. METZENBAUM), the Senator from North Dakota (Mr. BURDICK), and the Senator from Minnesota (Mr. BOSCHWITZ) were added as cosponsors of S. 3071, a bill to increase the funding authorization for low-income home energy assistance.

SENATE JOINT RESOLUTION 215

At the request of Mr. HATCH, the name of the Senator from Alaska (Mr. MURKOWSKI) was added as a cosponsor of Senate Joint Resolution 215, a joint resolution to provide that the week beginning March 6, 1983 shall be designated as "Women's History Week."

SENATE JOINT RESOLUTION 263

At the request of Mr. THURMOND, the names of the Senator from Mississippi (Mr. STENNIS), the Senator from Alaska (Mr. STEVENS), the Senator from Idaho (Mr. SYMMS), and the Senator from West Virginia (Mr. RANDOLPH) were added as cosponsors of Senate Joint Resolution 263, a joint resolution to authorize the President to issue a proclamation designating the week beginning on March 13, 1983, as "National Surveyors Week."

SENATE JOINT RESOLUTION 265

At the request of Mr. DENTON, the name of the Senator from Minnesota (Mr. BOSCHWITZ) was added as a cosponsor of Senate Joint Resolution 265, a joint resolution to authorize and request the President to proclaim 1983 as the "National Year of Voluntarism."

SENATE CONCURRENT RESOLUTION 121

At the request of Mr. DOLE, the name of the Senator from Ohio (Mr. GLENN) was added as a cosponsor of Senate Concurrent Resolution 121, a concurrent resolution expressing the sense of the Congress that the United States should maintain Federal involvement in, and support for, the child nutrition programs, and for other purposes.

SENATE RESOLUTION 478

At the request of Mr. DODD, the name of the Senator from Maine (Mr. COHEN) was added as a cosponsor of Senate Resolution 478, a resolution expressing the sense of the Senate with respect to the need to maintain guidelines which insure equal rights with regard to education opportunity.

SENATE RESOLUTION 514—RELATING TO THE SOCIAL SECURITY DATA PROCESSING CENTER IN WILKES-BARRE, PENNSYLVANIA

Mr. STAFFORD, from the Committee on Environment and Public Works, reported the following original resolution, which was placed on the calendar:

S. RES. 514

Whereas the Data Processing Center of the Social Security Administration—located in Wilkes-Barre, Pennsylvania—has responsibility for processing and storing earnings information on millions of people in the American workforce, issuing Social Security number cards to the public, and responding to the public's requests for earnings information, as well as various other tasks, and

Whereas this crucial activity is housed in inadequate space and scattered in three locations which diminish efficiency and productivity, and

Whereas over the past eight years the Social Security Administration has unsuccessfully sought assistance for improved facilities from the General Services Administration, and

Whereas the General Services Administration's proposed solution is very expensive, not in the best interest of the Government, and recommended without adequate study of alternatives and options;

Now, therefore, be it resolved that it is the sense of the Senate that the United States Corps of Engineers shall, in consultation with the Social Security Administration, study the space needs of the Data Processing Center in Wilkes-Barre, Pennsylvania, together with comparison of alternative means of meeting such needs. Such study shall also include a survey of available sites and identification of any such sites that are unfortunately located on a flood plain. The Army Corps of Engineers shall report to the Senate its findings and recommendations as soon as practicable early in the first session of the 98th Congress; Be it further

Resolved, That it is the sense of the Senate that the U.S. Army Corps of Engineers shall, from time to time, study and report to the Committee on Environment and Public Works of the United States Senate on other public building matters as requested by said Committee.

AMENDMENTS SUBMITTED FOR PRINTING

SURFACE TRANSPORTATION ACT OF 1982

AMENDMENTS NOS. 4984 THROUGH 4991

(Ordered to be printed and to lie on the table.)

Mr. SPECTER submitted eight amendments intended to be proposed by him to the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

AMENDMENT NO. 4992

(Ordered to be printed and to lie on the table.)

Mr. DANFORTH (for himself, Mr. EAGLETON, Mr. KENNEDY, Mr. TSONGAS, Mr. SARBANES, Mr. RIEGLE, Mr. HEINZ, Mr. SPECTER, Mr. PELL, Mr. BRADLEY, Mr. METZENBAUM, Mr. BURDICK, and Mr. BOSCHWITZ) submitted an amendment intended to be proposed by him to the bill H.R. 6211, supra.

● Mr. DANFORTH. Mr. President, the winter heating season is upon us, and the need for an increase in funding for low-income energy assistance grows each day. It is the poor and the unemployed who have been hit the hardest by decontrol of energy prices and the skyrocketing price of natural gas. It is the poor and the unemployed who now face with greatest difficulty the burden of disproportionately high energy costs and the increased prospect of utility shutoffs.

Higher energy prices and rising unemployment have increased the need for low-income energy assistance, but we face a situation in which there has been no increase in available funds for this program. Indeed, even if we were to appropriate the full $1.875 billion presently authorized for this program in fiscal 1983, this sum would be less in real terms than the same amount provided for this program in 1982.

In response to the growing need for assistance, Senator EAGLETON and I have introduced S. 3071, legislation to increase the authorized funding level for low-income energy assistance in each of fiscal years 1983 and 1984. This legislation would raise the current authorization level from $1.875 billion to $2.5 billion for each year. This is an increase of one-third above the current level for fiscal 1983—an increase necessary to meet the enormous rise in natural gas and other energy prices over the past year, and to assure that the low-income energy assistance program will be able to meet the growing need for aid.

Mr. President, Senator EAGLETON and I intend to press for action on this legislation now, before the end of this lameduck session. We are prepared to offer this proposal as an amendment to other pending legislation sometime this week.

The urgent need for such immediate action is made clear by two newspaper articles that appeared over the weekend. The first, an article in yesterday's New York Times, states that due to increased energy costs and the current unemployment situation utility shutoffs are on the rise. This article indicated that as many as 300,000 households may face involuntary gas disconnection this heating season if there is no increase in low-income energy assistance to meet the growing need for help.

The second article, in Saturday's Washington Post, shows that the need for increased low-income energy assistance is not limited to the Midwest region of the country. According to this article, Virginia has closed its doors to new applicants for low-income energy assistance because it no longer has the money to help them; there has been a 25-percent increase in applications this year in Virginia, but the State's Federal allotment is not large enough to assist them.

Mr. President, I urge my colleagues to read these articles and I ask unanimous consent they be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 12, 1982]

UTILITY SHUT-OFFS REPORTED ON RISE

(By Iver Peterson)

TAYLOR, MICH., December 10.—Sharply rising prices for gas and electricity, cuts in welfare benefits and rising long-term unemployment are making more people than ever fall behind on their utility bills, leading to record numbers of utility shutoffs.

There will be 300,000 involuntary gas disconnections this heating season as against 260,000 last year, according to a survey of state public utility commissions and utilities by the Citizen/Labor Energy Coalition, a nonprofit consumer group.

"There's just a lot more people going into this winter without any fuel than we've ever had in the past," said Charles Hill, managing attorney for the National Consumer Law Center in Washington. "There's going to be a lot more people doubling up; there's going to be more people using their oven, and if this is a cold winter there's going to be a great number of people in a great deal of trouble."

Larry and Patricia Mae Harwood are already in trouble. The Detroit Edison man came last week and disconnected their electric hookup at the pole, causing the furnace to go off. By that evening their house was already cold; by the next morning it was near freezing. They have gone back to wearing long johns, piling up blankets, snuggling the grandchildren, Heather and Duane, between them in bed, and leaving the oven on all the time, all to try to keep warm in the deepening winter.

"I got behind on my rent, I didn't have food in the house, I was behind on my gas," Mr. Harwood said, "and I tried to pay a little on each one, but the money just wasn't there anymore, and finally they just shut off the lights."

The kind of problem being experienced by Mr. Harwood, a 39-year-old former welder who says his ulcers prevent him from working anymore, is especially severe, not surprisingly, in Northern states where the winters are colder and where the economic slump and high unemployment have left more people pinched for cash.

There are already 25,000 homes without heat or electricity in Ohio; over 9,300 homes have no gas in Detroit and the rest of the southeastern Michigan, and gas to 1,500 homes has been disconnected just in the west end of Louisville, Ky.

HEATING COSTS UP SHARPLY

In the New York metropolitan area, where the proportion of people living in apartments is much higher than in the Middle West, the problems of heatless winters are most often a result of landlord neglect because of the cost of heating oil, which has risen nearly a nickel a gallon over the last few months alone.

As for the urban homeowners, the city of Trenton, N.J., recently provided a typical report on their plight to the United States Conference of Mayors.

The report found a rising number of people in Trenton who could not afford weekly heating costs of $100 to $225 in the city's aging, uninsulated housing stock, yet earned too much to qualify for Federal home heating programs.

"Therefore, many families, particularly those facing unemployment, cannot afford heating," the Trenton report said.

RESTRAINING UTILITY SHUT-OFFS

States in this region are responding to the developing emergency of cold and dark homes by placing restraints on utility shutoffs. Ohio's Public Utilities Commission last week ordered a moratorium on utility shutoffs until April 1, and declared that any of the 25,000 homes currently without gas or electricity could be reconnected if the residents paid $200 toward their overdue bills.

Michigan's utilities are restrained from shutting off gas to elderly customers or to those on public assistance until next spring, although homes with services already shut off, like the Harwoods' in Detroit, are not covered by the ban.

The Federal Government's Low Income Home Energy Assistance Program exists to help people in such a bind, but its appropriation has not been increased this year to account for the expected increase in demands for help.

Luther Flanagan, director of the Metropolitan Wayne County Community Services Agency here in suburban Detroit, illustrated how increased demand around Michigan has affected his office's allotment from the Federal program.

"In 1978-79 we got $800,000 for the heating program and this year we will get $152,000," he said, "and look at what has happened to gas prices and unemployment in the meantime. We don't start processing applications until Monday and people are already trying to line up to apply. It's just tragic."

The fuel assistance money will not, in any case, be available for disbursement until the first of January.

UTILITIES FACE DILEMMA

For their part, utilities are hardly eager to cut off service to nonpaying customers, especially in winter time.

"We'd much rather keep them as a customer than shut them off and we work hard with them to get them on a program of pay-

ments that they can manage," said Richard W. Zimmin, vice president for public affairs at Michigan Consolidated Gas Company in Detroit.

Indeed, what blame consumer activists place on utilities this winter is not on their shut-off policies but on their gas purchasing agreements. Many utilities, including MichCon, as the Detroit utility is known, are bound by contracts that commit them to pay for a fixed amount of gas whether they actually use it or not.

These contracts have forced gas prices up 20 to 50 percent this winter, although demand is down and the utilities, if freed from these contract, could find cheaper fuel on the market.

A measure has been introduced in the current special session of Congress to release utilities from these clauses so they can shop for the least expensive gas they can find. In another effort to ease the plight of consumers, an amendment to the gasoline tax increase bill in the Senate has been proposed that would freeze or roll back natural gas prices.

But for Larry and Patricia Harwood, the parents of two teen-agers, gas is not the problem. As recipients of Aid to Families with Dependent Children for the custody of their two grandchildren, their gas is protected against cut-off, regardless of the $312.56 they owe MichCon.

Electricity, however, is a different matter. There is no ban on electricity shut-offs, and without electricity their forced-air furnace will not operate.

When Detroit Edison first turned their power off at the meter last week, "we froze for four days and then I turned it back on myself," said Mr. Harwood. "It's not that hard to do. I hear a lot of people are doing it. But now they've turned it off at the pole, and they want $175 just to reconnect it. And where am I going to get $175?"

[From the Washington Post, Dec. 11, 1982]

100,000 COULD LOSE FUEL AID IN VIRGINIA

(By Michael Isikoff)

RICHMOND, December 10—Virginia's fuel assistance program, which has subsidized the heating bills of low-income residents for the past four winters, closed its doors to new applicants today because the state no longer has enough money to help them.

The action, coming on the eve of winter, means that as many as 35,000 qualified households, or more than 100,000 people, could lose fuel aid payments of up to $700 a household, state officials said. Some of the most severely affected may receive special one-time "emergency" payments of $150, although the standards for eligibility will be far stricter.

"We've had so many people apply that we basically ran out of money," said Richard Martin, Department of Social Services spokesman.

Today's action, which caught local welfare officials off guard, was forced by a 25 percent jump in applications this year, apparently caused by higher unemployment. Since the program opened its doors Nov. 1, the state had processed so many applications that its entire $28 million federally funded allotment was gone. The state had originally intended to take applications through March 31.

"This could be real serious," said James Dimitri, a staff attorney with the Virginia Poverty Law Center in Richmond. "I think you could see people forced out of their homes. The elderly will be particularly affected. . . . You can imagine some people in a situation where they're not going to have any place to turn."

Most Northern Virginia officials, however, were reluctant to predict the severity of the problem other than acknowledging that hundreds of eligible households will be deprived assistance. Verdia Haywood, deputy Fairfax County executive for human services, estimated that more than half of the 1,100 to 1,400 households he expected to serve this year will be affected.

"It's really too early to tell how serious this is going to be," Haywood said. "Obviously weather conditions are going to be a factor."

In the event there is a harsh winter, the ability of the state's emergency program to help pay heating costs will be limited. Standards for qualifying for the emergency funds are also more restrictive. Under the regular program, recipients could have up to $1,500 in the bank. Under the emergency program, they can have $500.

Payments from the state's $3 million emergency aid fund also will be made only to persons who are out of fuel or who have received a cut-off notice from suppliers.

"We're going to be facing the whole question of what to do with people in January or February who need assistance but don't qualify for the emergency program or, if they do, what to do if the emergency payments aren't enough," said Douglas Smarte, the fuel assistance administrator in Arlington.

Although created by Congress and funded by federal grants, the low-income fuel aid program is administered by each state. In Virginia, eligibility is determined by a formula that considers income, geographic location and type of heating fuel. A family of four in Northern Virginia can earn up to $13,950 and still be eligible.

Last year, the program subsidized the fuel bills of slightly more than 100,000 families with payments averaging $240 each. In most cases, the payments were made directly to the fuel supplier.

This year, although overall funding remained the same, the state has limited assistance to about 90,000 households, because the average payment jumped to $320, primarily because of more applications from the jobless. Most of the increase has come from those areas with high unemployment, such as the state's far southwest.

"It looks as though the people who are applying have less money," said Martin. He said a total of 3,785 Northern Virginia households received payments under the program last year, though no figures are available on the number of Northern Virginia households that will receive benefits this year.●

SUSPENSION OF CERTAIN DUTIES

AMENDMENT NO. 4993

(Ordered to be printed and to lie on the table.)

Mr. COCHRAN submitted an amendment intended to be proposed by him to the bill (H.R. 4566) to reduce existing duties, to suspend temporarily certain duties, to extend existing suspensions of duties, and for other purposes.

SURFACE TRANSPORTATION ACT OF 1982

AMENDMENT NO. 4994

(Ordered to be printed and to lie on the table.)

Mr. HEFLIN submitted an amendment intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENT NO. 4995

(Ordered to be printed and to lie on the table.)

Mr. CRANSTON (for himself, Mr. MATHIAS, Mr. KENNEDY, Mr. INOUYE, Mr. DODD, Mr. PELL, Mr. PRESSLER, Mr. MATSUNAGA, Mr. METZENBAUM, Mr. RIEGLE, Mr. BAUCUS, Mr. EAGLETON, Mr. PRYOR, Mr. PROXMIRE, and Mr. MELCHER) submitted an amendment intended to be proposed by them to the bill H.R. 6211, supra.

AMENDMENT NO. 4996

(Ordered to be printed and to lie on the table.)

Mr. DANFORTH (for himself, Mr. EAGLETON, Mr. SARBANES, Mr. RIEGLE, Mr. DIXON, and Mr. BOSCHWITZ) submitted an amendment intended to be proposed by them to the bill H.R. 6211, supra.

AMENDMENT NO. 4997

(Ordered to be printed and to lie on the table.)

Mr. BOSCHWITZ submitted an amendment intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENT NO. 4998

(Ordered to be printed.)

Mr. BAKER (for himself, Mr. DOLE, Mr. STAFFORD, Mr. GARN, and Mr. PACKWOOD) proposed an amendment to the bill H.R. 6211, supra.

AMENDMENT NO. 5006

(Ordered to be printed and lie on the table.)

Mr. SARBANES submitted an amendment intended to be proposed by him to the amendment prepared by Mr. BAKER No. 4998 to the bill H.R. 6211, supra.

AMENDMENT NO. 5007

(Ordered to be printed and lie on the table.)

Mr. HEFLIN submitted an amendment intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENT NO. 5008

(Ordered to be printed.)

Mr. METZENBAUM (for himself, Mr. ROBERT C. BYRD, Mr. RIEGLE, Mr. HUDDLESTON, Mr. SASSER, and Mr. RANDOLPH) proposed an amendment to the amendment No. 4998 proposed by Mr. BAKER to the bill H.R. 6211.

AMENDMENTS NOS. 5009 AND 5010

(Ordered to be printed and to lie on the table.)

Mr. NICKLES submitted two amendments intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENT NO. 5011

(Ordered to be printed and to lie on the table.)

Mr. CRANSTON (for himself and Mr. RIEGLE) submitted an amendment intended to be proposed by them to the amendment No. 4998 prepared by Mr. BAKER to the bill H.R. 6211, supra.

MEETING THE TRANSIT NEEDS OF HANDICAPPED AND ELDERLY PERSONS

Mr. CRANSTON. Mr. President, I submit for printing a germane amendment to the pending Baker amendment and ask unanimous consent that the text of the amendment be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, this amendment, which is cosponsored by the distinguished ranking minority member of the Banking Committee (Mr. RIEGLE), is designed to provide for fair and equitable treatment of handicapped and elderly persons in the context of our Nation's public mass transit systems. Specifically, this amendment would authorize—authorize but not require—the Secretary of Transportation to set aside for handicapped and elderly transit purposes 3.5 percent of transit capital infrastructure program funding. This is the same percentage that the Secretary may, under the Baker amendment, set aside for that purpose out of discretionary capital assistance funding under section 4(a)(3)(A) of the Urban Mass Transit Act as it is proposed to be amended.

Second, our amendment would require the Secretary of Transportation to issue regulations establishing criteria for handicapped and elderly transportation services under section 16 of UMTA—which declares national policy regarding mass transit services for handicapped and elderly persons—and section 504 of the Rehabilitation Act of 1973—which prohibits discrimination against handicapped persons in federally assisted programs.

Mr. President, if the Congress is going to provide a multiyear extension of the mass transit program and if the Congress is going to levy a 5-cent gas tax, with a portion of those revenues dedicated to the transit capital infrastructure, I believe we should adopt this amendment to help assure that the transportation needs of our Nation's handicapped and elderly citizens receive a modicum of fair treatment under these programs.

Mr. President, I have long been deeply concerned that federally assisted transit systems must deal fairly and adequately with handicapped and elderly citizens. Ultimately and ideally, I believe that transit systems should be fully accessible to handicapped and elderly persons, including those who must use wheelchairs. However, I recognize that it is not now feasible to gain approval of legislation that would provide a full guarantee of eventual accessibility.

On the other hand, I am convinced that the current situation is most unsatisfactory and that we should not leave it unchanged. On July 20 of last year, the Secretary of Transportation rescinded regulations that had been promulgated under section 504 of the Rehabilitation Act of 1973 and related statutes and that set forth specific standards by which federally assisted transit systems would be required to move closer to full accessibility. In place of those regulations, the Secretary issued an interim rule that requires only that federally assisted systems certify themselves—subject to no Transportation Department monitoring—that they are making so-called special efforts, and that establishes no national standards or criteria by which those efforts are to be gaged.

This local-option, self-certification, self-policing process is no more than a "paper-game" farce. It is not even a "paper tiger." It is a "paper kitten."

In essence, these regulations are a total abdication of Federal responsibility for protecting handicapped persons from discrimination and inadequate service.

Indeed, the Department of Transportation came close to recognizing this fact when, on January 13 of this year, it published a Federal Register notice indicating that its interim final rule was being considered. In that notice—published some 6 months after the interim rule—the Department stated that the disadvantages of the interim rule's approach "are that it leaves some transit operators unsure of what they should do and that it may permit some transit operators to make minimal transportation services available to handicapped persons." In addition, the Department noted that "without any substantive Federal criteria, the quality of transportation services offered to handicapped persons might be inconsistent or quite low in some areas."

That is the Department of Transportation talking, not me.

I believe it is clear that the reservations expressed by the Department about its own approach are understatements of the problem. On January 27 of this year, four other members of the Banking Committee and I asked the Comptroller General of the United States to conduct a survey of transit services under the interim regulation. Although the survey had to be done quickly in order for the results to be available in time for the committee's consideration of the transit bill last spring—and the GAO noted that the results may not be valid nationwide—I believe that report is very valuable and presents some very disturbing information regarding the effects of the interim rule. The survey covered 84 transit systems in 33 States and the District of Columbia, and the data came from the transit operators themselves.

The survey data showed that of the 83 systems surveyed that provided bus service, only 30 now intend to have 50 percent or more of their buses lift equipped.

Nineteen systems that had ordered lift-equipped buses before July 20, 1981, canceled their orders for lifts after the interim regulations were issued. A total of 707 new buses were thus rendered inaccessible almost overnight.

Of the 35 systems that had placed new orders for buses after July 20, 1981, 15 ordered not a single lift-equipped bus.

These statistics show an unmistakable, sharp backing off from the provision of accessible bus service.

Are there countervailing data showing that what handicapped persons are losing in the way of accessible bus service is being made up in useful paratransit services—so-called demand-responsive services? Clearly not. The GAO report data on paratransit services shows that of the 84 systems surveyed, only 66 offer any paratransit service; and of those 66, 22 have waiting lists of people who want to use the service for daily commutes; 61 require 24 or more hours advance notice; 38 set service priorities by trip purpose; and only 6 could say that they don't deny requests for service.

Compared to the bus service that these 66 systems operated, the paratransit service hours of operation were shorter in 45 systems; paratransit services were operated fewer days of the week by 35 systems; and the geographic area covered by paratransit services were less extensive in 15 cases. Incredibly, in the cases of 20 systems, over 25 percent of their paratransit vehicles are not accessible to people in wheelchairs—and in 11 systems more than half of their paratransit vehicles are not accessible.

Mr. President, I want to emphasize that these data came from the transit operators themselves in the context of a GAO survey. Thus, it is fair to say that they accurately reflect the situation and are not skewed against the transit systems.

Also, earlier this fall I asked that a check be made as to whether these data continue to reflect the current situation. As a result, GAO accomplished a limited followup on its earlier survey and, in a November 30 letter to me, stated that it had "found that very few changes had been made in the characteristics of the transit systems' special transportation services since April."

Mr. President, the GAO also reported in April that, since the time that the local-option approach had been adopted in the interim rule, the Department has done very little to administer that rule and has provided almost no guidance or assistance to transit system operators regarding the requirements of the rule; and that UMTA regional and headquarters officials planned no active monitoring of transit operators to determine compliance. The GAO also pointed out that only those complaints alleging a consistent pattern of failure to make special efforts will be investigated by the Department's Office of Civil Rights.

These GAO findings clearly indicate a most unfortunate situation in which the Department of Transportation's hands-off, local-option, self-certification, no-monitoring, and no-criteria position is transforming the antidiscrimination laws into hollow congressional symbols. And it is not just that accessible bus service is fast becoming a lost hope in many parts of the country; the special services—paratransit—for handicapped persons are proving to be unsatisfactory. Just imagine, if you need to use a wheelchair, the enormous barriers you would face in using those services as others use the bus or subway. If you need transportation to get to a new job, you may lose that job because you have been put on a paratransit waiting list. If you need to get to a medical clinic or doctor's office, even if you have given more than 24 hours' notice, you might be turned down because the paratransit service has insufficient capacity. If you used a paratransit service to get to a Government office to conduct business, you may learn upon arrival that despite what you had been told by phone or letter, you need to go to another office a few miles away in addition to or instead of where you had gone. Obviously, in most places, you cannot use the paratransit service to complete your business that day or even the next; you have got to go back home and make a new request with a day or more advance notice.

The present course is clearly not the answer. Not only are we headed toward affording handicapped and elderly persons third-class treatment, but we are frustrating our own efforts to rehabilitate people, help them get back into productive activities, be more independent, and get off of disability and welfare rolls. Mobility is certainly critical to these efforts, and it is a tragic waste to fund vocational rehabilitation programs and then frustrate those rehabilitation efforts by failing to insure that we continue to make progress in enabling disabled persons to find and to get to and from work.

In this amendment, I am not proposing an enormously costly burden for transit systems or requiring an immediate return to the controversial, tough standards that were in place before July of 1981.

I do believe, however, that it is essential that we turn the system around and get back on the right track. My amendment would deal in a modest fashion with some of the major problems that the GAO report identified and that the Department of Transportation has acknowledged. The four parts of our amendment are as follows:

First, it would require the Secretary to establish national criteria for providing handicapped and elderly persons with comparable, usable transportation services. In this regard, I would note that the Secretary would have broad discretion to formulate those criteria, and I'm not sure that I or many others deeply concerned about these issues would necessarily be satisfied with the criteria that the Secretary would develop. But I believe it is even less productive to have regulations implementing section 504 and UMTA section 16 that set no minimum standards, no bottom lines.

How can we have declarations of national policy, as we do in UMTA, that elderly and handicapped persons have the same right as other persons to use mass transit services and that special efforts shall be made in the planning and design of those services so that the availability to elderly and handicapped persons of services they can use will be assured and, at the same time, condone Federal regulations saying that federally assisted programs have no specific obligations other than to file a piece of paper—subject to no verification—simply stating they are making special efforts?

Second, our amendment would require the Secretary to establish some procedures for the Department to monitor and insure compliance with the criteria he would establish. The situation disclosed by the GAO report is totally unacceptable from the standpoint of the Department's current attitude and inactivity with respect to monitoring what services are being provided.

Third, should not any flexible system that leaves considerable discretion to local transit operators assure that representative organizations of handicapped and elderly persons will have meaningful opportunities to participate in the process of planning and carrying out the services to meet their needs? The GAO report indicated that this consultative process is not adequate. Our amendment would help give these groups an opportunity on the local level to make their needs known and to be consulted on how they are to be met.

Fourth, recognizing that the proposed gas tax would provide a new source of funding for transit capital improvements, this amendment would authorize—but not require—the Secretary of Transportation to set aside a modest portion of that new funding for capital improvements specifically for the purpose of enabling the needs of elderly and handicapped persons to be met. In this connection, I urge my colleagues to keep in mind that, as the GAO report shows, transit services for handicapped and elderly persons are in very bad shape in some localities. These funds could be well spent to help correct that situation.

In view of the nonavailability of mass transit services for handicapped persons, many of them are forced to rely on private automobiles and taxicabs. Thus, they will be paying the new gas tax—directly or indirectly. Isn't it only fair that some of these revenues be dedicated to meeting their needs?

Let's not literally leave these deserving individuals behind. Through the adoption of this amendment, we can show them that the Senate cares about their needs and is willing to make some provision for helping to meet them.

In summary, our amendment would deal with four vital aspects of handicapped and elderly transportation issues while still retaining the philosophy of granting broad discretion to local systems in the design and implementation of their programs. It would provide disabled and elderly persons with some fairness, some participation in the process, some Federal accountability, and an opportunity to share in some of the new tax revenues they must pay. It would leave great flexibil-

ity to the Secretary of Transportation to set the criteria and establish procedures for monitoring. But it would not permit the Federal Government to shed entirely its responsibilities—to abandon vast numbers of physically impaired persons to a future like the past they have known—one in which they were excluded, as no citizen should be, from the mainstream of our society and the opportunities that adequate transit services can and should open up for them.

I urge my colleagues to support this amendment.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 5011

The amendment of Mr. Baker is amended as follows:

On page 133, lines 6 and 7, strike out the comma and "3.5 per centum'." and insert in lieu thereof "and section 314 of the Federal Public Transportation Act of 1982, 3.5 per centum', and by adding at the end of the following new paragraph:

"'In carrying out subsection (a) of this section, section 165(b) of the Federal-Aid Highway Act of 1973, and section 504 of the Rehabiliation Act of 1973, the Secretary, not later than 90 days after the date of the enactment of this paragraph, shall publish in the Federal Register for public comment, proposed regulations and, not later than 180 days after the date of such enactment, shall promulgate final regulations, establishing (A) minimum criteria for each recipient of Federal financial assistance under this Act or the Federal-Aid Highway Act of 1973 to provide handicapped and elderly individuals with transportation services that such individuals can use and that are the same as or comparable to those which such recipient provides to the general public, and (B) procedures for the Secretary to monitor and ensure compliance with such criteria. Such regulations shall include provisions for ensuring that organizations and groups representing such individuals are fully consulted by such recipients in the process of determining and carrying out actions to provide such transportation services to such individuals.'".

AMENDMENT NO. 5012

(Ordered to be printed and lie on the table.)

Mr. CRANSTON (for himself and Mr. HAYAKAWA) submitted an amendment intended to be proposed by them to the amendment No. 4998 to the bill H.R. 6211, supra.

AUTHORITIES FOR COMMITTEES TO MEET

SUBCOMMITTEE ON PUBLIC LANDS AND RESERVED WATER

Mr. McCLURE. Mr. President, I ask unanimous consent that the Subcommittee on Public Lands and Reserved Water, of the Committee on Energy and Natural Resources, be authorized to meet during the session of the Senate on Tuesday, December 14, at 2 p.m., to hold a hearing on S. 2811, a bill to extend the restriction of water resources project construction for 1 year on the Tuolumne River, Calif.; and S. 3060, a bill to amend section 7(b) of the Wild and Scenic Rivers Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENT

UNJUST REMOVALS FROM DISABILITY ROLLS

● Mr. LEVIN. Mr. President, I would again like to call the attention of my colleagues to the unnecessary hardships which title II social security beneficiaries are forced to endure under the continuing disability review process.

Every day I learn of additional severely disabled Americans who have been unjustly removed from the disability rolls, only to have their benefits reinstated after a lengthy and time-consuming appeals process. During the appeal, these disabled persons receive no benefits. Consequently, many must exhaust their life savings in order to survive from the time their benefits have been terminated, until the time that they are reinstated by an administrative law judge.

Mrs. Antoinette Bates, of Bogalusa, La., lost her house and car after losing disability benefits for herself, and her two daughters, Elena, 11, and, Andrea, 9. In order to survive, Mrs. Bates and her family were forced to move to California to live with relatives.

Mrs. Bates was placed on social security disability in June 1969. Her condition was a subluxation of the hip, (congenital hip deformity). Since that time, Mrs. Bates has been diagnosed as suffering from scoliosis, cholitis, and cervical cancer. At first, Mrs. Bates was able to walk with the help of crutches, but now she is confined to a wheelchair.

On May 3, 1982, Mrs. Bates' social security benefits were terminated. At this time, she was in the hospital being considered for a total hip replacement. Social security terminated her benefits due to, what they considered, "a lack of an adequate medical workup," but had not even directed Mrs. Bates to undergo a consultative examination.

On September 22, 1982, an administrative law judge overturned the termination of Mrs. Bates' benefits on the basis of her medical record alone. He saw no need for a hearing, given the evidence already in her case file. Her disability was that obvious.

Although the decision to reinstate her benefits was made over 2 months ago, Mrs. Bates has yet to receive a check from the Social Security Administration.

Mr. President, the way in which these reviews are being conducted and the injustices that result are a disgrace to this country. Our disabled former workers deserve better than this. It is critical that Congress pass legislations in this lameduck session to remedy this outrageous situation. That is why I urge the House to give prompt consideration to H.R. 7093, which passed the Senate last Friday, so that legislation can be approved by the Congress before we recess.●

SOCIAL SECURITY DISABILITY REFORM

● Mr. HEINZ. Mr. President, a vexing problem continues to plague us as legislators as well as thousands of individuals who are social security disability insurance beneficiaries. Too many benefits are being terminated for too little cause. This body has now approved emergency legislation to alleviate the most egregious errors in the system, while a comprehensive approach to disability review procedural reform is being worked out. Although the bill is not perfect, the House can enact the perfecting amendments, as the following editorial from the Philadelphia Inquirer recommended on December 8. This issue must be resolved during the lameduck session and the emergency legislation sent to the President before we adjourn.

I ask that the editorial from the Philadelphia Inquirer be printed in the RECORD.

The editorial follows:

[From the Philadelphia Inquirer, Dec. 8, 1982]

PROTECT RIGHTS OF DISABLED

The "horror stories" (as Sen. John Heinz called them) kept coming out. There was the 47-year-old man with heart disease, who, six months after the Social Security Administration declared him no longer eligible for disability benefits because he was fit for work, died of a heart attack.

There was the 45-year-old woman who, about to be advised by the Social Security Administration that she could work even though she had two types of cancer, died of cancer two days before the notice was mailed.

There were several such cases of people who, as Sen. Heinz put it, appeared to have died of the very disabilities which SSA believed were not sufficiently serious to keep them from working. There were other cases of people who committed suicide when their disability benefits were cut off.

Yet these were only the spectacular horror stories. There is another. In its zeal to save money, the SSA has been cutting people off the rolls first, on the basis of evaluations of paper rather than of the people themselves, and then allowing them to appeal—shooting first and asking questions later—and it has been reversed on appeal in two-thirds of the cases.

Meanwhile, the people are without income. That, in most cases, doesn't save money. It simply transfers costs from the federal program to welfare programs at the state level.

The SSA has insisted that its procedures have been in accord with the law, but the results plainly were not the intent of Congress in requiring a review of disability cases.

Now the Senate has passed legislation designed to protect the rights of individuals receiving disability benefits, pending a more comprehensive look at disability in the next session. The bipartisan bill would no longer require a review every three years of every one of the nearly three million cases of "nonpermanent" disabilities. It would continue benefits during appeal until an administrative law judge makes a decision based on a hearing at which the claimant is present.

At the last minute, Sen. Russell B. Long (D, La) tagged on an amendment that would allow benefits to be taken away even though there is no medical evidence of improvement in the claimant's condition. The House Ways and Means Committee ought to remove the Long amendment before sending the bill to the floor, where the House should approve it before adjournment.●

OUR COUNTRY'S HEALTH SYSTEM

● Mr. DURENBERGER. Mr. President, on October 23, 1982, Irving Shapiro delivered an address marking the 100th anniversary of Abbott Northwestern Hospital in Minneapolis, Minn. Mr. Shapiro recently retired as chief executive of E. I. du Pont de Nemours & Co., and he now practices law and serves as chairman of Du Pont's Finance Committee.

In his speech, Mr. Shapiro demonstrates remarkable insight into the workings and problems of our country's health system. He paints a painfully clear picture of the choices that face us. Without greater involvement by the private sector, without a realining of financial incentives and, without leadership from within the health professions, we will be left with an overregulated, inefficient, two-tiered system of health care which is expensive and serves no one well.

Mr. Shapiro's speech has already attracted national attention. It deserves to be read and reread, for it is clearly one of the most thoughtful discourses on health to appear in a long time. I urge my colleagues and my fellow Americans to read it carefully. I ask that it be printed in the RECORD.

The speech follows:

HEALTH CARE, THE PRICE OF SUCCESS

Health care has become a right in our society. There is no longer a question that an individual who is seriously ill or badly injured is entitled to reasonable medical care, whether able to pay for it or not. The questions are all of degree: How sick? How badly hurt? How much care?

We ought to be proud of the fact that we do look upon this as a right and not a privilege that could be withheld. It fits our sense of community and our constellation of values. It goes well with the notion that a society can fairly be judged by the way it treats its neediest and most vulnerable citizens.

It is also a compliment of a high order to the professionals dispensing health care and to the enormous supporting cast working with them. Included are prople in research, medical education, and health management; the people who produce pharmaceuticals, diagnostic tools and other goods or services for health care; and the unsung people who caused the hospitals and nursing homes to be built.

The occasion of the centennial of a hospital as renowned as Abbott Northwestern is an appropriate time to remind ourselves that the nation has a high quality health care system, a work of many decades and countless sacrifices. It is only because so many people have done their work well that society has the luxury of regarding health care as a right. Not incidentally, this is also a tribute to an economic system that pays the bills and gives us the ability to deliver on this kind of social contract.

Success has a price, though, and the price is going up. As we are continually reminded, health care costs have been rising more rapidly than the rate of inflation, and more rapidly than the average individual's disposable income. The national health care bill is about $300 billion and represents close to 10 percent of the gross national product. It was about 5 percent a quarter century ago.

To put this in perspective, there has been a great deal of public attention to national defense and to the Federal budget increases this year, but the nation spends tens of billions more for health care than for defense. Consider the money going to some other programs where the Federal Government is an important factor though not the only one: pollution control, education, housing, community development, transportation, energy programs, and international affairs. The Federal spending on health care alone is nearly as great as the Federal support for all those areas put together. By any measure, health care is a gigantic societal commitment.

Unless the trend line is changed, health care costs will continue to rise faster than the nation's economy. One driving factor is the increasing number of people age 65 and over. Understandably, older people have a disproportionately large call on medical help. The elderly now account for about 11 percent of the population but demand almost 30 percent of all health care resources. Partly for that reason, medicare and medicaid expenses, which more than doubled in the past five years (to $73 billion in 1981), will double again by 1986, absent major changes in programs.

Given those numbers and their implications, I would argue for two points:

First, we must rearrange the incentives within the system. The way it is set up now is topsy turvey. All the logic is to spend more without sufficient concern for how much good it does. The payment system was designed to favor cure but not prevention. It rewards professionals for providing more services, but provides no rewards for exercising constraint. If we do nothing else to change health care services in the next decade, we should reverse the incentives to give the individual a direct stake in cost containment.

We have passed the time when it makes sense to have rules which permit an individual to be compensated if his problem is attended to in a hospital, but deny payment if the problem is solved, probably at lower cost, through home care. It is also time to challenge payment schemes which make the elderly more dependent on nursing homes than some of them need to be, and give no incentive for sheltered living arrangements that fall short of full nursing.

We have to be clear about our objectives. What counts is the outcome as measured by the health of people, not the amount of medical or nursing service provided. The two are not the same, or always correlated.

Second, we must recognize that problems associated with health care are societal in nature and cannot be solved within the health care industry alone. All major groups in society should help to set the priorities and manage this national resource better. Unless all of us do participate, the reform efforts are likely to center on details instead of the larger issues.

There is concern now about the Federal role, as well as there should be. Medicare, like the Social Security system, is going to run out of money. Something must be done, and the Federal Government has recently taken action to constrain its future spending. Unless the economy moves and gets at the heart of the problem, though, the burdens will fall unfairly on the poor and the elderly, or simply be dumped on other segments of society. The question of equity for the needy must be addressed with compassion and wisdom, or we will have broken faith with ourselves. Should that happen, there probably will be renewed pressure for a national health insurance scheme. That would be the worst of all possible solutions but it is not beyond inagining politically.

In a longer time frame, it is not the Federal Government but the private sector that is in the best position to provide the lead in improving the health care system. The most underused tool of all is the private corporations which pay for all or most of the medical expenses of their employees. It is time for more of those companies to become active, to demand more for what they are buying, and to change some of their own habits that keep the system running in its old ruts. On their own and in cooperation with others, corporations should be promoting alternative systems for delivery and payment, encouraging conservative health care practices, educating their employees to the need for changes (they have a large stake in this, too) and developing other programs that relate to cost containment and utilization of services.

Recently, through the Business Roundtable, more than 160 large corporations have agreed to try some additional steps along this line. Throughout the country, local and regional health care coalitions have sprung up in recent years, usually with business' help. Minnesota's example is a good one. Those are steps forward, but many companies are still at the handwringing stage. What is needed from them is informed action. What is needed as well is support throughout the private sector for changes in laws and regulations to take physicians and nurses off the defensive when they do call for less than maximum intervention.

In terms of health care costs, there is not much doubt about the villain of the piece. It is not the medical technology in the hospitals that is responsible for the cost runups. Properly applied, technology can reduce costs. It can make diagnosis more efficient and the management of treatment more effective. Nor is it the poor on public assistance who are responsible for most of the increase in the overall health bill. Medicaid, the program for the needy, is unquestionably expensive—well over $30 billion in this fiscal year—but even so, it is only 11 percent of all health care costs. Large savings in costs in the future cannot be achieved by squeezing the neediest 10 percent of the population.

The unit to be dealt with is the middle-income majority covered by private or governmental health insurance programs, mostly through arrangements which reimburse doctors, hospitals, and nursing homes

for whatever services they perform, and usually covering the patient from the first dollar onward. That is where the money goes—two-thirds of that $300 billion.

There is nothing to gain by blaming the doctors. To be sure, they are the people who order the services that can be costly, but as one physician said in a recent issue of a Massachusetts medical journal, blaming them for the high cost of medical care is like blaming the pilot for the cost of the airplane fuel. It is a loose analogy but not a bad one. People want to go coast to coast in a hurry, and the price of that is 747 plus 60 tons of jet fuel. Many people want the equivalent of 747 health care. Doctors and nurses try to oblige them, and for that they deserve no blame.

The difference is with us, the passengers. When we fly we pay; but when most of us call on medical service, the system makes it appear that somebody else is paying for the tickets. It is this that has helped to double the intensity of use of health care facilities in the past dozen years or so, and increased the number of physicians and (more dramatically) the number of other people working in hospitals and nursing homes (the two institutions together account for nearly one-half of all health care spending). The question is not whether all this medical attention is a social good. It does help people. The question is whether the present system encourages the wisest and most prudent use of resources; and the answer has to be, "No."

There is also an element of business responsibility here. After all, there are still many private health care plans that will reimburse patients only if they are admitted to hospitals, and not if they are treated in doctors' offices. Where would you want to go for treatment in that situation?

Enough of finger pointing. To drag out the old line from Pogo, we have met the enemy and he is us. Nothing much else will happen that is good unless this is acknowledged, and the incentives are turned in favor of more careful, personal stewardship by each of us.

There is no magic number for health care that is right and proper. Is 10 percent of GNP too much or too little? Who knows? It all depends on one's sense of the scale of unfilled needs at a point in time, and on a judgment about the competing claims for the same dollars. Suppose we did cut back on health care spending. Where would we put the billions of dollars we saved, and would the outcome be better or worse for the country?

Like any numbers game that has to be played in the real world, this one is loaded with subjectivity, not to say politics. One man's expense in the health care world is another man's income—and this is a people-intensive field. What strikes an observer as wasteful might seem no more than necessary care if he or she were the patient. Perhaps the only way to deal with this is to accept 10 percent of GNP as a given—no one is able to change it much in the short range anyway—and let the burden of finding a better target fall on others: If someone wants to argue for a substantially lower or higher health care spending rate, let him show how and why that would help society.

What deserves more attention than a specific figure is the general question of limits. The success of medical science presents us with policy decisions not encountered before, now unavoidable. On one side stands an ethic that says that the ideal health care system delivers everything that will be helpful to everyone who can be helped by it. That has been the target if not always the accomplishment, and the present entitlement system was set up accordingly. Opposite that is the fact that medicine can do things today it could not do in the past, and the list of those things grows constantly. Looking at future possibilities, many people would rate it a bargain if the health care bill could be kept from growing larger than the 10 percent figure.

The old ideal and modern reality cannot coexist. An endless supply of money cannot be assumed, and a displacement or resources from other worthwhile social objectives cannot be ignored.

We are driven toward uncomfortable options. Do we impose a lid on services through some public mechanism—kidney dialysis and open-heart surgery only to age 65 but not beyond? Do we withhold life-support measures for the terminally ill or the seriously handicapped? What about infant care? Medicine can now save many babies born very prematurely, but those babies may well need much more than average amounts of medical care throughout their lives. Are we to deny them life because they were born much to soon?

Consider some less emotional questions. Should we put a cap on the fees hospitals and mursing homes may charge—and thus in effect impose wage and salary controls on the segment of the population working therein? Do we put new constraints on the time doctors may spend on their patients, and thus interpose more strangers into relationships we like to think of as personal? Is not medicine too impersonal already? Do we toss out the whole system as it stands, with its mixture of private and public funding, and replace it with a nationalized health structure?

I exaggerate for emphasis. Some of the proposals sound mean-spirited. There are other, less harsh options. Surely society does not intend to send to the scrap heap people who are helpless or inconveniently expensive. Nonetheless, we are forced to make choices, because there is no believable scenario for providing everybody with literally every kind of health care that might do some good.

One way out of that box is to search for an amended charter, one that deals with the attainable and is still deserving of public support. What I believe we are striving for is not a system that tries to promise everything for everybody, but one that assures access to necessary health care for all who are in genuine need (the operative word is "necessary"). It also should be a system that retains options for special attention (above and beyond medical necessity) to those who are willing to pay their own money for the luxury of Cadillac medical services.

An amended charter need not and should not mean that the indigent should have to suffer catastrophe before they become eligible for help. Nor does it mean that the 90 percent of the population protected by health plans can line up for every service imaginable. It implies some screens based on the demonstrated values of various procedures, and it assumes sound advice based on agreement among professionals as to what ought to be done, and when. It implies, unavoidably, some risks—which is why we need some changes in the law and medical governance, to constrain what could be an endless amount of second-guessing.

"Take two aspirin and call me in the morning."

"Surgery now, without delay."

"One more day in the hospital and two weeks in bed."

Only those with appropriate training can pretend to know whether those are responsible prescriptions in given situations. Physicians confess that they are not always of one mind on such matters. They admit they may do more than needed, simply to cover their flanks. That is one of the problems. However, their disagreements cannot be allowed to stand as permanent impediments to change in the system. If the professionals cannot arrive at consensus standards at least in a great majority of cases, and if we cannot arrive at ground rules that protect them from unwarranted disciplinary action or lawsuits, then society is left with a system lacking internal restraint. "Do it all" becomes the fallback position.

Part of the solution has been suggested by medical professionals themselves, in their finding that for most people most of the time, the benefits of medical care taper off rapidly after the amount of care passes a certain level. The curve goes flat, or nearly so. We have it on their own testimony that in some instances additional medication or service cannot be shown either to speed a patient's recovery or to make a measurable difference in his or her eventual health. It may even be counterproductive. Such a finding can only be taken as good news by all concerned with health care problems, for it lends support to the notion that limits can be set without doing harm to people. In other words, it is possible to seek cost containment with a clear conscience.

To a layman, the decisions at the margins look easy. More medication, more tests, more surgery, more nursing care—these are sure to cost more money. If there is no good evidence that they promote better health, don't do them.

It is appreciated that to the professional the decisions may not seem so simple. A variety of other factors intrude—institutional, financial, and ethical, not to mention the psychological makeup of patients. It is hardly a surprise that doctors and nurses are inclined to err on the side of caution. They have some tough calls to make.

It is not too much to hope, though, that we can define the mission such that those calls are based on medical judgment and not on factors that ought to be extraneous. It is hard to defend a system that encourages hospitalization, or increases the prices that hospitals charge for certain services—for example, the prescriptions dispensed by the hospital pharmacy—because that is the only way doctors and patients can get a third party to pay the bill, or because that is a way to cover a deficit caused by an underpayment in some other account.

As a society we are at one of those turning points where we know what the problem is, we feel some urgency about it, but all the simpler solutions can be seen, in H. L. Mencken's phrase, to be "neat, plausible, and wrong."

The first among these, national health insurance, qualifies as the leading idea whose time has come and gone, or should have. A decade or more ago it commanded a large following, but on the merits there is little to say for it. Other nations have now accumulated considerable experience with it, and left us with no reason to believe that a comprehensive, government-managed health service in the U.S. would do otherwise than reduce quality and increase costs. Judging from some governmental welfare, health, and public housing projects, it is to be

doubted that a national health plan would even be equitable or responsive to its clients.

Whatever the theoretical ideal in some other social setting, in the American environment health care is best addressed by the private and public sectors working in tandem. The task is to achieve a good mix of responsibilities among the various participants, and find mechanisms for getting different actors to resolve differences and work toward common goals.

There is no great difficulty in identifying tasks for particular groups. It is mostly a matter of assembling the laundry list of challenges that have already been placed before these groups, frequently by their own members. For the medical profession, for instance, such a list includes, among other items, more utilization of people with less training than physicians and registered nurses, to provide selected services that do not require the more advanced (read more expensive) skills; the development of more data to pinpoint areas where less medical intervention is acceptable, and to clarify the risks and advantages; better peer review of practitioners, not merely to police the ranks for malpractice but also to discourage excesses; and changes in medical education to encourage more conservative health care, as versus training biased toward more elaborate treatment. There is nothing new in those thoughts. Some in the profession have been urging these steps for years, with varying success. It goes without saying that more is possible. It always is.

For people in health care administration, either running facilities or programs, there is a need to recognize that they are managing a changing, complex business. Health care is not a cottage industry anymore. It has to be run professionally in terms of purchasing economies, reduction of waste, personnel management, and the training of the senior administrators themselves. The amount of room for improvement is demonstrated by the spread to be found in different facilities in operating costs, and even in the cost of delivering a specific service to patients.

The wise health care providers are those who see that improvement would work to their own benefit long range, and who therefore are willing to team up with others to review the utilization of services. Such review projects are under way in Minneapolis, Phoenix, the state of Iowa, and elsewhere. There is probably lots more mileage in such collaborative, community based efforts.

Interestingly, most such projects stem from the initiative of people outside the medical profession, but the onus is put on the physicians to correct overutilization. Cooperation, not coercion, is the approach to try first, with the understanding that if the doctors fail to put pressure on their peers when needed, someone else will.

There are complicating factors in every efficiency formula. Some hospitals are more burdened than others by losses from patients who cannot pay at all, or who come to them under programs such as Medicare and Medicaid which fail to reimburse them for the full costs. Some facilities have the benefit of newer, better physical plants and equipment. When all the caveats are covered, though, it remains that some hospitals and nursing homes are more effective and efficient in providing care than others, and there is good evidence that the discipline of market forces can make useful contributions to efficiency.

For each of us as an individual there is a role. We should accept more responsibility for our own health. That point has been made countless times before, to some good effect but far less than is needed. Whether the result has been adequate or not, however, it is impossible to discuss health care as a national problem without directly addressing this side of it. There are all sorts of numbers, all big, on the savings that could be realized if people only tried harder to stay well. It is said that health bills might drop 30 to 50 percent. Maybe that is high, but fully one-third of medical expenses can be traced to three problems—circulatory conditions, respiratory ailments, and accidents—and all to some extent are preventable by individuals themselves.

There are no miracles out there. Young, thin, superbly conditioned athletes can have heart attacks. It happened to Arthur Ashe when he was still near his prime as a tennis player. Yet the literature is bulging with proof that a large payback in health care would be ours if we cleaned up our lifestyles through better diet and exercise, wore seat belts, and avoided habitual, heavy use of alcohol and tobacco. That would defer or eliminate tens of billions of dollars in costs, and who can say how much suffering?

Instead of restating more of what everybody knows, or offering advice to health care professionals already saturated with it, it is worth commenting at more length on the two groups that cover most of the health care costs, private businesses and the state and Federal Governments.

Consider first the private sector companies. No part of society has a better reason for wanting to see the present system changed. Private businesses have seen their health-related benefit costs quadruple, per employee, in the past 12 years. In 1981 and 1982 those costs have climbed at rates of 15-25 percent per year. It is not unusual for a company today to put more than $1,000 a year into health benefits for each of its employees.

The experience of the Du Pont Company may be instructive here. Medical and hospital benefits cost the company $32 million in 1970; this year, with only a slightly larger work force (the numbers do not include Du Pont's recent merger partner, Conoco), the bill will be nearly five times as much.

Du Pont is a supplier as well as buyer in the health care field. The company sells many medically related products, and sponsors extensive research programs in the life sciences. Du Pont manufactures pharmaceutricals, X-ray film and processing systems, clinical instruments, diagnostic test systems and associated services and supplies. In the past decade this has been one of the company's most successful lines of business. Last year it brought in $1 billion in sales. Not that the company keeps the books this way, but simply as a matter of interest it is notable that the company's growing success in the health care business barely compensates for the escalation in the parent company's health benefit costs. The profits on Du Pont's health-related businesses totaled $141 million last year, while the cost of health benefits is now running above $150 million per year. The "supply" side is having trouble keeping up.

When a business cost is running out of control, a sensible management team will move to get it in hand. Health care costs qualify as much as any other kind, and the managers of many companies have begun to look at them in a businesslike way. From the perspective developed in one such company, the recommended strategy is to emphasize more strongly the preventive route, to build more choice into delivery systems, and to redirect the payments structure away from overdependence on post-event, entitlement contracts which give neither the patient nor the provider a personal stake in restraining spending. Pre-event payment plans, and contracts which reward doctors and patients (or at least do not penalize them) for avoiding expenses, are ideas whose time has come.

Internally, many companies are moving toward cafeteria-style benefits plans. We can call this, to create a label, the Beneflex trend. It offers not one package that applies to all employees, take it or leave it, but a number of options from which people may choose according to personal and family wishes. Typically, companies include health care as one of the variables.

There may be a voucher system: In one example, $500 for medical expenses is given to the employee, and he or she pays the initial bills. If there is money left over at the end of the year, the employee keeps it. If the bills go beyond $500, a health insurance plan takes over at the employer's expense. There are endless such variations, but at the end of the line for all of them stands a cash register showing a "not-to-exceed" figure, to maintain equity as well as cost control.

Externally, businesses have gone shopping. They are negotiating with health care providers to reduce costs, and encouraging development of alternative health care delivery systems. They are buying into health maintenance plans, referring employees to preferred physicians and treatment centers, contracting for primary care services to cover the routine and simpler needs, requiring second opinions before approving nonemergency surgery, and self-insuring while contracting with outside firms for administrative services.

Again, there is little about this on the surface that is new. HMO's have been around for decades. Growth, variety and scale are the notables now. The most recent figures I have seen put the number of HMO's at 250, with enrollment of 10-11 million people. In many metropolitan areas, companies are able to offer not one alternative but several. In the Twin Cities area, there are seven HMO's. The Control Data Company offers its employees a choice of five plans; Honeywell, six.

Companies have rarely found it possible to abandon the rudimentary system adopted in the 1960's and early 1970's, under which the employer agreed to provide coverage from the first dollar onward, with little or no contribution from the employee's pocket. That arrangement has become entrenched by time and, in many companies, by collective bargaining agreements. Employee "givebacks" on benefits are even more difficult to obtain than voluntary reductions in wages and salaries. The better course (at any rate, the one most are taking) is to seek reasonable top limits on what the "first-dollar," "fee-for-services" plans can cost, and to place alongside them additional plans that require employees to share in the costs, but give them a financial incentive to do so. If the incentives are there, both laymen and medical professionals can be counted on to find ways of capping the costs.

What more can private businesses do? For business leaders as for the medical professionals, there is much to be said for closer involvement in community and regional health care coalitions. These have been created to bring better management to health care, to broaden public understanding of the

problems, and to help break down the rules that now distort the system to greater expense.

Coalitions exist in 60 or 70 communities, and while they get mixed reviews they do provide a mechanism that neither the private sector nor the government can deliver on its own. Bringing together people from all quarters—medicine, business, government, education, labor, and so forth—coalitions can move into parts of the health care problem that are divisive and politically hot to handle. When coalitions do their work well, they achieve an objectivity and develop a public credibility that the separate members have trouble matching. Business has talents and viewpoints to bring to the table, and it has more to gain by joining in coalitions than by trying to go it alone.

One further area deserves the strongest possible emphasis within business, and that is preventive care in the broadest sense of the word. Nothing business might do in the health care area would help people more than to improve its front-end, in-house health education and safety programs. There are too many calls on the system by people who need not have become sick or hurt in the first place, and too many such problems originate on the job. The number of occupationally-related injuries is far too high. Apart from the pain and suffering, the workdays lost to the economy are the equivalent of the full-time work of 170,000 people. That is the same as taking out of the nation's productive system all of the employees of the Du Pont Company including Conoco.

Nowhere is it given that people must be hurt or made sick because of irreducible hazards or fictions about "human nature." Some of the best health and safety records are found in industries which, by their nature, deal with potentially dangerous processes and products. One example is the chemical industry. For every lost-time injury of a chemical company employee (the data include occupational illnesses), there are 26 lost-time incidents in the trucking business, and 12 in the meat products industry. The all-industry average would be four. It is hard to believe that it has to be 26 times more dangerous to drive a truck than to work in a chemical company. Within specific industries there is a similar spread. The average chemical company's safety record is 17 times worse than the best chemical company's record.

There is no mystery as to why some private firms do better than average on health and safety: They work at it. They treat health and safety not just as the employees' responsibility but management's as well, and supervision is held accountable for results.

The companies that do best in this area obviously care about people, and defend their programs without trying to prove that they save money. The chances are that they do, though. By a rough calculation in Du Pont, which has one of the best safety records in all of industry, if company safety performance in 1981 had been no better than the industry's average, Du Pont's direct and indirect costs for injuries would have been $365 million more than they were.

If on-the-job health and safety programs have value, it is natural to ask whether there is a similar rationale for the "wellness" programs now springing up around the country. These involve health monitoring and physical fitness programs plus action on diet, mental health and alcoholism. Companies involved include IBM, Johnson & Johnson, Control Data, Kimberly-Clark, and the New York Telephone Company. Though good numbers are hard to come by, the efforts of such companies are well worth imitating. The risks and costs are relatively low and the health benefits could be high. Consider heart problems as an example. Currently, the largest single cause of claims for permanent disability for people below age 65 is heart disease. Some 2.5 million people still at work are restricted in their activities by heart conditions. If wellness programs produced even a modest reduction in the rate of heart disease, they would be justified.

(That justification, though, does not rest in an argument that wellness programs will bring a net decline in the national health bill long range. They save lives and money now, but that means they will keep more people alive to advanced ages, where they would be expected to command medical service for one condition or another. Cost-benefit calculations obviously have to be cut off before they become ludicrous. Were cost savings society's only goal, the way to proceed would be to have the largest number of people die at the earliest possible age.)

The problem of changing the government's role in health care has been saved for last. It is crucial but frustrating. Like the ancient task of the mice trying to hang a bell on the cat, it is far easier to see what needs to be done than to figure out a way to do it.

It is not especially difficult to gain agreement, even within government, on some general propositions. The indigent and elderly need help and are entitled to something more than bare minimum, life-sustaining services. Government must be the health care provider of last resort. There are research and educational needs which will not be filled unless government helps. Coordination and oversight in some areas properly fall to government.

On the specifics it becomes harder to translate principles into action, and action is what is needed. Legislation and regulation should be amended to encourage cost efficiency, broaden choice, and make the payment incentives neutral as to type and place of care.

There also should be more and better means of resolving conflicts and compensating people for harms that may be done in the name of health. That too calls for government action. There is too much reliance today on courts and juries of laymen to adjudicate malpractice claims. Justice sometimes is done but at a high price to society. Plaintiffs wait for years to have their cases decided, and in many instances the principal beneficiaries are lawyers who are members of the malpractice bar, some of whom delight in seeking six-figure fees. One consequence is the high cost of malpractice insurance for physicians, which ultimately is reflected in their fees. Less measurable but equally unwelcome is the cost of defensive medicine: physicians calling up more tests than they or most others think are needed, in case someone takes them to court for doing too little and a sympathetic jury agrees. Better safe than sorry.

There are ways to reduce that problem. Fee limits to lawyers might be set for certain classes of injury, to discourage the fortune hunters. Arbitration is an alternative to litigation. It is quicker and less costly than trials. (Some surgeons reportedly require patients to agree to binding arbitration, should there be a claim, as a condition of taking the case.) We should also consider a no-fault system for compensating those who are harmed. As with the workers' compensation system, the objective would not be to extract large sums from those inflicting harm, but to "make whole" the injured party; i.e., to cover his costs. There would be top limits on the amounts collected, but the offset is that the injured party would not have to prove negligence on the part of the health care provider. For such ideas to be pursued more aggressively, though, would require changes in law, regulation, or both.

In any of these areas it is foolish to expect too much of government, expecially in the short time frame. In fairness, the government has special problems for which the rest of us share some of the blame.

Government became wedded long ago to a command-and-control philosophy of regulation, which has not been an overwhelming success, and was trapped by its own entitlement system of benefits. There was broad public and political support for this at the outset, but there was not enough attention to the escalation of costs, and there have been perverse side effects. As the best illustration, the reimbursement schedules for Medicare and Medicaid fail to pay for most hospitals as much as it costs to provide a bed for a patient. To balance the books, hospital administrators have been forced to mark up the prices paid by private individuals and health plans. On the average, a patient with a private insurance plan pays $41 more for a day of hospital care than a Medicare or Medicaid patient. The cost to business: $5 billion per year. Such price shifting only distorts the system. By any other name, it is an unlegislated redistribution of economic resources from one group to another. It does not solve a problem; it only moves it.

Government often tries to do the right thing, but it does not always succeed at the right price. For example, in the hope of providing better oversight the Federal Government in 1972 set up Professional Standards Review Organizations. These were mostly concerned with payments under the Medicare and Medicaid programs. Now their funding is being withdrawn, at least partly because the Congressional Budget Office has found that the cost of the reviews—$174 million in 1981—was greater than the amount they saved.

This is not to say that all public sector regulation is misdirected or negative—hospital rate regulations that apply in some states; limits on new construction where the need cannot be shown for more hospital beds, equipment, and programs; licensing of facilities; setting of standards for practitioners; and all the rest. However, whether regulation works reasonably well or not, the command-and-control model has serious, inherent limits.

It can be argued that, by agreeing to an approach that contained few cutoff provisions, government in effect gave away the store. (Its representatives will quickly respond that private corporations did the same in their health plans, and there is some truth in that.) Now, the call is for a move in the opposite direction, but it takes exceptional political courage to lead such a charge, and it is tempting to take refuge in stopgaps and cost-shifting. For example, the tax bill passed this summer anticipates slower growth for Federal spending on Medicare and Medicaid (by $13 billion over three fiscal years), but simply leaves it to the states and private sector to make up the dif-

ference as best they can. Again, a problem was only being moved, not solved.

More recently, the Administration has proposed a prospective payment plan for Medicare. While the Department of Health and Human Services is to be commended for wanting to turn in this direction, there are enormous complications in its proposal. It takes several hundred pages of the Federal Register just to set forth the rules and regulations—and within a matter of days after these were published, health care experts had raised serious questions about the plans, challenging both feasibility and fairness. One good possibility the experts foresee is that there will be even more cost shifting to private individuals and employers.

Whatever happens in Medicare, the larger point is this: Considering how difficult it is to direct the Federal portion of national health care via command-and-control, there is no reason to believe that the whole system could be run that way. The problem is unmanageable in that fashion, and it is unrealistic to suppose that in some magic way, a Federal initiative is going to provide a formula for solving this national problem.

Individuals in government are as aware of their limits as anyone else, and recognize full well that the nation needs to do more than come at the problem at the margins. They as much as anyone might welcome more private sector support and, where appropriate, political help. This is as good a time as any for those outside government to stop criticizing and provide some leadership pointed toward a better managed system.

As one specific, I would encourage the creation of a national commission on health care, to be formed by the President and to include outstanding individuals from government, the health care industry, education, private business, and labor. The commission's job would be to back away from the detail that is consuming the attention of government agencies and officials today, analyze the system overall, and recommend structural changes that address in a single package the interlocking problems of quality, access, equity, and cost. The commission would have to have strong leadership and be staffed with first-rate people if its proposals are to have a chance of legislative passage.

Several of the state governors have established commissions. One in Iowa has just completed its work and issued its report. Utah has had one, and in Minnesota the health care coalition has acted as a governor's commission. There is nothing analogous on the national scene, although two groups have this as a partial mission, the one examining private sector initiatives and the one dealing with reform and management in government. However, the health care problem deserves concentrated national attention on its own.

I would not propose such a commission with any notion that it should replace local groups. Many parts of the problem require local attention, and this cannot successfuly be centralized in Washington. Nor would I expect a national commission to deliver major gains of and by itself. Some commission reports only gather dust, and even when that does not happen, the recommendations can be neutralized by political inertia. Exactly that happened in the 1970's with national commissions on water and air quality, the first headed by Nelson Rockefeller, then Vice President, and the other by Senator Gary Hart. The only trouble with either report was that Congress did not adopt enough of the recommendations.

There is no guaranteeing that this will not also happen in the health care area. Still, such a commission is worth a try. It could provide a needed forum if not an easy answer. It could raise the level of public debate, separate what is known from what is merely supposed, and clarify the issues of greatest moment.

Perhaps it will have a decent chance if it is given specific questions for a charter:

What should the role of the Federal Government be in health care over the next 20 years, and what does this imply for the state governments and the private sector?

Is there a better way to manage the Federal role? Should Medicare remain in the Social Security system, or be handled separately? Do we have too many Federal agencies in the health business?

What impediments to needed change are embedded in law and regulation, and what would the commission recommend be done about them? Is government regulating too much, or the wrong things?

What are the capital needs going to be?

What shifts will or should occur in health care needs and practices, or in health care education, based on changes in the population and health care technology?

With questions such as these on the agenda, and with a suitably strong, able national leader in the chair, such a commission could provide a better basis than we now have for hammering out political and social consensus.

Surely, it is not enough to put band-aids on the system, or to treat different parts of the problem in isolation. Such topics as payment reforms, efficiency in management of health care, depreciation and obsolescence of facilities, choice and competition among providers, limitations on services—these are not separate, distinct issues, but parts of the whole. The way to approach this, in my judgment, is not to compartmentalize the issues but instead to accept them for what they are—an integrated national problem—and to identify the contributions that different groups in society can make to solve that problem.

In sum, we are the victims of our own success. We have been able to expand access to health care, and turn this into a right, because we have had the technology, human resources and wealth to do so. That can only be regarded as a triumph of our society; but like any other right in a free society this one has limits, and we need a common approach that respects those limits. Otherwise, the costs will continue to climb and the nation will be driven to a two-tier system in which the indigent may receive less than the necessary quality of care, and people who need the largest amounts of help will be driven to the wall financially.

The way to cope with this is not through fiat but through more participation and leadership from the private sector, more collaborative efforts among health care professonals and other people in the community, more choice among programs, and more use of the technologies and management skills that can reduce costs while preserving the quality of care. Above all, we need different incentives. Changes in law and regulation to favor prospective payment, plus stronger preventive programs, would be major steps in the right direction.

Time is a factor. Health care is an issue that is sure to heat up, socially and politically, as more people discover there is no such thing as a free lunch.

There is no one model to follow, and no way to induce swift change in a $300 billion industry employing more than five million people. Those ought not be crippling factors, though. We have at hand a variety of alternatives already tried in one setting or another, and often found helpful. We have the advantage of experience, and the knowledge that experiments with change, launched voluntarily, are not irreversible. If some steps do not work as well as we hope, we can try others. Above all, we have strong reasons to believe that a "do nothing" strategy is likely to be the most costly and painful to all. That ought to give us enough to get the job done.●

THE GAS TAX

● Mr. DURENBERGER. Mr. President, all too often in Congress events move either too slowly or too quickly; either we allow an urgent issue to become paralyzed by controversy or we take frenzied action on an issue that demands more thoughtful consideration. The latter problem is afflicting the current Federal gasoline tax proposals and the issue of how to address our decaying highways, streets, and bridges. We had better slow down and make sure we are accomplishing what we really wish to accomplish.

An excellent summation of the gas tax issue is found in an editorial written by Gov. Richard A. Snelling of Vermont, published in the December 12 issue of the Washington Post. The editorial, entitled "Stop the 'Quick Nickel' Gas Tax," makes several forceful points: Chiefly, that the current proposals to channel a 5-cent Federal gas tax increase through existing Federal highway grant programs will not solve our most pressing highway problems, will not be responsive to the needs of the States, and will not effectively create jobs.

As Mr. Snelling points out, the gas tax is not being offered as a jobs bill, and rightly so. However, there are ways to optimize its potential to create jobs. The present method is not one of those ways. It is maintenance, not new construction, that promises the most effective job creation. It is maintenance, not new construction, that is needed in many of our States. But what does the current highway funding scheme stress. New construction. Or large-scale maintenance when all that is needed is pothole filling.

The Federal grants also carry financial burdens: matching requirements for States, many of whom are already stretched beyond their means. And there is the time element—a gas tax that takes money out of the struggling economy, sends it to Washington and through a bureaucratic labyrinth before finally sending it back to the States in some form or another.

Mr. Snelling, the immediate past chairman of the National Governors' Association, has been a major actor in the development of the New Federalism, the administration's historic initiative to return authority to the States.

89-059 O-86-42 (Pt. 22)

It is no wonder that he notes the irony in the administration's gas tax plan, a plan that says, in effect, that the Federal Government knows better than the States how to identify and fulfill their diverse infrastructure needs. We should be dropping the barriers to effective State action by reducing or eliminating cumbersome Federal highway grant programs and letting States set their own priorities. Instead, we are erecting barriers by tying up their revenues and hobbling them with restrictions.

Mr. President, the now-or-never sentiment present during this short session likely will make action on some sort of highway bill inevitable. But I urge my colleagues to heed Mr. Snelling's warnings, and I make this request: Let us not close the door to careful consideration; let us welcome the opportunity to reconsider the structure of our highway programs in the next Congress.

I ask that Governor Snelling's article be printed in the RECORD.

The article follows:

STOP THE "QUICK NICKEL" GAS TAX

(By Richard A. Snelling)

No matter what combination of the three "quick nickel" highway bills now before Congress is ultimately passed as a result of the current steamroller in Washington, the bill will not do the things its backers have promised. Specifically, the quick nickel will not do anything about the current severe unemployment problem (except possibly make it worse) and it will not fill potholes.

The White House (correctly) denies that this is a jobs bill. Nevertheless, the Department of Transportation tells anybody who will listen that precisely 170,000 jobs will be created. The only reason the bill is being considered at all in the lame-duck session is the great need of Congress to appear to do something about the unemployment situation.

The bill is not going to create jobs. In its early years, it takes more money out of the economy than it puts back in. Neither a Keynesian nor a supply-side economist would claim that sending more money to Washington is a way to create jobs.

If we don't have to send that $5.5 billion a year to Washington, we will presumably spend it to buy something else. If we do send that money to Washington, we won't be able to use it to buy something else. Whoever makes that "something else" will lose his or her job. Eventually, some of the money will result in creating some new construction jobs while eliminating jobs elsewhere in the economy.

Since the money leaves our pockets well before it ever comes back from Washington, the short-term effect will be a loss of jobs and not a gain. To make things even worse as far as jobs are concerned, it is unlikely that all states will be able to spend all the money that will theoretically be available to them. This federal money must be matched by state money. Since many states are already having difficulty matching the federal funds they are now eligible for, it is unlikely that these states will be able to match any more federal funds—especially since the federal government is planning to preempt their ability to raise state gas taxes.

The bill is touted as a way to fill the nation's potholes. There are certainly plenty of potholes that need filling. However, this bill simply extends existing federal highway programs, and federal highway money is not available for filling potholes under these programs unless the whole road is repaved. As a matter of fact, the road also has to be "wide enough" and "straight enough" to meet federal standards in order to qualify for this repaving money.

There are roads that do need to be completely reconstructed. There are also other roads that simply need to have their potholes filled and their cracks sealed. It is because of a lack of pothole-filling and crack-sealing over the last decade that so many roads need to be completely repaved or reconstructed now. This bill continues the tradition of encouraging massive reconstruction rather than simple preventive maintenance.

Many states, including Vermont, already need to raise their own gas taxes this year to meet unmet maintenance requirements. It is unlikely that those states will want to impose any further "user charges" on top of a large federal increase. When states raise their own gasoline tax, they can use the money from that increase to meet their most urgent priorities—whether those priorities be pothole-filling or new construction. It has been known for a long time that state-only projects are cheaper and can be done more quickly than projects using federal money.

It is easy to understand why those who have been frustrated by Congress' inability to pass a multi-year highway bill are jumping aboard the quick-nickel steamroller. They are afraid that, if Congress does not pass this bill now, it will never address highway needs constructively. They are willing to accept any bill, even a bad bill, as long as there is some more money for highways.

Nevertheless, a bad five-year bill passed during the lame-duck session will be worse for the nation than no bill at all. It will neither create jobs nor fill potholes. It will frustrate the ability of the states to achieve these goals themselves.

Although many states will be winners from the quick nickel, others will be substantial losers. The Reagan administration dedicated itself to a restructured federalism, which recognized the diversity of needs and problems in the different states. It is ironic that this administration is pushing a bill that extends federal decision-making even further and cripples the ability of states to meet their individual highest priority needs.

This lame-duck Congress ought to go home. After the Christmas recess, a new Congress should come back and address the nation's transportation (and other) problems in a constructive way. The quick nickel ought to be allowed to die a quick death.●

SENATOR EAST'S VOTE AGAINST THE CAREER CRIMINALS BILL

● Mr. DENTON. Mr. President, there are occasions during our deliberations when one Member of this body feels strongly enough, and is courageous enough, to stand on principle and stand alone on a particular issue, to cast the lone dissenting vote. Such was the case when my very good friend and distinguished colleague from North Carolina, JOHN EAST, cast the one vote against S. 1688, the so-called career criminals bill.

An editorial that appeared in the October 6, 1982, Louisville Times explains Senator EAST's significant concerns about that legislation.

Mr. President, I ask that the editorial be printed in the RECORD.

The editorial follows:

AN UNWELCOME INTRUSION—SENATE CRIME BILL INFRINGES ON STATES' ROLE

The U.S. Senate voted last Thrusday to smash the wall between federal and state criminal jurisdiction that has stood since the nation's infancy. Considering the constitutional and civil rights implications of such a step, warning bells should have been ringing all over the Senate floor. Instead, the final vote was 93 to 1 in favor of the measure.

The bill, sponsored by Sen. Arlen Specter of Pennsylvania, would allow federal courts to take jurisdiction from the states over armed robbery or burglary cases involving firearms and in which the defendant has been convicted of similar offenses at least twice before. If found guilty, the defendant would be sentenced to serve from 15 years to life in prision, fined $10,000, or both. Neither parole nor probation would be permitted.

A state charge fitting these qualifications could end up on the federal docket either if the state prosecutor relinquished jurisdiction or if the U.S. attorney general ordered it to be taken.

Sen. Specter, a former U.S. district attorney, portrayed his bill as an effective method of eliminating the "career criminals" who, he said, are responsible for two-thirds of the armed robberies and burglaries in the country. He suggested that the federal court system could handle the cases quicker than state courts, some of which have backlogs of up to 16 months, and that his bill would cut down plea-bargaining.

Initially, that might be so. The federal system does indeed try criminal cases more quickly, about four months on the average. It is required to do so under "speedy trial" laws. But many federal cases also avoid trial by plea-bargaining. Shifting local armed-robbery and burglary cases from state to federal dockets could only add greatly to the pressure to bargain a plea.

That was one objection raised by Sen. John P. East of North Carolina, who cast the only vote against the bill. But more important, said an aide, was Sen. East's belief that the measure is an "unwelcome intrusion by the federal government into state court matters."

We could not agree more with him on this issue. If the federal government can intervene to throw the book at a "career criminal" in a local burglary case today, it might well be doing the same to an anit-nuclear demonstrator charged with disturbing the peace or jaywalking tomorrow. Even the threat of that would serioulsy threaten the basic right to dissent.

As might be expected, the Reagan administration, which is always prattling about getting the federal government off our backs, is solidly behind Sen. Specter's bill, even though the measure is built on a sand pillar. The federal government can usurp state and local jurisdiction constitutionally, according to the bill, because a high incidence of street crime is "deleterious to interstate commerce."

It is disheartening that only one member of the Senate found himself gagging on that one, but this is the season when the unpalatable is swallowed whole. The overwhelming vote was a grandstand performance de-

signed to convince the voters only a month before the election that the incumbents are tough "law-and-order" champions. Perhaps many are depending on the House, which won't get to the matter until after the election, to rescue states' rights from the Senate's attempted assault. Others may be relying on the Supreme Court to clean up after them.

We hope they are right. But it is disheartening that the Specter bill ever got out of committee, much less the U.S. Senate.

ORPHAN DRUG ACT

● Mr. DOLE. Mr. President, I would like to just comment briefly on the compromise reached last week on the tax credit provision of the Orphan Drug Act.

The Senator from Kansas is very pleased with the incentives this bill creates for pharmaceutical companies to invest in research for drugs with relatively little commercial value. I believe the Orphan Drug Act represents a true concern and commitment by this body to the millions of Americans who are affected by rare diseases.

Currently, there is little incentive for pharmaceutical manufacturers to conduct the extensive and costly research required to develop drugs for use in treating diseases affecting a relatively small percentage of the population. From a purely economic standpoint, the disadvantages to a business of the time and expense involved in drug research for rare diseases clearly outweigh the limited commercial return. The tax credit established by the Orphan Drug Act provides a clear incentive for drug companies to proceed with research in the area of rare diseases, and alleviate much of the suffering so many Americans now experience.

The Senator from Kansas particularly appreciates the willingness of the distinguished chairman of the Labor and Human Resources Committee, Senator HATCH, and the chairman of the Health Subcommittee of the House Committee on Energy and Commerce, Mr. WAXMAN, to work with the Finance Committee in devising a tax credit acceptable to all.

Mr. President, I request that the attached technical description of the tax credit portion of the Orphan Drug Act be printed in the RECORD in conjunction with my statement.

The description follows:

CREDIT FOR CLINICAL TESTING EXPENSES FOR CERTAIN DRUGS FOR RARE DISEASES OR CONDITIONS

OVERVIEW

The bill provides an elective nonrefundable income tax credit for certain human clinical testing expenditures ("qualified clinical testing expenses") which are necessary in obtaining the approval by the Food and Drug Administration for the commercial sale of a drug for a rare disease. The rate of the credit is 50 percent of the amount of clinical testing expenditures. The amount of any deduction or charge to capital account attributable to "qualified clinical testing expenses" otherwise allowable is reduced by the amount of the credit. In addition, no credit is allowable under any other provision for amounts eligible for the new credit.

QUALIFIED CLINICAL TESTING EXPENSES

For purposes of the credit, the bill defines the term "qualified clinical testing expenses" to mean amounts which would qualify as "qualified research expenses" under the credit for research and experimental expenditures (section 44F), with certain modifications. Under these modified rules, a taxpayer's expenditures eligible for the new credit consist of (1) "in-house" expenditures by the taxpayer for wages, supplies, and rentals of personal property used in certain types of testing ("clinical testing") conducted by the taxpayer; and (2) 100 percent of amounts paid to any person by the taxpayer (other than an employee of the taxpayer) for "clinical testing" conducted on the taxpayer's behalf. However, expenditures are not eligible for the credit to the extent that the expenditure is funded by any grant, contract, or otherwise by another person or any governmental entity.

QUALIFIED CLINICAL TESTING

The bill defines the term "clinical testing" to mean any human clinical testing which (1) is carried out under an exemption for a drug being tested for a rare disease under section 505(i) of the Federal Food, Drug, and Cosmetic Act (FFDCA), (2) occurs after the date such drug is designated as a drug for a rare disease under section 526 of such Act, but before the date on which an application with respect to such drug is approved under section 505(b) of such Act, and (3) which is conducted by or on behalf of the taxpayer to whom the designation under such section 526 of such Act applies.

For purposes of the new credit, human clinical testing is the testing which uses human subjects to determine the effects of the drug on human beings and which is necessary for approval of the drug under section 505(b) of the FFDCA. Expenditures are not incurred under a 505(i) exemption unless their primary purpose is to qualify the drug for sale in the United States. Testing is taken into account only if it is related to the use of a drug for the rare disease or condition for which the drug was designated under section 526 of the FFDCA.

RARE DISEASE OR CONDITION

For purposes of the credit, the bill defines the term "rare disease" to mean any disease or condition which occurs so infrequently in the United States that there is no reasonable expectation of the taxpayer that the cost of developing and making available in the United States a drug for such disease will be recovered from sales in the United States of such drug, including sales by licensees. This determination with respect to any particular drug is to be made on the basis of the facts and circumstances in existence as of the date on which such drug is designated under section 526 of the FFDCA. Since the Secretary of Health and Human Services must make a similar determination under section 526 of the FFDCA, it is expected that the Secretary of the Treasury generally is to rely on the finding of the Secretary of HHS made under such section 526. However, because the reasonable expectation must be that of the taxpayer, the Secretary of the Treasury may find that a taxpayer's reasonable expectations as of the date of designation of the drug did not satisfy the definition of rare disease for purposes of the credit.

COORDINATION WITH CREDIT FOR INCREASING RESEARCH ACTIVITIES

Any qualified clinical testing expenses taken into account in computing the new credit for a taxable year cannot be taken into account for purposes of computing the credit for research and experimental expenditures allowable under section 44F for such taxable year. However, any qualified clinical testing expenses for any taxable year which are qualified research expenses (within the meaning of section 44F(b)) are to be taken into account in determining base period research expenses, for purposes of applying section 44F to subsequent taxable years.

LIMITATIONS ON TESTING OUTSIDE THE UNITED STATES AND TESTING BY POSSESSIONS CORPORATIONS

Expenditures for testing outside the United States are not eligible for the credit unless (1) the testing is conducted outside the United States because there is an insufficient testing population in the United States, and (2) the testing is conducted by a United States person or any other person who is not related to the taxpayer to whom the section 526 designation applies. For this purpose, two corporations are unrelated if each owns, directly or indirectly, less than a 10 percent interest in the other.

In addition, the credit is not available for any testing, either inside or outside the United States, conducted by corporations to which section 934(b) or section 936 applies.

DISALLOWANCE OF DEDUCTIONS

The credit is available for qualified clinical testing expenses for the taxable year regardless of whether the taxpayer has elected under section 174 to expense or amortize research expenditures. However, the amount of any deduction for qualified clinical testing expenses is reduced by the amount of any credit allowed for such expenses. If the taxpayer capitalizes, rather than deducts, the qualified clinical testing expenses otherwise allowable as a deduction for the taxable year, the amount chargeable to capital account for the taxable year is reduced by the excess of the amount of the credit over the amount allowable as a deduction for qualified clinical testing expenses for the taxable year.

RULES FOR AGGREGATION OF RELATED TAXPAYERS

For purposes of the credit, all members of a controlled group of corporations are treated as one taxpayer. Aggregation is also required of all partnerships, proprietorships, and any other trades or businesses which are under common control with the taxpayer. The rules defining these terms are similar to the rules applicable to the credit for research and experimental expenditures.

EFFECTIVE DATE

The bill applies to qualified clinical testing expenditures paid or incurred after December 31, 1982, and before January 1, 1988.●

ANNIVERSARY OF MARTIAL LAW IN POLAND

● Mr. KENNEDY. Mr. President, yesterday marked the first anniversary of martial law in Poland. It was 1 year ago that the Polish governmental authorities openly declared a state of war against the forces of freedom in Poland. What we have seen in that

country over the past year is oppression by proxy. The assault on Solidarity has been the work of a regime and an army acting under the shadow of Soviet bayonets.

On Sunday, General Jaruzelski, in a televised announcement, stated that the major provisions of martial law would be suspended by the end of the year. However, it remains to be seen what the real results of this action will be.

Even if martial law is relaxed, it appears that severe controls on Polish society will remain in effect. The military will keep its cruel control over the workplace, ready to crush any revival of Solidarity or renewed expression of dissent. General Jaruzelski's regime will retain its oppressive authority, not only over the institutions of government, but over the complete range of social, political, and labor activities in Polish society as well.

I call upon General Jaruzelski to release all of the political prisoners interned over the course of the past year. While I welcome the recent release of Lech Walesa, the many remaining political prisoners must also be freed. There can be no justification for the detention of victims such as Anna Walentynowicz, who was placed in a psychiatric facility just last month by martial law authorities. I also call upon the Jaruzelski regime to permit Solidarity to rise again as an independent trade union. There will be no justification for lifting sanctions until these basic improvements occur.

The "state of war," as the Polish regime refers to martial law, did not succeed. It has failed totally in its effort to break the Polish spirit. Despite martial law, the brave faith and enduring aspirations of the Polish people have not been dimmed. The historic Polish spirit is unbowed in the face of military and political repression.

The suspension of martial law does not mean an end to military rule; nor does it mean a renewed dialog between the Government, the Catholic Church, and Solidarity. It will not lead to an early end to the critical shortages of vital commodities which constantly deprive the Polish people of normal daily lives.

We must do all we can to insure that any relaxation of martial law in January begins a new trend of greater freedom in Poland. The welcome decision by Government authorities to allow Pope John Paul II to travel to Poland must be accompanied by a sustained official effort to improve relations with the Catholic Church. The Jaruzelski regime must make good faith efforts to establish a serious dialog between the Government, the church, Polish labor rerpresentatives, and the people of Poland.

The last 12 months have presented a challenge not only to the Polish people, but to America and her European allies as well. That challenge continues. We and our allies must continue to express our disapproval of violations of human rights and civil liberties in Poland. And our strong words of disapproval must be accompanied by effective joint action to insure a positive impact on the ongoing crisis.

Last Friday President Reagan signed a proclamation naming December 12, the eve of the first anniversary of martial law, as a day of solidarity with the people of Poland. As a sponsor of this resolution in the Senate, I was privileged to be present at the White House for this ceremony. Last night I was proud to join leaders of the AFL-CIO for a special fundraising event to benefit the Polish Workers Aid Fund. In the months to come, we must continue our support for this cause and for the Polish people.

Mr. President, in observance of this anniversary of the imprisonment of the Polish nation, I submit for the Record the following poem by Nobel laureate Czeslaw Milosz, which appeared in the New York Times on October 14:

TO LECH WALESA
(By Czeslaw Milosz)

After two hundred years,
After two hundred years of hope recovered and hope lost,
You became the chief of the Polish people
And, once more, the powers are arrayed against you.
It's bitter to know what we know, Lech Walesa,
A sacrifice demanded in every generation,
Heroes' graves anonymous,
At truimph of traitors and henchmen
Whose sons and daughters will have to be forgiven.
It is bitter to learn the strength of enslavement.
It dwells in bread and in an apple, in every gulp of water,
In morning light on a windowpane, in dusk on a street.
It doesn't desert you in work or in love,
Your sleep in the pre-dawn hours is full of it.
And it lurks in the letters of the written word
Till Polish books have only one subject,
And it darkens colors on the canvases of painters
And it covers with grayness the buildings of cities.
I don't know by what right, Lech Walesa,
You are addressed by one who chose exile
And refuses to think constantly of enslavement
Though he understands that he should, every day.●

JOHNSON & JOHNSON

● Mr. BRADY. Mr. President, I want to take this occasion to say a few words about Johnson & Johnson, a New Jersey based company that has provided people in the United States and around the world with quality health care products for almost 100 years. Johnson & Johnson and its affiliates produce over 10,000 products in the health care field.

In October of this year, this company became innocently involved in a nightmare when one of its products, Extra-Strength Tylenol, was maliciously poisoned. This incident resulted in the deaths of seven individuals and terrified millions of consumers. But in this age of skepticism about many of our institutions, I think it is important to note that Johnson & Johnson acted swiftly and honestly in handling this situation. The company immediately removed the product from the stores, alerted consumers to the problem, and provided substitute medications to consumers. I would like to commend Johnson & Johnson for its handling of a difficult situation and for the example it set of how a responsible business should conduct itself during a crisis to reassure consumers.

As a result of the Extra-Strength Tylenol incident, stricter guidelines have been drawn up for packaging over-the-counter drugs. This is a constructive step in protecting innocent people. Nonetheless, consumers must be cautious when they buy medications and other products. As part of this effort to protect consumers, public service announcements have been prepared to inform people about the need for careful and intelligent use of products. I submit for the RECORD one such public service announcement produced by the Department of Health and Human Services.

The announcement follows:

In recent weeks we have all been shocked by criminal tampering with non-prescription medicines on store shelves. Innocent products like Tylenol—products that are intended to help—have been used to harm consumers.

Government and industry have been working together to provide packaging that will lessen the chance of this happening again—either to the people of Chicago or anywhere else. New government rules requiring tamper-resistant packaging for most non-prescription medicines will soon come into effect. We anticipate that such new packaging will being to appear on store shelves over the next few months.

But, neither government rules nor tamper-resistant packaging can guarantee protection against everything that a criminal mind might think of. You, the consumer, must help. When you buy medicines—or any product—be sure packages are not opened or damaged. Look at seals or wrappings to make certain they are not torn. and when you get home, check the product inside the package for signs of tampering.

We don't have to do without any of the medicines that make our lives more comfortable. But we should use a little extra care.●

HAS MARTIAL LAW BEEN LIFTED IN POLAND

● Mr. DOLE. Mr. President, 1 year ago, on December 13, 1981, war was declared on the Polish people. The

Polish generals flouted solemn commitments of the Helsinki Final Act to respect human rights and fundamental freedoms by declaring martial law and suspending the Polish trade union, Solidarity. A Soviet general, Marshal Kulikov, was in Warsaw that day to oversee the operation, spuring Helsinki promises to respect the rights of sovereign states, including those of the Warsaw Pact Allies of the Soviet Union.

And now the Polish generals tell the world that martial law is "almost" over. I suspect, however, that far from being over, martial law has been made part of everyday Polish life and of Polish civil law. In his actions, perhaps General Jaruselski has decided to follow a strategy suggested by Bertold Brecht:

> They could do with a good war around here. What else can you expect with peace running wild all over the place? You know what the trouble with peace is? No organization.

How, then, was—and is—this war organized? First there is evidence of Soviet involvement in this military campaign. The following points are elaborated in the comprehensive report on compliance and implementation of the 1975 Helsinki Final Act issued by the Helsinki Commission last Friday on International Human Rights Day, December 10.

The martial law proclamation was printed in Moscow in September, 3 months before its actual imposition in Poland;

The Soviet press repeatedly denounced the Solidarity movement in Poland, claiming that it threatened Socialism in Poland and therefore "directly affected the vital interests" of the entire Warsaw Pact;

The Warsaw Pact conducted extensive, intimidating military maneuvers in and around Poland on critical dates in March, September, and November 1981;

Polish leaders repeatedly were called to Moscow for consultations in 1981 and, I believe the presence of Soviet Marshal Kulikov in Warsaw on December 13 is compelling evidence.

Repeated Soviet arguments at the Madrid CSCE review meeting that martial law is a Polish internal matter not appropriate for Western concern, rings hollow in comparison to Soviet actions. The Soviet Government rejects verbal criticism of the Polish situation at Madrid, yet, its own actions violate such important Helsinki precepts as prohibitions on the threat or use of force, and respect for the rights of sovereign states and peoples.

I want to turn now to an examination of what martial law has meant to the Polish people. Probably best known is the freeze effect this war has had on Polish civil liberties, in blatant violation of Helsinki human rights pledges:

Suspension or restriction of the rights of personal immunity;

Violation of the inviolability of places of residence;

Major restrictions on freedom of correspondence; and

Denial of the right to freedom of speech, press and assembly.

Unfortunately, of course, these denials of rights we take for granted is far from unusual in Warsaw Pact countries and does not convey the brutality of Jaruselski's rule-by-martial-law. According to information in the Helsinki Commission report, under the military regime at least 30,000 Poles have been arrested and/or sentenced to terms ranging from several months to 10 years. Another 100,000 Polish citizens were detained and/or fined for violations of martial law. These thousands of people are prisoners of war in Jaruselski's struggle against the solidarity of 10 million Poles.

Imprisonment is not the only price Poles pay for their solidarity. To preserve public order, the Polish military has applied massive force against peaceful protestors through the special riot police, Zomo. In Jaruselski's battle against peaceful street demonstrations—with Zomo tanks, clubs, tear gas, rubber bullets, and water cannons—hundreds of Poles have been injured and at least 24 people have died—murdered by their own government.

Not even this tragic litany or systemic violence against the Polish people reveals the entire scope of martial law. As the commission report states:

> Although regime repression in Poland is not visible in massive street confrontations, the impact of martial law is most widely felt in the workplace.

Fully 60 percent of Polish industry has been put under direct military control and workers in all these industries are subject to military discipline. "Verification" procedures—requiring ritual denunciations of Solidarity—are now almost a universal requirement for holding a job in Poland. And where can Solidarity loyalists turn for work in a society where the state controls all employment?

Just to make sure that the Polish people feel there is no exit from Jaruselski's new order, martial law reversed previous, fairly liberal—by eastern standards—travel policies. Perhaps not surprisingly, the new travel regulations for Polish citizens strongly resemble those of the Soviet Union. In this area also, then, Poland has moved in lock-step away from Helsinki open-door policies.

Finally, I want to examine what the "lifting" of martial law will actually mean. Unfortunately, a careful examination of recently enacted laws in Poland shows that martial law, in effect, has been institutionalized.

In October, the Polish Parliament passed a new trade union law which not only outlaws Solidarity, but excludes trade unions from wage negotiations. This new law does not even define what constitutes a trade union, while it gives courts the right to outlaw any trade union at any time. In fact, the provisions of this law parallels all the martial law provisions which nullified Solidarity gains, and in effect perpetuates martial law under another name.

There have been executive orders which abolished the independent journalists' and actors' unions because of widespread support for Solidarity. In this way, the Polish authorities are depriving the Polish people of important, even if sometimes symbolic, public gestures of support for Solidarity.

The new censorship law, passed in September, gives the state Orwellian power to censor any materials deemed "threatening to the public and political order of the Polish People's Republic." Any vestiges of the right to a free press have been wiped away by this law.

A new law on public order in universities prohibits freedom of assembly and expression and outlaws independent student organizations. Russian and Communist ideology are reinstituted as obligatory courses.

The parasitism law, passed in October, obliges any unemployed Polish worker to accept any job offered to him, regardless of health, family, location, or previous employment. Any worker who refuses to accept such jobs can be sent away for military training or service.

The emergency powers bill, which has not yet been passed, closes the loopholes in Polish civil and political liberties. Among its other repressive provisions, this act permits the indefinite internment of any Polish citizen who is suspected of violating "public order."

In closing, I urge the Polish Government to heed the voice of Solidarity, which is a voice for peaceful reform, and to honor the Polish commitments under the Helsinki Final Act. When the people do not like the government they have, the government cannot hope to elect a new people, to quote Brecht again, unless massive and relentless repression is used. General Jaruselski may call his new regime by another name than martial law, but if it looks the same, and sounds the same, and has the same effects, it will never serve as a basis for rapprochement between the government and the people.●

THE REBUILDING OF CHRISTMAS VILLAGE IN BRIDGEPORT, CONN.

● Mr. DODD. Mr. President, the people of my home State's largest city,

Bridgeport, have much to celebrate today. And, in the focus of their celebration is a wonderful illustration of what Christmas should represent for every member of every community.

Last week, fire destroyed what had been a Bridgeport Christmas tradition for more than a quarter century: the Police Athletic League's Christmas Village. More than $10,000 worth of donated toys and gifts were also destroyed.

The people in this city responded to the tragedy with courage and conviction, rebuilding and restocking Christmas Village in less than 1 week. Everyone found they had something to give: Workmen donated labor; retailers donated toys; construction companies donated materials. While each tangible gift is impressive—the lumber, the toys trucked miles to Bridgeport, Santa's throne from a local department store—it is the special gift of cooperation and community spirit that makes this project remarkable.

Christmas Village reopened Sunday night. The newspapers and television news shows heralded Bridgeport's great accomplishment, as well they should have. There are many who deserve congratulations and thanks, whose efforts have earned the admiration and respect of observers across the country. No one is more deserving of this praise than officers Mike Marrella and Robert Zwerlein, president and vice president of the Police Athletic League. This holiday season will be infinitely brighter for Bridgeport-area children because of their outstanding efforts.

Mr. President, I ask that a frontpage story form the New York Times, describing Bridgeport's great accomplishment be inserted into the RECORD following my remarks. The people of Bridgeport have provided us all a welcome reminder of what Christmas spirit means when translated into actions.

The article follows:

FROM ASHES, NEIGHBORS FORGE A CHRISTMAS SITE

(By William E. Geist)

BRIDGEPORT, CONN., December 12.—The Mayor called it a "miracle." Santa Claus himself proclaimed it "the best Christmas ever." Grown men cried.

Just five days after an arsonist destroyed Christmas Village—a chalet-style building in Beardsley Park where children have come for 26 years to see animated Christmas scenes, receive a toy from Santa Claus and ask of him their fondest desires—Mr. Claus regained his throne.

It was done through the efforts of hundreds of volunteers working almost around the clock, often in subfreezing temperatures, and through donations of toys, money, materials and food for the workers.

EXHIBITS AND TOYS DESTROYED

An early-morning fire last Tuesday, which the Fire Department said was arson, leveled more than half the 140-foot-long building, with extensive smoke and water damage in what remained. It destroyed several of the exhibits, the costumes for Santa and his helpers and about $14,000 in toys that were to be given away by the Police Athletic League, which operates Christmas Village. The building's contents were not insured.

At dawn Tuesday, Frank Parlatore, a 65-year-old retired factory worker who has been Santa Claus at Christmas Village for 25 years, sat near the smoking ruins, crying.

Karen Bergquist said her 7-year-old daughter, Jennifer, was among many children who believed that Santa had died in the fire.

"Everyone was devastated," said Mayor Leonard S. Paoletta, who called a meeting Wednesday with representatives of local construction companies and building trades unions to see if there was any way the building could be reopened by Christmas.

"Many of them thought I was crazy, and some said so," recalled the Mayor, who conceded that he had had almost no knowledge of the construction field before challenging them to rebuild Christmas Village by the weekend for the children.

"If I had any idea what I was asking," he said, watching volunteers working feverishly hours before the reopening, "I never would have gotten the words out." At the reopening ceremony, some workers cited "Christmas spirit," others "temporary insanity," but for whatever reasons, they had accepted the challenge. The site was cleared of debris, and by 1 P.M. Wednesday the first nail was driven.

The Mayor put some city workers on the job. The first volunteers were police officers and firefighters, then came electricians, carpenters, plumbers, roofers, painters, decorators, carpet layers, unemployed people, retired people, Boy Scouts, children after school and people who took time off from their jobs for a few days.

LIKE A BANZAI ATTACK

"They started coming over the hill like a banzai attack," said Nick Zerella, one of the construction supervisors on loan from a local company, "and had to be mobilized."

A contractor in Groton, some 65 miles to the east, shut down a job and brought his crew to Bridgeport to work on the project. A carpenter from Monroe, about 10 miles to the north, rode his bicycle over.

Jeremy Horner, 7, who lives nearby, was toting some impossibly large boards with his father this weekend, Jeremy said that he had volunteered, but that he believed Santa would take note of his efforts.

Michael Roberston, 19, a carpenter, was one of several unemployed building trades workers who volunteered, so impressing one construction official with their skills and dedication that he said he would try to find them jobs. "This is the greatest," said Mr. Roberston. "You could not get people to work like this for pay. And it's quality work. There's a lot of pride in it."

By Saturday, less than 24 hours before the scheduled reopening at 1 P.M. today, work had reached a furious pace. The site was a muddy mess of extension cords and lumber, teeming with nearly 100 workers who filled the Christmas Village section of the city park with echoes of hammering and sawing, punctuated by the warning beeps of heavy machinery backing up.

CHANGES AND SHAKING HEADS

The building and grounds changed appearance dramatically from hour to hour. An electrician wired a room with the insulation man hot on his heels, the sheet-rock man behind him, the carpenters and painters closing in fast.

It was a scene that caused onlookers, one after another, to shake their heads in disbelief.

The work force was fueled standing up, at a table of sawhorses and sheets of plywood laden with hamburgers, chicken, Italian sausage, pizza and other fare donated by local restaurants and residents. One restaurant owner, Thomas Caco, cooked meals at the site. Women continually appeared from between the dozens of trucks and cars with baked goods. One of the workers, Peter Freer, spoke of a "phoenix rising from ashes" and worried about his weight.

Children showed up with coffee cans full of money collected in their neighborhoods. When a worker was taken to the hospital for a few stitches after a minor accident, the emergency room staff sent him back with $63 in donations. A fireman dropped off a $5 bill given him by someone. A bank gave $2,000.

Several department stores each gave as much as $1,000 worth of toys, and some toy companies from as far away as Long Island and New Jersey sent truckloads of them, as did a Christmas Village in Torrington. One department store had Mr. Parlatore spend most of Saturday roaming its aisles with shopping carts.

A "TRICKY" PROCUREMENT TECHNIQUE

Sandy Mirsky seemed to take charge of procurement, telephoning for donations of materials as the workers told her what they needed. Lifting her foot so the floor could be laid, she said her technique was to call local merchants, order what she needed and then break it to them that she had no way to pay. "Tricky," she said between calls for locks, carpeting and red flocked wallpaper, "but it has usually worked."

Dolly Goldstone, who is playing Mrs. Santa Claus this year, watched as the work progressed and said it reminded her of the spirit she saw in England during the bombing in World War II.

Ten minutes before reopening, the tree was trimmed and a vacuum cleaner brought in, "Stop vacuuming!" yelled Marilyn Goldstone. "Camp David is calling."

President Reagan called to congratulate the workers, describing what happened in Beardsley Park as "one of the most inspiring Christmas stories I have heard in years and years and years."

Michael Marella, president of the Police Athletic League, said the President's call was "wonderful, but the real thanks is in the faces of the children," hundreds of whom came to see the papier-mâch elves hammer and saw once again and Santa arrive in a white, donated limousine.

Snow fell on the chalet and the surrounding pines. Grown men cried.●

MECHANICAL TECHNOLOGY, INC. (MTI)

● Mr. D'AMATO. Mr. President, today we are debating H.R. 7356, the Interior appropriations bill for fiscal year 1983. Within this bill there is a line item for vehicle propulsion research and development which includes funds for the Stirling engine program. The Stirling engine program is being carried out under the Automotive Propulsion Research and Development Act of 1978 by Mechanical Technology, Inc., of Latham, N.Y.

This is an unusual program because it has remained on schedule and within budget since its inception. This program has drawn rave reviews from those who are familiar with its progress and potential. The Director of the NASA Lewis Research Center has repeatedly evaluated MTI contractor performance as excellent to outstanding in all respects.

Major government supported Stirling engine developmental efforts are now underway in Europe. The Japanese Government recently announced a significant Stirling program as well, one purportedly cost-shared by private industry. However, our Stirling program, the only significant one in the United States, is still in the forefront, and with continued funding support will be able to compete successfully with these foreign efforts.

Indeed, the results of this NASA-run program have been so impressive that General Motors, Ford, and John Deere have now quietly let it be known that they are interested in possible utilization of the Stirling engine. Additionally, the U.S. Army is now developing Stirling technology for field power application.

I am very pleased that MTI has begun to gather recognition it so well deserves. The MTI success story exemplifies the best in private industry and government cooperation in the important area of scientific research and development. Mr. President, I ask that the Popular Science article about the Stirling engine and MTI be inserted into the RECORD.

The article follows:

THE PROMISING POWER PLANT MAY FINALLY BE READY TO ROLL—IF JOINT DOE-NASA FUNDING CONTINUES

(By E. F. Lindsley)

Frankly, if they'd left the driving to me, I'd have waited for the car coming from our left to clear before pulling out of the driveway and onto the road. The timing and distance were just a bit tight. Besides, the engine under the hood of our car didn't even sound as if it were running.

But my driver, Jeff Spraker, a technician at the laboratory where the car's unusual engine is being developed, kicked down hard on the gas. I heard gravel spin out from under our tires as we shot out of the driveway and across the road with a smoothly fluid sweep. Oddly enough, I still didn't hear much from the engine—no exhaust roar, vibration, or other symptoms of a floor boarded takeoff.

That was because the car we were riding in was powered by the latest experimental version of a Stirling engine, a power plant whose pistons are driven by externally heated hydrogen gas instead of fuel-air firings inside its cylinders. I was visiting Mechanical Technology, Inc., in Latham, N.Y., to see how the NASA-managed development program was proceeding, and particularly to find out if this latest Stirling program could overcome the vexing engineering problems that have frustrated past efforts to fulfill the Stirling's promise of high fuel efficiency, low emissions, and multi-fuel capability. What I found, as the test drive suggests, was highly encouraging. But that's getting ahead of the story.

To understand where the Stirling engine is now and where its been requires some backtracking. The engine was invented by Robert Stirling, a Scottish minister, back in 1816, long before the Otto and diesel engines we think of as conventional. Conceived as an alternative to steam engines, whose high-pressure boilers could be dangerously explosive, the Stirling transferred the heat produced in an external combustor through a heat exchanger to a working gas that drove reciprocating pistons. Stirling also originated the idea of employing a regenerator to bank thermal energy when it wasn't needed, returning it when it was. With regeneration, the Stirling cycle promised the highest efficiency theoretically possible in a heat engine, as the laws of thermodynamics—not yet developed in Stirling's day—would show. And external combustion carried another advantage over other engines: Stirlings could run on any fuel—from wood chips to cow chips.

Many of them did just that. Until about 1920, small wood- and coal-powered Stirling engines saw wide use pumping water and generating electricity on farms and in remote communities. They were even sold by Sears, Roebuck. But these early designs used air as the working fluid. Steam, with the technology then available, was more efficient.

AMERICA'S HOLE CARD?

Nevertheless, in 1938, N. V. Philips of the Netherlands initiated modern research on the Stirling. Since that time, a great many development programs have sought to take advantage of the stirling's inherent efficiency advantage to generate electricity, operate refrigeration units, or power automobiles. Both General Motors and Ford pursued Stirling programs in recent years, but eventually abandoned them in the face of serious engineering and financial obstacles.

Despite this, in a 1975 study of advanced automotive engines performed for the Department of Energy, NASA's Jep Propulsion Laboratory named the Stirling along with another design—the Brayton-cycle, or gas-turbine, engine—as the most attractive candidates for future automotive power plants. Then, in the post-fuel-shortage flurry of 1978, the two agencies jointly set up a program to develop and, by 1984, demonstrate in a car a practical Stirling automotive engine. It was to be a three-step program, using as a baseline the P-40 research engine already being developed by a Swedish contractor, United Stirling, Inc. This was to be followed by a Mod I engine with greater power and less weight than the P-40. Finally, when the Mod I had yielded its secrets, a Mod II engine would be built and demonstrated in a car. The hope was to have the Stirling ready to serve as America's ace in the hole if a really prolonged and serious fuel shortage occurred.

The contract for the Mod I engine went to Mechanical Technology, Inc. The company's goals, as MTI vice president Gene Mannella explained to me, are to achieve a 30 percent fuel-economy advantage over equivalent spark-ignition engines, low exhaust emissions, and ability to use a variety of fuels with easy changeover.

"And all of these objectives must be coupled," assistant project manager Bill Ernst added, "with normal automotive reliability, durability, competitive manufacturing and operating costs, and acceptable noise and safety levels."

These are bold goals, as I knew from my past experience with Stirlings, including having seen William Beale's Stirling-cycle air conditioner [PS, Aug. 1974] and electric generator [PS, June 1978] and even having built a little model Stirling from ancient PS plans [PS, July 1965]. These and other engines I have seen have run all right, but they did not shake my impression of the Stirling as an elegant, exotic engineering novelty beset with too many mechanical and thermal problems for everyday automotive use.

Thus, I went to MTI in a skeptical frame of mind. Specifically, I wanted to know:

What kind of mechanical arrangement would be used to translate the engine's hard-to-define operating cycle—lacking both valves and a timed ignition event—into output power?

How would the engine overcome the necessary thermal time lag between putting heat into the combustor and getting action out of the pistons?

Could warm-up times in cold weather be kept acceptably short?

Could effective seals be designed to keep the pressurized hydrogen gas contained within the cylinders?

Finally, could such an engine perform in a normal car—in ordinary traffic—without a team of technicians aboard to keep it running?

That last question would be answered in due course; first Dr. Mannella showed me around the lab. As he explained the details of the engine, Mannella impressed me as a sleevesup type of engineer who easily translates difficult engineering concepts into things that run. Both he and his assistant, Bill Ernst, seemed solidly sure of their development work.

My misgivings about the complex mechanical linkages employed in some earlier Stirling engines were quickly put to rest when Mannella showed me one of the Mod I engines disassembled. Here was an ordinary-looking crankcase with a V4 setup. It did have two crankshafts geared together to drive a single output shaft, but it certainly appeared simpler and more conventional than the oddball rhombic drives and swash plates I'd seen on other Stirlings.

"It's a kinematic, double-acting engine," Mannella told me. Kinematic means that the pistons are mechanically linked to the crankshafts. Double-acting means that the two working chambers, hot and cold, are separated by a single piston and the hydrogen working fluid operates against both upper and lower faces of the pistons. "With this approach," Ernst said, "we can have an absolutely vibration-free, perfectly balanced engine."

THERMAL LAG

Nice, but those complex drive linkages were meant to overcome the Stirling's inherent problem of matching engine output to driving demands. Simply using the throttle to increase or reduce fuel does not yield the split-second changes you get from a carburetor or injection pump delivering fuel directly into the cylinders. With external combustion, there is a time lag before the effect of a fuel-quantity change in the combustion chamber is translated into gas-pressure change in the separate cylinders.

Some other Stirlings have used swash plates, which actually alter the mechanical length of the working strokes, and thus the working volume, to produce quick response to the driver's demands. Owners of lawn tractors with hydrostatic drive, which also

use swash plates, will understand this. It may still be the best way to control the Stirling.

MTI's engine, though, with its simpler, unchanging crank throws, manages power output by altering the volume of the hydrogen working fluid in the engine. A microprocessor monitors fuel input and adjusts hydrogen pressure to match it by valving gas to and from a storage reservoir. "At idle, the pressure is 450 psi. At maximum power, it's 2,500," Ernst told me. In a sense, that's not much different from a throttle plate in a carburetor, which controls the pressure of air, the working fluid in an internal-combustion engine.

That sounds simple enough, but it makes even more crucial a difficult problem that has plagued Stirling development: sealing in the hydrogen.

In a way, the Stirling is an engine divided against itself. The power-producing side contains hydrogen under pressure, and the lower side has a crankshaft that must be bathed in oil. Hydrogen is one of nature's most difficult gases to seal, but somehow the seals must allow the connecting rods to bridge this boundary region of high-pressure hydrogen on one side and engine oil on the other. At the moment, MTI is having fairly good luck with a double seal, one part that keeps the hydrogen in and another that scrapes the oil from the reciprocating connecting rods.

But if no oil is permitted inside the cylinders, how are the piston rings lubricated? "They're PTFE materials," Ernst said, using the chemical designation for the slippery material commonly called Teflon. "They run with no lube. A film builds up on the cylinder walls, and the rings don't wear. We've operated them for thousands of hours with no wear," he said.

If that problem is close to solution, what about two other difficulties caused by hydrogen's unique properties? The gas can also leak by diffusion, actually penetrating the metal structure by sneaking between the molecules. An apparent solution to this problem was stumbled upon when some impure gas found its way into MTI's lab. "When the hydrogen is doped with carbon monoxide or carbon dioxide, an oxide coating builds up on the walls of the working-gas chambers and passages," Ernst explained. Apparently, these thin coatings are a more effective hydrogen barrier than the metal alone.

Hydrogen's other ability may prove a more serious problem. When metal parts working at elevated temperatures are exposed to hydrogen, they tend to become brittle and lose strength. To date, MTI has used exotic metals to resist the gas's destructive bite. But such metals are strategically critical and extremely costly. The next step is to find less-exotic materials.

MULTI-FUEL APPETITE

Meanwhile, the Mod I engine is running up to all expectations—and not just on test stands. In answer to my last question, Mannella and Ernst turned me over to technician Jeff Spraker for a test drive. Both emphasized that the car is not intended as a demonstration car, but as an engineering test vehicle.

As Spraker slid into the driver's seat, I asked him how long it took to get the car going, aware that external combustion can mean long start-up times. "On a warm day like today, about 15 seconds," he said. "At 15 below zero it could take 35 seconds. On the other hand, it's a heat engine and is therefore more efficient in cold weather."

That's when he stepped on the gas and we shot out of the MTI driveway, stilling any doubts I had about the engine's acceleration. Once in traffic, Spraker demonstrated another of the Stirling's surprising virtues by pushing a series of buttons on the heavily instrumented dash. "I'm switching from unleaded gas to diesel fuel to gasohol as we go," he explained. "This engine doesn't care what it runs on." Indeed, I couldn't feel the slightest change in performance, and the dials on the panel didn't even quiver as he varied fuels.

All of this was very impressive, but one big question remained: What is the likelihood of a Stirling-powered car appearing in the showroom soon, in five years, or ever?

Unfortunately, that question is impossible to answer right now. Government cutbacks have placed the third phase of the NASA program in doubt. Although the Mod I engine is well on its way to demonstrating all it was expected to and more, its planned successor, Mod II, is presently condemned to remain a "paper" engine. Perhaps a car manufacturer will pick it up and carry on. If not, a great deal of successful research may languish half finished. After seeing the performance of the NASA Stirling at this stage, I'd hate to see that happen.●

PROPOSED AMENDMENT STRIKING FUNDING FOR MX MISSILE PROCUREMENT AND BASING MODE

● Mr. HART. Mr. President, the administration's announcement this morning that it is backing away from the Dense Pack basing mode for the MX missile is a step in the right direction. It appears that the White House finally understands it does not have support in the Senate or in the Nation for a basing scheme that is expensive, destabilizing, and probably unworkable.

But the announcement does not go far enough, and the "compromise" proposed does not solve fundamental strategic questions. The fiscal year 1983 budget should contain no money for procurement or basing of the MX until Congress agrees to a basing mode and considers the alternative missile systems. Since more than 30 basing schemes have already been rejected, the administration may not be able to develop a basing mode for this missile.

We should, therefore, require the Air Force to proceed with feasibility studies on alternatives to the MX missile itself to determine if a more survivable, cost-effective system can be developed.

I intend to offer an amendment to strike all funding for procurement of the missile and the basing mode. "Fencing" or temporarily qualifying the appropriation is not an adequate protection against a system. Appropriating production funds in the DOD appropriations bill or in the continuing resolution, however qualified, commits our Government to procurement of a specifically designed new missile system [MX] whose very characteristics are increasingly called in question.

Mr. President, I submit for the RECORD the text of my amendment.

At the appropriate place in the resolution, it should read:

"None of the funds made available by this resolution shall be made available for obligation or expenditure for procurement of MX missiles or procurement of any permanent basing mode for the MX missiles."●

VOCATIONAL EDUCATION ACT

● Mr. DENTON. Mr. President, in the coming year the Congress will have an opportunity to reassess and, perhaps, redirect the Vocational Education Act. I believe that vocational education is vital to our economic and social well-being and I look forward to the opportunity to work with fellow members of the Education Subcommittee under the leadership of the distinguished Senator from Vermont, Mr. STAFFORD, to increase our Nation's capacity to provide technical and occupational education. In that regard, I was very impressed with the contents of a recent article by Cynthia Dodd which appeared in the Decatur Daily. I commend this article to my colleagues as evidence of the prowing importance and value of vocational education. Mr. President, I ask that the article: "Vocational Education Said More Popular Now" be printed in the RECORD.

The article follows:

VOCATIONAL EDUCATION SAID MORE POPULAR NOW

(By Cynthia Dodd)

Vocational education classes have become more attractive to students in recent years, says Homer Landrum, director of Hartselle High School's Vocational Education Department.

Today Hartselle's vocational education classes involve 65 percent of the students at the high school. That growth has occurred over recent years.

Of the 940 students at Hartselle High School, 627 are enrolled in some kind of vocational class, according to Principal J. P. Cain.

The vocational training center, built in 1979, houses vocational classes.

At Hartselle, courses are offered in cosmetology, trade and industry, distributive education, building trades, welding, automotive mechanics, health occupations education, agri-business and home economics.

Those classes are part of the comprehensive vocational education program. Some students, like those in distributive education, work in local businesses.

Others, like the students in cosmetology, study in a work-like atmosphere. They go from their regular English and history classes to actual experience with hair dryers and hair curling solutions, learning to cut and style hair.

By attending the school's cosmetology classes for two years, students can earn up to 1,000 hours of training, according to Landrum.

When they graduate, those students will have ony 200 hours of training to complete before they can become licensed cosmetologists.

Landrum says the incentive to find jobs is the major reason students enroll in voca-

tional classes. "We just have so many jobs that do not require a college degree today."

Vocational classes are becoming more successful in preparing students to go from the classroom to jobs, said Landrum.

"The students in the welding class often go straight from class into a job."

Landrum and Cain both said that the image of students in vocational classes is changing. There was a time when the students who enrolled in vocational education were considered second-class students, the educators agree.

Landrum said that is no longer true: "The attitude of the parents and the students has changed. People are finding out that skilled education is important and is not second class.

"At one time a college education was the only thing there was. If you weren't going to college you fell by the wayside and took whatever came along."

Students enrolled in vocational education classes say that they enjoy learning skills that will help them in the job market.

They are also proud of the paychecks they are bringing home: 18-year-old Regina Bailey is in Paul Parker's trade and industrial education class. She is a senior and works part time at Hartselle Medical Center Hospital as a nurses' aide.

"Both my brothers have been laid off. I just feel thankful to have the job I have. The films I see in class help you deal with your job. It helps you understand the ones who are above you and the ones who are below you," she said.

Regina said that she plans to keep her job for at least a year after she graduates, possibly longer.

Nancy Brindley, also a senior, is a student in Don Tomlinson's distributive education class. She was also in the D.E. program last year, and was able to leave school an hour early each day to go to her job at Hardee's.

She enrolled in D.E. again this year, even though, because of a heavier class load, she does not get the extra hour daily on the job.

She said that the work experience has "taught me a lot about getting along with my bosses at work. I pay closer attention to what I'm doing at work."

Nancy says she studies some things in class that may be unrelated to her present job, but that she is still learning about the business world in general.

"I'm getting work experience that I can use later on when I have a career job," she said.

Both the D.E. and the trade and industrial relations departments are co-operative programs—students work at regular jobs to practice what they are learning in the classroom.

The D.E. classes are mostly concerned with selling and distributing a product. Those students often hold jobs in retail outlets as sales clerks.

The trade and industrial education classes deal with manufacturing principles and rendering service, such as working as a nurses' aide or working as a cook in a restaurant.

Both Tomlinson and Parker are involved in helping their students find jobs while the students are in the co-operative program.

Hartselle School Superintendent Carlton Smith is proud of the school's vocational education department, he said.

The growth started with a survey conducted when the Hartselle City School System was formed in 1975.

"We did a goal-identification program and one of the things that was very high on the list was the need for more vocational ed," Smith said.

At that time Hartselle had only five teachers in vocational education. There were two home economics teachers, two agri-business teachers and one distributive education teacher. Now there are 13 vocational education teachers, Smith said.

The present vocational center was built four years ago with funding from an Appalachian Region federal program. "We are proud of where we've come in eight years," said Smith.

There is still a long way to go, he said. Presently there is only one computer being used by students in vocational education. Smith would like to see more.

"There is going to be a big demand for people in that field in the next few years. I would like to see a program developed that would help adapt students to the computer age," he said.

At the end of the month, the vocational department will be evaluated by the state Department of Education. The team of state and local vocational education officials will review the total Hartselle program.

The review team will report to Smith after its visit. The administration here will use the report to develop programs which address the recommendations of the review team, the superintendent said.

"We plan to use the state survey as a way of looking at ourselves," he said.●

WHAT THE COAST GUARD MEANS TO THOSE WHOSE LIVES ARE IN JEOPARDY ON THE HIGH SEAS

● Mr. PELL. Mr. President, the Coast Guard is the oldest continuing seagoing Armed Force of the United States. It performs a host of missions relating to our Nation's defense, the safety of all who sail our waters, and the enforcement of U.S. law and international treaties and agreements. Nowhere, however, is the indispensability of the Coast Guard more vividly demonstrated than in a dramatic rescue effort on the high seas.

The details of a heroic rescue operation in waters off the New England coast were disclosed last week by the Coast Guard, and reported by the Associated Press in the Providence Journal on December 10. According to the news account, the Gloucester scalloper *Sacred Heart* was floundering in 30 foot seas on the rocky shoals of the David Banks off Cape Cod on the night of last October 9. On patrol in the area was the 39-year-old Coast Guard cutter *Unimak*, stationed in New Bedford, Mass. As the high seas smashed tons of seawater against the aging steel plates of the *Unimak*, Comd. C. B. Newlin directed his crew in a successful operation to get a towline to the crippled *Sacred Heart*. Both ships were just a few minutes away from foundering in the treacherous waters of the David Banks when the last attempt at a towline held and the seven member crew and the *Sacred Heart* itself were saved from disaster.

This memorable rescue is a great credit to the men and women of the Coast Guard who perform their manifold duties under frequently challenging and difficult circumstances. The average age of Coast Guard cutters is more than 22 years, and many cutters—including one I served on prior to World War II—are over 40 years old. Navy vessels, by comparison, are half the age of the average Coast Guard cutter. Significant advances have been made in the last 2 years to address the capital equipment needs of the Coast Guard, but we have not achieved nearly enough to make up enough for years of underfunding and neglect.

Mr. President, I wish to share the account of the rescue of the *Sacred Heart* with my colleagues, and ask that the text of the article entitled "A Captain's Last Bold Choice Saves Seven Lives" be printed in full in the RECORD at this point.

The article follows:

[From the Providence Journal, Dec. 10, 1982]

A CAPTAIN'S LAST BOLD CHOICE SAVES 7 LIVES

BOSTON.—As 30-foot waves pounded the aging Coast Guard cutter, buckling its steel plates, the captain faced a life-and-death choice: Should he abandon an attempt to rescue a stricken fishing boat, or risk losing his ship and crew on rocky shoals a quarter-mile away?

Cmdr. C. B. Newlin's decision for one more try at getting a line to the seven-member crew of the Gloucester scalloper worked. His cutter, the 39-year-old, New Bedford-based *Unimak*, was able to take the 90-foot vessel *Sacred Heart* in tow.

But it was close. Newlin, 41, of Danville, Va., estimates that the two ships were 10 to 15 minutes away from foundering on the treacherous David Banks 45 miles east of Cape Cod.

"In 17 years at sea, I've seen a lot of rescues," said Newlin. "This was one of the most difficult."

The rescue took place the night of Oct. 9, but details were disclosed this week by the Coast Guard.

The story began earlier that day when an engine failure left the fishing vessel at the mercy of a growing storm.

"In 30 minutes, the wind changed from 30 mph to 50 mph," said Capt. Carlo Randazza, who rode out 30-foot seas for eight hours, waiting for rescuers. "I've been 13 years on fishing boats, but I've never seen a sea so big."

The 311-foot *Unimak* arrived that evening, after two smaller Coast Guard vessels were unable to reach the fishermen. Newlin said the high seas smashed tons of seawater against the converted Navy seaplanes tender, buckling metal plates and rolling his ship up to 55 degrees.

"One minute we'd be walking on the deck, then on the bulkhead," he said.

When the *Unimak* pulled to within 900 feet of the *Sacred Heart*, Newlin ordered 10 men to the fantail to fire a tow line onto the *Sacred Heart*. A huge wave submerged the cutter's stern, and 10 men were swept toward the railing.

Nine men smashed against a flagpole dismantled and lodged horizontally in the stern. Seaman Michael Conklin of Port Jervis, N.Y., slipped over the slide, but he clung to a guide rope and was pulled back aboard.

"We had some boys who became men out there," said Newlin.

One man suffered a concussion, another a broken leg. They were later evacuated by Coast Guard helicopter.

A tow line was fired to the weary crew of the *Sacred Heart*, but it split, forcing another try.

Newlin decided on one more try before giving the *Sacred Heart* crew 10 minutes to abandon ship for the raging sea and a long-shot rescue. By that time the *Unimak* was a quarter-mile from the shoals.

"If we didn't grab the line," said Randazza, "we were lost, totally lost."

But the line held. The *Unimak* was able to haul the fishermen to the safety of Provincetown.●

HUMAN RIGHTS WEEK

● Mr. D'AMATO. Mr. President, on December 10, 1948, the United Nations adopted the Universal Declaration on Human Rights, an historic document outlining the obligations of every government to its citizens. many of the principles embodied in the declaration have been fashioned after the first 10 amendments to the Constitution of the United States. As Americans, we have come to cherish the liberties guaranteed by the Bill of Rights. Nevertheless, it is important, especially during our observance of Human Rights Week, that we remember the millions of men and women deprived of even the most basic human rights and civil liberties.

As a member of the Commission on Security and Cooperation in Europe, I am particularly familiar with the ruthless and systematic denial of such freedoms by the Communist regimes of the Soviet Union and Eastern Europe.

Yesterday, we observed a "Day of Prayer for Poland and Solidarity" with the Polish people. I share the sense of concern expressed by many Americans over the tragic events which have occurred in Poland since the imposition of maritial law 1 year ago. The declaration of martial law by the Polish Council of State represents an attempt to deal a serious blow to the freedom and rights of the Polish people. Under constant pressure from the Soviet Union, General Jaruzelski has sought to extinguish the free spirit of the Polish workers, denying them the right to strike as well as imposing stringent control with respect to personal travel and communications.

It is important that we recognize the influence of the Soviet Union in these and other violations of human rights.

The Soviet Union, despite its professed support of both the Universal Declaration on Human Rights and the Helsinki Final Act, persists in its efforts to suppress religion and restrict emigration. While the Soviet regime has instituted repressive policies of control against Catholics, Protestants, and Muslims, it has been particularly harsh with respect to Soviet Jews. As a result, Soviet Jewry, today, faces the bleakest circumstances in more than a decade. Emigration continues to be effectively denied to Jews and members of other national and religious groups in clear violation of the Universal Declaration and the Helsinki Final Act. In addition, the authoritarian leaders of the Soviet Union have attempted to quell any form of dissent, imprisoning thousands of human rights activists in forced labor camps.

Soviet hegemony, meanwhile, has served to proliferate these policies in other nations. Elsewhere, the Romanian Government recently announced its decision to impose exorbitant education taxes on Romanian citizens who wish to emigrate. The proposed tax would block the emigration of thousands of Romanian citizens who have applied for permission to leave that nation.

In Afghanistan, for example, the Communist regime, under the Soviet puppet Babrak Karmal, has tried to crush the freedom and nationalism of the Afghan people. Thousands of innocent men, women and children have been executed or tortured by the military authorities. Today, nearly 3 years after the Soviet invasion, an estimated 100,000 Soviet troops remain in Afghanistan. A report recently released by Secretary Schultz presents convincing evidence that the Soviets have unleashed lethal gases over Afghanistan in an attempt to break the will of Afghan freedom fighters.

These are but a few examples of the blatant disregard for human rights fostered by Communist regimes, under the watchful leadership of Moscow. Let us, during this special week, reflect upon the Universal Declaration and strive to realize the common rights and freedoms which it contains.

Mr. President, I ask that the entire text of the Universal Declaration on Human Rights be printed in the RECORD.

The text follows:

UNIVERSAL DECLARATION OF HUMAN RIGHTS

PREAMBLE

Whereas recognition of the inherent dignity and of the equal and inalienable rights of all members of the human family is the foundation of freedom, justice and peace in the world,

Whereas disregard and contempt for human rights have resulted in barbarous acts which have outraged the conscience of mankind, and the advent of a world in which human beings shall enjoy freedom of speech and belief and freedom from fear and want has been proclaimed as the highest aspiration of the common people,

Whereas it is essential, if man is not to be compelled to have recourse, as a last resort, to rebellion against tyranny and oppression, that human rights should be protected by the rule of law,

Whereas it is essential to promote the development of friendly relations between nations,

Whereas the peoples of the United Nations have in the Charter reaffirmed their faith in fundamental human rights, in the dignity and worth of the human person and in the equal rights of men and women and have determined to promote social progress and better standards of life in larger freedom,

Whereas Member States have pledged themselves to achieve, in co-operation with the United Nations, the promotion of universal respect for and observance of human rights and fundamental freedoms,

Whereas a common understanding of these rights and freedoms is of the greatest importance for the full realization of this pledge,

Now, therefore, the General Assembly proclaims this Universal Declaration of Human Rights as a common standard of achievement for all peoples and all nations, to the end that every individual and every organ of society, keeping this Declaration constantly in mind, shall strive by teaching and education to promote respect for these rights and freedoms and by progressive measures, national and international, to secure their universal and effective recognition and observance, both among the peoples of Member States themselves and among the peoples of territories under their jurisdiction.

Article 1. All human beings are born free and equal in dignity and rights. They are endowed with reason and conscience and should act towards one another in a spirit of brotherhood.

Article 2. Everyone is entitled to all the rights and freedoms set forth in this Declaration, without distinction of any kind, such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status.

Furthermore, no distinction shall be made on the basis of the political, jurisdictional or international status of the country or territory to which a person belongs, whether it be independent, trust, non-self-governing or under any other limitation of sovereignty.

Article 3. Everyone has the right to life, liberty and security of person.

Article 4. No one shall be held in slavery or servitude; slavery and the slave trade shall be prohibited in all their forms.

Article 5. No one shall be subjected to torture or to cruel, inhuman or degrading treatment or punishment.

Article 6. Everyone has the right to recognition everywhere as a person before the law.

Article 7. All are equal before the law and are entitled without any discrimination to equal protection of the law. All are entitled to equal protection against any discrimination in violation of this Declaration and against any incitement to such discrimination.

Article 8. Everyone has the right to an effective remedy by the competent national tribunals for acts violating the fundamental rights granted him by the constitution or by law.

Article 9. No one shall be subjected to arbitrary arrest, detention or exile.

Article 10. Everyone is entitled in full equality to a fair and public hearing by an independent and impartial tribunal, in the determination of his rights and obligations and of any criminal charge against him.

Article 11. (1) Everyone charged with a penal offence has the right to be presumed innocent until proved guilty according to law in a public trial at which he has had all the guarantees necessary for his defence.

(2) No one shall be held guilty of any penal offence on account of any act or omission which did not constitute a penal of-

fence, under national or international law, at the time when it was committed. Nor shall a heavier penalty be imposed than the one that was applicable at the time the penal offence was committed.

Article 12. No one shall be subjected to arbitrary interference with his privacy, family, home or correspondence, nor to attacks upon his honour and reputation. Everyone has the right to the protection of the law against such interference or attacks.

Article 13. (1) Everyone has the right to freedom of movement and residence within the borders of each state.

(2) Everyone has the right to leave any country, including his own, and to return to his country.

Article 14. (1) Everyone has the right to seek and to enjoy in other countries asylum from persecution.

(2) This right may not be invoked in the case of prosecutions genuinely arising from non-political crimes or from acts contrary to the purposes and principles of the United Nations.

Article 15. (1) Everyone has the right to a nationality.

(2) No one shall be arbitrarily deprived of his nationality nor denied the right to change his nationality.

Article 16. (1) Men and women of full age, without any limitation due to race, nationality or religion, have the right to marry and to found a family. They are entitled to equal rights as to marriage, during marriage and at its dissolution.

(2) Marriage shall be entered into only with the free and full consent of the intending spouses.

(3) The family is the natural and fundamental group unit of society and is entitled to protection by society and the State.

Article 17. (1) Everyone has the right to own property alone as well as in association with others.

(2) No one shall be arbitrarily deprived of his property.

Article 18. Everyone has the right to freedom of thouht, conscience and religion; this right includes freedom to change his religion or belief, and freedom, either alone or in community with others and in public or private, to manifest his religion or belief in teaching, practice, worship and observance.

Article 19. Everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media and regardless of frontiers.

Article 20. (1) Everyone has the right to freedom of peaceful assembly and association.

(2) No one may be compelled to belong to an association.

Article 21. (1) Everyone has the right to take part in the government of his country, directly or through freely chosen representatives.

(2) Everyone has the right of equal access to public service in his country.

(3) The will of the people shall be the basis of the authority of government; this will shall be expreseed in periodic and genuine elections which shall be by universal and equal suffrage and shall be held by secret vote or by equivalent free voting procedures.

Article 22. Everyone, as a member of society, has the right to social security and is entitled to realization, through national effort and international co-operation and in accordance with the organization and resources of each State, of the economic, social and cultural rights indispensable for his dignity and the free development of his personality.

Article 23. (1) Everyone has the right to work, to free choice of employment, to just and favourable conditions of work and to protection against unemployment.

(2) Everyone, without any discrimination, has the right to equal pay for equal work.

(3) Everyone who works has the right to just and favourable remuneration ensuring for himself and his family an existence worthy of human dignity, and supplemented, if necessary, by other means of social protection.

(4) Everyone has the right to form and to join trade unions for the protection of his interests.

Article 24. Everyone has the right to rest and leisure, including reasonable limitation of working hours and periodic holidays with pay.

Article 25. (1) Everyone has the right to a standard of living adequate for the health and well-being of himself and of his family, including food, clothing, housing and medical care and necessary social services, and the right to security in the event of unemployment, sickness, disability, widowhood, old age or other lack of livelihood in circumstances beyond his control.

(2) Motherhood and childhood are entitled to special care and assistance. All children, whether born in or out of wedlock, shall enjoy the same social protection.

Article 26. (1) Everyone has the right to education. Education shall be free, at least in the elementary and fundamental stages. Elementary education shall be compulsory. Technical and professional education shall be made generally available and higher education shall be equally accessible to all on the basis of merit.

(2) Education shall be directed to the full development of the human personality and to the strengthening of respect for human rights and fundamental freedoms. It shall promote understanding, tolerance and friendship among all nations, racial or religious groups, and shall further the activities of the United Nations for the maintenance of peace.

(3) Parents have a prior right to choose the kind of education that shall be given to their children.

Article 27. (1) Everyone has the right freely to participate in the cultural life of the community, to enjoy the arts and to share in scientific advancement and its benefits.

(2) Everyone has the right to the protection of the moral and material interests resulting from any scientific, literary or artistic production of which he is the author.

Article 28. Everyone is entitled to a social and international order in which the rights and freedoms set forth in this Declaration can be fully realized.

Article 29. (1) Everyone has duties to the community in which alone the free and full development of his personality is possible.

(2) In the exercise of his rights and freedoms, everyone shall be subject only to such limitations as are determined by law solely for the purpose of securing due recognition and respect for the rights and freedoms of others and of meeting the just requirements of morality, public order and the general welfare in a democratic society.

(3) These rights and freedoms may in no case be exercised contrary to the purposes and principles of the United Nations.

Article 30. Nothing in this Declaration may be interpreted as implying for any State, group or person any right to engage in any activity or to perform any act aimed at the destruction of any of the rights and freedoms set forth herein.●

PROTECTING BIG SUR FROM OFFSHORE LEASES

● Mr. HAYAKAWA. Mr. President, the California coastline is special for a number of reasons. For one, coastal tourism is the No. 1 industry in my State. Millions of visitors, generating $19 billion per year, come to California to witness such scenic wonders as the rocky cliffs at Big Sur. For another, the commercial fishing industry brings an additional $1 billion in revenues per year to California. In fact, virtually the entire economic base of California's coastal region is based on the productivity of an unspoiled coastline.

Recognizing this importance, the House of Representatives in the Interior and related agencies appropriations bill, deleted funding for the "procurement, leasing, bidding, exploration, or development of offshore leases" from Pismo Beach to Oregon. The House language in section 107 protects only those coastal areas considered to have an estimated low oil reserve and a much greater potential environmental impact on commercial fisheries and the threatened California sea otter. The House language does not affect leasing in the recently announced oil finds near Point Conception.

In contrast, the Senate version retains the language passed in last year's Interior appropriations bill. At that time, a smaller tract-specific lease sale was proposed by the Department of the Interior. Last year's language also protected the Big Sur area with which I am concerned today. It is important for my colleagues to understand that in order to protect the same areas as were covered in last year's Interior appropriations bill, the Senate needs to adopt the House language in section 107. I urge the conferees to consider this matter carefully.●

TRIBUTE TO THE PHARMACISTS AGAINST DRUG ABUSE CAMPAIGN

● Mrs. HAWKINS. Mr. President, as chairman of the Senate drug Enforcement Caucus, I would like to call my colleagues' attention to an exciting Government/private sector initiative.

On March 22 of this year, First Lady Nancy Reagan hosted a very special White House briefing on drug use and the family, sponsored by ACTION, the national volunteer agency. Present at that briefing were corporate and organizationsl leaders from across the country who gathered in the East Wing of the White House to hear from various parents and drug experts about the problem of illicit drug use by our Nation's young people.

Present at that meeting was Mr. Jack O'Brien, President of McNeil Pharmaceutical. Mr. O'Brien pledged that same day he and his company would do everything within their power to assist in the efforts of thousands of parents nationwide who were trying to prevent the spread of drug abuse.

Since that day in March, McNei Pharmaceutical, ACTION, and the White House have been actively designing and implementing a program which I find most inspiring. It was recently launched in the Boston metrolopolitan area and in the States of Maine and New Hampshire as a test program. This unique drug abuse program uses the resources of 1,400 community pharmacies to help educate parents on the health dangers of illicit drug use by their children.

The campaign, Pharmacists Against Drug Abuse (PADA), is a cooperative effort sponsored by McNeil Pharmaceutical, ACTION, and State pharmaceutical associations. It is built around a free brochure, "The Kinds of Drugs Kids Are Getting Into," available at participating pharmacies. Michael Landon, an outstanding spokesman for the program, was present to launch the campaign in New England.

PADA focuses on alcohol and marihuana which, according to Dr. Carlton E. Turner, Director of the White House Drug Abuse Policy Office, "are two drugs young people are mostly likely to use in entering the drug scene." The program also focuses on cocaine, the fastest growing drug of abuse in America.

Speaking before the press conferences at Boston's Hotel Meridien and in Manchester and Portland to launch the PADA campaign, Dr. Turner emphasized that "over one-third of all kids in America use illegal drugs and 1 of every 14 high school seniors use marihuana every day." Dr. Turner added:

> Parents and kids need to know that using these drugs is not harmless. For example, marihuana can have a marked impact on a child's ability to learn and remember things. What we're really talking about is an epidemic of drug abuse which is a threat, a real danger to a generation of young people.

According to Jack O'Brien, "We developed the pharmacists against drug abuse program because local pharmacists, by academic training and professional experience, are experts on drugs and are an excellent source of information on drug abuse." He added:

> The program will not be successful if all we do is distribute 600,000 brochures on drug abuse in Maine, Massachusetts, and New Hampshire. What is needed is for parents to get educated about drug abuse, to talk with their kids, to get involved in their communities, and to form parents' organizations that can turn around the drug problem and the drug abuse culture in America.

Tom Pauken, Director of ACTION, stated that ACTION was "enthusiastic in cooperating in the McNeil Pharmaceutical PADA program, as it stimulates volunteer and private sector participation."

Also present at the announcement was Mr. Robert Stutman, Regional Director for the Drug Enforcement Administration, who added the support of the law enforcement community to the campaign.

In addition to the free brochure available at participating pharmacies, the PADA program also includes pharmacy posters announcing, "This is the place where parents can learn about drug abuse."

For parents who want further information about how to aid in the fight against drug abuse, there is a toll-free number to call—ACTION/PRIDE, the National Family Resource Center at 1-800-241-9746.

This program is a perfect example of theeh effectiveness of a public/private partnership. I am also pleased to see the agencies of the Federal Government working together in this cooperative manner. The utilization of all possible resources is required to put a stop to this problem.

I commend all those involved: McNeil Pharmaceutical, ACTION, Michael Landon, and the DEA for this outstanding campaign. I wish you luck in hopes that these materials can be made available in all our States in the very near future.●

NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS

● Mr. WALLOP. Mr. President, it is required by paragraphs 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Ms. Laura Hudson, of the staff of Senator JOHNSTON, to participate in a program sponsored by the Hebrew University of Jerusalem in Jerusalem, Israel, from January 9-18, 1983.

The committee has determined that participation by Ms. Hudson in the program in Jerusalem, at the expense of the Hebrew University of Jerusalem, to participate in seminars on American-Israeli relations, is in the interest of the Senate and the United States.●

ORDERS FOR WEDNESDAY

ORDER FOR RECESS UNTIL 10 A.M.

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business this morning it stand in recess until 10 a.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, today after the Senate convenes at 10 a.m. and after the recognition of the two leaders under the standing order, I ask unanimous consent that there be a brief period for the transaction of routine morning business to extend not past 10:30 a.m. in which Senators may speak for not more than 2 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that at 10:30 a.m. today the Senate proceed to the consideration of the PIK bill which is an Agriculture bill which I understand is cleared for consideration on both sides.

Mr. ROBERT C. BYRD. No, it is not.

Mr. BAKER. Mr. President, I understand that that has not cleared. I was mistaken.

SCHEDULE FOR WEDNESDAY

Mr. President, in the morning at 10:30 a.m. it is my hope that we may be in a position to proceed to the consideration of PIK bill. If we are not, then we will go back, of course, to the highway bill at which time the pending question will be the Metzenbaum amendment.

However, I would urge Senators to consider the desirability of trying to clear that matter after consideration within a brief period of time.

Mr. President, in addition to that I understand that an Agriculture appropriations conference report may be available today and that perhaps we could deal with that in a short time as well.

Mr. President, I expect today will be a late day as indeed yesterday had been a late day.

It is my fondest hope that we may be able to finish the highway bill today.

The motion to invoke cloture against further debate on the substitute and on the bill has been filed and votes on that will mature on Thursday. But really if we put our minds to it I think we might finish that in advance of the time that the Senate is called on to decide the question of cloture.

Mr. METZENBAUM. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. METZENBAUM. I know that the majority leader has indicated that I was to be recognized when we return to consideration of this bill.

My parliamentary inquiry is, Has an order to that effect been entered in the RECORD?

The PRESIDING OFFICER. An order to that effect has been entered and the Senator's right will be protected.

Mr. METZENBAUM. I thank the Chair, and I thank the majority leader.

RECESS UNTIL 10 A.M.

Mr. BAKER. Mr. President, I have no further business to transact at this time. If no other Senator is seeking recognition, I now move in accordance with the previous order that the Senate stand in recess until the hour of 10 a.m. today.

The motion was agreed to; and at 1:29 a.m. Wednesday, December 15, 1982, the Senate recessed to reconvene at 10 a.m. today.

NOMINATIONS

Executive nominations received by the Senate December 14, 1982:

IN THE NAVY

The following-named officer, under the provisions of Title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Vice Adm. Kenneth M. Carr, [redacted] /1120, U.S. Navy.

PUBLIC HEALTH SERVICE

The following candidates for personnel action in the regular corps of the Public Health Service subject to qualifications therefor as provided by law and regulations:

For appointment:

To be assistant surgeon

David M. Anderson
James M. Erskine
Martha J. Wunsch
John S. Yao
Kevin S. Yesky

DEPARTMENT OF JUSTICE

William Thomas Dillard III, of Tennessee, to be U.S. attorney for the northern district of Florida for the term of 4 years, vice Nickolas P. Geeker, resigned.

89-059 O-86-43 (Pt. 22)

EXTENSIONS OF REMARKS

TRIBUTE TO HON. TOM RAILSBACK

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. RODINO. Mr. Speaker, TOM RAILSBACK of Illinois is leaving this body after 16 years of exemplary service to his Nation, his district, and his State.

Throughout our years on the Judiciary Committee he and I have forged a close working relationship. He has been an artful legislator. A thoughtful and fair-minded man, his work has been most valuable in helping the committee fashion acceptable compromises among competing interests on thorny issues.

There has been no lack of these difficult issues in TOM's years on the committee. As the ranking minority member of the Subcommittee on Courts, Civil Liberties and the Administration of Justice, he has helped guide the committee through many prickly legislative thickets in which emotions on the issues run high.

Perhaps, I know TOM best through his service on the Subcommittee on Monopolies and Commerical Law. His probing mind always helped us cut through to the heart of the issues, to sort out the validity of the various interests, and to reach just and equitable solutions.

I think the Nation's citizens will remember TOM best for his service during the agony of the impeachment hearings. All of us who took part in those hearings and the millions who viewed the proceedings on television will not soon forget his own special torment as the facts unfolded, the record mounted, and the committee moved toward historic decision. At no time has TOM RAILSBACK's courage and dedication to principle that have marked his career been more evident.

NOW, TOM RAILSBACK is about to begin a new career with the Motion Picture Association of America. We wish him success in this endeavor, knowing full well that the knowledge and expertise and all the personal qualities that he has shown during his political career will guarantee that success.

KGB LEADERSHIP FOR THE SOVIET UNION

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. McDONALD. Mr. Speaker, the swift and smooth transition of leadership in the Soviet Union on November 12 from Leonid I. Brezhnev to Chief of KGB, Yuril V. Andropov, should not have been a surprise to anyone who followed the events in the Soviet Union in 1982. This was a year of great changes in personnel and in policies in the country which otherwise is known for its slow, internal, political process. Each new leadership in the past has stressed at the transition time the theme of continuity of Soviet domestic and foreign policies and principle of collective leadership.

The transition of leadership, for all practical purposes, started on January 25, 1982, when Mikhail Andreyevich Suslov died rather suddenly while known to be in poor health for quite some time. Considered to be second in significance to General Secretary Leonid I. Brezhnev as member of both top leadership bodies, the Politburo and the Secretariat of the Central Committee of the CPSU, Suslov has been credited for the ideological supervision and formulation of Soviet foreign policies. His departure meant that the new Soviet initiatives on the international arena should be expected. And, notwithstanding the fact that Brezhnev and his entourage were still officiating in the Kremlin, new leadership came to be felt in Soviet policies abroad and at home.

A large delegation, headed by head of the China Department of the U.S.S.R. Ministry of Foreign Affairs, M. Kapitsa, left for Peking several weeks after Suslov's death. This first Soviet delegation of such size and significance to vist China since 1963, first met a rather reserved reception in Peking. However, 2 months later it was followed by higher-level Soviet delegation headed by Deputy Minister of Foreign Affairs, L. Iliychev. This time, the discussion touched practical measures of cooperation in the field of cultural and technical exchange and future expansion of trade relations. Several visits of technical teams and sport groups were exchanged between China and the Soviet Union since that time. Minister Iliychev came for a second visit in October.

On April 22, Yuriy V. Andropov, Chairman of the Committee of State Security (KGB) and member of the Politburo of CPSU, made a speech in which he described at length the creative nature of Marxism-Leninism with an obvious reference to flexibility and possible changes in Soviet foreign policies after Suslov. It is very unusual for the head of KGB to make public speeches and pronouncement of general policy nature. Andropov also referred at that time to the strong defensive posture that the Soviet Union must maintain in view of the aggressive policies of the capitalist countries. Domestically, it was expressed by harsher persecution of political dissidents and religious groups. Some arrests took place in Moscow and Academician Sakharov was roughed up with a manuscript of his new book taken away from him.

On May 20, 1982, Yuriy Andropov moved from his position as Chairman of the KGB back to the Secretariat of the Central Committee of CPSU, the job he had for several years prior to becoming head of KGB in 1967. It was said that at this second time as Party Secretary, Andropov took over the responsibilities of deceased M. A. Suslov. In this new capacity, he automatically became member of the Defense Committee, the highest body overseeing the armed forces of the country.

It was the time of great anxieties for the Brezhnev family. Brezhnev's brother-in-law, KGB General Semyon K. Tsvigun, died suddenly and it was rumored in Moscow that he had committed suicide. Brezhnev's daughter Galina was under suspicion of having been involved in a corruption scandal. Also, Brezhnev's close friend and political commander of Moscow Military District, General V. Grushevoy, suddenly died of a heart attack. Brezhnev himself was very sick and absent for weeks from Moscow and some malicious gossip declared him even dead. He was obviously very weak since at the funeral of General Grushevoy, he openly and uncontrollably cried.

In June, a large delegation of Yugoslavian high military and Communist Party officials, headed by Army Commander and Politburo member, General Nicola Ljubicic, came to the Soviet Union for a prolonged 6-week tour of important military installations and for mutual interest conferences. This was the first such delegation from Yugoslavia since 1956.

It is clear now that these new initiatives attempting to consolidate the Communist camp and to forge a united bloc—including China and Yugoslavia—have been conducted by Andropov. He succeeded, throughout

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

the 10 months between the deaths of Suslov and Brezhnev, in creating new trends and a strong front of supporters in the Central Committee of CPSU to help him become new General Secretary of CPSU.

It is for the first time in the history of the Soviet Union that the head of secret police and intelligence organization became the head of the ruling Communist Party. Andropov is a tough, shrewd, smart, scheming manipulator who for 15 of the 18-year Brezhnev administration as General Secretary of the party, has been molding the KGB machinery according to his own pattern and methodology of operation. He was in charge of the computerized dossiers of each and every Soviet citizens longer than any other KGB boss, including its organizer, Felix Dzerzhinskiy. Andropov created a newly sophisticated, modern KGB machinery run by efficient, smartly dressed operators known in Moscow as Andropovtsy, a far cry from the crude and primitive KGBeshniks of the Lavrentiy Beriya times. Andropov forced Soviet medicine, including its vulnerable branch of psychiatry, into the role of a tool of the invincible KGB. He extended the KGB system of administration into Poland where in reality, not the military under General Wojciech Jaruzelski but the secret police and detachments of ZOMO under the Minister of Interior, General Czeslaw Kiszczak, are exercising actual controlling power.

Andropov started his big-time career 31 years ago in 1951 when he was transferred from Petrozavodsk in the Karelo-Finnish Republic to Moscow to the department of the Central Committee dealing with security affairs. He was recommended by Otto Kusinen, Soviet Finn, and leader of that Soviet territory since 1940. Andropov spent 11 years in that area and impressed Kuusinen by his ability to speak Finnish and by his adroitness and skill of dealing with dissident Finnish nationalists during and especially after the war. With very little formal education—he graduated only from the Technical School of River Transport in Rybinsk on the Bolga, a school academically about the high school level—Andropov displayed during his life a great organizational ability, strong instinct for survival in the jungles of Soviet Communist Party institutions, and an unusual talent for languages. He augmented his limited formal education by attending university courses during his post World War II stay in Petrozavodsk (1945-51) and by additional studies at the Higher Party School of the Central Committee in Moscow. But he never graduated from either of these schools. The transfer to Moscow in 1951 was the first big breakthrough in Andropov's career. His knowledge of Finnish—which has common roots with Hungarian—served him very well in his second big advancement when he was assigned to a new diplomatic security position in Budapest, Hungary in 1953 and, when he became Soviet Ambassador to Hungary a year later in 1954. He impressed the diplomatic community of the Hungarian capital as one of the very few foreign ambassadors who spoke Hungarian.

Andropov's skill in diplomatic maneuver, however, was surpassed by his ability to plot in the KGB style. In November, 1956, he lured General Pal Maleter—military leader of the uprising—and Prime Minister Imre Nagy to conferences with the Soviet command by promises of negotiation. Andropov was standing in the background, very suave and smiling, while one of his predecessors at the KGB, General Ivan Serov, supervised the arrest of General Maleter and his party. Both Maleter and Nagy were executed sometime later.

There are no ambiguities in Andropov's record. He always knew how to promote himself through the rough Soviet Party politics. In 1937-38, he took advantage of the Stalin purges in the Communist Youth Organization and became a secretary and a year later first secretary of Yaroslavl Communist Youth Offices.

After his performance in Hungary he came back to Moscow with the new taste for sophistication. He switched from vodka to scotch whiskey and started his study of English as an essential language for a Soviet leader dealing with intelligence and security affairs.

After 5 years as head of the Central Committee department dealing with affairs of the Communist bloc countries, Andropov joined the top policy body, the Secretariat of the Central Committee in 1962. As Secretary of the Central Committee he dealt directly and indirectly with the problems of internal and national security and consequently in 1967, he became chairman of the KGB, the organization that combines the functions of the CIA, FBI and at least a dozen other agencies in the United States—Secret Service, National Guard, National Security Agency, and others. He remained in charge of this huge network with not less than half a million employees, longer than any other person in the history of the U.S.S.R.

The KGB, during the 15 years of Andropov's supervision, changed from rather simplistic service of the Stalin period into the sophisticated and expanded body of professional operators intimidating dissident movements at home, skillful intelligence experts and terrorist leaders abroad and scientifically based analysts writing reports for the policymakers in the offices of the Central Committee.

During the Andropov time, some of the previously abandoned slave labor camps were filled again, the political dissident movement completely crushed and many religious leaders either imprisoned or confined to psychiatric clinics. The foreign intelligence service has been elevated by Andropov to its new levels of sophistication and professionalism.

In May 1982, Andropov selected a professional security officer, General Vitaliy V. Fedorchuk to succeed him as Chairman of the KGB. General Fedorchuk spent all his adult life as a KGB officer in the Ukraine and occupied Austria and Germany after the war. He became Chairman of the KGB Office for the Ukrainian Republic in 1967.

The only way to judge Andropov's future performance as the new leader of the Soviet Union is to evaluate his previous achievements and the way he succeeded to power in 1982.

First of all, it is due to Andropov's work that there is virtually no dissident movement in the Soviet Union today. The strict control over the political behavior of the Soviet population has been ruthlessly implemented since 1967 and any small degree of political freedom that may have existed for a while in the late fifties and early sixties has been rooted out by all means, including psychiatric wards, increased forced labor confinements and plain prison terms.

The internal party discipline has also been considerably tightened during Andropov's administration of the KGB. In several swift shifts and short trials, some party officials were replaced by others and some jailed in consequence of the KGB investigations.

The image of the KGB as a "sword and shield" of the Soviet Union has been maintained very effectively under Yuriy Andropov. His heavy hand has been felt throughout the system and it helped him and his cohorts, whoever they are when the transition time came in 1982.

Brezhnev's group, headed by his old friends and long-time associates, both members of the Politburo and the Secretariat, A. P. Kirilenko and K. U. Chernenko, did not amount to much in a confrontation with Andropov. There was a rumor that Kirilenko, who was once slated to succeed Brezhnev, was very sick or that he was linked to the defection to the West of his son. He was dropped from the Politburo list even before Brezhnev's death and was prevented from signing Brezhnev's obituary. He was present in the crowd on the first day of Brezhnev's lying-in-state and was seen crying when expressing sympathies to Brezhnev's wife, Victoria. Konstantin Chernenko was given a dubious privilege of making a speech nominating

Yuriy Andropov for election to the post of General Secretary. Speaking probably more about himself than the rest of the Politburo and other party members or the Soviet citizens at large, he said, "All of us are obviously aware that it is extremely difficult to make up for the loss that was inflicted on us by the death of Leonid Brezhnev". Continuing in a clear appeal to Andropov he said, "It is now twice, three times as important to conduct the affairs in the party in a collective manner." Knowing what happened already to Kirilenko, he added, "All members of the Politburo believe that Yuriy Vladimirovich (Andropov) thoroughly assimilated Brezhnev's attitude to cadres * * *" It may have been the last important speech by Chernenko.

Judging on the basis of his past performance and of the very swift transition, Andropov will pursue the internal administration along even more centralized and tightly-controlled lines than was the case heretofore. When essential members of the Central Committee—about 50 or 60 persons—were summoned for a conference several hours after Brezhnev's death, they were prepared to give their approval for Andropov's nomination as the new General Secretary. He assured himself the support of the two key members of the Politburo in advance—First Secretary of Moscow, V. V. Grishin and First Secretary of Ukraine, V. V. Shcherbitskiy. In the bargain, the protege of Shcherbitskiy, Vitaliy Fedorchuk, was elevated to replace Andropov as Chairman of the KGB.

The built-in inefficiency of the economic system of the Soviet Union will not bother Andropov as much as some of the Western observers would like it to be the case. The Soviet economy was always in trouble since 1917, and at times in much worse shape than it is now. Naturally, being larger and more complex at present than ever before, it has bigger losses and problems, but it serves well in funding the security apparatus, responding to the military-industry requirements and covering the personal needs of the elite. These three considerations rank in Andropov's mind high above the needs of the population in general.

In foreign affairs Andropov has already displayed great emphasis on improving Soviet relationships with the Communist-bloc countries and primarily with China and Yugoslavia. The effective penetration of the non-Communist countries by the efficient KGB intelligence network and expanded terrorist activities throughout the world seems to have convinced Andropov of the vulnerabilities of the democratic societies.

The recently discovered case of the Soviet operation within British intelligence, where Geoffrey Prime was transmitting to the Soviets highly sensitive information since 1968, is just one in a series of deep intrusions by Soviet operatives into the British intelligence establishment. The master-spy, Kim Philby, was a top man in British intelligence for over 20 years before he escaped to Moscow where he is now a KGB general and a top adviser to Andropov's network. George Blake, an associate of Philby in British intelligence, was sentenced to a 42-year term for his Soviet espionage activities but was assisted in a mysterious escape from the maximum-security prison in 1966. Guy Burgess and Donald MacLean, defected to the Soviet Union after many years of service in British intelligence, and Antony Blunt was accidentally unmasked in 1979 after many years of service in a very sensitive position.

During the last two decades, Andropov introduced a new method of intelligence infiltration, misinformation, and confusion. His select agents defect to the West, primarily to the United States but also to Great Britain and West Germany. Their purpose is to misinform and misguide the intelligence and political decision circles in the West, and thus, assist the Soviet policies. The number of these known and unknown double agents is great. During 1982, one of their assignments has been to picture Andropov as a suave, debonair, amiable, and sophisticated person with a liking for the Western way of life, music, and culture.

Andropov seems to be in a hurry to make changes in personnel policies. In the postfuneral session of the Central Committee, Gaydar A. Aliyev, who served in the KGB since 1943 when he was 20 years old and became First Secretary of Azerbaydzhan Republic in the cleanup of 1970, was elevated to full membership of the Politburo while Andrey Kirilenko was officially relieved of his post. Nikolay Ryzhkov, the defense industry manager who in 1979 was transferred from the Urals to the State Planning Commission, became new Secretary of the Central Committee, the body of 10 people depleted by the departure of Brezhnev, Suslov, and Kirilenko.

The changes in domestic and foreign policies, outlined in general terms by Andropov in his speech to the Central Committee, will obviously require more shifts in personnel in the near future.●

HON. BOB DORNAN

HON. CARROLL A. CAMPBELL, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. CAMPBELL. Mr. Speaker, it is with deep regret that I bid farewell to my friend and distinguished colleague, BOB DORNAN.

Representing a district with radically divergent interests, BOB has established himself as an able and superbly effective legislator. His abilities as a rousing orator and a champion of conservative ideals have won him the respect of all of us who have worked with BOB. His compassion and social awareness have won the respect of those he has represented for the past 6 years. As the originator of the POW bracelet, BOB revealed his concern for those heroic soldiers who had been captured in a war which BOB felt was a necessary evil. He recognized the need for conservative policies without losing touch with the unfortunate of the world.

Thus, it is with a deep sense of loss that I address this body. I will miss BOB as a fellow legislator and as a friend. I wish him the very best in the future.●

WHAT VETS THINK ABOUT THE WALL ON THE MALL

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. DANNEMEYER. Mr. Speaker, Veterans Day, 1982, and the dedication ceremonies on that day for the Vietnam Veterans Memorial, are just barely 1 month behind us. Yet, there are some important details about the memorial that remain to be finished. As part of a compromise reached between various parties with divergent points of view on how best to remember the Vietnam veteran, it was agreed that a flag and a sculpture would be added to the original design for a wall containing the names of those who died in Vietnam.

I am advised that the Fine Arts Commission, which must approve matters pertaining to monuments and memorials on the Mall, will meet later this week to review several options for implementing the additions agreed to in the compromise. With that thought in mind, I believe it would be helpful to circulate the results of a survey of veterans on the three major options for the flag and the statue. Accordingly, I am including in the RECORD at the end of these remarks an article by Milt Copulos and the results of the survey he supervised. I trust that the Fine Arts Commission will take them into serious consideration.

RESPONSES TO QUESTIONNAIRE ON FLAG PLACEMENT, INSCRIPTION, AND THE MEMORIAL DESIGN BY ITSELF

Category	Vietnam vet	Family member	Viet era vet	Other vet	Non-vet	Family and Viet vet	Total

[1] Option A represented the proposal made by the Vietnam Veteran's Memorial Fund to the Fine Arts Commission in September, Option B represented placing the flag at one side, and the statue within the tree line, and Option C represented the placement suggested by the Fine Arts Commission with both the flag and statue within the tree line. Letters were used so as not to bias the respondents.

What Veterans Think About the Wall on the Mall

(By Milt Copulos)

The memories came flooding back when I spotted the familiar 25th Infantry Division patch on the faded fatigue jacket. "Hey Wolfhound!" I shouted. You could almost see the pride welling up within him as he turned to me, smiling. I understood how he felt. I too had worn the emblem of the Tropic Lightening Division, although with a different unit. But we were all there that day: the Wolfhounds, the 3/4 Cav, the Fifth Mech. All the units I had once known so well.

The place names came back in a rush too: Trang Bang, Go Da Ha, the Boi Loi Woods, Black Widow Mountain, and Katum—especially for me Katum. So many years had passed since these names were a daily part of our lexicon, years in which we seldom thought of them except sometimes, in the depth of night when they came unbidden, unwanted. Still, they were places burned into our souls. Places where too many of our comrades had fallen, where we had lost our innocence.

We were all so young then. But, like the youth of countless generations, we were called to do a job, a job we could be proud of: to help defend freedom. We did the best we could—the best anyone could under the circumstances, but for a decade or more it seemed as though no one else understood. Finally, that day on the mall, despite the mud, the wind, the cold, our day had come. Our service, the source of our pride was at long last being recognized.

I walked over to the fellow with the patch on his fatigue jacket, and the fatigue cap that had "Wolfhounds" proudly emblazoned across the peak, and said simply, "Welcome home." There was a hushed sort of reverence in his voice when he replied, "Yeah, we are home. Aren't we?"

Still, reunion wasn't my purpose that day. I was there to finish a job begun a year earlier in a series of marathon meetings held in a Senate office building. I, along with other Vietnam veterans had come together to settle our differences over the memorial that was to be built in honor of our service. The divisions among us had been so deep at the outset, that the right appeared beyond repair. But, in those meetings, we drew on the reserves of maturity and perserverence that saw us through the war, and reached a compromise. More important, we agreed to band together and see it through to fruition.

The compromise really didn't ask much: merely the addition of a flag, and a 7½ foot high statute to the memorial site along with an inscription on the flagpole's base referring to the principles for which we fought. Small changes, but important ones, because they gave context and meaning to the nearing 58,000 names inscribed on Maya Lin's wall.

A panel, of which I was a member, was selected to help choose a suitable sculpture, and determine the placement of the new elements; and it seemed as though the controversy was at least put to rest. Events, however, sometimes take on a life of their own, and this one did with a vengeance.

A small, but vocal segment of the arts community cried "foul". Raising specious arguments about the "sanctity of design competitions", and making adhominem attacks on those asking for the changes, they managed to totally loose sight of the purpose for which the memorial was being built. Throughout the summer, they pressed a vigorous lobbying campaign to destroy the compromise so painfully achieved, and impose their will on the approving agencies.

As both sides ralleyed support, it seemed as though every possible opinion was being sought, except the one that counted: the opinion of those to whom the memorial was dedicated. It was for this reason that I found myself on the mall that day.

With the cooperation of student volunteers from four local universities, and the assistance of prominent experts in survey research, I had organized a poll to determine the attitudes of those attending the dedication of the Vietnam Veteran's Memorial. There were a number of reasons this particular time was selected.

First, it guaranteed that some semblence of a national cross-section would be present—veterans from every state were there. Secondly, everyone being polled would have had the opportunity to see the actual memorial, not just some model or artist's conception, and would be able to clearly understand where the proposed locations for the new elements were. Most important, the poll would be taken in an atmosphere which placed the original design in the most favorable light possible—while a steady procession of speakers praised it as the long overdue recognition of the veteran's service.

The reason we felt it necessary to go to such lengths to insure the original design every opportunity to be viewed in a favorable light was that many of us, myself included, had strongly negative feelings toward it. We saw it as nihilistic—more a memorial to the negative image which had evolved around the war, than a tribute to the honorable service of the 2.7 million Americans who fought it. Although we had been contacted by countless Vietnam veterans who shared our view, the nagging doubt that we might be wrong left us honor-bound to seek the truth, and make every effort to insulate the poll against the danger that our own bias would color the results. Well, the results are in, and they are, to say the least, compelling.

888 people took the time to answer our survey—far more than is required for statistical validity. Included among them were 530 Vietnam Veterans, and 96 family members of Vietnam veterans. They were asked four basic questions: (1) Should the flag be prominently displayed as an integral part of the memorial?, (2) Should there be an inscription making reference to the principles for which the veterans fought?, (3) what they thought about the wall design by itself, and (4) which of three proposed locations they preferred for location of the new elements.

Without exception, every category polled indicated that the flag should be prominently displayed as an integral part of the memorial. The favorable responses ranged from 94.2 percent from Vietnam veterans to 74.3 percent from non-veterans. Overall, 89.5 percent of the total respondents answered yes to this question. With regard to including the principles for which the veterans fought, again a wide majority said yes, with Vietnam veterans leading the favorable responses at 84.7 percent, and non-veterans at the lower end with 56.4 percent. Overall, 78.2 percent agreed.

The question regarding attitudes towards the wall design by itself showed no such unanimity, however. Interestingly, there appeared to be little middle ground in the emotions the stark black walls elicited. 54.3 percent of the Vietnam Veterans polled said their impression of the wall was strongly unfavorable, and only 27.4 percent indicated their impression was strongly favorable. Only 8.3 percent of the veterans rated the wall somewhat unfavorable, and 6.2 percent somewhat favorable. Among non-veterans, though, the margin was reversed, with 73.5 percent giving the wall either a strongly favorable or somewhat favorable rating, and only 20 percent rating it unfavorable. Overall, however, the wall received an unfavorable rating from those polled.

On the final, and most important question, that of placement, unanimity once again surfaced. Here, the option labled "A", which would place the flagpole behind the Apex of the walls, and the statue about 170 feet in front of it was selected as the first choice by every single category of respondent, and in every category save one—non-veterans—by a margin of more than two to one. Option "A" was actually the placement suggested by the sculpture selection panel, and endorsed before the Fine Arts Commission last September by every major verterans group, the Memorial Fund itself, the Gold Star Mothers, and even the Memorial Fund's architect. Overall 69.3 percent of the sample selected option "A", as compared to option "C", which, is fact was the placement demanded by the Fine Arts Commission, which was the first choice of only 16.3 percent of the total sample, and a mere 12.8 percent of Vietnam veterans.

What is evident from the survey results is that the group for whom the memorial was built—Vietnam veterans—has a very clear picture of what they want done, and that picture is sharply at odds with what a small segment of the arts community would foist upon them. To allow this to happen would be a travesty, and yet, unless the President acts to end the deadlock over placement, that travesty may occur.

As I was contemplating the prospect, and the poll results, images of two men came into my mind. One was an architect who had argued during the compromise meetings that the wall design "needed no corny patriotic claptrap like a flag or a statue to adorn it." The other was the Wolfhound, still proud of his unit fifteen years after

leaving Vietnam, who stood next to me singing the national anthem during the dedication ceremony, his eyes misting over as the emotions of the moment overcame him. The architect may not believe a flag belongs at the memorial, but the Wolfhound does, and so do I.●

REVIEWING THE FEDERAL ROLE IN DOMESTIC VIOLENCE PROGRAMS

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. STARK. Mr. Speaker, this past week we have spent a great deal of thought, time, and energy on the question of how best to prevent nuclear violence. Unquestionably this was a paramount issue we had to deal with. However, there is another kind of violence much closer to home taking place daily in this country which we also need to address, and that is domestic violence.

During the last administration Congress realized the depth of the problem of spousal abouse and funded 13 separate programs that in some way provided assistance to local shelters and related projects. Even then the lack of funding and space forced battered women's programs around the country to turn away three times the number of people they actually served.

Today the problem of domestic violence has been greatly exacerbated by this administration's insensitivity. Battered women and their families have been placed in double jeopardy—first, by the current administration's attack on programs offering immediate escape from violence in the home and then by slashing resources individuals could use to build new lives. Such cuts have sentenced battered women and their children to continued abuse.

We can see the devastating effects of the budget cuts on our ability to deal with domestic violence by reviewing what has happened to the 13 programs funded in 1980. Five of them have been totally abolished and no longer exist in any form. Those eliminated were: First, the Office of Domestic Violence, second, the family violence program, third, the ACTION technical assistance projects, fourth, Community Services Administration domestic violence demonstration projects, and fifth, public service employment under CETA. The loss of CETA funds in the fiscal year 1982 budget particularly hurt domestic violence programs. In my own State of California the shelters lost from one-third to one-half of their staff and three programs were actually closed as a result of the loss of CETA staffing. Needless to say trying to maintain 24 hour crisis lines, counseling services and other support services with only one-half of their former staffing has been very difficult.

Three other programs were block granted resulting in the reduction of funds to alleviate the problem of domestic violence. The National Institute on Alcoholism and Alcohol Abuse domestic violence initiative, a small demonstration program, no longer exists as a separate Federal program. Having been consolidated into a State block grant for alcohol, drug abuse and mental health services, as part of the Omnibus Budget Reconciliation Act of 1981, the States are no longer required to support domestic violence-related projects with their block grant money.

Of greater importance to those of us concerned with domestic violence has been the State block granting of title XX money of the Social Security Act and the Community Action Agencies formerly funded by the Community Services Administration. A major potential source of Federal funding of shelters has been the social services programs under title XX. Through 1981, title XX programs provided matching funds to States for the provision of a wide variety of social services including shelters, and a separate training component on matching funds for training social service personnel. Under fiscal year 1982 budget changes, the block grant was funded at a level which resulted in a 23-percent reduction from projected fiscal year 1982 spending levels for services and training combined. Although it is very difficult to determine how the States are spending their title XX funds, the Department of Health and Human Services believes that only 18 States are planning to fund domestic violence shelters or similar projects. I know that in California not 1 penny of title XX money is going to help solve the problems caused by domestic violence or aid the victims of abuse.

The Community Services Administration was the third program abolished and consolidated into a community services block grant to the States. Up to 1982 the Community Services Administration supported 860 Community Action Agencies which could fund shelters and other domestic violence-related projects if they assisted low-income clients. During fiscal years 1982 and 1983, States have been required to fund existing Community Action Agencies. Because of the lack of detailed reporting required by the States it is impossible to know the effects of block granting. However with a 26-percent funding cut in the block grant and the emphasis on funds for antipoverty agencies, it is very likely that Community Action Agency involvement in, and support of, local domestic violence shelters has been significantly eroded.

As if the picture painted so far were not bleak enough, of the five remaining programs two are targeted to be abolished by the administration. The National Center on Women and Family Law, under the auspices of the Legal Services Corporation, has provided assistance to 300 field programs and has done background legal research related to representing abused spouses in civil cases. If the administration has its way these services will end, leaving an unfortunate void in legal aid for victims of domestic violence. Hopefully Congress will resist attempts to reduce or eliminate funding for the Legal Services Corporation.

The VISTA volunteer program, administered by the ACTION Agency, is another program slated for oblivion by the administration. During fiscal year 1982, around 70 VISTA volunteers worked in 21 shelters and related projects. Having sustained sharp reduction in funding it is obvious that VISTA will not be able to take up where CETA workers left off.

One bright note has been the buying and renovating of housing for battered women's shelters under the community development block grant program administered by HUD. However, in the administration's misguided effort to cut reporting requirements for block grant programs, we have been left with no information of how the community development block grants have spent their money for the past 2 years. Having sustained an approximately 8 percent funding reduction, it is at least obvious that the community development block grant program has not been able to buy shelter houses as it once did.

Of the remaining five programs there are still two small research and demonstration programs funding projects related to domestic violence. The National Center on Child Abuse and Neglect, in the Office of Human Development Services, awarded seven grants in fiscal year 1982 to projects that address the problems and needs of the children of abused spouses. The Center for Studies of Crime and Delinquency, in the National Institute for Mental Health, awarded five research grants and two training grants in the domestic violence area.

Where does this leave the Federal role in dealing with the terrible problem of domestic violence? In summary we have seen that five programs were totally abolished, three blocks granted and probably doing less than Congress had originally hoped, and two more targeted for abolition. The remaining programs that do survive are now able to offer only paper hope. Little real chance remains that victims of domestic violence will find shelter space, be able to exercise their rights to legal recourse or receive the other support services essential to their efforts to free themselves and their families from abuse.

I hope this review will awaken my colleagues to the urgent need to address the truly unfortunate problems spouses face in finding shelters and support from domestic violence.●

TRIBUTE TO HON. ROBERT McCLORY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. RODINO. Mr. Speaker, it is with a sense of regret at his departure that I add my voice to the farewell tributes being offered to my esteemed colleague on the Judiciary Committee for so many years, BOB MCCLORY.

I have worked closely with BOB MCCLORY, the ranking Republican of the full committee and of the Subcommittee on Monopolies and Commercial Law. We have not always been in agreement. He is a tough-minded man. But over the years I was pleased to have him cosponsor many important pieces of legislation.

I have always valued his support and counsel, his love of the law and his dedication to justice. BOB has a special interest and expertise in matters international. During this Congress, he cosponsored with me the Foreign Trade Antitrust Improvements Act, and worked toward passage of its provisions as a part of the Export Trading Company legislation signed by the President in September.

I shall never forget and shall always be grateful for the difficult, careful and thoughtful role he undertook in the impeachment drama. I remember his shock and disbelief as that tragedy unfolded. In the end, he courageously took on the sad responsibility of writing one of the three articles of impeachment reported by the Committee on the Judiciary.

Now, BOB MCCLORY is voluntarily ending a legislative career that began in 1950 in the Illinois General Assembly and that brought him to the Congress in 1963. He has served his Nation, his State and his district in exemplary fashion.

Earlier this year, after he announced his decision to retire, he testified before a congressional subcommittee. After testifying, he accepted the best wishes of the members and said:

> I do not mind looking forward to the retirement. The thing that I am a little apprehensive about are the retirement tributes.

This remark is so typical of his wry humor and graciousness. As one newspaper in his district remarked, "when he left he did so with grace. He can be proud of that."

And another summed up what I think are the sentiments of his colleagues:

We've come to know him well, and to appreciate him as both a person and as a legislator.

We will miss him, as a person, and as a legislator.●

THE FARM ECONOMY: WHICH DIRECTION

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. JONES of Tennessee. Mr. Speaker, the farm economy of our Nation is in an especially fragile financial condition during the present recession. Depending upon how farm income and credit problems are managed in the months ahead, we could witness either a recovery of agriculture to a status of relative health similar to much of the 1970's or a sinking of the farm economy to a situation reminiscent of the 1920's when agriculture preceded the rest of the country into the Great Depression. The December 1982 issue of Independent Banker magazine contains an article by Weldon Barton, the agricultural representative of the Independent Bankers Association of America, which analyzes the situation facing American agriculture and suggests steps to be taken in order to position the farm economy for a healthy recovery.

The text of the article follows:

[From the Independent Banker, December 1982]

THE FARM ECONOMY: WHICH DIRECTION?

(By Weldon Barton)

As we approach the 1983 farm production year and a new 98th Congress, the following question is important: in the months ahead, will decisions be made that help the 1980's take shape as a basic continuation of the 1970's agricultural era, or will retrogression to an agricultural era more characteristic of the 1920's occur?

The 1970's were marked by expanding export markets for U.S. farm commodities—with only intermittent years of oversupply—and built-in, government sponsored market price "floors" and related stabilizers which combined with periodic export surges to sustain rather strong average farm prices during 1970–1979.

The 1920's were characterized by chronic overproduction and low farm prices, downward movement in farmland prices, and a strong reluctance by government to initiate production restraints and related measures to stabilize the deteriorating farm economy.

It is useful to bear in mind certain similarities to these earlier periods in considering the following discussion, which is intended to provide perspective for decisions ahead.

THE FARM RECESSION OF 1982 IN PERSPECTIVE

When averaged over the 1970's, total financial returns to farmers were substantial in terms of both realized income and appreciated value of capital assets. According to July 1982 calculations by Chase Econometrics, realized net farm income for 1982 would have to total $30.5 billion (or 72 percent above the $17.7 billion then projected by USDA), in order to be equivalent to the average farm per capita income level during the decade of the 1970's.

Regarding asset appreciation, during 1970–79, the market price of farmland increased by an average 25.9 percent annually, amounting to an increase of $45.6 billion per year, thus for the same period more than doubling both the average general inflation rate of 11.2 percent per year and average annual realized net farm income of $21.6 billion.

During the decade of 70's, agricultural lenders increasingly allowed farm borrowers to pull equity out of their farmland and other capital assets to make additional land and equipment purchases and to meet short-term operating expenses. This practice enabled the Farm Credit System to become the leading lender in farm real estate-secured debt by 1978. The FCS attained this lead through refinancings, which during the 1970's accounted for 40–50 percent of the total FCS extended real estate debt, and a substantial portion of this credit was used to finance short-term production.

Similarly, even though the Farmers Home Administration's regulations prohibit the use of regular farm real estate loans for operating purposes, a large portion of FmHA financing under the "farm emergency" and "economic emergency" loan programs (which greatly expanded after the mid-1970's and together comprised 68 percent of total FmHA farmer loans outstanding in 1981) was used to refinance farm operators who faced unmanageable cash flow problems.

To a substantial extent, the cash flow problems which led to Farm Credit and FmHA refinancings during the late 1970's resulted from extensive investments by farm operators in farmland and other capital items based upon overly-optimistic projections that the high farm commodity prices which prevailed around 1973 would continue.

However, the years 1980–82 have continued to witness the substitution of farm operator debt for net cash income, except that during this most recent period the cash flow problems are due primarily to persistently low farm prices for basic crops. Realized net farm income (before inventory adjustments) dropped from $26.7 billion in 1979 to $24.4 billion in 1980 and $19.6 billion in 1981, and is expected to drop perhaps another $600 million.

Meanwhile, effective supply controls to reduce surplus inventories of farm products were not implemented in 1982 in order to position the cropland farming sector for an economic turnaround. While the non-farm economy geared down to an average 69 percent of production capacity in 1982 to set the stage for a recovery, U.S. basic grain production increased to 101 percent of last year's record production. (Combined corn and wheat production is estimated at 11.12 billion bushels for 1982, up 1 percent from 11.0 billion in 1981.)

By late October, the government-sponsored grain reserve and nonrecourse loan programs were already bulging with 3.5 billion bushels of wheat and feed grains (including 2 billion bushels of corn), and about 1.9 billion bushels of 1982 corn crop which is eligible to enter the government loan or reserve is several times the total volume of grain which the Soviet Union is expected to purchase from the United States during the year ending September 30, 1983.

Furthermore, due to the low participation in the 1982 corn program which amounted to 23 percent of acreage planted to corn, for the first time since the 1930's the government price support loan level will not serve as an effective "floor" under the market prices for corn. During October, the average price received by farmers was $2.03 per bushel, or 52 cents per bushel less than the $2.55 price support loan rate.

Based upon a projected $2.20 per bushel average price to farmers during the 1982-83 corn marketing season, producers of approximately 6.4 billion bushels of corn which is not eligible for a nonrecourse loan (8.3 billion bushels estimated production x 77 percent participating acreage = 6.4 billion bushels) stand to lose $2.24 billion compared with every previous year when the loan level constituted the market "floor." (An apparently small portion of this loss would not materialize, to the extent that farm operators locked in a return higher than $2.20 by hedging or forward contracting.) Of course, many producers will not actually market their own corn at harvest time, but they will have to allocate costs for storage and will face a future price situation that is uncertain at best.

This temporary lapse in the corn marketing system could be partially self-correcting in 1983, because it undoubtedly will lead to higher rates of participation in the commodity programs for 1983. Higher participation rates could, in turn, restore the price support loan level as the market floor. However, it is also quite conceivable that the supply-demand imbalance could reach a point where the government incurs large losses on the feed grains relinquished to the CCC by farmers holding nonrecourse loans (in addition to outlays for storage and target price payments), and the entire system would become politically unsustainable. This, in turn, could prompt steps to remove the built-in government stabilizers per se, exposing major segments of the farm economy to a potential farm asset devaluation reminiscent of the 1920's.

THE DETERIORATING BALANCE SHEET OF AGRICULTURE

At least until very recently, it was commonplace to refer to the farm economy as "fundamentally strong," and to cite the overall average "balance sheet" of agriculture to document the point. For instance, the debt-to-asset ratio for all farm and ranch operations in the United States was 18 in 1970—that is, debt was 18 percent of assets, and this ratio fluctuated narrowly between a high of 18 and a low of 16.2 during 1970-79, standing at 16.3 for 1979. Even by January 1982, it had risen to only 18.5.

But a great deal of this apparent financial strength rests upon the Census Bureau's broad definition of a "farm." As of December 1979, only 1.27 million of the total 2.35 million U.S. farmers, or 54 percent of the total, had farm debt. This 54 percent of farmers who have debt make up the overwhelming portion of the actual agricultural economy, since only 1.2 million farms (54.9 percent of total farms) have over $10,000 of annual sales, and this 54.9 percent of the farms produces over 95 percent of total sales volume.

Thus, almost one-half of the "farmers" included in the overall debt-to-asset ratios are essentially living on a "farm" but hold little or no farm debt and derive their livelihood predominantly from non-farm employment. And of those 1.27 million farm operators with farm debt, their debt at the end of 1970 averaged $80,000 compared with assets of $352,000 yielding a debt-to-asset ratio of 22.6—39 percent higher than the 16.3 for all Census "farmers."

When the overall averages are further dissected, the figures reveal a rather debt-laden position among a large segment of commercial-size farm operators. As of December 1979, about 291,000 farm operators, 23 percent of all operators with debt, had a debt-to-asset ratio of 41 or higher. Offsetting these higher-leveraged operators on the other side of the ledger were farm landlords without debt (most of whom were not themselves farm operators but instead rented their farm assets to operators), who held 47.9 percent of all farmland and service building assets totaling $353.7 billion in 1979.

It should be noted that the 291,000 farm operators (23 percent of all operators with debt) who had debt equal to 41 percent or more of their total assets had such debt in 1979, (prior to the 1980-82 farm recession) and substantial further deterioration in the balance sheet of many farm operators has occurred since 1979. The seriousness of the present situation is indicated by a survey conducted by the independent Bankers Association of America during September, 1982, to which 873 (or 42 percent of the 2,076 banks that responded) said that based upon their current assessment, 6 percent or more of their existing farm borrowers were not expected to qualify for commercial financing for 1983 production purposes.

PRESSURES ON THE FARMERS HOME SAFETY VALVE

The same September 1982 IBAA survey asked the question: "Regardless of the reason, in your judgment has Farmers Home Administration's extension of credit to agricultural borrowers in your area this year been: too lenient, about right, too restrictive, or far too restrictive." Among the 2,004 banks that responded, 45 percent said FmHA was too restrictive, 43 percent said about right, and 12 percent said too lenient. The responses suggest that most agricultural banks approve of the FmHA serving as a partial financial safety valve, as "financer of last resort" to commercial farm operations which are competently managed, during the deepening agricultural recession.

Such approval of FmHA may be difficult to understand, because the agency is no longer a peripheral lender in the farm economy. With about $20.6 billion of agricultural credit outstanding to 270,200 farm borrowers in 1982, the agency is involved in financing over 21 percent of the 1.27 million farm operators with debt. Over 50 percent of the total dollar volume of loans made by FmHA to farmers since the agency's beginning has been made since 1975, and FmHA's market share of total farm production debt held by institutional lenders (excluding individuals and the CCC) rose from 4 percent in 1977 to 19.4 percent in 1982.

Realistically, however, it is significant that FmHA is no longer the exclusive source of agricultural credit for a large percentage of its borrowers, but instead shares the credit financing of borrowers with commercial lenders through simple participations involving the simultaneous closings, participations involving the subordination of collateral by FmHA, the refinancing of farmers' accumulated debt with FmHA takeout loans, and other arrangements.

The agency's data in the volume of shared lending is spotty, but for real estate credit in 1981 alone $186 million was extended by commercial lenders in some form of participation with FmHA. In 1982, about 29,950 FmHA farm loans involved subordination of collateral to commercial lenders (compared with 5,800 such loans in 1981), and approximately $1 billion of commercial credit resulted from these 1982 subordinations.

Going into 1983, the FmHA may be the last resort for a substantial number of properly-managed commercial-size farmers who do not wish to liquidate, including not only existing FmHA borrowers but also many farm operators who, for the first time, will be unable to secure adequate credit elsewhere. The agency has a number of legal authorities (including refinancings, repayment deferrals, collateral subordinations, loan guarantee authority) to cope with the situation. However, the currently-budgeted lending volume which includes about $1.5 billion for regular operating loans may be inadequate, and the maximum flexibility and usage of the agency's legal authorities will be required.

THE CHALLENGES OF 1983

As indicated earlier, developments over the next several months could determine to a large degree whether the decade of the 1980's takes shape for the agricultural economy more like the 1970's, or the 1920's. If at least a modest rise in export marketing begins to occur for the basic crops, if effective production controls are implemented and price support policies are carefully directed, and if credit with an active FmHA is properly arranged, the agricultural economy could begin to reposition for a recovery somewhat similar to the 1970's.

However, the financial structure of the agricultural economy is now unusually fragile, and the pragmatic system which combines individual decision-making by hundreds of thousands of competitive independent farmers with timely government intervention—which has sustained a relatively stable and highly productive American agriculture—could be in jeopardy.

As described earlier, farm capital assets (mostly farmland) stands as collateral behind a growing portion of total outstanding farm debt, including a substantial amount of debt incurred for short-term operating purposes but reamortized over longer repayment periods. The U.S. farmland market is traditionally thin and dominated by farmers (less than 3 percent of the farmland is transferred annually and almost three-fourths of the buyers are farmers), and it was especially thin in 1982 due to the reluctance of both buyers and sellers to enter the market.

If unusually large amounts of land were to be moved into liquidation in the period ahead, due perhaps to an undue tightening of FmHA credit or reacting to increased budget costs of price support and supply control policies by undermining the policies *per se* rather than managing them better, this could cause more precipitous declines in farmland prices and the collateral underlying farm debt.

A case can be made that farmland had become overpriced, because during the 1970's the demand for farmland was enhanced by temporarily-escalated farm price levels which were not sustained and by buyers seeking a hedge against general inflation. However, this is being worked off over time as market prices for farmland have stabilized or dropped in many areas, and because farmland prices are likely to rise at rates below the general inflation rate at least for a significant period of time.

Any developments triggering more precipitous reductions in farmland prices would also cause serious erosion of the independent farmer structure of U.S. agriculture. As of 1978, there were approximately 525,000 farm operators in the United States with annual sales between $40,000 and $200,000, who collectively accounted for about 43 percent of total sales of agricultural products. Given current conditions, one would expect most farm liquidations to occur among this segment which makes up the basic group of commericial-size independent farmers in the United States.

If farmland was reduced to "bargain" levels, (with more extensive pressures actually to sell), purchases of land would be made in the present climate primarily by groups who retain sufficient net worth to have a longer financial time horizon. These would include: (1) the larger farm operators who also tend to be substantial landlords (approximately 64,000 farms have over $200,000 of annual sales and together make about 39.3 percent of total agricultural sales); and (2) nonfarm operators including pension funds and other institutional investors.

Extensive farmland purchases by these groups would reduce the number of commercial size independent farmers and increase concentration in agriculture, further bifurcate production agriculture into renter operators and "absentee" landlords (non-operator landlords already hold 48 percent of farmland assets), and render independent farm operators more vulnerable to future liquidity squeezes.

In positive terms, the hardest decisions that need to be made in order to position the farm economy for a 1970's-type recovery involve reducing supplies and improving realized net income of producers of grains, cotton, and other land-intensive crops. At least two types of action are needed.

First, effective supply controls must be implemented in 1983 that frankly recognize the reality that the agricultural production plant must gear down temporarily in view of the present global recession, the various political interruptions to export markets, and the favorable weather conditions which produced consecutive record U.S. grain crops. These production controls should supplement (not replace) the existing grain reserve policy and can be composed of the ad hoc voluntary and "paid" diversion types of controls which are compatible with a longer term market-oriented approach. However, such ad hoc measures will be effective only if they are adequate and equitable, and only if the OMB or others resist any temptation to leverage the situation into basic policy changes which could frustrate achieving Congressional approval.

But such *ad hoc* measures will be adequate only if the USDA, OMB, and other government agencies involved are able and willing to work together pragmatically and effectively.

Second, Congress and the Administration need to make pragmatic alterations in the policies which have held realized annual cash income of land-intensive crop farmers below costs of production in recent years. Specifically, a pricing structure is needed that returns a positive cash flow (including allocated costs of farmland) to well-managed farm operations. Except that special costs may be necessarily incurred in working out of the current predicament, this can be done without excessive budget outlays if the proper mix of price support loan "floors" and other measures are used.

In conclusion, it should be noted that there is an abiding search for a so-called "new economics" in the United States to avoid the economy leveling out at unacceptable high unemployment and unused productive capacity. However, this has not been a problem with the land-intensive agricultural production sector, which has continued to demonstrate high productivity gains and record breaking production. Appropriately, the agricultural economy has thus far largely avoided the polarization of policy into "regulation versus deregulation" which has occurred in various other economic sectors. Hopefully, a pragmatic approach for the agricultural economy can continue to prevail.●

THE U.N. COMMISSION ON HUMAN RIGHTS

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. BONKER. Mr. Speaker, last Friday the House Foreign Affairs Subcommittee on Human Rights and International Organizations, which I chair, met to review the work of the 38th session and the upcoming 39th session of the U.N. Commission on Human Rights. The witnesses were Michael Novak, U.S. Representative to the Commission; Richard Schifter, Alternate Representative; and David Kramer, Professor of Law, University of Texas. I would like to commend to the attention of my distinguished colleagues my opening statement.

(The statement follows:)

Today is the 34th anniversary of the U.N. Declaration on Human Rights. It is fitting that we meet to review the work of the U.N. Commission on Human Rights.

For the first time in several years, due to the Congressional schedule, I was not able to attend any meetings of the 38th session of the United Nations Commission on Human Rights. The Commission met in Geneva from February 1 to March 12, 1982. A staff member of the Subcommittee was in attendance during the sessions of the Commission the first week in March. Over a year ago the Subcommittee held a hearing to reveiw the work of the 37th session of the United Nations Commission on Human Rights. At that time I said: "It is my hope that at the 38th session the U.S. will take some positive initiatives and regain a leadership role in the human rights area. The delegation should be strengthened by the fact that our representatives will be veterans of the last session * * *."

I am pleased to note that from all accounts the U.S. delegation received high praise and was instrumental in passing a number of initiatives despite their controversial nature.

The good work of the U.S. delegation and the positive decisions on a number of issues were a welcome contract to the previous year. The Commission adopted 44 resolutions covering almost all items on the agenda. Its opening was marred by the announcement that Mr. Theo Van Boven, the Director of the U.N. Human Rights division, would be leaving his job. he had taken a leading role at the U.N. in holding governments accountable for their human rights violations. His effective work on behalf of people who have suffered atrocities and indignities will be missed.

I will not comment on every agenda item but would like to discuss several that have been of ongoing interest to the Subcommittee.

I was especially delighted that the mandate of the working group on missing and disappeared persons was renewed for another year. I would expect that at the 39th session the U.S. delegation will again be supporting the extention of its mandate.

I was also delighted that the U.S. delegation ably dealt with the difficult resolution on Poland. The hard work of the delegation paid off when the Commission decided to request the Secretary-General to undertake a thorough study of the human rights situation in Poland and to report back to the Commission at the 39th session. This was a very significant act on the part of the Commission.

Several new initiatives that were adopted must be mentioned. It is my hope that they will be further acted upon during the 39th session. One was a resolution dealing with protection of persons detained in psychiatric institutions. It was proposed by the United Kingdom and adopted by consensus. Another was a resolution on the right of individuals and groups to promote human rights. This was a Canadian proposal adopted by consensus and designed to express moral support for Helsinki monitors and similar groups. Another Canadian resolution adopted by consensus was on human rights and mass exoduses. The resolution called for follow-up action during the 39th session. A fourth resolution was sponsored by Denmark and it deplored summary and arbitrary executions. The Commission stated that it was "deeply alarmed about the occurrence of summary or arbitrary executions, including extra-legal executions, that are widely regarded as politically motivated." The resolution called for the appointment of a special rapporteur to examine that question and prepare recommendations for the 39th session.

I was disappointed that the U.S. delegation once again voted against the continuation of a special rapporteur for Chile. His term was extended by a vote of 28 in favor, 6 opposed, and 8 abstentions. The special rapporteur once again reiterated "serious concern at the persistence and, in certain respects, the deterioration of the situation of human rights in Chile." The Commission accused the Chilean government of persecuting, intimidating, imprisoning, and exiling labor union leaders and others. The U.S. delegation has an obligation to act differently at the 39th session. Nothing has happened in the last year to indicate any improvements in human rights in Chile.

I was further disappointed that in the open session the U.S. delegation voted against a resolution on El Salvador and abstained on a strong resolution on Guatemala. In both instances the Commission decided to extend the mandate of a spcial rapporteur for another year. Perhaps the U.S. delegation will take certain positive actions on these questions at the 39th session of the Commission.

Other matters of importance include a resolution that the Subcommittee passed condemning all forms of religious persecution and discrimination as a violation of human rights. This comprehensive resolution calls on the U.S. delegation to work for the establishment of a working group on

the elimination of all forms of religious persecution and discrimination. Every effort should be made to establish such a working group. You certainly will have the support of the U.S. Congress.

Finally, the U.S. delegation should do all it can to encourage the working group on torture to complete its work in drafting an international convention on torture.

I understand, Mr. Novak, that you will not be going back as head of the U.S. delegation to the 39th session. I want to publicly praise your work at the 38th session. I regret that you will not be in Geneva in 1983 to build on the accomplishments of last February and March. Your dedication, labor, and experience in service to your country will surely be missed.●

THE NUCLEAR REALITY: BEYOND NIEBUHR AND THE JUST WAR

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. EDGAR. Mr. Speaker, during the past 2 years many loyal Americans have undergone changes in their attitude toward our nuclear arsenal. One such person is Kermit D. Johnson. He has analyzed the morality of a world whose obsession with security leads to a never-ending arms race. He has pondered the "perverse preference for the war of mutual annihilation, simply because mutual annihilation means the other side doesn't win, either." And he has tried to relate our modern situation to the ethics of Reinhold Niebuhr and the idea of "just war." After considering these questions Kermit Johnson decided that he must work to help the world extricate itself from the nuclear quagmire. He believes that we must challenge the justification that our Nation's so-called defenders have been giving to the nuclear arms race.

Many other people have come to that conclusion in the recent past. What makes Kermit Johnson different is that he is Maj. Gen. Kermit Johnson, graduate of West Point and the U.S. Army War College, a former combat commander in Korea, and until this year Chief of Chaplains of the U.S. Army. Major General Johnson has described his thoughts in an article which appeared this fall in the Christian Century.

Mr. Speaker, I insert Major General Johnson's article, "The Nuclear Reality: Beyond Niebuhr and the Just War," at this point in the RECORD.

THE NUCLEAR REALITY: BEYOND NIEBUHR AND THE JUST WAR

(By Kermit D. Johnson)

As a commissioner to the 1980 General Assembly of the United Presbyterian Church, I was convinced that the church's new peacemaking efforts needed "a good dose of Niebuhr." I saw "The Call to Peacemaking" document as pacifistic and deficient in its failure to affirm the "just war." In a brief speech to the Peacemaking Committee, I closed this way:

"I dare say that if 'The Call to Peacemaking' were being written just after World War II, it would read differently. With the memory of Munich, it probably would include a statement something like this: 'There can be no security in a world whose obsession with peace leads to appeasement.'"

Then I quoted from Rienhold Niebuhr's letter to a pacifist who was reluctant to favor the Allied war effort against Hitler:

"Your difficulty is that you want to try to live in history without sinning . . . our effort to set up the Kingdom of God on earth ends in a perverse preference for tyranny, simply because the peace of tyranny means, at least, the absence of war." (*Love and Justice* [Westminster, 1957].)

This was the dose of realism I felt my Presbyterian brothers and sisters needed.

Now, two years later, I am in a different place. Although my background includes graduation from West Point, Command and General Staff College, the U.S. Army War College, overseas service in Okinawa, Germany and Vietnam, combat duty as a company commander in Korea and chaplain assignments at every level of the army, including the Pentagon, none of this experience has prevented a gradual but inexorable change in my viewpoint during the past two years. No, I did not become a pacifist. In fact, I will probably continue to bristle when the facile warmongering stereotype is unfairly and uncharitably applied to the many fine leaders of our armed forces. Likewise, I will continue to defend those military chaplains whose self-identity and role definition is so clear that they lend no credence to Niebuhr's remark, "Kings use courtiers and chaplains to add grace to their enterprise."

What has changed is my view of nuclear warfare and nuclear weapons. The change is by no means unusual or unique. In the May 1982 chief of chaplain's newsletter, I referred to the people of Europe who feel they are "living on the battlefield." Then I shared my own feelings:

"I believe that statement can go further: *We are all living on the battlefield.* We are all vulnerable. For years I have put this out of my mind, knowing perhaps in some distant or subliminal way that it was true. But it never "grabbed" me. I just really did very little thinking about it. That is not true recently, however. This new awareness is happening to many people the world over. I believe this is of God, and I believe this is something God is doing in human history today. Doubtless it is striking fear into the hearts of many, leaders and policy-makers especially. This awareness of itself may not automatically determine immediate specific policy, but it is *right* that human beings be aware that it is *wrong* to be nonchalant, unthinking and indifferent about the real danger of the possible destruction of humankind. I welcome this widening awareness as a divine intervention, a warning and a signal, possibly a life-and-death 'last chance' for human civilization. Life is a precious gift of God, willed by our Creator, but it cannot continue unless we also will that it does."

If I were to revisit the Peacemaking Committee now, I would say to them that the question is not whether we are to "live in history without sinning," but whether we are to live in history at all. If we were to apply Niebuhr's real politics, with its ready acceptance of the inevitability of conflict, to the present nuclear situation, it could well mean "a perverse preference for the war of mutual annihilation, simply because the war of mutual annihilation means, at least, that the other side doesn't win either." In speaking of plans for a protracted nuclear war, Secretary of Defense Caspar Weinberger said recently that nuclear war was not winnable but that "we certainly are planning not to be defeated" (*New York Times,* August 9, 1982).

In view of continued presidential certification and support of the government of El Salvador, I would conclude, "There can be no peace in a world whose obsession with security leads to denying the claims of human rights and justice." Finally, I would still admit that under certain circumstances, weakness invites aggression. Peacekeeping has a place. The United States Army War College motto, "Not to promote war, but to preserve peace," is the idea behind the Armed Forces motto, "Peace through strength." But now I would have to ask. "When does 'peace through preparation for war' make war a more likely possibility?" Certainly I would say. "There can be no peace in a world whose obsession with security leads to a never-ending arms race."

Reinhold Niebuhr saw history as a "long tale of abortive efforts to establish peace," with failures due "either to the effort to eliminate the factor of force entirely or to an undue reliance upon it" (*Moral Man and Immoral Society* [Scribner's, 1932]). During the rise of Hitler and World War II, Niebuhr moved from his early pacifism to focus on the pacifist's unrealistic effort to eliminate the factor of force. But now it appears that Niebuhr's comment on "an undue reliance upon the factor of force" was more prophetic. The undue reliance on force by both the United States and the Soviet Union is characterized by nuclear overkill, indiscriminate arms peddling, and the wasting of precious human and national resources in an unending arms race.

Given these conditions and Niebuhr's ability to shift his thinking, I wonder if he were living today whether he would not sharply limit his application of real politics. He reminded us that realism, not moralism, guides the conduct of nations. Nations relate to one another simply on the basis of self-interest. It is unreasonable and moralistic to expect nations to reflect the virtues of individuals—hence his book title, *Moral Man and Immoral Society.* Niebuhr chided moralists for failing to understand "the brutal character of the behavior of all human collectives." The stark realities of power and conflict must be accepted as inevitable. Indeed, "to the end of history the peace of the world . . . must be gained by strife."

Such ideas from Niebuhr's real politics blunted moral attacks on war and helped provide an easy conscience to a generation of American policymakers. But now the case for realism appears to be moving beyond Niebuhr. Real politics, with its acceptance of the inevitability of conflict, is no longer realistic—not when two nations with a total of more than 50,000 nuclear weapons can essentially obliterate one another. We must go beyond real politics, from self-interest to shared interest. Despite their competing systems, the U.S. and the U.S.S.R. have a shared interest in survival. Niebuhr states it clearly:

"The peril of nuclear war is so great that it may bridge the great ideological chasm between the two blocs and make them conscious of having one thing in common: preference for live over death." (*The Structure of Nations and Empires* [Scribner's, 1959].)

In order to realize this preference, we must go beyond Niebuhr's realistic observation that groups and nations relate predominately on a "political rather than ethical" basis. If we cannot, then we must face the likely doom of the human race. Ironically, a recently revealed memo which former president Harry Truman wrote in 1958 indicates that he feared precisely this failure.

The nuclear reality not only takes us beyond Niebuhr and real politics; it also takes us beyond the "just war" as a justification or rationalization for the use of nuclear weapons. Nuclear warfare is indicted, not vindicated, by the limiting categories of just-war criteria such as due proportion, just means, just intentions and reasonable possibility of success. The burden of proof is on those who would say otherwise. A limited nuclear "just" war can be theoretically conceived of in a textbook scenario, but is it possible in the real world? War is confusion, chaos and hell, not predictable sequences. Even if nuclear weapons were to be used as counterforce, and even assuming that noncombatants could be protected, the question of escalation would remain unanswered—not to mention long-term environmental or genetic damage. How can we know that *any* use of nuclear weapons will not result in catastrophic escalation?

In 1978, General Creighton Abrams was said to have interrupted a discussion about limited nuclear war "with an expletive, followed . . . by the statement, 'One mushroom cloud will be reported as one hundred, and that will probably be the end of the world.'" The technical discussions as to when or whether nuclear weapons can be used without violating just war criteria are irrelevant unless the question of escalation can be answered with certainty.

I suspect that a number of these conclusions are shared by many middle-of-the-roaders who have thought of themselves as just-war adherents. Our realization that the just war theory provides no justification for nuclear weapons or nuclear warfare has involved painful reappraisal, a "shaking of the foundations." However, some of us were prodded and assisted by the cavalier comments of leaders in the current administration. European nuclear protest has been accounted for as "Protestant angst" (Assistant Secretary of Defense for International Security Policy Richard N. Perle) which was "bought and paid for by the Soviet Union" (President Ronald Reagan). On this side of the ocean, Secretary of the Navy John Lehman blamed "a few uninformed and overly idealistic religious leaders."

This trivialization of nuclear concerns was a misreading of the across-the-board struggle taking place with issues of life and death, of the widespread sense that this may be the "last chance" for human civilization. Since our leaders did not have the sensitivity to feel the moral earnestness of literally millions of European and American people, it is legitimate to ask how sensitive they are to the moral issues themselves.

In good will we might patiently wait for signs of moral leadership, but the facts of history do not offer us this choice. We were the first and only nation to use atomic bombs in war. It was a presidential decision; the American people were not consulted. Furthermore, in our armed forces schools, military officers in tactical war gaming make the assumption that nuclear "release" will be forthcoming in any major war. Where did such an assumption come from?

All these factors heighten the importance of the present nuclear debate. If there is any hint from our political leaders that the use of nuclear weapons is regarded once again as one of the prerogatives of power in a "close hold," then at the very least the nuclear debate ought to serve the purpose of forcing openness, or what Jacques Ellul called "unmasking." Using nuclear weapons does not fit into the "If I felt the American people needed to know . . ." category. History, if there is to be a history at all, must not repeat itself.

But the only guarantors of this history are the American people themselves. As reported in the *Washington Post*, former secretary of defense Robert S. McNamara implicitly assigned this responsibility recently when he attempted to account for the tremendous nuclear buildup by the U.S. and the U.S.S.R. in the last 15 years. Robert Scheer asked, "But how did this happen?" McNamara's response: "Because the potential victims have not been brought into the debate yet, and it's about time we brought them in. I mean the average person."

In order for this participation to take place, "the average person" must overcome a passive feeling of inferiority which blindly blesses government policy, and is content to "leave it to the experts." The question is not whether we trust our leaders, but whether our leaders can be made to trust the American people and bring them into their confidence. Gatekeeping is a permanent feature of any bureaucracy.

At lunch with me one day in the Pentagon, a senior Defense Department official complained about Roman Catholic bishops who, in involving themselves in nuclear issues, were "tampering in geopolitical areas." I responded by defending the bishops' right to transgress the sacred soil of geopolitics; the possible killing of human beings is certainly a moral question. "Potential victims" have a right to be brought into the debate and the decision-making process concerning their fate.

"Potential victims" must also break through their sense of foreboding and inevitability—the prime ingredient which could bring us to a nuclear holocaust. In reflecting on the Truman-Churchill decision to use the atomic bomb, Niebuhr said, "The question is whether they were not driven by historic forces more powerful than any human decision." Will competitive forces "more powerful than any human decision" once again drive us toward use of nuclear weapons and ultimate disaster? Or will we decide that human decisions can and will control our destiny?

It now appears that the U.S.-U.S.S.R. arms race has taken on "a life of its own." Completely apart from the "Soviet threat," the reason this is so is that we have ascribed an idolatrous power and ultimacy to weapons which has deepended our dependence on them and increased our feelings of inevitable disaster. Therefore our president "orders" another 17,000 nuclear weapons. And he proposes to sell $25 billion worth of arms in a single year to a waiting world. The familiar statement "If we don't, someone else will" is a sign of the paralysis of "inevitability" and lack of moral leadership—not a valid reason for arms peddling.

Last year Frank C. Carlucci, deputy secretary of defense, described what he believed to be an election mandate: "We are obliged to rearm our country." Then, in anti-gun-control language, he said, "A casual appreciation of history reveals that neither weapons nor armies start wars. People start wars." This, of course, is nonsense, even though it is true that people start wars. What is so tragic is this nonchalant approach to weapons, as if they were just another commodity such as wheat or silver. Admiral Hyman G. Rickover's sense of history in his "final blast" before retirement was more accurate:

"The lesson of history is: When a war starts, every nation will ultimately use whatever weapon has been available. That is the lesson learned time and again. Therefore, we must expect, if another war—a serious war—breaks out, we will use nuclear energy in some form. That's due to the imperfection of human beings." *(New York Times*, January 30, 1982.)

Even though Rickover seems given over to the probability of nuclear extinction, he nevertheless seems to appreciate that weapons are not "neutral," that their presence introduces a compelling temptation for human beings to use them.

Jacques Ellul probed the deeper reasons why human beings must get control of weapons and weapons systems or be controlled or destroyed by them. In a technological society, Ellul points out,

"People think that they have no right to judge a fact—all they have to do is to accept it . . . A striking example of this religious authority of the fact is provided for us by the atomic bomb. Confronted by this discovery, by this instrument of death, it was quite possible for man to refuse to use it, to refuse to accept this fact. But this question was never even raised. Mankind was confronted by a fact, and it felt obliged to accept it. All the questions which were raised after that were secondary: 'Who will use this weapon? How shall we organize our economy with it in view?' But no one ever raised the question: 'Is this line of action itself good or bad?' The reason is that 'the fact' itself at the present time seems to be something which is beyond good and evil." *(The Presence of the Kingdom* [Seabury, 1967].)

Actually, Ellul is not quite correct in stating that the question of refusing to use the atomic bomb "was never even raised." The matter was never considered in any public forum. However, the Committee on Social and Political Implications in its report to then-Secretary of War Henry Lewis Stimson stated prophetically:

"The use of nuclear bombs for an early unannounced attack against Japan is inadvisable. If the U.S. were to be the first to release this new means of indiscriminate destruction upon mankind, she would sacrifice public support throughout the world, precipitate the race for armaments, and prejudice the possibility of reaching an international agreement on the future control of such weapons" (quoted in Alan Geyer, *The Idea of Disarmament* [Brethren Press, 1982]).

This committee foretold the consequences of the nuclear "Fall." They underscored Ellul's contention that nuclear weapons command a religious authority over our lives.

We cannot reverse the Fall, but what we can reverse is our continued complicity in nuclear idolatry. The time has come for the American people to overcome the religious authority of nuclear weapons by questioning their basis in "fact." Neither real politics nor the just war theory can provide a legitimate basis for their existence or use. The "fact" of nuclear weapons has been superseded by a more compelling fact: that human beings have a right to live free of the risk of mutual nuclear annihilation.

This is the essence of European and American nuclear protest.

Paul Warnke's comment that the START talks were "conceived in sin" (as a result of grass-roots pressure) indicates the reluctance of the leaders of this administration to face the primary moral question of nuclear arms control and elimination. Having accepted nuclear weapons as "fact," these leaders have concentrated on secondary questions concerning nuclear capability and use. Now it is time for our leaders to exercise their considerable talents in the "politics of self-interest" by stopping the nuclear arms race instead of continuing to justify and stockpile the means of mutual suicide.

Albert Einstein once said, "We live in an age of perfect means and confused ends." Our politicians and the technicians of violence have shown great dedication to perfecting the means for human extinction. Now it is time for them to back off and ask, "to what end?" If they cannot exercise a commensurate moral leadership in addressing this question, then it is time for the leaders to be led.●

MARY R. BUBNA, REPUBLICAN WARD 5 LEADER FOR 28 YEARS

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Ms. OAKAR. Mr. Speaker, one of Cleveland's most active women has passed away. Although she was of the opposite political party I had a great deal of respect for her. My personal sympathy to her family.

The following is an article which appeared in the Plain Dealer:

Caring for her family and politics were priorities in Mary R. Bubna's life.

She came to Cleveland in 1911 from Reggio Calabria, Italy, with her parents. She attended business college and helped her late husband, William H., start an accounting and insurance businss. She continued to work at the business with her children.

Mrs. Bubna, 73, died yesterday at Cleveland Metropolitan General Hospital. She had been in the intensive care unit since Nov. 17 for treatment of a kidney ailment.

For 28 years, Mrs. Bubna was the Republican Ward 5 leader. She was a member of the GOP state central and executive committees and the Cuyahoga County central and executive committees.

She was a delegate and an alternate at several Republican national conventions, most recently in 1976.

Mrs. Bubna was appointed by former Mayor Ralph J. Perk as a Cleveland civil service commissioner in 1976 and was reappointed by Mayor George Voinovich in 1979.

Along with her political work, Mrs. Bubna helped the Boy Scouts raise money for summer camp. During World War II, she was a volunteer at the Crile Hospital.

Mrs. Bubna is survived by sons, Joseph A. and Frank Romeo; daughter, Catherine Yadlovsky; mother, Domenica Zaffino; a brother and sister, 10 grandchildren and five great-grandchildren.

Services will be at 10 a.m. Monday at St. Rocco's Church, 3205 Fulton Rd.●

INDONESIA AND EAST TIMOR

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. EDWARDS of California. Mr. Speaker, on several occasions in recent years I have expressed great concern over the conflict prevailing in the former Portuguese colony of East Timor. I have continued to stress the illegal nature of the Indonesian invasion and occupation of that territory and have called for American diplomatic moves that could help terminate the Indonesian occupation. I have noted that this tragic conflict may well have thus far claimed more than 200,000 East Timorese lives out of an original population of less than 700,000.

More than this, I have expressed my dismay over the diplomatic position taken by the United States. Far from helping to find a just solution to this tragedy, the United States has supplied Indonesia with vast quantities of military equipment in the years since Indonesia's 1975 invasion of the territory. The United States, disregarding the United Nations Charter which our diplomats helped to draft in San Francisco in 1945, has supported Indonesia in the U.N. votes on the Timor issue.

But the Congress has become more active on issues pertaining to East Timor, and I hope to see congressional involvement increase in the coming year.

There are others whose activity on the East Timor issue should increase dramatically, in my judgment. It should be recalled that until 1975, East Timor had been a Portuguese colony for 400 years. East Timor was dependent upon Portugal for protection against an Indonesian invasion. For whatever reason, Portugal failed to prevent the Indoniesian assault, and Portugal will continue to bear a heavy responsibility for this failure.

As I have noted in recent years, Portugal has at various times announced moves that could help bring a just settlement to East Timor. I have applauded these moves, while noting that the right of self-determination for the people of East Timor is an inalienable right that cannot be ignored.

On December 14, the current Prime Minister of Portugal, the distinguished newspaper editor Fransisco Pinto Balsemao, will meet with President Reagan in Washington. I believe that the Portuguese Prime Minister will raise the East Timor question with our President.

I would like to take this opportunity to urge all possible steps that can bring peace to East Timor within a proper legal framework scrupulously respecting the wishes of its inhabitants. Like Britain in the case of the Falkland Islands, Portugal has the capacity to conduct an active diplomacy on the East Timor issue. But concerning East Timor, where so many people have died fighting for their freedom from foreign domination, the responsibility of the former colonial power is all the more keen.

To inform my colleagues on the editorial opinions of two of our Nation's leading newspapers, I insert for the RECORD commentaries that have appeared in the San Francisco Chronicle and the New York Times:

[From the San Francisco Chronicle, Oct. 13, 1982]

INDONESIA AND EAST TIMOR

The red carpet has been rolled out for Indonesian President Suharto's visit to Washington. At the welcoming ceremony, President Reagan told this leader of a nation of 13,500 islands that "the United States applauds Indonesia's quest for what you call national resilience. No nation in our era has shown itself more firmly committed to preserving its own independence than Indonesia . . ."

This is a fair statement that recognizes the importance of oil-rich Indonesia to United States foreign policy and to stability within the Southeast Asia region.

But there is a shadow that alls across Suharto's visit, and it is the shadow of Indonesia's conduct in East Timor. This former Portuguese colony was taken over by Indonesia in a bloody invasion during 1975, and reports that filter out from the island indicate it is still the scene of oppression and famine.

A bipartisan group of senators and representatives has urged the Indonesian government to allow international relief agencies free access to the area. It is also pressing President Reagan to open up the whole question of human rights on East Timor with President Suharto.

"We are deeply concerned," said the senators, "over the tragic situation in East Timor . . . Although events (there) have received comparatively little attention, that does not make past or present conditions . . . any less severe." The Congressmen say means should be found to convince Suharto to agree to an internationally-negotiated settlement that will guarantee Indonesia's "legitimate security interests" while providing the people of East Timor with the political rights to which they are entitled. Their position on this wrenching situation is a thoroughly reasonable one.

[From the New York Times, Oct. 9, 1982]

FORGOTTEN SORROWS IN TIMOR

Aggression forgotten is aggression rewarded. Because Britain could send a fleet to the Falklands, Argentina paid in bitter coin for its seizure of the islands. Indonesia had better luck seven years ago: it grabbed East Timor, a former Portuguese colony, and heard only token protest. The principle was the same but Indonesia's crime is nearly forgotten.

Yet not wholly forgotten. On the eve of President Reagan's meeting with Indonesia's President Suharto, a bipartisan group in Congress has asked America not to avert its eyes.

East Timor was indifferently governed from Lisbon for 400 years. Its half-million people, predominantly Catholic, were unprepared when independence was thrust

upon them. But at worst, it was a slum; now it is a wasting prison. As many as 200,000 people may have perished under Indonesia's occupation. And the denials of ill treatment remain implausible as long as Jakarta refuses both free exit to Timorese and Portuguese nationals and unimpeded entry to relief organizations.

At the very least, Indonesia's rulers have to be persuaded to open the doors to East Timor. But there is nothing persuasive about a United Nations that regularly threatens Israel for much lesser transgressions while gently chiding Indonesia for the abduction of a whole people. And it does not help for the United States to mute its protest in gratitude for Indonesia's anti-Communism.

Protesting the situation in East Timor is not just a matter of arraigning a new nation for what the old colonial powers used to do with impunity. It is a way to help the United Nations and world opinion elevate standards of conduct. What other help is available to a remote and vulnerable people when their cause dwindles to a footnote?

Creditably, though tardily, Portugal is not shrugging. Prime Minister Pinto Balsemão reminded the General Assembly last week that he still cared. He appealed for using all mechanisms of the U.N. to find a remedy. Maybe the effort would fail. So far, it hasn't really been made.●

FEDERAL OIL AND GAS ROYALTY MANAGEMENT ACT

HON. KEN KRAMER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. KRAMER. Mr. Speaker, in passing the Federal Oil and Gas Royalty Management Act, the Senate has taken an important step to reduce the over $2 billion lost annually by oil and gas producers to theft. This bill requires the Secretary of the Interior to develop site security plans and initiate new inspection and accounting procedures to insure that theft losses are brought under control. These losses are estimated by the Department of the Interior to affect as much as 3 percent of daily production in the United States.

Fortunately, American industry has already responded to the challenge offered by the goal of this legislation. Cypher Systems has developed a technological solution to the problem of monitoring inventories at remote sites in the oil and gas industry. This system, using microcomputer technology, allows the petroleum industry for the first time to measure accurately oil and other tank-stored fluids on even the most remote and widespread facilities operating from a central location—for example, company headquarters. A petroleum inventory manager using this system can instantly determine if an unauthorized removal of tank fluids is taking place. Access codes allow operators to perform only those functions assigned to them.

Over time, inventory security systems such as this will set a standard for the petroleum industry which will insure that the U.S. Government, Indian tribes, and other oil and gas owners receive the full measure of royalties and other payments due them on their leases.●

A TRIBUTE TO DR. KEITH SMITH

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. MOTTL. Mr. Speaker, I would like to pay tribute to a man who has done much to contribute to the health of the people of my district and to the development of optomology and otolaryngology.

Dr. Keith Smith is an ear, nose, and throat specialist in Parma, Ohio, who first acquired his interest in medicine through his mother's fascinating tales of her work with Sir Harold Delf Gillies during World War I. Sir Gillies developed the pedical type of skin graft which surgically transfers skin and subcutaneous tissue attached for nourishment.

Dr. Smith received a doctor of medicine from the University of Western Ontario in 1959. He did his internship at the Lutheran Hospital in Fort Wayne, Ind., from July 1959 to June 1960, and his residency at St. Lukes Hospital in Cleveland, Ohio, from July 1960 to June 1964.

He has contributied to medical and surgical literature with articles regarding specific techniques for surgery. He contributed to George Shambaugh's book, "The Surgery of the Ear," and the ear, nose, and throat monthly magazine, The Laryngoscope.

Dr. Smith belongs to numerous medical groups, including the American Medical Association, the Centurian Club, the American Board of Otolaryngology, the Academy of Optomology and Otolaryngology, a College of Surgeons, and the Medical Council of Canada, to name a few.

In addition, he is a member of the Royal Academy of Medicine, Aesculagians, and the Medical Arts Club. He is a Diplomat of Otolaryngology of the American College of Surgeons. He is a past president of the Otolaryngology Club, and the Council of Medical Staffs of Northeast Ohio.

His contributions to the community include serving on the safety board of the Cleveland police and advising the Lost Chord Club of Cleveland, training under Julius McCall, who was very important in developing the Laryngectomy.

Dr. Smith's involvement in these numerous organizations does not take his attentions away from his patients, however. He has an outstanding record of treatment of 80,000 patients in his career. I hope you all will join me in honoring a man who has contributed greatly to the health of the people of the Cleveland area and to the development of the world of medicine.●

H.R. 7352

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. ROSENTHAL. Mr. Speaker, I recently introduced the Insider Trading Sanctions Act of 1982, H.R. 7352, to strengthen the Security and Exchange Commission's civil authority to prosecute violators of the law prohibiting insider trading and to increase criminal penalties for violations of the Securities Exchange Act of 1934.

As chairman of the Commerce, Consumer, and Monetary Affairs Subcommittee of the Committee on Government Operations, I have examined a recent example of enforcement by the SEC of insider trading violations in the Santa Fe International Corp. takeover by Kuwait Petroleum Corp. Some of my views, particularly regarding the reluctance of the SEC and the Justice Department to utilize criminal penalties, and more detail on the cases arising out of the Santa Fe takeover, are expressed in the correspondence which appears below.

The material follows:

SECURITIES AND EXCHANGE COMMISSION,
Washington, D.C., November 22, 1982.

Hon. BENJAMIN S. ROSENTHAL,
Chairman, Subcommittee on Commerce, Consumer and Monetary Affairs, Committee on Government Operations, Rayburn House Office Building, Washington, D.C.

DEAR CHAIRMAN ROSENTHAL: In your letters of October 13 and October 27, 1982, you requested, among other things, certain information concerning the relationship between the Commission and the Department of Justice with respect to criminal prosecution of insider trading cases. I requested that the Commission's Division of Enforcement prepare the enclosed memorandum in response to your request.

Your October 13 letter also stated that you will introduce and support the Commission's legislative proposal to establish a civil penalty for insider trading violations and to increase the maximum fines that may be imposed in criminal prosecutions of violations of the Securities Exchange Act of 1934. The Commission and its staff appreciate your support of, and decision to sponsor, this legislation.

Please do not hesitate to contact me again if I may be of further assistance. In addition, as I indicated in my letter of October 12, 1982, John M. Fedders, the Director of the Division of Enforcement (272-2900), is available to provide you or your staff with

additional information concerning the Commission's enforcement program.

Sincerely,

JOHN S. R. SHAD.

MEMORANDUM

To: Chairman Shad.
From: John M. Fedders, Director, Division of Enforcement.
Date: November 18, 1982.
Re: Response to Chairman Rosenthal's inquiries concerning insider trading cases.

This responds to questions asked by Chairman Benjamin S. Rosenthal in his letters to you of October 13 and 27, 1982. The letters request, among other things, certain information concerning the relationship between the Commission and the Department of Justice with respect to criminal prosecution of insider trading cases.

The October 13 letter inquired whether the Commission "has agreed, formally or informally, not to make a criminal referral in any of the settlements relating to Santa Fe or other insider trading cases since January 1, 1981 to date." We have not done so. In this regard, the Commission has a policy, 17 CFR 202.5(f), a copy of which is attached, or refusing to discuss during settlement negotiations with subjects of Commission enforcement proceedings any action that the Commission may take with respect to possible criminal prosecution.

The letter also requested the number of insider trading cases "referred by the SEC to the Justice Department within the past three years and the number of such cases prosecuted by the Justice Department." The Commission has two means of providing information to the Department of Justice. The first is the criminal "referral," which involves a formal Commission recommendation that the Department institute criminal proceedings. Such a referral requires a vote of the Commission and generally is accompanied by a detailed staff memorandum, which summarizes relevant evidence and evaluates the strengths, weaknesses, and legal theories involved in the case.

The second method used to provide information to the Department, and by far the more common, is a "grant of access" to the relevant investigative case file. This process often is initiated when senior members of the Commission's staff advise representatives of the Department of Justice of information obtained in a particular investigation. If the Department determines that the case may warrant criminal prosecution, a written request for access is made.

As the courts have recognized, this access procedure has substantial advantages. For example, the Second Circuit Court of Appeals has stated with respect to this procedure:

"Allowing early participation in the case by the United States Attorney minimizes statute of limitations problems. The more time a United States Attorney has, the easier it is for him to become familiar with the complex facts of a securities fraud case, to prepare the case, and to present it to a grand jury before expiration of the applicable statute of limitations. Earlier initiation of criminal proceedings moreover is consistent with a defendant's right to a speedy trial." *United States v. Fields*, 592 F.2d 638, 646 (2d Cir. 1978), *cert. denied* 442 U.S. 917 (1979); quoted with approval in *Securities and Exchange Commission v. Rubinstein*, 82 Civ. 4043 (S.D.N.Y. 1982).

The *Fields* court went on to note that the Congress had recently expressed its expectation that the close working relationship between the Department of Justice and the Commission would continue. The court declined to "interfere with this commendable example of inter-agency cooperation." *United States v. Fields*, 592 F.2d at 646.

Since October 1979, the Commission has made one "referral," to the Department of Justice, and granted access to files on thirteen occasions, with respect to insider trading cases. One grand jury indictment and conviction has resulted to date. *United States v. David H. Hall*, 80 Cr. 692 (S.D.N.Y. 1980). These figures do not reflect two criminal prosecutions of insider trading violations since October 1979 that resulted from grants of access prior to that date. *United States v. James M. Newman*, 664 F.2d 12 (C.A. 2, 1981), *United States v. Steven Nussbaum* 81, Cr. 672 (S.D.N.Y. 1981). In addition, these figures do not reflect two criminal prosecutions of insider trading violations during the period which were referred to United States Attorneys by a private law firm and the Department of the Navy at the same time they were referred to the Commission. *United States v. Carlo M. Florentino*, 82 Cr. 450 (S.D.N.Y. 1982); *United States v. Mark C. Saunders*, 82 Cr. 157 (E.D. Va. 1982).

With respect to criminal prosecutions for violations of the federal securities laws generally, the Commission has a close and harmonious relationship with the Department of Justice and the various United States Attorneys offices. The Commission has encouraged the Attorney General and United States Attorneys to prosecute violations of the securities laws including those violations involving the prohibitions against insider trading. The total number of "referrals" and access requests increased from 38 in fiscal 1972 to 86 in 1981.

The Commission always is striving to improve its relationship with the Department of Justice and to increase the number of criminal referrals. To this end, I and my senior staff meet with representatives of the Department of Justice to discuss cases of mutual interest.

Chairman Rosenthal's letter of October 27 set forth a number of questions concerning *SEC v. Randolph, et al.*, Civil Action No. 82-5343 (filed September 30, 1982). In response, I am attaching transcripts of the hearings held before Judge Orrick in that case on October 1 and 15. At the October 15 hearing, Judge Orrick requested that the Commission respond to certain questions. I am also attaching a copy of the Commission's response to Judge Orrick's inquiries. After Chairman Rosenthal has reviewed the Commission's response to Judge Orrick's question, we would be pleased to elaborate on our responses or respond to any additional inquiries that he may have.

In the *Randolph* case, the Commission has submitted consents, undertakings and proposed final judgments of permanent injunction to Judge Orrick, which would provide for disgorgement of $116,707.74. Although the Judge declined to sign the proposed final judgments on two occasions, we are hopeful that he will do so after reviewing the Commission's response to his inquiries. As set forth in the enclosed response to the Judge's questions, the proposed final judgments would grant the Commission virtually all of the relief that it is possible for the Commission to obtain in its civil enforcement action. I believe that on October 1 and 15 Judge Orrick was expressing many of the concerns which the Commission and its staff have in connection with the adequacy of the sanctions available to deter persons from engaging in insider trading and other violations of the federal securities laws.

I appreciate Chairman Rosenthal's statement that he will introduce and support the Commission's legislative proposal to establish a civil penalty for insider trading violations, and to increase the maximum fines that may be imposed in criminal prosecutions of violations of the Securities Exchange Act of 1934 from $10,000 to $100,000. We in the Division firmly believe that enactment of the legislation will provide a more effective deterrent against insider trading and other securities law violations.

COMMERCE, CONSUMER, AND MONETARY AFFAIRS SUBCOMMITTEE,
Washington, D.C. October 27, 1982.

Hon. JOHN SHAD,
Chairman, Securities and Exchange Commission, Washington, D.C.

DEAR MR. CHAIRMAN: This is in further reference to my letter to you of October 13, 1982, regarding the SEC's investigation and litigation arising out of insider trading in Santa Fe International Corporation.

The Wall St. Journal of October 18, 1982, reports that Judge Orrick in the *Randolph* case indicated that he would not consider approving the settlement proposed by the SEC "until the full commission answered two dozen wideranging questions on the SEC's handling of insider cases in the past. . . ."

Please supply the subcommittee with a copy of the Judge's questions and the SEC's responses in this case. Also, please let us know the present status of the *Randloph* settlement.

Sincerely,

BENJAMIN S. ROSENTHAL,
Chairman.

JUDGE AGAIN REJECTS SANTA FE INTERNATIONAL EMPLOYEES' SETTLEMENT

SAN FRANCISCO.—A federal judge again rejected as too soft a proposed Securities and Exchange Commission settlement with two Santa Fe International Corp. employees charged with insider trading.

Judge William H. Orrick, in a hearing here Friday, said: "I am worried that an insider can trade on insider knowledge secure in the knowledge that he can flip the cookies back in the jar and only get a slap on the wrist from a friendly judge."

The judge said he wouldn't consider approving a settlement until the full commission answered two dozen wide-ranging questions on the SEC's handling of insider cases in the past that he asked SEC lawyers at the hearing. The judge told the SEC to submit the information in three weeks.

On Oct. 1, in an unusual mode, the judge refused to accept the proposed accord in which two Santa Fe employees agreed to return to shareholders alleged securities trading profits of $116,700 to end an SEC civil suit against them.

Under the proposal, the men would have settled the charges without admitting or denying them and would have consented to a permanent court order barring them from future violations of an SEC antifraud rule.

The judge had asked the SEC why he should accept the proposed settlement. In resubmitting the proposal Friday, the SEC said the repayment of the trading profits was the maximum penalty it can win through its civil suits.

The SEC alleged that the profit was produced by buying Santa Fe international securities before the company announced last year that it was being acquired by a unit of Kuwait Petroleum Co.

Charged in the Santa Fe case, the latest in a series of SEC actions against people the agency accuses of profiting illegally from advance knowledge of merger plans, were James H. Randolph Jr. and Charles Blackard. Both are vice presidents of Santa Fe units.

At Friday's hearing, lawyers for the men wouldn't discuss the case.

The SEC has filed three other lawsuits over alleged insider trading stemming from the merger, and the investigation is "continuing and ongoing," according to SEC court filings. So far, the SEC has settled one of the suits with a consent decree similar to the one rejected by the court.

SEC court filings show that in the Santa Fe cases, the SEC has obtained preliminary orders freezing about $7 million in proceeds from alleged insider trading and has recovered about $300,000 in alleged illegal trading profits.

U.S. DEPARTMENT OF JUSTICE,
Washington, D.C., October 26, 1982.

Hon. BENJAMIN S. ROSENTHAL,
Chairman, Subcommittee on Commerce, Consumer, and Monetary Affairs Committee on Government Operations, Washington, D.C.

DEAR MR. CHAIRMAN: Your inquiry dated October 1, 1982, concerning the Darius N. Keaton matter has been referred to the Criminal Division for reply.

With respect to your specific request regarding whether the Securities and Exchange Commission referred the Keaton matter to the Department of Justice, the SEC has not referred this matter to the Department. However, you should know, we are working closely with the SEC regarding several allegations of insider trading in the securities of Santa Fe, resulting from the takeover of Santa Fe by Kuwait Petroleum Corporation.

We appreciate your bringing this matter to our attention.

Sincerely,

D. LOWELL JENSEN,
Assistant Attorney General, Criminal Division.

COMMERCE, CONSUMER, AND MONETARY AFFAIRS SUBCOMMITTEE,
Washington, D.C., October 13, 1982.

Hon. JOHN SHAD,
Chairman, Securities and Exchange Commission, Washington, D.C.

DEAR MR. CHAIRMAN: Thank you for your letter of October 12, 1982, regarding the SEC's investigation and litigation arising out of insider trading in Sante Fe International Corporation.

I understand that within the past few days, in the *Randolph* case in San Francisco, U.S. District Judge William Orrick refused to accept a proposed settlement similar to the Darius Keaton settlement, calling it "a slap on the wrist." Surely, the Judge understands the extent of the SEC's options, and may be suggesting that a criminal referral is necessary before he will agree to the civil settlement. I still question why a decision to refer to the Justice Department has not yet been made in the Keaton and other cases where a settlement has been accepted or proposed. If the present law limits your civil penalties, I suggest that the SEC should consider criminal referral where appropriate in order to insure that the law has a deterrent effect. In this regard, please advise whether the SEC has agreed, formally or informally, not to make a criminal referral in any of the settlements relating to Santa Fe or other insider trading cases since January 1, 1981 to date. Also, please provide the number of cases of insider trading referred by the SEC to the Justice Department within the past three years and the number of such cases prosecuted by the Justice Department.

In any event, I want you to know that I agree that increased civil penalties are needed. Accordingly, I will introduce as soon as Congress reconvenes after the election, the legislative proposal the SEC has submitted to increase civil penalties for insider trading. This situation should provide ample proof of the need for such a measure.

Sincerely,

BENJAMIN S. ROSENTHAL,
Chairman.

SECURITIES AND EXCHANGE COMMISSION,
Washington, D.C., October 12, 1982.

Hon. BENJAMIN S. ROSENTHAL,
Chairman, House Committee on Commerce, Consumer and Monetary Affairs, Subcommittee of the Committee on Government Operations, Rayburn House Office Building, Washington, D.C.

DEAR CONGRESSMAN ROSENTHAL: I have your letter of October 1, 1982 concerning the Commission's investigation and litigation regarding insider trading arising out of the merger of Santa Fe International Corporation ("Santa Fe") and Kuwait Petroleum Corporation ("KPC").

Shortly after the announcement of the proposed merger of Santa Fe and KPC, the Commission initiated an extensive investigation of possible insider trading in Santa Fe securities and options. This investigation has resulted in the filing of four civil actions: (i) *Securities and Exchange Commission* v. *Certain Unknown Purchasers, et al.*, Civil Action No. 81 Civ. 6553 (S.D.N.Y.), (ii) *Securities and Exchange Commission* v. *Gary L. Martin, et al.*, Civil Action No. C-82-381 (W.D. Wash.), (iii) *Securities and Exchange Commission* v. *Ronald A. Feole, et al.*, Civil Action No. 82-5018-LEW (C.D. Cal.), and (iv) *Securities and Exchange Commission* v. *James H. Randolph, Jr., et al.*, Civil Action No. 82-5343-WHO (N.D. Cal.). In these pending actions, the Commission is seeking the disgorgement of over $8 million in profits.

Your letter raised questions concerning the Commission's settlement with Darius Keaton, a director of Santa Fe. In the settlement, the Commission obtained all the relief that it could have obtained from Mr. Keaton at a full trial on the merits. In this respect, Mr. Keaton consented to the entry of a final judgment of permanent injunction enjoining him from further violations of the anti-fraud provisions of the Securities Exchange Act of 1934 and an order to disgorge all profits from his transactions. These are the sole remedies presently available to the Commission.

Nothing in the settlement with Mr. Keaton precludes a referral of the case to the Department of Justice. No decision has been made as to whether or not this matter should be referred, nor has the Department of Justice either requested access to our files or indicated that it does not wish to review this matter. Similarly, no decision has been made with regard to other remedies the Commission might pursue against Ronald A. Feole or any of the other defendants in the pending actions. Our investigation indicates that Mr. Keaton is still a director of Santa Fe and Mr. Feole is still the general counsel of Santa Fe Minerals, Inc. There has been no announcement by the company to indicate otherwise.

I believe the Santa Fe cases, in general, and the Keaton case, in particular, demonstrate the Commission's determination to use all of the enforcement tools presently available to it. The Commission shares the concerns raised in your letter and has recognized the need for added deterrence in insider trading cases. In this regard, at the end of September, the Commission submitted to Congress a legislative proposal which would amend the Securities Exchange Act of 1934 to allow the Commission to seek additional sanctions against persons who violate that Act by purchasing or selling securities while in possession of material nonpublic information. The proposed legislation would allow the Commission to obtain monetary penalties of up to three times the amount of profits illegally obtained.

I would be happy to have the staff of the Division of Enforcement brief your staff on these matters and provide any relevant materials. May I suggest that your staff telephone John M. Fedders, Director of the Division of Enforcement, at 272-2900 to arrange for a meeting. You will find that Mr. Fedders will be willing to cooperate with your staff in answering its questions and discussing the Commission's enforcement program.

Sincerely,

JOHN S. R. SHAD.

COMMERCE, CONSUMER, AND MONETARY AFFAIRS SUBCOMMITTEE,
Washington, D.C., October 1, 1982.

Hon. JOHN SHAD,
Chairman, Securities and Exchange Commission, Washington, D.C.

DEAR MR. CHAIRMAN: As you know, the Commerce, Consumer, and Monetary Affairs Subcommittee has taken an active part in oversight of the federal response to the Kuwait Petroleum Corporation's takeover of Santa Fe International Corporation, including allegations of insider trading in violation of the securities laws. I have followed with approval the SEC's activities in this and similar cases in attempting to pierce Swiss secrecy laws and by conducting what apparently is a thorough investigation of insider trading in the Santa Fe case. On October 20, 1981, SEC Commissioner John Evans testified before the subcommittee concerning the SEC's investigation. He outlined the various remedies available to the Commission, including referral to the Justice Department for possible criminal prosecution in appropriate cases; he discussed problems resulting from the use of secret numbered foreign accounts; and he assured the subcommittee repeatedly of the high importance and sense of urgency given to prosecution of insider trading.

In light of this testimony and other subsequent statements by you and other SEC officials of the importance of pursuing insider trading cases with vigor, I am surprised to learn of a recent development in the Santa Fe case which appears to demonstrate a milder prosecutorial stance. In this instance, a director of Santa Fe, Darius N. Keaton, who is charged with using inside information, was permitted to "settle" the matter by repaying the $278,750 profit he made on the illegal trading. As far as I know, no further penalty has been imposed. Surely, the

deterrent effect of the law is vitiated if a director or officer who had access to inside information is permitted to walk away from an insider charge without any penalty whatsoever except the repayment of an illegal profit. I find it ironic that the SEC is presently asking Congress to increase penalties against insider trading but apparently is not willing to use the ample prosecutorial options it presently has.

In light of this situation, I would appreciate responses to the following by October 18, 1982.

1. Supply a status report on the investigation of insider trading in Santa Fe stock and options.

a. What cases have been brought?

b. What cases are pending?

c. What direction will the investigation take?

2. On what basis was the decision made not to pursue criminal remedies in the Darisu N. Keaton situation?

a. Was the case referred to the Justice Department for criminal prosecution? What was Justice's response?

b. Supply copies of documents relating to the decision to accept Mr. Keaton's repayment instead of pursuing criminal remedies.

c. State whether the Commission made a decision regarding criminal prosecution. If so, supply copies of the minutes of the meeting at which the decision was made and all staff documents prepared in connection therewith.

d. If the matter was referred to Justice and prosecution was declined, supply copies of any document stating the Department of Justice's reasons for declining prosecution.

3. Will other remedies be pursued in the case of Ronald A. Feole, the general counsel of Santa Fe Mineral, Inc., and others related to him, who are allegedly involved in additional insider cases?

4. Are Keaton and Feole still employed by Santa Fe International?

Sincerely,

BENJAMIN S. ROSENTHAL,
Chairman.

COMMERCE, CONSUMER, AND MONETARY AFFAIRS SUBCOMMITTEE,
Washington, D.C., October 1, 1982.

Hon. WILLIAM FRENCH SMITH,
Attorney General of the United States, Department of Justice, Washington, D.C.

DEAR MR. ATTORNEY GENERAL: Enclosed is a copy of a letter I have sent today to the Chairman of the Securities and Exchange Commission regarding a case of insider trading and the SEC's possible failure to refer the matter to the Justice Department for prosecution. I recently wrote to you about another matter involving prosecution of banking law violations referred to the Department of Justice by the Office of the Comptroller of the Currenty. I expressed my concern about whether the Justice Department is devoting sufficient resources to white collar crime. In this connection, I enclose an article from the Wall Street Journal of September 28, 1981, entitled, "Reagan Team Plans to Slash Efforts to Catch White-Collar Criminals."

I am writing now to determine whether the Darius N. Keaton case was or was not referred to the Department of Justice by the Securities and Exchange Commission. If it was, why did Justice decide not to prosecute?

I would appreciate a reply by October 18, 1982.

Sincerely,

BENJAMIN S. ROSENTHAL,
Chairman.●

A TRIBUTE TO MR. GEORGE KELL

HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. BLANCHARD. Mr. Speaker, several of our Michigan State legislators, including Senators Miller, Faust, Ross, Hart, and Hertel, have offered a resolution encouraging the Baseball Hall of Fame Committee on Baseball Veterans to induct Mr. George Kell into the National Baseball Hall of Fame. It is with great pleasure that I join this effort.

Mr. Kell, who is already a member of the Michigan Sports Hall of Fame and had been named the Detroit Tigers' all-time greatest third baseman, has had a long and distinguished career, both as a baseball player and later as a gifted sportscaster. Mr. Kell's talents as a ballplayer were perhaps best displayed from 1946 to 1952, when he became known as an outstanding third baseman for the Detroit Tigers. An injury later in George Kell's career led him to retire from playing baseball, but fortunately not from the sport itself.

Since 1954, Mr. Kell has been the sportscaster for the Detroit Tigers and has enhanced Tiger games with his witty and knowledgeable reportage. Mr. Chairman, I hope that the Baseball Hall of Fame Committee on Baseball Veterans will consider Mr. Kell's exceptional career both on and off the field and will induct him into the Baseball Hall of Fame.●

A SALUTE TO HARRIS STOWE COLLEGE

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. CLAY. Mr. Speaker, recognition is extended all too seldom to America's institutions and the people connected with them who quietly serve their country but whose contributions are nonetheless of far-reaching importance.

I would like to call to the attention of my colleagues an article which deals with an historical perspective of an educational institution in my district, Harris Stowe State College, a St. Louis teacher-training institution now celebrating its 125th anniversary.

Harris Stowe State College has graduated many courageous and extraordinary teachers who have demonstrated in the face of great adversity and opposition a caring and commitment to education. The graduates of Harris Stowe State College have rendered significant and superior service to this Nation's most precious resource: its children and youths.

Public institutions like Harris Stowe State College should be praised, supported and preserved. Rather than have this happen, the current administration has not seen fit to continue support for such institutions of higher education based on the devastating cutbacks in funding which has adversely affected institutions of higher education.

Therefore, I applaud the 125 years of teaching teachers for Harris Stowe State College, I applaud Dr. Henry Givens, Jr. the current president of Harris Stowe for his stamina, determination, and superior academic leadership because of his impershable belief that a "mind is a terrible thing to waste."

This State college throughout its 125 years has made an invaluable contribution to the St. Louis community as well as throughout the State of Missouri.

Mr. Speaker, it is with great pride that I bring this article which appeared in the St. Louis Globe-Democrat on November 21, 1982, to the attention of my colleagues:

[From the St. Louis Globe-Democrat, Nov. 21, 1982]

125 YEARS OF TEACHING TEACHERS: "NEW" PROBLEMS ARE ONES COLLEGE HAS SEEN BEFORE

(By Charles E. Burgess)

A 5 percent cut in state aid and an enrollment drop were sobering developments to Harris-Stowe State College, the St. Louis teacher-training institution now celebrating its 125th anniversary.

Harris-Stowe President Henry Givens Jr. remains optimistic about the college's future, although he admits "the cuts put us under tremendous pressure to find ways to carry on programs."

Financial stress has been a relative constant for the institution since its establishment in 1857. It was designed as an arm of the St. Louis public school system to alleviate a shortage of teachers as the population swelled.

In 1862, Superintendent Ira Divoll noted "the rebellion (Civil War) had deprived us of all state aid and had reduced our other revenue by about one-half."

One consequence was that enrollment in the "St. Louis Normal School"—the fledgling teacher-training program—fell from 80 to 38. The sole instructor, Richard Edwards, not only saw his salary cut from $2,500 to $1,500 annually, but he was also required to serve double duty as principal of the system's one high school.

Givens attributes this fall's enrollment drop to 1,072 from last fall's 1,241 to problems students have in getting financial aid and pessimism about job openings in teaching.

Another possible factor was that Harris-Stowe raised the grade-point average students need for certification as teachers and toughened its admissions standards. "Our students must be able to compete as elementary instructors throughout the nation," Givens explained.

The teacher training program faced a similar situation in 1882, as reported by the superintendent then, Edward Long:

"Of late, the number of admissions to the Normal School has been very small as compared with that of former years. It is believed by some that the high standard for admission has been the chief cause . . . It is more probable that the almost certain delay of three or four years after graduation before receiving an appointment has been the main cause."

While Harris-Stowe held a series of events to commemorate the 125th year in the summer and the early fall, some good financial news did arrive.

Voter approval of a $600 million state bond issue will probably mean more renovation and modernization of the college building at 3026 Laclede Ave., said S. Stanley Dalen, vice president for finance.

In the first two years after 1979, when Harris-Stowe became a state institution independent of St. Louis Public Schools, nearly $1.4 million in state aid was granted to upgrade the 55-year-old structure. But a state budget crunch reduced the allocation to only $109,300 in 1981.

As a result, most of a $15.7 million "master plan" developed by Givens, his staff and the Board of Regents will remain on the shelf.

But much has been done in the first three years of autonomous operation. Most science labs have been renovated. The toilets, student lounges and cafeteria have been refurbished. Key classrooms have been air-conditioned for summer sessions. And a new elevator allows almost all handicapped people access to the four-story building, Dalen said.

The once-inadequate library now contains files of 300 periodicals and 70,000 books, says head librarian Julia Broad, who graduated from Harris in 1941.

There's a sense of permanence now about the institution, she said—something it seldom had despite its 125 years.

The Normal School shared space in many buildings before getting its own in 1905 at 1517 S. Theresa Ave. That building now houses the school system's instructional division offices. There was a move in 1948 to 5351 Enright Ave., now the Classical Junior Academy. And in 1963, the school settled in its present site, formerly Vashon High School.

For the first time in 125 years, Harris-Stowe is offering another degree besides elementary education, with its specialization.

In 1984, the first bachelor degrees in urban education will be awarded. About 75 juniors are in the program, aimed at providing school systems with expertise for which they now must hire expensive consultants.

In financially pinched times, the staff has been remarkably supportive, Givens said. To preserve full-timers from layoffs after state aid cuts this year and last, faculty members—including Givens and other teaching-certified administrators—took on an additional three-hour teaching load.

"I would match this faculty for dedication and ability with any in the area. That's why I have stayed as long as I have," said a 35-year veteran of the staff, A. Samuel Oliveri, professor of psychology.

Givens has headed Harris-Stowe since it was severed from the city school system. The 49-year-old educator is former assistant commissioner for urban education and teacher training in the Missouri Department of Education.

Givens' predictions for the school's success are based on the probable shortage of teachers by mid-decade, already evident in such specialized fields as science, math, industrial arts, home economics and music.

Under his direction, Harris-Stowe has emphasized these disciplines. Evening and Saturday classes allow working teachers to increase their certification range, thus improving their job chances. The average age of students is 27.

"It's giving me what I want. I went to a community college for a year, and wasn't satisfied, but her I feel like I'm getting really good preparation," said senior Wally Rutherford, 27, who works full-time as a convention coordinator at the Chase-Park Plaza Hotel.

Givens' links with the school date from the early 1940s, although he attended Lincoln University in Jefferson City. "At the time I wanted to be an engineer, but my brother and sister went to Stowe Teachers College."

The sister, Armetta Whitmore, was on Harris-Stowe's staff before Givens was hired, and now directs special academic programs there.

Before 1954, the St. Louis school system maintained separate teacher training institutions—Harris Teachers College for whites, Stowe for blacks.

The Normal School for whites was renamed in 1910 to honor William Torrey Harris, an innovative St. Louis superintendent from 1868 to 1880, who later was U.S. commissioner of education. Stowe's name honored Harriet Beecher Stowe, whose novel "Uncle Tom's Cabin" strongly influenced anti-slavery movements.

The program to train teachers for black schools was authorized by the legislature in 1875, but did not begin until 15 years later—as a branch of Sumner High School. Stowe was housed in cramped space in Sumner or Simmons School until 1940, when it got its own building, now Turner Middle School.

In 1948, a Stowe student, Marjorie Tolliver, filed suit seeking admission to Harris on grounds that Stowe was inferior and "did not offer equal educational opportunity." Missouri's Supreme Court rejected her argument two years later.

But in 1954 U.S. Supreme Court decision barring student separation by race meant closing for Stowe and the end "of an era of humiliation, disgrace and suppression" for blacks in public education. That statement was made by Ruth Harris, Stowe president for 14 years before integration, in her history of the institution.

Harris-Stowe's enrollment is now about 70 percent black, 30 percent white.

Pictures in old yearbooks of Harris and Stowe are vivid evidence of other changes. Because men weren't permitted to teach in elementary schools in St. Louis until 1940, they weren't admitted to the two colleges.

The 125th anniversary yearbook contains a section of pictures of children of students. Before 1948 in St. Louis, female teachers who got married were fired and lost their pension rights, and female teacher-college students who married were expelled.●

TROND SKRAMSTAD

HON. BEVERLY B. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mrs. BYRON. Mr. Speaker, Mount St. Mary's College, a small school of 1,400 located in my congressional district in Emmitsburg, Md., has been producing track and field champions with amazing frequency. In fact, it now appears possible that as many as five Mount students or graduates will be representing their respective countries at the 23d Olympic games. The summer Olympics return to the United States for the first time in 50 years when Los Angeles plays host in 1984.

Most recently, the accomplishments of Trond Skramstad have highlighted Mount St. Mary's efforts. Trond won the 1982 NCAA Division I title in the grueling decathlon. The decathlon requires a remarkably talented, versatile, and determined competitor, as it consists of 10 separate track and field events over a 2-day period. The winner of the Olympic event is widely regarded as the "World's Greatest Athlete."

Trond's national victory came a mere 5 days after he captured the Division II national title. His score of 7,860 points is the leading collegiate effort thus far this year and represents a personal, stadium, meet, and Norwegian national record. In addition, Trond was the only NCAA track and field champion to represent a school from the east coast. Not only is he an outstanding athlete, but the 20-year-old native of Konesburg, Norway, is also an honors student majoring in business and finance.

I welcome this opportunity to praise the efforts of this fine young man and Mount St. Mary's College, and I am certain that we all look forward to the Olympic games and all they represent.●

THE NATION EMERGES FROM 25 DARK YEARS WITH TOO FEW FROGS

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. McCLOSKEY. Mr. Speaker, in the last hectic days of the 97th Congress, with most of us in deep dismay over the Nation's continuing economic decline and our clear inability in Congress to do anything about our deficit and unemployment woes, it is a pleasant, if only momentary relief to find some hope in a front-page article which ran in the Wall Street Journal last Tuesday, December 7.

The article, written by James P. Sterba, describes a little-known but highly significant success of the Reagan administration's "Stay-the-Course" economic game plan coupled with its sometimes misunderstood efforts for the protection of endangered species.

Mr. Sterba points out the astounding fact that for the first time in 25

years the Nation's frog population is again increasing. What Mr. Sterba does not mention is that a single individual on the Reagan White House staff, operating effectively and in near secrecy, was able to accomplish this incredible turn around in a period of a little less than 18 months.

That individual is none other than Nestle J. Frobish of Lyndonville, Vt., a conservative Republican who has devoted most of his life to seeking protection and fairness for frogs. Mr. Frobish, from 1974 to 1980, deluged Members of Congress and the national media with impassioned warnings that declining habitat and other problems were bringing the U.S. frog population to a dangerously low level. His 1977 book, "Fair Play for Frogs," coauthored with our former colleague, Jerome Waldie, electrified the small but powerfully placed frog-loving community, most of whom are born-again Christians and members of the National Rifle Asscociation like Frobish himself. While Frobish's views found little support in either the Ford or Carter administrations, his conservative—some say antediluvian—views on economic and social issues earned him a position high in the Reagan White House domestic establishment in early 1981.

Within a short time Frobish, working with his close friend, OMB deregulation director, Chris De Muth, was able to abolish several previously ineffective Federal frog programs while at the same time obtaining the President's commitment to a major new frog propagation effort. The frog population had declined in the last quarter of a century because, as Mr. Sterba points out, frogs, like Presidents, when placed in close quarters, rarely copulate.

Frobish conceived a brilliant solution: unlimited space through use of the Space Shuttle. As a result, in 1985, the Nation's TV viewers will have the chance to watch, in living color, the first space mating of frogs, presumably one from Frobish's beloved home pond in northern Vermont and one from the famous Sacramento Delta country which has sent both Ronald Reagan and Jerome Waldie to serve in this city with such distinction.

Those of Mr. Frobish's friends who may want to send him their congratulations can reach him at the Worldwide Fairplay for Frogs Committee headquarters, Box 94, Lyndonville, Vt., 05851. Once, the future of frogs was assured, Frobish left the White House, as surreptitiously as he had come.

It is unfortunate that Mr. Sterba failed to assign appropriate credit to Mr. Frobish in his Wall Street Journal article, but then again Mr. Frobish would probably never have been able to accomplish his spectacular achievement had the world, or even President Reagan, been aware of how he was spending his time on the White House payroll.

The Wall Street Journal article follows:

THE NATION EMERGES FROM 25 DARK YEARS WITH TOO FEW FROGS

MANY NOW MERCIFULLY ESCAPE DISSECTION BY SCHOOLBOYS; THE ORBITING FROG GOTOLITH

(By James P. Sterba)

America's long national frog shortage is over.

Twenty-five years after the Russians caused it, the Reagan administration has quietly but firmly put an end to it. For the first time since Sputnik, U.S. demand for frogs no longer outstrips supplies.

Reaganomics, the recession, and cuts in federal funds for science education have combined to make it a little easier being green.

"We have plenty now," says Roger Griedl, a Wisconsin frog merchant who has monitored the batrachian market's ups and downs for 30 years. "Demand is way down. There's not a lot of money out there these days to spend on frogs."

Although this may be good news down in the swamps, frog-supply companies are distressed and science educators worried. A nation that skimps on frogs today, they assert, will not lead the world in science tomorrow.

COSMIC PROBLEM

While it continued, the frog shortage touched the lives of millions of Americans. But for those who managed to pass the last quarter-century oblivious of the quandary, some background:

Sputnik started it.

Sputnik was the earth's first artificial satellite, and when the Soviets lofted it on Oct. 4, 1957, the U.S. got scared. President Eisenhower launched a national campaign to beat the Russians in science. Declaring that science education was a matter of national security, he signed the National Defense Education Act in 1958, thereby circumventing opponents of federal aid to education. Federal dollars, including $50 million to $80 million annually for laboratory supplies, began to rain on high schools and universities. And what did these schools buy?

Frogs, by the millions. (They also bought textbooks, teacher training, student fellowships and lab equipment.) Pretty soon, virtually every student in every biology class in the nation got to take a frog apart.

"Those were the good old days," says Mr. Griedl, who is biology division operations manager of a frog-supply company called Nasco, a Ft. Atkinson, Wis., subsidiary of Geneve Corp. "Gosh, after Sputnik every kid got his own frog."

Why frogs? Because taking them apart is a lot more exciting than looking at textbooks, says Roberta Hill, a biology teacher at Cyprus Lake High School in Ft. Myers, Fla. "It's an attention getter, a hands-on enrichment experience." She says lab work in comparative anatomy starts with taking apart a worm. Dissecting a frog is the culmination.

The idea was to lure students into science careers, using frogs as carrots.

A victory of sorts over Moscow came 12 years after Sputnik when Neil Armstrong set foot on the moon. In calling it a "giant leap for mankind," however, he obviously wasn't telling the whole story. Suppliers estimate that more than 100 million frogs gave their lives in the interim on behalf of U.S. science prowess, although no one is sure how many students they inspired to join the space program.

Some were repulsed. By the late 1960s, student consientious objection to killing frogs for dissection was on the upswing. Frogs aren't covered by the Animal Welfare Act of 1966, which required humane treatment of warm-blooded research animals and birds. "Frogs aren't warm-blooded, so I guess nobody cared," says Dorothy Greenhouse, staff officer of the Institute of Laboratory Animal Research in Washington.

Frogs played a more direct role in the space program too. On Nov. 9, 1970, two bullfrogs were shot into space in an O.F.O.; or orbiting frog otolith, to test reactions of their inner-ear balancing sensors to weightlessness. The air ran out. A second frog mission, aboard the space shuttle, is scheduled for 1985.

The frog business boom turned tiny biological-supply companies into bio-giants. Business at Carolina Biological Supply doubled the year after Sputnik, say company sources. Carolina is privately owned and declines to discuss growth and income. Its current 944-page catalog, however, lists 143 sizes and species of live and preserved frogs and toads, ranging from a 69-cent pickled leopard frog to an $11.40 giant bullfrog specially preserved in non-ordorous fluid and injected with color-coded latex. (Cable address: Squid, Burlington, N.C.)

But through the '60s and most of the '70s, the supply houses couldn't get enough frogs to fill orders. Frog catchers, in the mold of pioneer fur trappers, died out or got dry-feet jobs. Swamps were drained. Frog habitats were poisoned by herbicides and pesticides.

Competition from the bio-supply firms wreaked havoc in the frog-leg trade. Restaurants buying only legs didn't want to pay what the supply companies were offering for the whole frog. So they turned to frozen imports from India.

DIRTY POOL

Unfortunately, frog facilities in India are not exactly models of sanitation. Vigilant Food and Drug Administration inspectors were rejecting 85% of the shipments in the early '70s because they were contaminated by salmonella. Unscrupulous traders flogged rejected frog legs off on other countries. Sometimes they took tainted legs out to sea, reboxed them aboard ship, and tried to slip them back into the U.S.

Indian exporters, who tend to see frog-leg consumption as symptomatic of barbaric Western appetites, did not stand idly by while their reputations were besmirched. The Indian government invited Clifford Shane, then the FDA's top New York regional inspector, to tour their frog facilities. He recommended chlorine. Many posh restaurants, however, felt the chlorine made frogs' legs rubbery, and excised them from their menus.

Chlorine or no, thousands of dollars worth of frog legs are rejected monthly by FDA inspectors. Smuggling persists, and grand juries are convened with some regularity to probe nefarious frog dealings.

While the imports have sated the frog-meat market, frog demand in the science sector has fallen victim to the recession, shrinking school budgets and dwindling federal and state aid. "We used to be able to afford one frog for every two students," says Mrs. Hill in Ft. Myers. "Now it's four students per specimen. They don't get enough direct contact. I have 160 students this year and only $100 to spend on all lab supplies,

including frogs. So we buy the smallest and cheapest."

DRYING UP

Mr. Griedl's company, Nasco, sold about 75,000 live frogs yearly in the early 70s. "We're down to less than half that now," he says.

That's symptomatic of a gross neglect in science education, according to Bill Aldridge, executive director of the 40,000-member National Science Teachers Association. Just when students are getting interested in science because there are lots of jobs in scientific fields, schools have neither enough money for frogs nor enough teachers who can dissect them.

George W. Nace, professor of biology at the University of Michigan, remains hopeful that the frog market will rebound. He notes that there are 331,600 life-science and biology classes this year in junior and senior high schools around the country. Averaging 20 students per class, that's 7,295,200 students. Even at one frog per four students, that's a market for 1,823,800 frogs.

Mr. Nace knows this because he spent the last quarter-century trying to overcome the national frog shortage. The answer, it would seem, is frog farming. But frogs are not easily farmed. Put too many together, and diseases can wipe them out. That's what happened to a hopeful bullfrog-raising venture at the mouth of the Amazon in Brazil last year.

SET IN THEIR WAYS

Moreover, in close quarters, frogs, like most people, will not copulate. They need space and privacy. They are also cannibalistic, capable of munching tadpole kin without remorse. Most perplexing to would-be frog ranchers, however, are frogs' finicky eating habits. They only eat live protein, such as insects and crayfish.

Federal research grants, ranging from $75,000 to $125,000 annually since 1964, have helped Mr. Nace solve many of these problems in northern leopard frogs (*Rana pipiens*), the most commonly dissected and researched species. He has perfected sanitary, indoor habitats (frogs must be comfortable, he says). He can stimulate females to ovulate, then artifically fertilize the eggs.

Ironically, Mr. Nace's federal research money ran out last month, and the University of Michigan is tearing down the Ann Arbor building holding his lab at the very moment Mr. Nace thinks he has achieved a breakthrough in leopard frog feeding, the final hurdle. So he's forming a private company (called the Amphibian Facility) and moving his entire operation into an abandoned Kroger food store near Ypsilanti. So far, he notes, venture capitalists have not been knocking down its door.

WHAT ABOUT THE CHILDREN?

Nevertheless, Mr. Nace says he's pressing on for the good of the nation.

"It started before Reagan, but now I think this country is in bad trouble technologically, and that starts with kids not knowing how animals are put together," he explains. "With fewer kids growing up on farms, they don't see chickens killed for the table."

"I call this the Bambi syndrome," he goes on. "The only thing they know of animals is from Walt Disney films. It's just my pop psychology, but I think their distance from daily life and death makes them see violence as an abstract concept. You kill a frog and get in there and touch his legs, you realize there are nerves in there and feelings."

Mr. Nace continues to get a little money from NASA to plan the 1985 frog shuttle mission to see how frog eggs divide without gravity. In the meantime, he plans to patent his feeding breakthrough. He remains cryptic about this. All he will say is that he has a device that fools frogs into thinking the protein pellets in front of them are alive and, thus, are good to eat.●

INCREASING THE GAS TAX

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. ROYBAL. Mr. Speaker, in spite of my deep concern about this country's deteriorating infrastructure, I found it necessary to vote against a 5-cent increase in the gasoline tax.

I certainly do not argue with the need for increased funds for transportation and public works projects. Our Interstate Highway System, as well as State and local roads, are badly in need of substantial repairs, while thousands of bridges all over the country are considered unsafe. Urban rail and bus transit capital investment needs will total nearly $50 billion over the next 10 years, and this does not even allow for expansion. However, as badly as we need the extra funds, I cannot justify renovating and rebuilding our transportation system on the backs of the poor.

This gas tax is regressive—it falls most heavily on low- and middle-income wage earners. The result? These people will have to devote a much larger proportion of their incomes to transportation needs—money that will certainly be diverted from other necessities such as food and health care—money that is already inadequate to meet the basic needs of so many Americans.

It comes as no surprise that this tax is the funding method that was chosen. Fair and workable alternatives were suggested, such as caping next year's tax cut and funding the transportation programs out of the increased revenues, but they fell by the wayside as has happened so often since this administration took office. The administration has tried to balance the budget on the backs of the poor. That has been a dismal failure. Deficits have skyrocketed, while the quality of life for millions of Americans has been severely compromised and the promised economic recovery is still nowhere in sight. I did not support these actions when we were called upon to consider them earlier in this Congress, and I see no reason to support a measure which continues in the same vein.

Let me reiterate that I do recognize the need for increased transportation funding, but not at the expense of those very Americans who have already been asked to sacrifice so much.●

THE LAW OF THE SEA TREATY

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. FIELDS. Mr. Speaker, I enter into the RECORD an article that should be of high interest to anyone supportive of scientific advance and discovery toward an improved life for all of our citizens.

As the article points out, the vast and rich mineral wealth of the ocean floor holds incomprehensible hope and promise for our civilization. Once the appropriate technologies are refined for mineral recovery and processing, we will enjoy greater national security and increased living standards for our people and any other nation wishing to participate.

Mr. Speaker, this is one of the reasons we must avoid the socialistically conceived U.N. Law of the Sea Treaty. Such a scheme would be foreclosing hope and promise for us and all other nations. As Conrad Welling states in the article, we have really only begun to understand and discover the geology of the sea bottom.

Our ability to explore and utilize the vast resources of the oceans and our solar system must not be curtailed in its progress. Principles and schemes such as those embodied in the Law of the Sea Treaty and the Moon Treaty serve only to close up the future, and drive the world back toward a dark age. There are few other issues before us today that demand of us as much far-reaching vision and concern for scores of generations unborn.

NEPTUNE'S FORGE

(By Charles Petit)

For one glittering Mediterranean civilization after another, generations of miners on Cyprus have dragged from the Troodos Massif a steady stream of copper sulfide ore. The beginnings of the Troodos mines already were lost in legend whe overseers from Imperial Rome sent slaves into unventilated, hellish galleries burrowed beneath the island's rocky surface. But the eerie, labyrinthine corridos of these ancient mines are not as strange as the places where similar deposits are now being created.

In the past six years, explorers have discovered minerals forming in a geological pageant of lava lakes, volcanic cones, and hot springs shimmering in the spotlights of deep-sea research submarines. The deposits are born alongside communities of giant clams, eight-foot-long tube worms, and ghostly white crabs residing in the hydrothermal warmth of areas 8,000 feet and more under the ocean's surface, where new sea floor erupts from the molten mantle below. The discovery helps answer one of the most practical of geological questions: Where do minerals come from?

The minerals, known as polymetallic sulfides, are combinations of sulfur and metals, primarily iron, copper, zinc, manganese, cobalt, lead, and vanadium. Although deep-sea exploration has barely begun, the fact

that they are found along portions of rift zones—ocean floor spreading centers—suggests that many more deposits may lie exposed on the ocean floor, for the planet is girdled by some 40,000 miles of speading centers.

"To dive on one of these hydrothermal sites," says geophysicist, Peter Rona of the National Oceanic and Atmospheric Administration, "is really the fulfillment of a geologist's dream to actually see mineral deposits in the process of formation."

The discovery of large quantities of minerals on the sea floor followed a sequence of tantalizing clues and individual finds spanning most of the 1970s and early 1980s, including a dive in August 1981 by the research submersible *Alvin*. Alexander Malahoff, chief scientist for the National Ocean Survey, a part of NOAA, was aboard the three-person craft as it groped slowly along the Galápagos Rift, more than 8,000 feet below the eastern Pacific in water 250 times the atmospheric pressure at the surface.

Suddenly, recalls Malahoff, ahead of the *Alvin* loomed "this metallic cliff, all covered with dead chimneys and towers." In the foreground lay a lumpy, yellow-and-orange expanse with huge but now dead communities of giant clams cloaking its margin. The hot springs at this spot had faded out, no one knows how long ago. But they left a tremendous deposit of sulfides. Malahoff thinks it might contain 25 million tons of copper and zinc, an amount that surpasses the legendary lode of Troodos. *Alvin* measured that single deposit to be at least 115 feet high, about 650 feet wide, and about .6 of a mile long.

Another explorer of the hydrothermal vents is John B. Corliss at Oregon State University. When he was completing studies at Scripps Institution of Oceanography in 1971, the concept of plate tectonics was still newly minted. Puzzles of continental geology were eagerly analyzed with an eye to mid-ocean ridges where new sea floor spreads, subduction zones where it dives back into the mantle, and regions where sections of sea floor jam up along the margins of drifting continents. Among the puzzles was the origin of essentially pure bodies of polymetallic sulfides, not limited to the best known deposit on Cyprus but found scattered throughout the world in island arcs and along continental margins.

By the early 1970s, "people were definitely thinking of these sulfides as the result of hydrothermal solutions," says Corliss, "but they were only beginning to say these were formed on the sea bottom." The central idea was that superhot water leached metals from rising magma and concentrated them near the Earth's surface, but no one knew exactly how and where it happened and where the hot water came from.

"It was a classic geologic problem," Corliss continues. "How do you get sulfides from an aqueous solution?" The difficulty was that sulfides do not dissolve particularly well, yet the metals appear to be precipitated from the salt water.

Soon, however, laboratory tests showed that the metals will dissolve in very hot salt water. Temperatures of 600 degrees Fahrenheit or more are needed, and extreme pressure must be exerted on the water to prevent it from flashing into steam. Under such conditions, the dissolved metals combine with sulfur from the seawater. When the water cools, the metallic sulfides precipitate out.

In the mid-1960s, exploration of the Red Sea—an infant spreading center—revealed mineral deposits and hot springs on its floor. No one knew then whether these springs and deposits were only short-term features of newly formed centers, where spreading rates are comparatively slow. But the deposits fueled curiosity about the mature rift systems that lace the ocean floor.

By 1977 most of the picture had been put together, in theory. That year in his book "Tales of an Old Ocean: Exploring the Deep Sea World." Stanford marine geologist Tjeerd van Andel with others in the field speculated that cold seawater percolates down through fissure in spreading centers nearly to the 2,000-degree-Fahrenheit magma a mile below, leaches out metal-rich sulfides, then rises again, leaving the sulfides in concentrated deposits as it cools. So far, so good, but few experts then expected the deposits to extend right up to the ocean floor. The process, van Andel wrote, could not be confirmed "because there are no practical means for penetrating into the oceanic crust to locate the ore bodies."

It was then that exploration began in earnest in the eastern Pacific, which contains mature spreading centers where plates are shouldered apart relatively quickly. Spreading rates on the East Pacific Rise, Galápago Rift, and elsewhere range from 2½ inches to as much as 10 inches per year. The discoveries that followed over the next three years forced van Andel to revise his book with a new final chapter describing the "great good fortune to stumble on something wholly unexpected and exciting."

In a historic 1977 expedition to the Galápagos Rift, John Corliss, with marine scientists Richard von Herzen and Robert Ballard of Woods Hole Oceanographic Institute, took *Alvin* down more than 8,000 feet, where temperatures average a frigid 35 degrees Fahrenheit. There they found strange vents from which poured relatively balmy (about 52 degrees) water. Though no sulfides were seen, this expedition introduced to science the first of the sensational hydrothermal communities of huge clams, crabs, giant tube worms, and chemical-eating bacteria.

The next year a French, Mexican, and American team aboard the French submersible *Cyana* extended exploration to include the East Pacific Rise at a spot called 21° North, after its latitude off the tip of Baja, California. It was here that the team found the first deposits of polymetallic sulfides. One sample was almost pure spahlerite, a mineral 50 to 60 percent zinc by weight.

In 1979 *Alvin* was back at 21° North where Bill Normark, of the U.S. Geological Survey office in Menlo Park, California, and others were confronted with a sight from the devil's own workshop: the first of what are now known as black smokers. They saw a tall, chimney-like vent belching a rolling plume of black fluid. The "smoke" turned out to be suspended iron sulfide. Soon other smokers were found.

"We knocked half the top off a two-meter smoker chimney," Normark remembers, "and used the robot arm to stick a temperature probe in." The meter in the cramped little sub read 32.768 degree Centigrade, about 90 degrees Fahrenheit. This was the hottest hydrothermal vent ever measured. "We were pretty excited," he said, "then the guys on board ship radioed down and told us it was off the scale. The thing just wouldn't read any higher than 32.768 degrees."

After a short consultation, the group on the sub shoved the probe back into the broken vent and left it for awhile. The plastic began to melt. Later, at the surface, they found it blackened. A handbook check revealed it would not char unless the temperature was some 650 degrees Fahrenheit.

The nature of water at 650 degrees and 250 times the surface pressure is hardly that of ordinary water. Its buoyancy is astounding. At such pressures water cannot boil; it just expands with temperature. Cold water at the sea floor has a density of about one gram per cubic centimeter. But at 650 degrees, expansion has cut its density almost in half. At 1,100 degrees, a temperature that could be reached around a magma chamber, density drops to about .1 of a gram. Such superheated fluids rise with incredible speed through denser surroundings, bursting through the Earth's crust into the cold sea.

Geochemist John Edmond at the Massachusetts Institute of Technology, one of the many scientists still rocked by the swiftness of ocean floor discovery, knew immediately the implication of such hot water billowing directly into the cold, quenching sea. Such vents could easily carry large quantities of minerals that would then be precipitated from cooling water. "They (the vents and passages feeding them) clearly are the process that produces the sulfide deposits of places like Cyprus. What you have on the continents are samples of sea floor, jammed up by plate tectonics, left over from spreading centers."

In the wake of such discoveries, Malahoff's find of the huge polymetallic sulfide lode in the Galápagos Rift in 1981 was no accident. It was actually about 700 yards from the Galápagos spreading center, along a fault in the pillow basalts, rocks formed from cooled lava that pave the ocean floor near spreading centers. Malahoff thinks the sulfides formed right there by hot brines diverted to the fault from the central rift plumbing system. Most other researchers feel the lode was encrusted along the rift thousands of years ago and was then slowly carried, conveyor-belt fashion, by the spreading sea floor to its present location.

Whichever assessment is correct, the fact is that since then many other deposits have been found. Later in 1981, deep tow instruments and dredges found evidence of metallic sulfides and vent fields in the Juan de Fuca Rift off the coast of Washington. And last year, on the East Pacific Rise at 12 degrees north latitude, a French team found a truly enormous hydrothermal field, accompanied by massive sulfide deposits, that stretches for five miles and is dotted the whole length with black smokers.

It appears that surface deposits of sulfides form mainly in older, vigorous spreading centers splitting the sea floor at three inches or more a year. But minerals are probably forming in slower spreading centers as well, only beneath the sea floor. Last fall, a dive in the Atlantic led by Peter Rona revealed the largest find of exposed manganese on a slow spreading center, about 1,000 miles east of Miami and some 10,000 feet deep. Beneath the manganese, one of the last minerals to precipitate out of a hydrothermal solution, there may be metallic sulfides that were deposited earlier from cooling brines.

When they do form, polymetallic sulfide deposits probably appear almost instantaneously by geological standards. Single deposits may build up in decades to a few hundred years, to be carried away from the rift by the spreading sea floor. During the height of activity, it is estimated that many thousands of tons may be added to a deposit each year, raising the prospect of layer after

layer of deposits, older ones buried under sediment, being carried away from spreading centers to eventually be subducted back into the mantle or, occasionally, uplifted and incorporated in islands and continents.

Normark at the USGS sees one guaranteed payoff to the discoveries. "Slabs [of sea floor] are now in the continents. So, if we understand how they are formed on the sea floor, we'll know better how to prosper on land."

Malahoff is enthusiastic about mining the deposits directly, but others are not so sure. John Edmond at MIT thinks direct mining prospects are remote. While significantly different in execution, experimental mining has already been done at depths as great as 15,000 feet to gather nodules of manganese scattered like potatoes across the ocean's abyssal plans. But when it comes to mining sulfides, Conrad Welling, president of the California-based Ocean Minerals Company, asserts that "there is a big difference between scientific exploration and commercial exploitation. It will be 10 years, at least, before we know whether these sulfides are exploitable."

Practical men like Welling have another problem. There is still no legal way to stake a claim in the open sea and be sure of holding rights to it and any ensuing profits. Last spring the United Nations adopted the Law of the Sea Treaty, but the United States voted against it, objecting to, among other things, the requirements for deep-sea mining of manganese nodules. Private companies must turn half their claims over to an "International Seabed Authority," which determines conditions under which mining can continue. American delegates feared that bureaucratic impediments and uncertainties would scare private investors away from sinking their money into the deep sea. For companies without treaty protection, the risk is even greater. Malahoff thinks the United States will probably concentrate its mining interests on areas within territorial waters.

The pace of scientific discovery is not likely to slow while legal and commercial implications are argued. The exploration of the sea bottom has barely begun. "The ocean is so big," said ocean miner Welling, "that what has been done so far is the equivalent of digging one 3,000-foot hole in Texas and saying we know the geology of the state of Texas. Fifteen years ago I thought I knew the ocean pretty well, but I didn't know anything."●

BENAVIDEZ—U.S. ARMY PRIDE AND SELF-RESPECT

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. COLLINS of Texas, Mr. Speaker, recently I visited with Roy Benavidez. He is a retired master sergeant of the U.S. Army, who won the Congressional Medal of Honor in Vietnam.

I told him how proud I was to see a Texan as one of our Nation's heroes. And then I asked what motivated him. Was it his Hispanic heritage that the family and friends all stand together when the going is rough?

He said: "Yes, my heritage is there but I just acted naturally. You see, if I didn't give it all I had, I would have lost my pride and self-respect."

Pride and self-respect mean much to Sergeant Benavidez. I pulled the Congressional Medal file and here are a few of the commendations remarks:

Roy Benavidez was a special forces soldier (a Staff Sergeant E-6). It happened on May 2, 1968. Benavidez was monitoring the radios in the control center when a requirement came to extract a 12 man special forces reconnaissance team. Three helicopters were sent in but were returned because they could not get in because of small arms and anti-aircraft being fired. Then Benavidez voluntarily got on a helicopter and returned to that area. It was impossible to land there but Benavidez spotted a clearing about 75 meters away; they hovered over that area in the helicopter, and he jumped out and ran over to the team members. He was wounded 3 times en route. Despite wounds he took charge of the team members and started to reorganize. About this time the helicopter landed and he started dragging wounded team members to the helicopter. As this was happening he went back and got the Team Leader and was then wounded 2 more times. About the same time that he was wounded the helicopter crashed and the pilot was killed. Sergeant Benavidez then made his way back to the wreckage and helped the wounded out of the helicopter. He gathered the survivors in a defensive position. Then Benavidez directed tactical air strikes and supporting gun ships against the enemy from this position. While doing this he was wounded again by small arms fire. Then another helicopter lands and Benavidez begins ferrying the wounded to the new helicopter. He was wounded again while helping get the injured on the new helicopter. Then he was attacked by an enemy soldier in hand to hand combat. He killed this soldier. He then spotted 2 other soldiers charging the new aircraft and he killed them also. About that time he made another trip back to insure that all the wounded were on the helicopter, then he got on and left also. Total 7 wounds sustained.

In times of war, the solid character of America comes through with pride and self-respect. Having served in the U.S. Army Engineers, I am proud of the Army traditions. What America needs today in peacetime is more of this quality of pride and self-respect.●

OUR NATION PRAYS FOR POLAND

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. SMITH of New Jersey. Mr. Speaker, on this National Day of Prayer for the People of Poland, I cannot think of a single better way to begin my remarks than to make the words of Lech Walesa, several days ago, in his invocation to the Black Madonna who has saved Poland time and time again. These words may well serve as a prayer for all people in the world who search for freedom:

I beg you to direct me, because I want to be an instrument in your hands in the service of the motherland, the church and the people. Reinforce our will and our hearts so we can make peaceful efforts in favor of the just rights of our country.

And so our prayers for peace in Poland should and must continue, especially during this critical transition period.

We are fortunate, Mr. Speaker, that there is hope in the message that the military government may be willing to ease the tension and restrictions placed on the Polish people. However, I believe that we must reiterate the position of this Government, as President Reagan has said, that "free men cannot and will not stand idly by in the face of brutal repression."

Therefore, it is only fitting that today—on this first anniversary of the imposition of marial law—we reaffirm our unqualified support for the suffering people of Poland.

Mr. Speaker, I urge President Reagan and all of my colleagues, not to be lenient in our dealings with the Jaruzelski government. Our position will change only upon legitimate action by the Polish Government toward a peaceful resolution with the Polish workers. We will not tolerate the flagrant abuses and violations of fundamental human rights.

Listen to the words of Lech Walesa, 2 years ago in the triumphant days following the founding of Solidarity:

No matter what the system may be, if it does not rest on truth, on moral conscience, on honesty, it has no chance. One cannot work against man * * * If you have a machine that doesn't work, it must be repaired. This one here broke down in 1956, in 1970 and in 1976. If it can't be repaired, it must be changed.

Mr. Speaker, 16 months after the courageous leader of the Solidarity Independent Trade Union made that statement, he was arrested along with over 6,000 Solidarity officials, activists, and antigovernment intellectuals. Martial law was imposed on December 13, 1981 during a brutal crackdown by the Jaruzelski government.

This day has been marked by prayer in the United States and throughout the world. Let us be thankful, Mr. Speaker, that perhaps much of this ordeal has now ended. And let us ask God that we may continue to join in prayer for peace—an end to hostility and oppression—in Poland and throughout the world.●

CONGRESSMAN PERKINS RECEIVES AWARD

HON. AUSTIN D. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. MURPHY. Mr. Speaker, I would like to make this Chamber aware that during the past congressional recess the Honorable CARL D. PERKINS of Kentucky was presented with the National Rehabilitation Association's National Legislative Service Award. The National Rehabilitation Association (NRA), the world's largest organization of professionals, consumers, and other individuals devoted to improving the lives of handicapped adults and children, established the legislative service award in 1981 to recognize public officials who have demonstrated leadership in improving rehabilitation services for persons with disabilities through legislative action at the national level. Recipients are chosen on the basis of their creative and effective political leadership over a period of years on behalf of rehabilitation programs, To those of us familiar with Chairman PERKINS' long and distinguished record of successfully championing strengthened rehabilitation services in this country, which has already earned him the nickname of "Mr. Rehabilitation," it seems most fitting that he was selected to be the first recipient of this prestigious award.

The selection of Chairman PERKINS as the first recipient of NRA's National Legislative Service Award was announced at th NRA's national conference in September by Jack G. Duncan, NRA's general counsel, who was instrumental in establishing the award. Appropriately, however, the award was actually presented to Chairman PERKINS in the Seventh Congressional District of Kentucky—a region that he has represented with distinction and devotion since 1948. The presentation, which took place at the Eastern Kentucky Comprehensive Rehabilitation Center in Thelma, Ky., on October 25, was made by Jack Cline, regional manager of Kentucky Rehabilitation District 14, which is in the heart of Congressman PERKINS district. Mr. Cline nominated Chairman PERKINS for the award.

Before the presentation, Joan Barker, chairman of the NRA's Professional Concerns Committee, and a constitutent of Chairman PERKINS, explained why Chairman PERKINS received the commission's unanimous vote to receive the award:

The Honorable Carl D. Perkins, Chairman of the Committee on Education and Labor, has been dedicated to the cause of the handicapped and disadvantaged since his election to the U.S. House of Representatives in 1948. He has been actively fighting for the rights of disabled individuals since he became a member of the Education and Labor Committee in 1949. Since 1949, the Rehabilitation Program has grown from an annual budget of $19,000,000 to $956,500,000 in fiscal year 1981. More importantly, the number of persons rehabilitated each year has grown from 58,000 in 1949 to 277,000 in 1980. Congressman Perkins has been a major contributor to the growth and improvement of the National Vocational Rehabilitation Program through his legislative activities and his ardent advocacy for the goals of the Rehabilitation Program.

The following list contains just a few of Congressman Perkins' outstanding achievements:

1. In 1967, he was co-sponsor of Public Law 90-99 which extended the Vocational Rehabilitation Act and expanded authorization of grants to states for Rehabilitation Services; authorized assistance in the establishment and operation of a National Center for Deaf Blind Youths and Adults; and provided assistance for migrants.

2. In 1968, he was principal sponsor of legislation which became Public Law 91-61 which provided for a National Center on Educational Media, and Materials for the Handicapped.

3. In 1970, he was principal sponsor of legislation which became Public Law 91-610, a bill to extend reauthorization of programs under the Vocational Rehabilitation Act.

4. In 1971, Congressman Perkins was the principal sponsor of a bill to amend the Vocational Rehabilitation Act to extend and revise the authorization of grants to states for Vocational Rehabilitation services and other purposes. The bill which Congress passed on October 14, 1972, was vetoed by the President. Congressman Perkins introduced an identical bill in 1973 which was again vetoed by the President. On May 23, 1973 Congressman Perkins and four members of the Education and Labor Committee again sponsored a bill similar to the two previous bills which was signed into law by the President.

5. In 1974, Congressman Perkins was one of four co-sponsors of the bill which led to Public Law 93-516 which: extended authorization of appropriations in the Rehabilitation Act of 1973 for one year and transferred the Rehabilitation Services Administration to the office of the Secretary of Health, Education and Welfare; amended and strengthened the Randolph-Sheppard Act for the blind; and provided for a White House Conference of Handicapped Individuals. Congressman Perkins successfully managed these amendments on the floor of the House.

6. Through his efforts as Chairman of the Education and Labor Committee, the 1978 amendments to the Rehabilitation act added new programs to expand employment opportunities and a new and innovative program was established to promote independent living of persons with severe disabilities.

Congressman Perkins has been an active participant in the struggle for the rights of disabled individuals since his election from the Seventh Congressional District of Kentucky. He has been a leader in expansion and improvement of services to the handicapped since he became chairman of the Education and Labor Committee in 1967. He has proven to be one of the strongest allies of vocational rehabilitation services during the 1981 battle to prevent the inclusion of rehabilitation programs in a proposed block grant. He was essential to the successful vote to maintain the vocational rehabilitation program as a separate and identifiable entity.

Congressman Perkins believes that the rehabilitation of handicapped individuals is, in part, a shared State/Federal responsibility and that the basic grant program must be maintained within the Rehabilitation Act. He feels that the Federal Government must play a part in aiding handicapped persons as they strive for a full share of our American way of life. He has been an invaluable leader in legislative action to promote and expand the national rehabilitation program.

Mr. Speaker, this is by any standard an impressive record, and one which I expect Chairman PERKINS will embellish as he continues his distinguished service in this body. He should have our heartiest congratulations on this well deserved honor.●

ARTHUR ASHE TENNIS CHAMPS

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. HOYER. Mr. Speaker, I am pleased to bring to the attention of my colleagues the outstanding achievements of two young people who live in my district in Maryland. Donna Fleming and Travis Gillespie won the mid-Atlantic regional championships of the Arthur Ashe National Junior League tennis championship. In addition, they placed 5 out of 16 teams in the national competition held in New York earlier this year.

This competition presented a terrific opportunity for young people from throughout the United States to become exposed to championship tennis. I am proud that two of my constituents were so honored to represent the mid-Atlantic region. The region includes Maryland, New York, New Jersey, and Delaware.

Donna Fleming, daughter of Horace and Debbie Fleming, is 12 and is an eighth grader at the Thomas Pullen Middle School in Landover. She was rated the best girl in the 12-and-under future champions competition.

Travis Gillespie, son of Barbara and Joseph Gillespie, is also 12 and is in the eighth grade at Stephen Decatur Junior High School in Clinton. He was rated best boy in the 12-and-under future champions competition.

The national competition, sponsored by tennis great Arthur Ashe and the Congoleum Co., took place during the week of the U.S. Tennis Open. This gave the young participants the chance to see championship tennis and to meet some of tennis' top stars—for instance, both Travis and Donna met Bjorn Borg.

These two young people come from the same neighborhood, Pepper Mill Village in Landover, Md. They are the first "stars" to come from a great

tennis coach, Bill Brooks. Mr. Brooks is a retired, self-described "Sunday hacker" who undoubtedly is a gifted tennis coach. He has been the volunteer coach for the local chapter of the Ashe junior tennis league for the past 8 to 9 years. He certainly deserves tremendous thanks for all the time and effort he has given to the kids who live in the neighborhood.

Mr. Speaker, I think it is indeed a marvelous accomplishment for these young people, and I know that you will join with me in honoring them today.●

SUCCESSFUL SMALL BUSINESS PROGRAM FACES PRESIDENTIAL VETO

HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. HALL of Ohio. Mr. Speaker, the Office of Management and Budget is maintaining an intransigent position on a matter which will cause severe economic hardship, including the loss of jobs, for many small businesses.

The issue is OMB's insistence that small businesses not be permitted to use tax exempt bonds to finance pollution control improvements. The House responded to that need by passing legislation this year nullifying the OMB order creating the problem. The other body has been similarly sympathetic and it is expected that final action on the legislation will take place this week.

However, there is growing fear that the President will veto the bill at the insistence of OMB Director David Stockman. I sincerely hope that is not the case and know that my view is shared by virtually all Members of the Congress.

The matter received some visibility last week when the Washington Post published an article on its Federal Report page on Wednesday, December 8. The report was excellent and right on the mark.

What was highlighted was the fact that my constituent, Jack Schaefer, president of the Specialty Paper Co., of Dayton, Ohio, also is the president of the Small Business Coalition For Pollution Control. Through Mr. Schaefer's efforts, that organization has fought back against the OMB edict and brought the issue to the attention of Congress.

Mr. Schaefer deserves great praise for his courage and initiative which have brought its resolution to the finish line. I believe that my colleagues would find the Washington Post account informative and I hereby insert it at this point in the RECORD:

OMB SPOILING SMALL-TIME WAR AGAINST POLLUTION

(By Cass Peterson)

A Dayton, Ohio, businessman is leading an assault on the Office of Management and Budget for killing a widely praised Small Business Administration program that has helped more than 200 small firms finance pollution control equipment.

The businessman, Jack L. Schaefer, is president of Specialty Papers Co., which employs 295 persons and has been a mainstay of Dayton's inner city for 57 years. His comrades-in-arms are nearly 100 small businesses, ranging from cheese factories in Wisconsin to an electroplater in Arkansas, whose applications for nearly $180 million in pollution-control bond guarantees have been gathering dust in SBA's files for nearly a year.

SBA's Pollution Control Financing Guarantee Program, set up by Congress in 1976, was effectively closed down by an OMB directive in January. Under the program, SBA guarantees tax-exempt bond issues for pollution control equipment up to $5 million. OMB characterized the program as a form of "double-dipping" and told SBA it could guarantee bonds only when they would be taxed.

Advocates say that government-guaranteed tax-free bonds are the only practical way a small business can finance pollution control equipment, which typically is expensive, adds nothing to production and is of little value as loan collateral.

Large firms generally finance such equipment through tax-exempt bond issues. The smaller issues required by small firms, which lack the name recognition and financial resources of their big brothers, have limited appeal to investors. Taxable issues have almost none.

In a letter to the White House late last month, SBA administrator James C. Sanders reported that "taxable financings have not been utilized to any significant extent" in the year since SBA was limited to that option.

Supporters of the SBA bond-guarantee program call it a particularly odd target for Reagan because it turns a profit.

Schaefer's ad hoc group of businessmen, the Small Business Coalition on Pollution Control, has the discreet blessing of SBA officials, many of whom regard the program as one of the agency's most successful.

The group also has vocal bipartisan support on Capitol Hill, where members have watched with increasing alarm as the Reagan administration, budget knife flashing, has waded into the lifelines designed to help keep small businesses competitive with the industry behemoths.

Reagan's budget request for fiscal 1983 proposed to "zero out" business and industry loans under the Farmers Home Administration, small-business set-asides at the Energy Department, small-business grants at Interior, and direct loans and loan guarantees at the Economic Development Administration.

Reagan also would abolish SBA's direct loans, already cut to $225 million from the fiscal 1981 level of $308 million. The agency's guaranteed loans—the linchpin in federal aid to small business—would be cut to $2.4 billion, nearly a billion dollars under the 1981 level.

"I can't believe the American people want to do this to small business," said Rep. Berkley W. Bedell (D-Iowa), who took up the banner of Schaefer's group in a series of congressional hearings over the past year. Rep. Silvio O. Conte (R-Mass.), a member of Bedell's subcommittee, introduced legislation to restore the bond guarantees; it has passed the House without a peep of protest.

Similar legislation also has been approved by the Senate Small Business Committee with equal ease. Backers hope to package the provision in an "omnibus" bill that will also include benefits for minority-owned businesses, making it a pro-small business, pro-environment and pro-minority bill that supporters figure will be difficult to veto even in a non-election year.

In a last-ditch effort last week to solve the problem the way it started—administratively—a group of congressmen made a direct appeal to OMB Director David A. Stockman, who reportedly promised he would "think about it." But an agency spokesman said two days after the meeting that OMB remains firmly opposed.

"When you start authorizing on macroeconomic theory, the programs have a tendency to get lost," said a congressional aide.

A Washington lobbyist was even more direct: "This administration thinks small business and housing are a pain in the tookies," he said. "It's got to be the most anti-small business administration in 60 years."●

A TRIBUTE TO REPRESENTATIVE SHIRLEY CHISHOLM

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. OTTINGER. Mr. Speaker, I rise in warmest praise of our colleague from New York, SHIRLEY CHISHOLM, and her tremendous contributions to this House and our country.

Few Members of Congress have accomplished so much for the cause of civil rights as SHIRLEY. As the first black woman elected to Congress, SHIRLEY has worked hard to extend the constitutional freedoms to blacks, women, and minorities, throughout all reaches of society. Her eloquence and leadership have served as an inspiration in the struggle against social inequity, discrimination and poverty.

SHIRLEY has been a leader not only as a national symbol of the civil rights movement but also as a legislator. She will be remembered by her colleagues for her diligence and effectiveness on the Rules Committee and for her efforts in the creation and passage of the Federal minimum wage law.

SHIRLEY is a fighter. She has struggled for change and effected change. She has paved a difficult path and made it easier for others to follow. The winds of change have shifted, yet SHIRLEY continues to wage the battle for those who need government assistance the most: The poor, the underprivileged, and the handicapped. I am sure that she will work as diligently in retirement as she has for 12 years in the House.

SHIRLEY will be sorely missed by her colleagues. We wish her well in what will surely be an active retirement,

continuing as spokeswoman for the most decent and constructive interests of this country.●

A CHANUKAH REDEDICATION TO HUMAN RIGHTS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. GILMAN. Mr. Speaker, Friday night, December 10, marked the beginning of the holiday of Chanukah, the commemoration of the rededication of the Temple in Jerusalem by the Jewish forces, fighting under the direction of Judah Maccabee, who defeated the Syrian Army in 165 B.C. The Syrians had sought to assimilate the Jewish community to Hellenistic practices. Rather than capitulating to such pressures, there was a revolt which led to Jewish rule of Judea for the next 100 years.

Today, a similar oppression is taking place, albeit in the Soviet Union. Jews (and others) are consistently denied the right to practice their religion freely. Ostracism and imprisonment face those who attempt to defy Soviet authority. There are some who have sought to emigrate who have, after much persistence, been allowed to do so; yet too many others, denied the right to live where their hearts tell them they should be, join the ranks of thousands of refuseniks whose lives are made miserable by protracted harassment at the hands of the Soviet KGB. Others have been imprisoned on trumped-up charges, and their fate is without much hope unless we speak out and act in their behalf.

It is even more appropriate that we focus attention on these human rights issues as the 10th of December 1982 marked the 34th anniversary of the adoption of the Universal Declaration of Human Rights by the General Assembly of the United Nations and which underscores the "Recognition of the inherent dignity and of the equal and inalienable rights of all members of the human family is the foundation of Freedom, Justice and Peace in the World."

Mr. Speaker, I hope that the day will soon come when the Soviet Union will recognize that their abridgment of human rights and misdeeds against their own citizens erodes their relations with our Nation and with the world community.

The Union of Councils for Soviet Jews has appropriately circulated a memorandum asking as part of this Chanukah celebration that we rededicate ourselves to our plea for human rights for Soviet Jewry, and that each candle lit on the 8 nights of Chanukah represent specific prisoners of conscience who have suffered so much in their fight for freedom. I share this list of prisoners with my colleagues so that we may all continue to have their cause in our hearts and minds, as we recall the courageous fight for freedom by the Maccabees over the oppressive Syrian army thousands of years ago.

FREEDOM LIGHTS

First candle—for Anatoly Shcharansky whose desire to live with his wife, Avital, in Israel and his activity with the unofficial Helsinki monitoring group in Moscow, resulted in a charge of treason and 13 years under strict regime in prison and labor camps. Prevented from any contact by visit or letter since January, 1982, he is reported to be on a hunger strike.

Second candle—for Alexander Paritsky, sentenced December, 1981, to 3 years exile at a labor camp over 3,000 miles from his Kharkov home for his desire to emigrate to Israel with his wife and children. Has not been allowed to receive warm winter clothing or medication, despite severe heart problem.

Third candle—for Alexei Murzhenko and Yuri Federov, the last of the Leningrad Trail prisoners, sentenced in 1970 for attempting to hijack a plane out of the USSR—an act of desperation never carried out, but which sparked the emigration of over 250,000 Jews from the USSR in the last decade—14 and 15 years in labor camps under strict regime.

Fourth candle—for Alexander and Kirill Podrabinek, brothers who were sentenced in 1977 and resentenced in prison in June, 1980, for protesting the abuse of psychiatry in the USSR. Kirill is critically ill with tuberculosis.

Fifth candle—for Andrei Sakharov, Nobel Peace Prize winner and physicist, who was summarily exiled from Moscow, January, 1980, to Gorky for an indefinite term—without benefit of trial or hearing.

In November, 1982, Sakharov was allegedly drugged by the KGB in his car and all of his personal papers, research and memoirs were confiscated.

Sixth candle—for Valery Pilnikov of Kiev and Vladimir Tsukerman and Osip Lokshin of Kishinev, all of whom face years in labor camps for demanding to know why they are refused exit visas.

Seventh candle—for Vladimir Slepak, leading Moscow refusenik, sentenced in June, 1978, for 5 years in exile for "malicious hooliganism." Even in exile on the Siberian-Mongolian border, he has been harassed over his housing and work.

Eighth candle—for Viktor Brailovsky, leader of the unofficial Moscow scientific seminar, sentenced to 3 years of Siberian exile for his "anti-Soviet" activity.●

A TRIBUTE TO DR. FAYIZ SALWAN

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. MOTTL. Mr. Speaker, today I would like to take this opportunity to honor one of the most outstanding doctors from my district.

Dr. Fayiz Salwan is a very prominent general surgeon who works mostly in surgical oncology, which is the study of tumors. He received his doctor of medicine from the American University of Beirut in 1959. He then came to the United States and served his residency at St. Alexis Hospital in Cleveland, Ohio, from 1959 to 1963. His additional year of residency, from 1963 to 1964, was spent with Memorial Hospital in New York where he worked in the department of surgery with cancer and allied diseases.

In 1967, Dr. Salwan was accepted by the American Board of Surgery and in 1969 was presented with a fellowship from the American College of Surgeons. In addition, he is a member of the Cleveland Surgical Society, the Society for Surgical Oncology, and the Greater Cleveland Growth Association.

Most of Dr. Salwan's work is done with the so important area of the treatment of cancer. He has contributed to the development of cancer research with five papers on a variety of different cancers. As chairman of the cancer committee of Parma Hospital, Dr. Salwan works hand-in-hand with those who monitor progress of cancer victims. In addition, he is a member of the CEA protocal, which is carried nationally by the Surgical Oncology Society.

Dr. Salwan and his lovely wife Monica are the proud parents of five lovely children.

Mr. Speaker, Dr. Fayiz Salwan has shown that the United States is truly a country of immigrants. In the short time he has resided here, he has illustrated his sheer excellence as a surgeon. Dr. Salwan is a perfect example of how in this great melting pot, our many immigrants have contributed to the health and well-being of our society.●

SOVIET WATCH: ANDROPOV IMPACT ON SOVIET POLICY

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. FIELDS. Mr. Speaker, I enter the following article into the RECORD for the benefit of our colleagues.

[From the Washington Times]

ANDROPOV IMPACT ON SOVIET POLICY

(By Marvin Leibstone)

After Nikita Khruschev's fall from power in 1964, Americans feared new Soviet leader Leonid Brezhnev would bring back the cold war. Instead, experiments with detente lasted another decade.

But cooperation with the West has been half a Soviet ploy. Khruschev agreed to trade and cultural exchanges, plus nuclear test ban treaties, yet Kremlin troops entered Hungary and Poland. Brezhnev signed SALT I and II, yet his regime invaded Af-

ghanistan and encouraged Poland's martial law.

Will Yuri Andropov change this? One view says Joseph Stalin was the last Soviet leader of unlimited political power, that policy deviations in the Soviet Union are by committee only . . . that Politburo members are rigid, therefore Yuri Andropov will merely reflect the status quo.

Another view holds that if a precise continuation of Brezhnev's thinking and a rubber-stamp head-of-state were desired, Konstantin Chernenko, almost a Brezhnev clone and rarely an innovator, would have been selected instead of Andropov . . . thus, since it was Andropov who got the job, change may be in the offing.

A third view suggests the Politburo is being forced by events to consider change. Too many rubles go to defense, export dollars are not balancing import costs sufficiently. Afghanistan and Poland are uruly and America is going ahead with Pershing deployments in Europe.

Assuming that Andropov is capable of bringing about change in the Soviet Union and was selected to do so because the Politburo considers change necessary, what can be expected about Soviet foreign policy?

In his nomination speech, Andropov said, "We know full well it is useless to beg peace from the imperialists. It can be upheld only by resting upon this invincible might of the Soviet armed forces." But this was no tougher than a lot of Khruschev and Brezhnev statements, and not very different from remarks by President Reagan where the theme was deterrence, not aggression. Moreover, while making no reference to specific objectives, Andropov did say he intends to follow the foreign policy of Leonid Brezhnev, which, like Khruschev's, sacrificed attractive goals rather than risk losing what the Soviet Union has already achieved. If we take Andropov's comments to mean something about future Soviet foreign policy, there is no indication it will take a turn for the worse.

Western historians like to surprise audiences by saying the worst Soviet aggression has been above all else, cautious. The Kremlin, they add, was confident the West would not interfere in post-war East European takeovers, nor, years later, in the Afghan matter. The slightest doubt otherwise, these historians continue, and Russian troops would have stayed home. If this is so, it follows that Soviet foreign policy has sought what it could get at minimum risk.

Bound to keep Soviet foreign policy from drifting toward carelessness and risk is the fact that Brezhnev died when the U.S. was beginning to back its language about engaging the Soviet Union militarily and economically if it has to. American support for El Salvador and anti-Soviet trade maneuvers have not relaxed the claws on Afghanistan or Poland but are likely to cause Mr. Andropov to think twice about more Soviet hegemony.

Still, it is not enough to let Andropov know U.S.-Soviet military confrontations will cost heavily. Politburo members have to know there are choices in the matter, that there are levels of cooperation Washington will stick to, such as where START might take us.

Taking these factors into account, U.S. Secretary of State Shultz seemed to suggest at a press briefing prior to his departure for Moscow and Brezhnev's funeral, that if the U.S. leads a Western demonstration of intent to curb Soviet adventurism while sharing in efforts to control nuclear arms rationally, it is possible the Soviet Union will, under Andropov, pursue cooperation.

If Secretary Shultz is correct, much of Yuri Andropov's behavior in the international arena will be our own creation.●

BILL BRODHEAD

HON. BOB TRAXLER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. TRAXLER. Mr. Speaker, BILL BRODHEAD came to Congress shortly after I did. We got to know each other, however, in the Michigan State Legislature, where we served together.

From our eearliest acquaintance, I have respected BILL as an outstanding Member of Congress and as an outstanding State representative, for like his service in Congress, his first and foremost duty was always in the best interests of his constituents, our State, and our Nation.

All who know BILL respect him as a man of integrity and great honesty. BILL has played a key role as a member of the Michigan delegation, a leadership role in the Ways and Means Committee, and a dynamic role as director of the Democratic Study Group.

BILL BRODHEAD took DSG and made it, for the first time, into the advocacy organization is should be. Under his leadership DSG became the loyal opposition—an active force in opposing the policy of the Reagan administration and enlightening Members of Congress with facts, figures, and numbers so that the rest of us could know what was happening in our districts and around the Nation.

He did all this without taking away the integrity and quality of DSG as a factfinding service, but rather, added another facet to it.

I am sad to have to say farewell to BILL BRODHEAD, but I know that we have not seen the last of him. When he came to Congress he filled the shoes of departing Congresswoman Martha Griffiths. Now at the age of 72 Martha is beginning her new career as Lieutenant Governor of Michigan.

We hope BILL will not wait until he is that old, but we know he will be back in public service, giving his talents and energy to our State and our Nation before too long.●

BRENTWOOD FAMILY HEALTH CENTER

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. DOWNEY. Mr. Speaker, I want to take this opportunity to commend the Brentwood Family Health Center on an important accomplishment. It is the first ambulatory community health care facility in New York State to receive accreditation by the Joint Commission on the Accreditation of Hospitals.

JCAH accreditation does not come easy. And the fact that the Brentwood Family Health Center has earned it is a tribute to their commitment to providing quality services.

Following is the Brentwood Family Health Center's pledge to the Long Island community. It is precisely "because they care about quality" that Suffolk County residents know they are getting the very best medical care from the Brentwood Family Health Center.

BECAUSE WE CARE ABOUT QUALITY BRENTWOOD FAMILY HEALTH CENTER IS ACCREDITED

The Brentwood Family Health Center is accredited by the Joint Commission on Accreditation of Hospitals (JCAH). This means that our efforts to provide high quality patient care have earned professional recognition. Earning accreditation shows that we care about the quality of services we provide and are committed to evaluate and improve them.

Accreditation is professional and national recognition reserved for facilities that provide high quality health care. It means that our Center has voluntarily sought to be measured against high professional standards and is in substantial compliance with them.

A JCAH survey team including a physi cian and an administrator visited our center to evaluate our performance in many areas. The surveyors applied JCAH standards to each of these functions, evaluated the findings and consulted with our professional staffs.

You can be confident that we are dedicated to providing and maintaining a high level of care and services at our Center. The fact that we have received JCAH accreditation is an indication of our commitment on your behalf.

BANKRUPTCY LEGISLATION: COMMUNICIATION FROM THE ATTORNEY GENERAL ON NEED FOR A CONSTITUTIONAL BANKRUPTCY COURT

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. RODINO. Mr. Speaker, I want to share with all Members a communiciation sent from the Attorney General of the United States to the Speaker of the House of Representatives on December 10, 1982, concerning the urgency of congressional action on an article III bankruptcy court bill. I share the concern of the Attorney General that failure to enact remedial legislation to correct the constitutional infirmity in the bankruptcy courts prior to December 24, 1982, would foster the impression "that, in the view of Con-

gress, judicial decrees concerning constitutionality are not to be taken seriously," thereby promoting disrespect for the rule of law in this country as well as the principle of separation of powers.

As the Attorney General points out, in the case of this legislation there is a dimension to the urgency for passage that is not present with regard to any other legislation currently pending in Congress. Legislative issues extraneous to the emergency issue before us should not distract this body from discharging its constitutional responsibility. The Attorney General's letter follows:

OFFICE OF THE ATTORNEY GENERAL,
Washington, D.C., December 10, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: On September 28, 1982, you wrote to me urging the United States to seek a further stay of the Supreme Court's judgment in *Northern Pipeline Construction Co.* v. *Marathon Pipeline Co.*, 102 S. Ct. 2858 (1982). As you know, in that case the Court held that the broad grant of jurisdiction conferred on Article I bankruptcy judges by section 241(a) of the Bankruptcy Reform Act of 1978 was inconsistent with Article III of the Constitution. The Court stayed the effectiveness of its judgment until October 4, 1982, in order to "afford Congress an opportunity to reconstitute the bankruptcy courts or to adopt other valid means of adjudication without impairing the interim administration of the bankruptcy laws." 102 S. Ct. at 2880.

Of course, the reason for your letter to me was your assessment that the Congress would be unable to enact curative legislation by October 4. In your letter you asserted that, althought "the House has diligently addressed the issues presented * * * and is anxious to meet the deadline imposed" by the Court's decision, it was "enormously difficult to enact comprehensive legislation in the short period of time" before October 4.

I fully understood then and understand now the difficulties that result from the competition for scarce legislative time and attention during a short legislative session. I must point out, however, that in the case of the bankruptcy legislation there is a dimension to the urgency for congressional passage that is not present with regard to any other bill currently pending in this session. That dimension is the recognition and respect that we, as representatives of the legislative and executive branches, owe to the judicial branch. For this reason it is imperative that remedial legislation reconstituting the bankruptcy court system on a sound constitutional basis be enacted before the end of the current legislative session.

We were reluctant to seek a state of the Court's judgment beyond October 4 for several reasons. First, the Court had already stayed its own judgment for more than three months. Second, the enactment of legislation reconstituting the bankruptcy court system was being impeded by controversies over other legislative proposals having nothing to do with the constitutional issue in the Court's *Northern Pipeline* decision. Finally and perhaps most importantly, we believed that the Court might reasonably conclude that sufficient progress toward a legislative resolution had not been made, so that an extension would only result in further delay and a subsequent request for a further extension.

Notwithstanding these reservations, the Solicitor General did request an additional stay of the Supreme Court's judgment on October 1, 1982. That motion was premised upon the belief that a legislative resolution of the constitutional issues could be achieved by the conclusion of the current legislative session on or before December 24, 1982. We deemed it advisable to avoid a disruption of the administration of bankruptcy laws during the relatively brief additional period which seemed to be required to achieve curative legislation.

Since the Supreme Court's grant of the requested stay, officials of the Department of Justice have worked diligently with members of the Congress to resolve this issue. Jonathan Rose, Assistant Attorney General for the Office of Legal Policy, testified on November 10, 1982 before Senator Dole's Subcommittee on Courts of the Senate Committee on the Judiciary. In his testimony, he explained that the Department's thorough study of the Supreme Court's decision led to the conclusion that no Article I system for the appointment of bankruptcy judges was either free from constitutional doubt or workable as a practical matter. Thus, the Department could not support the legislation recommended by the Judicial Conference in September and instead urged the creation of the requisite number of Article III judges to handle the existing bankruptcy case load.

Despite the considerable effort by Departmental officials and many members of Congress in the two months since October 4, it is apparent that a legislative consensus is still distant. The matters in contention include not only the precise contours of the Article III court system, but a number of unrelated and controversial amendments to the Bankruptcy Code and other laws. Indeed, there have been increasing indications that remedial legislation might not be enacted before December 24, 1982.

I am deeply concerned that the judiciary and the nation might conclude that, in the view of Congress, judicial decrees concerning constitutionality are not to be taken seriously. Interpretation of the Constitution is the core function of the courts, and the United States Supreme Court has spoken concerning the constitutionality of the Bankruptcy Reform Act of 1978. It would be an unconscionable affront to the courts, to the principle of separation of powers, and to the Rule of Law for the political branches of government to fail to enact legislation to provide for a constitutionally sound bankruptcy system in this country. The Department of Justice cannot in good conscience accept such a position.

Accordingly, it is imperative that the necessary remedial legislation be enacted before the end of this session. I am sending copies of this letter to Representatives Rodino, McClory, Michel and Butler, and to Senators Baker, Robert Byrd, Thurmond, Dole, and Biden, to inform them of my concerns, as they also share important responsibilities in this matter. Of course, we stand ready to assist you in achieving enactment of the necessary legislation.

With best personal regards.

Sincerely,

WILLIAM FRENCH SMITH,
Attorney General.●

BARRY GOLDWATER, JR.

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. O'BRIEN. Mr. Speaker, BARRY GOLDWATER, JR., leaves Congress this year after nearly 14 years in the House.

BARRY has served on the Public Works Committee and the Science and Technology Committee. He has been in the forefront of many of the issues before both of these committees, and has earned a reputation as an effective legislator.

Though his colleagues are saddened to see BARRY leave the House, he does so at so young an age as to be certain to make his mark in whatever field he now enters. We can be certain of one thing where BARRY GOLDWATER, JR., is concerned, whatever he chooses to do, it will be done well.

STOP CLINCH RIVER

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. MARKEY. Mr. Speaker, during consideration of any energy and water appropriations bill or the continuing resolution, the House should delete funding for the Clinch River Fast Breeder Reactor. This project embodies the worst problems associated with domestic nuclear power, but a vote against Clinch River should not be construed as a vote against nuclear power. Simply stated, the Clinch River project makes no economic, technological or proliferation sense. It has been granted too many reprieves. It must be put to rest, once and for all.

Every time the matter of Clinch River is brought before this body, there is less to say in its behalf and more evidence that the project should be filed away with the archaic economic and technological assumptions upon which it was conceived.

Not all of Clinch River's problems carry dollar signs. The potentially grave social costs attached to the project are ultimately more serious than the hopeless cost-benefit picture. Highest among these is the inevitable spread of nuclear weapons. Construction of this breeder reactor would launch this country, and the rest of the world with it, smack into the perils of the plutonium age.

While existing light water nuclear plants produce waste containing plutonium, extraction of that plutonium in order to make nuclear weapons is very difficult and expensive. Clinch River, however, would be fueled by plutoni-

um in a form easily converted to weapons. Moreover, fuel reprocessing would mean shipping plutonium between generating and reprocessing plants, presenting more opportunity for the material to fall into the wrong hands.

A 1977 Ford Foundation study by the Nuclear Energy Policy Study Group predicted that annual plutonium commerce in a worldwide breeder economy could provide enough plutonium for several hundred thousand nuclear weapons. The fuel required annually to reload a single breeder of the Clinch River type would provide enough plutonium for 200 to 400 nuclear weapons. This plutonium would have to be guarded with absolute assurance for more than 100,000 years. That is comparable to the period between now and the last ice age.

The introduction of plutonium to world markets would only stimulate long-held fears that the deadly substance could be misplaced. And the fears could very likely become reality.

Last week the Washington Post carried a full-page ad from the Edison Electric Institute urging Members of Congress to vote for the Clinch River breeder. The association of electric companies which sponsored the ad cautioned that "the U.S. is falling behind." It played upon that tender American nerve that twinges at the thought of another country inching ahead in technological development.

But an article in the December 10 issue of Science magazine reported that European countries are backing off from their earlier enthusiasm for breeder technology. As they have been here, viable breeder programs in those countries have been hampered by increased costs, decreased demand for electricity, and delayed construction of light water reactors. Britain and West Germany are now seriously considering a freeze, if not abandonment, of breeder programs.

France, home of the world's first commercial fast breeder, has had its own problems. The prototype Phenix plant, which has provided electricity since 1973, developed a leak in April of this year. The plant was shut down for several weeks and a new debate about the safety of the breeders was born.

Plans for a German test reactor have been delayed and may be postponed indefinitely, primarily because of financial problems. And observers feel that the British, who have been at the forefront of research in the field, will take a wait and see approach to further development because of the weakened economic arguments for breeders.

The potential problem of proliferation in this country may be more than that in Western Europe. A recent article in the German magazine, Der Spiegel, claimed that the French Super-Phenix breeder under construction is intended to produce plutonium for the French military. If proliferation is the prize in the breeder race, let us step to the back of the pack.

And there is the question of economics. Some proponents of the project have insisted that economics should not even enter into the debate because Clinch River would be a research and development project, rather than a commerical venture. Clinch River was intended to demonstrate the performance of a breeder reactor in a utility environment—so it should be a commercial venture and economics must be a central consideration.

Unfortunately for the project's proponents, the economic picture is bleak. Even if it made sense when it was proposed 11 years ago, Clinch River has become an economic absurdity. The cost of the project was originally set at $400 million. This fall, however, the Energy Department revised that figure for the sixth time, putting it up to $3.6 billion. But the General Accounting Office has released an updated and more realistic estimate—$8 billion.

The GAO also concluded that the Energy Department had overestimated the revenue we might expect from the plant. These economic facts should be seen in the context of the country's record deficits and cuts to social services, including proposals to cut fuel assistance to the poor.

When Clinch River was proposed, there were bright forecasts for the nuclear industry. But it has since entered a slump. Even before the Three Mile Island accident there was a sharp drop in orders for new reactors. At one time it was predicted that more than 60 new reactors would be operating by 1984. Most of those orders, however, have been canceled, and there have been no new orders since 1979. As many as a third of all the plants now under construction may never be completed.

Industry officials once believed that high numbers of new nuclear plants would be putting greater demands on limited uranium supplies. But uranium supply is no longer a problem. In fact, researchers believe there should be adequate uranium supplies for existing reactors until the year 2055—without breeders.

The Energy Department's Energy Research and Advisory Board recommended that, because construction of a breeder reactor demonstration is not an urgent priority, and in light of current budget constraints, construction of such a project should be delayed.

And the Nuclear Energy Policy Study Group in 1977 concluded that there is little advantage in early commercial introduction of breeders and that construction could be delayed 20 or more years without seriously affecting the economic health or energy security of the country.

Even if the plant made economic sense, and even if there were not serious questions about the need for such a plant, the proliferation problems Clinch River will inevitably present are enough to warrant its demise.●

H.R. 7379, THE "NATURAL GAS IMPORT POLICY ACT OF 1982"

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. CORCORAN. Mr. Speaker, for the benefit of our colleagues, I would like to include in the RECORD the text of H.R. 7379, the "Natural Gas Import Policy Act of 1982." I introduced this legislation on December 7, and it was referred to the House Committee on Energy and Commerce.

H.R. 7379

A bill to establish new import prices for natural gas and liquefied natural gas authorized by the Department of Energy to be imported to the United States pursuant to section 3 of the Natural Gas Act, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Natural Gas Import Policy Act of 1982".

GENERAL RULE

SEC. 2. Effective beginning one hundred and eighty days after the date of the enactment of this Act, any order authorizing the importation of natural gas which was issued pursuant to section 3 of the Natural Gas Act prior to such effective date shall be suspended with respect to any natural gas entering the United States on and after such effective date unless and until the applicable requirements of section 3 of this Act have been satisfied.

ESTABLISHMENT OF NEW PRICES FOR NATURAL GAS IMPORTS

SEC. 3. In the case of natural gas produced in a foreign country and imported to the United States, the requirements of this section shall be considered satisfied at such time as—

(1) a new price for natural gas imported to the United States has been established by the government of such foreign country (or, if no such price is established by such government, by the producer or exporter of such natural gas);

(2) such price has been agreed to by the Secretary of Energy on behalf of the Government of the United States; and

(3) the contract or contracts applicable to such importation have been renegotiated to conform to such new price and tariff adjustments to reflect the cost savings achieved by the renegotiation have been filed with the Federal Energy Regulatory Commission by the importer.

RECOVERY OF TERMINAL OR ATTENDANT FACILITY COSTS IN CONNECTION WITH ALGERIAN NATURAL GAS

SEC. 4. In the case of any terminal or attendant facility located in the United States and constructed for the importation to the

United States of Algerian natural gas the authority for which is suspended by section 2 of this Act, the Federal Energy Regulatory Commission shall permit recovery of the costs prudently incurred in connection with the construction of such facility to the same extent and in the same manner as if such facility were used and useful for the importation and transportation of natural gas (without regard to the suspension under this Act of importation authority). The Commission may not permit any rate of return on such costs.

NATURAL GAS TO INCLUDE LIQUEFIED NATURAL GAS

SEC. 5. For purposes of this Act, the term "natural gas" includes liquefied natural gas.●

FREEZE NOW, SURRENDER LATER

HON. EDWARD J. DERWINSKY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. DERWINSKI. Mr. Speaker, it is tragic that most "nuclear freeze" advocates focus on American weapons and American policy. None of them seem to think it is strange that the leaders of the movement do not mention the Soviet nuclear arsenal that has overtaken America's in nearly every respect. Nor do they mention Soviet aggression the world over. Pundits of the press pooh pooh the idea, that there is a Moscow connection to the freeze movement. However, the evidence is there and William Randolph Hearst, Jr. hit the nail right on the head with a recent column on the subject. In this column he reviewed the material contained in the book called "The War Called Peace," published by Western Goals of Alexandria, Va. His column, which appeared in the Hearst newspapers on December 5, 1982, has great relevance for our continuing debate on the MX missile and the size of our defense forces. The column follows:

[From The Hearst Newspapers, Dec. 5, 1982]

FREEZE NOW, SURRENDER LATER

(By W. R. Hearst Jr., Editor-in-Chief, Hearst Newspapers)

NEW YORK.—This has been a pretty slow week at home, what with President Reagan off on a four-nation swing around Latin America. But the Soviet Union hasn't let up in its campaign for a nuclear "freeze" which many honest people here and among our allies embrace because they fear the thought of a nuclear disaster being suddenly unleashed. Obviously they are not alone because the prospect is indeed a terrifying one.

But there are much better ways of settling nuclear hassles and the Russians know it. The first is on-site verification, proposed long ago by President Eisenhower and recently repeated by President Reagan.

I have just been reading a fact-filled book entitled *The War Called Peace,* (sub-titled *The Soviet Peace Offensive*). It is published by "Western Goals," with headquarters in Alexandria, Va., whose advisory board lists among others such eminent Americans as Dr. Edward Teller, father of the H-bomb; author Taylor Caldwell; former chairman of the Joint Chiefs of Staff Admiral Thomas Moorer; former Marine Corps Commandant General Lewis Walt, and renowned physicist Dr. Eugene Wignar.

This book, commenting on anti-nuclear demonstrations here and among our Western European allies, tells how pro-Soviet organizations organized and fueled protest movements. Most staggering, I found, was the voluminous list of pro-freeze, anti-nuclear groups located in the United States. They run the gamut from the straight freeze units to anti-draft registration to groups of scientists, lawyers and even include church groups of all denominations.

It's most curious, I thought, that all this effort has been synchronized into the major objective—"freeze now"—but there's nary a mention of Soviet wanton use of chemical warfare in Laos, Cambodia and, lately, in embattled Afghanistan where freedom fighters have slowed the invasion-occupation by the U.S.S.R.

The Soviets have used toxin weapons, commonly known as "yellow rain," spraying the poison over thousands of people, killing the land in Communist-held Southeast Asia and Afghanistan. The symptoms are prolonged vomiting, dehydration and bone disease.

Months ago, I wrote about "The Yellow Rain", based on articles done by a brave lady, Jane Hamilton-Merritt, who worked and lived among the Hmong people in Laos and also spoke their language. After being instrumental in helping some Hmong villagers come to the States, she returned to Thailand to help refugees.

Just before he left to accompany President Reagan on the Latin American tour, Secretary of State Shultz flatly accused the U.S.S.R. of using toxin weapons, all of which are in gross violation of international law. Secretary Shultz, usually lowkey, declared that the U.S. had accumulated new evidence of what he termed "cynical disregard of international law" by the Soviets and their Communist comrades in Southeast Asia and Afghanistan.

Secretary Shultz, despite foot-dragging by other nations who are sympathetic, has been able to make our case more timely. This charge demands verification in Russian-controlled territory but the Soviets won't even let neutrals venture one foot inside.

It brings us right back to the freeze issue, which many Americans and our overseas friends and allies see as the road to peace. President Reagan put it bluntly at a press conference when he said that it "takes two to tango," referring to arms control and genuine disarmament. The Soviets have now shown an interest in his televised proposal on reducing risks. To repeat President Reagan's comment, it "takes two to tango" and we're here to dance.

Over a year ago President Reagan authorized our top negotiators to the nuclear disarmament conference in Geneva, Paul Nitze and Eugene Rostow (they had been working all along on the problem), to make the offer to the Russians that we would not arm our allies in Europe with Pershing missiles if they'd withdraw their SS-20s. This was referred to as the "Zero Option" for varying reasons. It was promptly rejected by the Soviet representative, Yuli Kvitsinksy.

Strangely enough, the entire incident was given very little publicity in the American media. In Europe the blame for the almost deliberate ignoring of so important a development is placed on the Washington press corps which the continent sees as being anti-administration. It is quite likely that not being so close to the woods they can see the trees better.

The Russians, we must never forget, always break up meetings over there calling for nuclear disarmament and generally ship off protest leaders to harsh labor camps or mental hospitals. And when negotiators ask that Soviets agree to on-site inspection, Russian representatives pretend unbridled anger, charging that we demand interference in their internal affairs.

As this book, The War Called Peace, clearly presents, peace doesn't come about by wishing it to happen, particularly when the other side happens to be wily, powerbent and interested in unilateral nuclear disarmament, namely, ours. That isn't the way real, enduring peace can be achieved in the 20th century. The late, great Winston Churchill, when Russia under Stalin menaced Western Europe, put it in his usual eloquent manner. "We arm to parley."

His remark is as true today as it was when Europe was virtually naked before a post-World War II tyranny.

TRIBUTE TO HON. JOHN NAPIER

HON. HAROLD ROGERS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. ROGERS. Mr. Speaker, I wish to thank the gentleman from South Carolina, Mr. SPENCE, for requesting this chance, for those of us who have come to know and admire JOHN NAPIER, to pay tribute to him.

Mr. Speaker, I know I speak for many of my colleagues when I say that we are losing not only an outstanding Member of Congress, but also an outstanding man, when we lose JOHN NAPIER.

I know for a fact of JOHN'S devotion to his work, and to the people of South Carolina he represented so well in his brief tenure here in Washington.

I know, because I had the distinct honor of visiting his district. I saw with my own eyes the respect and admiration the people in his district have toward JOHN NAPIER.

As fellow freshmen, we had the opportunity to work together closely on a number of projects. In particular, I will always remember JOHN NAPIER'S able work during last year's fight over the tobacco program, when the very life of this important program was being threatened. Yet it was JOHN NAPIER who helped come to the rescue, and who was among those in the forefront who were instrumental in developing a consensus on that issue, and ultimately preserving it.

Through this close relationship with JOHN NAPIER, I have had a firsthand knowledge of his ability to work with others. I have also seen on countless

occasions his selflessness, and his total sincerity toward others, and toward his work.

I have also seen JOHN NAPIER's outstanding leadership on both the Agriculture and Veterans' Affairs Committees. His selection as an assistant regional whip attests to the respect and admiration felt about him by his fellow Republicans.

JOHN NAPIER's service to Congress is merely the latest of his contributions to society. He has long been acknowledged as one of South Carolina's most active supporters, as well as being one of its best public servants. JOHN NAPIER's years of service to another outstanding South Carolinian, Senator STROM THURMOND, is another example of his abilities. And as a veteran, JOHN has also distinguished himself through service to his Nation.

It is with some sadness that we salute JOHN NAPIER, as he prepares to move on to new challenges lying before him. As friends, as colleagues, as Americans, we will miss JOHN's hard work, dedication and leadership. Yet we also mark this event with a feeling of elation, in having known and worked with JOHN NAPIER. For deep in our hearts and minds, we have all been touched by his presence in this Chamber. And we know that we are all better Representatives, and better people, for having known him.

Our best wishes to JOHN NAPIER and his family. And thanks from all of us, for a job well-done. Good luck and Godspeed.

BUENOS AIRES HONORED FOR PUBLIC CLEANSING ACHIEVEMENTS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. FLORIO. Mr. Speaker, the United States can well be proud of its progress in professionalizing environmentally sound waste management practices. I personally am proud of my involvement on the Energy and Commerce Committee in developing the Resource Conservation and Recovery Act of 1976 and recent amendments which have promoted sound waste management practices in this country. Likewise, we can take pride in the fact that American companies are exporting this professionalism to our trading partners around the world, helping better conditions and improving the quality of life in foreign lands.

I would call the attention of my colleagues to an award to be bestowed next Tuesday by our National Solid Wastes Management Association which serves as the secretariat for the International Council of Waste Services Industries, on the city of Buenos Aires, Argentina for its remarkable achievement of an innovative and highly successful public cleansing program including visionary solid waste mangement techniques, street sweeping and catch basin cleaning. Buenos Aires has become a sparkling example of public cleanliness not only for the nations of South America, but for cities in our country as well.

What has made the difference in Buenos Aires has been the highly effective public awareness and public participation program which has mobilized citizen support and cooperation for the program. Supplementing a traditional public relations campaign of advertising and news placements, the city of Buenos Aires has distributed flyers door to door educating the public on collection schedules and what citizens can do to assist their collectors. Street sweeping schedules were also distributed so that citizens could cooperate by moving parked cars to allow efficient street sweeping. City officials from Mayor Osvaldo A. Cacciatore on down participated in press conferences and extensive media interviews to alert the citizenry. The refuse vehicle themselves became mobile advertisments for the "Help Keep Buenos Aires Clean" program with distinctive graphics. Classroom teachers were provided packets for their students on the virtues of public cleanliness.

The success of the public awareness program has enabled this city of 2 million people to transform an unhealthy situation into a model for other municipalities within a short space of 2 years. Public cooperation was the key to assuring success of the long range, innovative waste management plan for the entire region. The overall plan is as exciting as it is extensive. Closing down numerous open burning dumps, the city has embarked on a 30-year program of converting 12,000 acres of low lying area which surrounds the city in a 180 mile circumference ring, into a system of parks with soccer fields, golf courses, picnic areas and trails for cycling, hiking and horseback riding. This is an emminent example of converting wastes into socially useful purposes.

I commend the example of Buenos Aires to my colleagues and to the municipalities which they represent. I add my congratulations to those of the National Solid Wastes Management Association in saluting Buenos Aires for this remarkable achievement.●

NATIONAL MINORITY SUPPLIER DEVELOPMENT COUNCIL

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. MITCHELL of Maryland. Mr. Speaker, I am pleased to share with my colleagues a speech which was recently given at the 10th Annual Conference of the National Minority Supplier Development Council by William R. Chaney, president of Avon Products, Inc., who is currently serving as chairman of the council.

As Mr. Chaney comments, the past 10 years have indeed brought a sense of pride and accomplishment for the efforts of the National Minority Development Council. I share his view that, as minority business is expanded and strengthened, a healthier free enterprise system will occur in the United States.

NATIONAL MINORITY SUPPLIER DEVELOPMENT COUNCIL

(By William R. Chaney)

Mayor Byrne, distinguished members of the Dais, members of NMSDC, and friends.

It is both a pleasure and a privilege for me to personally welcome you to our 10th Annual National Minority Supplier Development Council Conference here in Chicago, Illinois.

I know that the entire council joins me in extending our sincere appreciation to the Chicago host committee for helping to make this conference possible.

Mayor Byrne, we also thank you and the people of Chicago for your kind hospitality.

As chairman of NMSDC, it is my hope that we have all come to this particular conference, one that marks a decade of our existence, with a great common spirit of dedication and total commitment to our purpose.

When you think about it, 10 years is really not a very long time in the life of an organization, we are still young and growing. Yet, I believe that we can look back on these past 10 years with a special sense of pride and accomplishment because our record of achievement speaks for itself.

In just 10 years, NMSDC has grown into a network of 43 regional councils with satellite offices aroung the country. Our annual estimated value of goods and services purchased from minority enterprises increased substantially from $86 million in 1972 to $4.2 billion in 1982. In addition, our corporate participants have increased nationwide . . . from 261 in 1972 to more than 2,700 active supporters today.

I believe that these figures indicate significant progress and that we should be proud to be a part of an organization that continues to increase business opportunities for minorities despite general economic conditions with which all businesses are concerned.

Today, the council is an established recognized national organization in this country. It has a history of creating jobs for thousands of people, through its support of successful minority business.

As I have said before, helping minority businesses to grow and prosper is one of the

most effective ways to alleviate some of the social and economic problems confronting our Nation, and I think the council is doing just that.

But, we cannot afford to rest on our past successes. We, as an organization, have some very real challenges ahead. The Federal Government, for example, has taken a declining posture in its level of funding for us, and we are going to have to use all of our resources to move the council's dependency away from the public sector and seek greater participation and support of the private sector. We will have to work together with efficiency, imagination, and initiative to implement our private sector expansion plans.

For the short term, we need the help of our Federal funding, and together with Ben Jones, our executive director, we are working to see that all of the Government's requirements are met.

Clearly, the Federal Government and the council share the same interest—we all want a stronger, healthier national economy, and minority business development certainly contributes to that interest. It is no secret that by strengthening the minority business community, you help to improve the employment picture, increase the tax base, reduce public assistance programs, encourage urban revitalization, and generally strengthen the overall marketplace.

As we approach 1983, I am pleased to report that our channels of communication to the public sector are open and in place, and our relationships remain strong.

We continue to share the view that a policy of greater private sector support and involvement is the way to develop business opportunities for minority entrepreneurs. This policy, of course, reinforces the council's expansion plans for the future. Moreover, it makes it possible for us to enjoy the influence of the Federal Government and at the same time convince the corporate community that advocacy of voluntary programs as opposed to Government imposed programs is good for business and good for the country.

I also want to report that our existing expansion plans, which are so vital to our future growth, call for a very strong national membership recruiting drive that will reach out to the Fortune 1,000 companies.

Expanding our corporate membership through an aggressive recruiting campaign is the single most important way to insure our funding needs and I plan to do all that is within my power as your chairman to see that this priority is maintained.

Finally, as we enter our second decade, I am optimistic about the future of the council, and I hope that you share this optimism with me. It is based on our 10-year history of progress that has produced such positive results and the course that we have set for the future.

I have confidence in our management team because of their level of experience and their dedication to the achievement of our goals.

I believe in our purpose and objectives for as minority business is expanded and strengthened, a healthier and more vital free enterprise system will result.

Thank you.●

SPACE COMMERCE ACT

HON. DANIEL K. AKAKA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. AKAKA. Mr. Speaker, today I am introducing a bill which would streamline the current procedure by which a private company is granted permission to launch a vehicle into space. This bill, known as the Space Commerce Act, is of vital importance to the success of private sector involvement in our Nation's space effort. There can be no question that the commercial era of space has dawned with the arrival of the 1980's. As a Congress, we must do what we can to encourage the private sector to invest in space and space-related activities, for as history has shown, an investment in space is one of the soundest economic investments we can make in our Nation's future.

Under current practice, it is quite difficult for a private company to receive the necessary clearances to launch a vehicle into space. In fact, the process is not only complicated, but often requires a company to spend an inordinate amount of time and money in an effort to receive those clearances. One company which recently conducted a suborbital launch was required to obtain regulatory permissions, clearances and approvals from five different Federal agencies or bodies: the Federal Aviation Administration, the National Aeronautics and Space Administration, the Department of State, the Federal Communications Commission, and the North American Defense Command. Furthermore, not only did the company have to register with the Internal Revenue Service, but incredible as it may seem, with the Bureau of Alcohol, Tobacco and Firearms as well. As a result of this ponderous procedure, this particular company was required to invest over 6 months and more than a quarter of a million dollars in legal fees to be cleared for launch.

The bill I am introducing today simply streamlines the regulatory procedure by establishing a single point of contact within the Federal Government for applicants to obtain permission to launch a space vehicle. Under the terms of this bill, this single point of contact would be responsible for coordinating and facilitating all Federal actions pertinent to private sector space launches. In turn, this single point of contact would issue a comprehensive license for space vehicle launchings to private companies. This bill would in no way abrogate our national security interests, and would certainly result in an efficient and less costly procedure for regulating private space launches.

There can be no doubt that private sector involvement will shape the future of the Nation's space effort in the years ahead. Already, there are at least six companies which have publicly announced their intention to commercialize various aspects of space launch services.

By streamlining the regulatory procedure for companies involved in this activity, this bill encourages the development of new enterprises in the space field—not by subsidy or special treatment, but rather by opening up new opportunities for entrepreneurs. These new business opportunities can be exploited and developed by small- and middle-size businesses—businesses which form the backbone of our American economy. By streamlining the regulatory procedure, this bill also encourages the creation of new jobs, for as the industry grows, so does the number of people necessary to it.

Passage of this bill will kindle the spark of new investment in America and make clear our commitment to American leadership in new areas of technology and industry.

Passage of this bill will serve to encourage the kind of high productivity which we, as a nation, have long supported.

Passage of this bill, and others like it, can make a real contribution to the health of our economy.

We must not limit our effort in rebuilding America to fixing potholes and decaying bridges. We can, through passage of this legislation, create the conditions necessary for building a bridge to a whole new frontier.

I urge my colleagues to make a commitment to building the bridge to a whole new frontier by supporting this legislation.●

PETE McCLOSKEY

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. O'BRIEN. Mr. Speaker, PETE MCCLOSKEY has been an immense asset to the House. He will be missed greatly.

PETE came to Congress in 1967, after distinguishing himself in the California legal community. He was a Marine Corps officer and served his country at the time of the Korean war. In Congress, PETE has been the first to speak out on many difficult issues, such as the war in Vietnam, and he has carved out nationally known positions on issues such as compulsory youth service.

Several years ago PETE came out to my district to speak to a group of about 250 high school students on the roles they could play in the governing of the country. It was more than a

civics lesson. PETE caught their imagination, and I believe he inspired them. It was a moving experience.

But it also is what we expect from PETE MCCLOSKEY. He is no usual Congressman, and he will be missed an unusual amount.●

THE PEOPLE'S PARADISE

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. FIELDS. Mr. Speaker, some form of socialism/communism is dominant in many nations and every continent. The idea of socialism is especially attractive to intellectuals who are able to maintain a comfortable distance from actual socialist practices.

Though socialism is a god that fails continuously, and causes more human suffering and tragedy than any idea or practice in history, there are those who stubbornly cling to its high-minded idealism. They religously close up their eyes to the reality that the socialist promise of instant utopia brings only the tyranny of a real dystopia.

It is for them that the following glimpse of reality is provided.

[From the Washington Times, Oct. 1982]

SOVIET LIFE INCREASINGLY BLEAK

(By Allan Brownfeld)

Visiting the Soviet Union is a sobering experience. It is one thing to review statistics about declining Soviet grain production and to read reports about the shortage of even the most basic necessities of life, and quite another to walk the streets of Moscow and other Russian cities and observe the life of average citizens of the U.S.S.R.

For those Russians who are not part of the Communist elite, life is increasingly bleak. This writer visited department stores, food and clothing shops in Moscow, Leningrad and Kiev. In all of them, lines were long and goods were few. In a meat shop on Gorky Street, Moscow's equivalent of Fifth Avenue, I observed what almost developed into a brawl, as customers fought over the one remaining chicken. The line was 20 deep, and many who had waited for at least an hour or more arrived at the counter only to find that nothing was left to purchase.

In a vegetable shop in Kiev on a sunny Sunday afternoon, 12 people waited in line with shopping bags. The only things available were potatoes, cabbage and cucumbers. At the famous GUM department store, across from the Kremlin and Red Square, long lines were to be found on weekday evenings at 9 p.m. for such basic items as socks, underwear and toothpaste. Shopping for the basic necessities of life occupies much of the nonworking time of Russians.

Hedrick Smith, former New York Times correspondent in Moscow, notes that, "The accepted norm is that the Soviet woman daily spends two hours in line, seven days a week, daily going through double the gauntlet that the American housewife undergoes at her supermarket once, maybe twice a week. I noted in the Soviet press that Russians spend 30 billion man-hours in line annually just to make purchases. That does not count several billion more manhours expended waiting in tailor shops, barbershops, post offices, savings banks, dry cleaners and various receiving points, for turning in empty bottles and so on. But 30 billion manhours alone is enough to keep 15 million workers busy year round on a 40 hour week. Personally, I have known of people who stood in line 90 minutes to buy four pineapples, three hours for a two-minute roller-coaster ride, 3 and a half hours to buy three large heads of cabbage only to find the cabbages were gone as they approached the front of the line, 18 hours to sign up to purchase a rug at some later date . . . Lines can run from a few yards to half a block to nearly a mile . . . The instinctive reaction of a Russian woman when she sees a queue forming is to get in line immediately—even before she knows what is being sold."

The group of journalists with whom I was traveling stayed in new, modern hotels which were constructed for the Russians by Swedes and Finns for the 1980 Olympics. We were provided with the best available food although, even for foreign visitors, the Russians were unable to provide fruit of any kind—much less orange or grapefruit juice. The bars appeared to be well stocked, yet we were told on at least three occasions that, as early as 10 p.m., "we are out of beer for tonight." Anyone who wanted a second cup of coffee with dinner was charged an additional fee. We were told that coffee was a scarce and valuable commodity in the Soviet Union. Our privileged life was meant to be as separated as possible from average Soviet citizens. Guards stood at the doors of the hotel to keep Russians out.

While the Soviet Union has devoted its funds and energy to building the world's most powerful military machine, its domestic economy is in a state of growing disarray. No place is this more apparent than in the agricultural sector.

Almost a quarter of Soviet workers are in agriculture, yet they still cannot feed the country. By contrast, only 3 percent of the American labor force is engaged in farming and produces vast surpluses. Each U.S. farm worker feeds 60 Americans; each Soviet farmer feeds only eight Russians. In fact, no country has ever dominated world grain trade as the U.S. does today. Its 55 percent share of world grain exports in 1981 easily overshadows Saudi Arabia's 32 percent share of world oil exports.

This year, because of its own failed system of collective farms, the Soviet Union will attempt to import 46 million tons of grain—more than any other country in history. As a result, one-fourth of all the grain for Soviet human and livestock consumption will come from abroad, according to a study by the Worldwatch Institute. Over one-half of this imported grain will come from North America, most of it from the U.S. In this sense, we continue to bail out Moscow's failed agricultural system and permit its massive expenditures for defense.

While communism may have made the Soviet Union a military success, it remains clearly an economic failure. The average Russian has one of the lowest standards of living in the industrial world. Nicholas Daniloff, the Moscow correspondent of *U.S. News and World Report*, points out that, "The fact that the Soviet economy is an economy of scarcity is underlined by long lines at stores, black marketeering, bribe giving and bribe taking—and the government's harsh new campaign to stamp out speculation and corruption."

The only bright spot in Soviet agriculture is the small island of free enterprise represented by the tiny private plots that workers on collective and state farms are allowed to cultivate—occupying less than 2 percent of the farmland but producing one-third of the total meat and vegetable output. Westerners residing in Moscow report that the people seem to have lost whatever incentive they had to work—not only in agriculture, but throughout the Soviet economy.

The incentive of private gain has been banned and the ideological exhortations to avoid waste and work harder no longer have much effect. Soviet officials are now admitting their concern. Radio Moscow, for example, recently compared the Tolyatti plant, built by Fiat on the Volga River, and the Daimler-Benz plant in West Germany. The broadcast complained that Soviet output lags far behind in quality and quantity because of chronic absenteeism and tea breaks.

It is the Soviet elite, however, which pursues the profit motive to ever greater heights. While communist ideology speaks of a "classless" society—and a state designed to serve the "workers," it is the governing elite which is largely served. They do not wait in long lines for meager goods. Instead, the elite groups shop in separate stores, deliberately unmarked to avoid attention and accessible only with a special pass. "These stores," Hedrick Smith points out, "insulate the Soviet aristocracy from chronic shortages, endless waiting in line, rude service and other daily harassments that plague ordinary citizens. Here, the politically anointed can obtain rare Russian delicacies like caviar, smoked salmon, the best canned sturgeon, export brands of vodka or unusual vintages of Georgian or Moldavian wines, choice meat, fresh fruit and vegetables in winter that are rarely available elsewhere . . . Certain stores also provide the elite with foreign goods the proletariat never lays eyes on . . . Supreme leaders of the Communist Party get the kremlevsky payok, the Kremlin ration—enough food to feed their families luxuriously every month—free. By contrast an ordinary urban family of four might spend 180–200 rubles a month, easily half its income on food."

Western Marxists who view the U.S.S.R. as a model for their own societies should come here for a visit. They would be quickly disabused of their romantic notions and would discover that the myth and the reality are radically different.●

TRIBUTE TO THE HOLT CHILDREN'S SERVICES, INC.

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. CARMAN. Mr. Speaker, I would like to bring to your attention a very special organization, the Holt Children's Services, Inc. This group is a nonprofit social welfare organization approved by the Ministry of Social Affairs of the Republic of Korea. The organization was started in 1955 by the late Mr. Harry Holt. He started the group with the adoption of eight children who became orphans during the Korean war.

The cardinal philosophy of the organization is based upon Christianity. The Holt Children's Services is an outstanding example of child welfare work. Its main program consists of counseling and prevention of unmarried parents, adoption at home and abroad, medical welfare service, rehabilitation for mentally retarded and physically handicapped children, scholarships for underprivileged children, and the management of the Saemaul Day Care Center and Baby Home.

I have had a special association with the Holt Children's Services. As some of you may know, my family has been blessed by my daughter whom we adopted through the Holt Services. After recently visiting the organization in Seoul, Korea, and meeting with the President, Han Kyu Kim, I commend the group for the special joy they have brought to my life and to the lives of many children and families throughout the world.●

NO RIGHT TO CONDEMN

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. PAUL. Mr. Speaker, the ongoing debate over the role the United States should play in the Middle East has focused on which side of the Arab/Israeli conflict the United States should champion. Some advocate siding with Israel over the Arab nations, while others urge the United States to favor the Arabs over Israel. Both sides make it appear that these two positions are the only options open to the United States. However, a third option is readily available—a policy of noninterventionism.

A noninterventionist foreign policy was successfully pursued by this Nation from its founding essentially up to World War II, with only brief interruptions. Under a system of noninterventionism, people and goods flow freely across national boundaries, and nations enjoy the greatest economic prosperity. Also, the United States would remain free from the "entangling alliances" that cost the American taxpayers billions of dollars annually.

For the RECORD, I would like to submit an editorial that I wrote on the need to pursue a noninterventionist foreign policy in the Middle East. This editorial, which appeared in The Jewish Hereald Voice of Houston, Tex., was written in response to the administration's condemnation of Israel's recent decision to continue building settlements on the west bank. The text follows:

NO RIGHT TO CONDEMN

(By Ron Paul)

The Administration's harsh condemnation of Israel's decision to continue building settlements on the West Bank is another example of the arrogance of our decades-old foreign policy of interventionism. The U.S. State Department possesses neither the wisdom nor the authority to dictate to Israeli citizens where they may or may not live. It is the height of presumption for this Administration to assume that American-Israeli relations depend on Israel's willingness to adhere to U.S. plans for Israel. Israel, after all, is a sovereign state possessing every right to determine its own policies, free from our intervention. State Department officials and U.N. demagogues have no business dictating to the Knesset, and are out of order in any attempt to determine the boundaries of other nations.

The U.S. response, while masquerading as benevolent, is in fact purely self-serving. We have not voiced our concern in human terms. Instead, Administration officials have referred to the settlements as a "litmus test" of U.S. influence and intentions in the region. The State Department's real concern involves possible losses in its own power to manipulate other nations.

The U.S. must refrain from criticizing Israel's decision. The Israeli government must be free to pursue those policies that it finds to be in its national interest, and to bear the responsibilities for those decisions. The United States, in this as in all other matters, must mind its own business.●

SALUTE TO MAJOR REDDICK

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. CLAY. Mr. Speaker, I am honored to pay tribute today to an outstanding citizen of the St. Louis community, Maj. James F. Reddick, on the occasion of his retirement from the St. Louis Police Department after 31 years of outstanding service.

James F. Reddick was born in Carlyle, Ill., on December 23, 1918. He attended the Carlyle Grade School, where being the biggest boy in his class it became necessary for him to prove his strength, many times against his wishes. Jim believes it was at this point that he developed an interest in boxing. Jim also attended the Carlyle High School. While he was there he decided boxing would be his chosen profession and he set out to improve his boxing technique. After his father's death, Jim had to leave high school and support his widowed mother and he resigned himself to life on the family farm.

In 1936, Jim Reddick found the opportunity to move to St. Louis. The next year, his boxing career took off when he won the southern Illinois Golden Gloves middleweight championship in Centralia, Ill. In 1937, 1938, and 1940, Jim Reddick won the Ozark AAU light heavyweight championship in St. Louis, Mo. He was selected to be a member of the international boxing team in 1938. As a member of the team, Jim toured South America and Europe. He fought five fights in five countries. Jim lost the first fight in third round decision to Carlos Berte in Argentina. In Rio De Janeiro Jim fought his second fight and knocked out Jose Nicolo in the first round. The third fight took place in Uruaguay where Jim won in a decision against Josquin Mosquerz. Jim went on to knock out Migueal Morales in the third round of his fourth fight in Chile and in his fifth fight, which took place in Lima. Peru, Jim knocked out Vincente Quion in the first round. Jim Reddick was then judged the team's "outstanding fighter."

Jim Reddick's career continued and in 1940 and 1941 he captured the title of National AAU Champion in Boston, Mass. In Rochester, N.Y., Jim was awarded the diamond ring in the 1941 Tournament of Champions. That same year, Jim Reddick was a St. Louis Globe-Democrat Golden Gloves champion.

In 1942, James Reddick joined the U.S. Army Air Force and was stationed at the MacDill Air Force Base in Tampa, Fla. During his military career, Jim Reddick toured various military bases in a series of exhibition bouts with Joe Louis, then the heavyweight boxing champion of the world. Jim recalls those fights as among the highlights of his service career. While Jim Reddick was stationed at Keesler Field, Miss., he met and married his wife Martha on June 28, 1952.

First Sergeant Reddick was honorably discharged from the service after serving 31 months overseas and a total service of 55 months. He then went to work as a postal clerk at the main post office in St. Louis, Mo. While he worked at the post office he studied business administration through the GI bill at the Hubbard Business College.

Jim Reddick believes his eventual interest in the St. Louis Metropolitan Police Department was manifested during his last fight. After taking the proverbial trip to the canvass a total of five times in the first round, Jim noticed a smiling gentleman whom he later discovered was Eugene Camp, a man destined to become the chief of the St. Louis Police Department. Jim remembers, "Looking at Camp, from a horizontal angle, I knew that the fight game was no longer for me, and that the life of a police officer was." He says the happiest day of his life was March 12, 1951, when he was appointed a probationary patrolman with the St. Louis Police Department, and he remembers he was ready to lock up the world.

Jim Reddick has had a varied career with the St. Louis Police Department and attained a list of promotions:

March 12, 1951, police academy; June 2, 1951, ninth district; December 16, 1951, promoted to patrolman; March 1, 1954, secret service division; December 3, 1956, promoted to corporal; March 15, 1960, promoted to sergeant; March 15, 1960, supply division; February 1, 1962, promoted to lieutenant; February 13, 1962, robbery-burglary division; February 1, 1963, vice division; August 19, 1963, robbery-burglary division; July 10, 1965, eighth district; August 15, 1966, promoted to captain; August 15, 1966, bureau of investigation; August 24, 1966, seventh district; August 25, 1968, eighth district; October 1, 1980, promoted to major; and October 2, 1980, bureau of investigation.

Maj. Jim Reddick has always been high on police work and says he has not ever become disillusioned. He became known for his annual Christmas parties which he began in 1966 in the seventh district. Jim gave the parties because he wanted to do something for the men who had worked so hard all year without any reward. The men in the district were invited as were the residents and businessmen of the community. Jim's Christmas parties grew bigger each year and afforded a valuable opportunity for the police officers to relax and talk with the citizens of the community they served. Jim Reddick also hosted a barbecue for his men each year at Lake Carlyle.

Mr. Speaker, Major Reddick has earned the admiration, affection, and professional respect of his fellow law enforcement peers, and he will be greatly missed by the St. Louis Police Department. Throughout his career, Jim Reddick has been a truly dedicated and compassionate man. He believed in his work and he has left a real mark on our city. I understand Jim plans to vacation in Argentina, Uruguay, Peru, and Rio de Janeiro, and looks forward to working with the young boys at the Matthew Dickey Boys Club.

I salute Major Reddick on his outstanding service to the St. Louis community and I wish him a long and happy future.●

HENRY R. FOLSOM

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. EVANS of Delaware. Mr. Speaker, I note with pride and personal pleasure that on December 8 the other body confirmed the reappointment of one of my most distinguished constituents, Henry R. Folsom of Hockessin, Del., to a 6-year term on the Postal Rate Commission.

It was my honor to bring Commissioner Folsom's name to the President's attention more than a year ago when a vacancy on this Commission occurred. President Reagan appointed him early in 1982, and in March he was confirmed by the Senate. He has now been reappointed for the full term at the Commission where he has already made his mark. He was elected Vice Chairman in April and has played a leading role in the complex activities of this Commission. I was proud to receive a statement from the Commission's Chairman, Janet Steiger, a few weeks ago, expressing her pleasure at Henry Folsom's substantive contributions to the Postal Rate Commission.

As an active supporter of Ronald Reagan in 1980, I was impressed by his genuine desire to bring competent and dedicated persons into his administration who would make a personal sacrifice to enter public service. Henry Folsom is indeed such a man. His long record of outstanding public service in my home county of New Castle is appreciated by all of us who were beneficiaries of his sound judgment and brilliant political leadership.

Henry and his charming wife, Grace, are one of Delaware's most illustrious teams, and I am happy that our State is "lending" them to this administration for 6 more years.●

TRIBUTE TO B. F. SMITH

HON. DAVID R. BOWEN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mr. BOWEN. Mr. Speaker, one of the greatest rewards of my congressional service has been the opportunity to work closely with one of Mississippi's most outstanding leaders, B. F. Smith, executive vice-president of the Delta Council. Under B. F. Smith's leadership, the Delta Council, an economic development organization representing 18 rural counties in the Mississippi Delta region, has earned an impressive national reputation for work in agricultural and industrial development.

The Delta Council, which holds its annual membership meeting at Delta State University in my hometown of Cleveland, Miss., has been the driving force behind the economic development of the entire Mississippi Delta area and, since his association with that organization in 1947, B. F. has clearly been the driving force behind the Delta Council.

B. F. is stepping down from his post of executive vice-president effective January 1, 1983, although he will continue to serve the organization as an executive assistant and will work on special assignments. I can truthfully say that I know of no other person in the entire State of Mississippi who has contributed more to the quality of life in that area that B. F. Smith, and he will be sorely missed.

I wanted to share with my colleagues the following article from the Leland Progress of Leland, Miss., which is a fitting expression of praise and thanks for B. F.'s work.

[Leland Progress, Dec. 2, 1982]

MONUMENTS TO SMITH TAKE VARIOUS FORMS

If you were to visit the Mississippi Delta, you probably wouldn't see the name "B. F. Smith" on a marble statue, a bronze plaque, or an impressive new building. But monuments bearing testimony to his 33 years of dedicated service to Northwest Mississippi are plentiful in the 18 rural counties that make up the region known as the Delta.

The monuments take various forms . . . like the vastly improved farm-to-market road system and new four-lane highways that link the Delta with important trade centers . . . or the crucially-needed drainage and flood control projects now in place on the Yazoo-Mississippi River Basin . . . or the region's transformation from a one-crop "feast or famine" economy into a diversified farming area that last year produced more than 70 percent of Mississippi's agricultural products . . . or the 255 manufacturing plants that have been attracted to the area to create new jobs and help balance the agricultural economy.

B. F. Smith, of course, didn't accomplish these things single-handily. But it is safe to say that it took the vision, the leadership and the ingenuity of a B. F. Smith to bring them about. Of all the contributions this outstanding man has made to rural Northwest Mississippi, by far the most important is his singular ability to organize the top business, professional and agricultural leadership into an active and cohesive group that works effectively to improve the quality of life for all people in the Delta.

He has used this talent well in his official capacity as Executive Vice-President of the Delta Council, the areawide development organization that has spearheaded the section's economic and social progress. But undergirding all that he does in his professional capacity—and indeed driving him far beyond the requirements of his job—is a deepseated love for his native Delta and sincere compassion for its people. These are the qualities that make B. F. Smith go the extra mile in service and dedication, and these are the qualities that time and again have deterred him from accepting more lucrative positions with private industry in other parts of the state and nation.

Neither time nor space allows a complete listing of the numerous and varied projects in which B. F. Smith has played a key role. But a quick rundown of a few in recent years will hopefully demonstrate the scope of his activities:

One of B. F. Smith's unique abilities is to recognize opportunities and establish priorities. Soon after becoming Executive Vice-President of the Delta Council, he recognized that if the soils of the Delta area were to approach their economic potential, an effective agricultural research and extension program was essential. His untiring efforts led to unified support by the people of the area for legislation to permit funding of agricultural research through millage from county government, which culminated in passage of Mississippi House Bill 481 in the 1963 session. This bill authorized Supervisors of the Levee District Counties to levy special taxes for funding agricultural research. These funds have been made available to the Mississippi Agricultural and Forestry Experiment Station each year thereafter.

In 1974 and 1975, the Delta—like many other farming areas of the United States—suffered crop disasters as the result of unusually poor weather conditions. This occured at a time when commodity prices in both domestic and foreign markets were almost stagnant and when farmers also were beginning to feel the bite of inflation. B. F. Smith began exploring the feasibility of a "disaster relief" credit system that would allow farmers to obtain emergency farm credit loans under the existing Farmers Home Administration program.

Drawing on his extensive knowledge of agricultural credit policies, he devised special provisions that would enable farmers to use this type loan when conventional credit was unavailable or simply out of financial reach. During 1974 and 1975, emergency farm loans totaling more than $100 million were made each year in the State of Mississippi alone—and the great majority went to small family farming operations which would have ceased to exist had it not been for B. F. Smith's ingenuity and determination.

As part of his campaign to diversify agriculture in the Delta, Smith was in the forefront of a campaign to allow unlimited acreage for rice growers. Many Delta farmers had been attempting to grow cotton and soybeans on land ill-suited for row crops but ideally suited for rice production. But under the federal farm programs prior to 1976, only landowners who held allotments based on past history of rice production could grow rice. Smith organized the agricultural leadership of the Delta in an effort to change the situation. And despite stiff resistance from many large commercial rice farmers in the rice-producing areas of Texas, Arkansas, Louisiana and other parts of Mississippi, the first steps of a program initiated by Smith ultimately became federal legislation allowing all farmers to grow rice.

Before its passage, less than 35,000 acres of Delta land were in rice production. But today—three years later—rice plantings total more than 240,000 acres. Delta farmers have an important new crop, and the land's productivity and value have thus been enhanced.

Education is another area that has benefitted tremendously from this man's efforts. In the early 1970s, he headed the "Committee of Sixty"—a group organized to obtain increased funding for the state's nine universities and colleges. Armed with documented facts and informational data, Smith carried the fight for the urgently needed funds to the State Legislature—testifying before the budget commission and the appropriations committees of both houses, and finally appealing successfully to the entire legislature.

This effort paid off in continued growth for Mississippi's institutions of higher learning and has done much to assure proper emphasis for the state's educational programs in future planning.

Smith also has been a strong proponent of vocational-technical training in Mississippi's secondary schools and junior colleges. Mississippi Delta Junior College, now the state's largest vocational-technical training center, is one of the many schools that is providing rural Mississippians with educational opportunities as a result of B. F. Smith's continued emphasis on advancing occupational skills and training.

The industrial development of Northwest Mississippi is due in large part to the tireless efforts of B. F. Smith. in 1957, he made a forceful presentation to 95 Delta business leaders—convincing them of the need to initiate and finance an Industrial Development Department in the Delta Council area. Since the creation of a fulltime Industrial Development Department headed by Smith, more than 255 new manufacturing plants have been attracted to the area. More than 26,000 new jobs have been created and the industrial payroll has grown from about $33 million to more than $365 million annually. Bank deposits have increased by $1.8 billion and retail sales have climbed from $368 million in 1957 to almost $2 billion in 1979.

Without the enonomic transfusion provided by this industrial development, many of the Delta area's small communities would have disappeared. As the guiding force behind the effort, B. F. Smith has demonstrated his own special ability to tap almost every one of the area's human and natural resources in order to assure rural citizens of the opportunity to live and prosper in the Mississippi Delta.

Simply put, he is one of the most respected men this region has ever produced.

Our wishes are for the best of life and health for him and Mrs. Smith in the years to come. Thanks, B. F., for passing our way.●

JOHN ROUSSELOT

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. O'BRIEN. Mr. Speaker, JOHN ROUSSELOT will retire soon, and that will be a great loss to the House.

JOHN has had a long and distinguished career in Congress. Most recently he has served on the Social Security Subcommittee on the Ways and Means Committee, where he has championed the interests of the Nation's elderly.

JOHN has also served on the Joint Economic Committee, the Post Office and Civil Service Committee, and the Committee on Banking, Finance and Urban Affairs.

Personally, JOHN has been a good friend and true gentleman. Like all of us in Congress, I regret his departure from Congress greatly. He will truly be missed.●

HAITI: HUMAN RIGHTS STILL AN ISSUE

HON. SHIRLEY CHISHOLM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

● Mrs. CHISHOLM. Mr. Speaker, last Friday my colleague, the gentleman from Texas, (Mr. LELAND) sponsored a special order on behalf of Human Rights Day. As I leave Congress, I hope that the House will continue to support human rights causes in the future. In the 97th Congress, we can be proud of the fact that it was the House who successfully fought to retain many of the foreign aid restrictions against those countries with a pattern and practice of human rights abuses.

The Congressional Black Caucus has played a leadership role in this area, as well. Our efforts on behalf of Haitian refugees actually focused great attention on the human rights conditions in Haiti, conditions which prompted many Haitian nationals to flee to our shores for refuge. The caucus' work in this area has been greatly aided by Michael S. Hooper and the Lawyers' Committee for International Human Rights. Their reports have also provided insight and definitive information regarding human rights practices in Haiti. It is my hope that a new organization, the National Emergency Coalition for Haitian Refugees, will be able to continue those efforts under the leadership of Michael Hooper. In this regard, I have submitted for my colleagues' attention, the latest human rights report on conditions in Haiti. A more definitive work on this subject can be found in a report to the Organization of American States entitled "Violations of Human Rights in Haiti-June, 1981-September, 1982."

VIOLATIONS OF HUMAN RIGHTS IN HAITI: A SUMMARY, NOVEMBER 1982

The twelve month period analysed in this report reveals a lack of commitment on the part of the Government of Haiti to removing institutional impediments to the protection of human rights, official disrespect for the rule of law, and a pattern of gross violations of basic human rights in the following areas: [1]

(1) Recent background. The effects of the November, 1981, crackdown on journalists, lawyers and human rights activists continue unabated: independent journalists and politicians have been imprisoned, forcibly exiled or silenced; human rights monitors have been forced to disband or to go underground; and an informal and infant trade union movement has been crushed.

(2) Security forces. The complex network of official and semi-official Haitian security forces continues to violate the rule of law by arresting or detaining without charge or explanation persons perceived to be opponents by the Duvalier Government. These forces regularly use severe beatings as an interrogation technique. In August, 1982, a new series of arrests occurred in Port-au-Prince that resulted in the detention without charge or explanation of approximately 35 persons in one of Haiti's political prisons, the Caserne Dessalines. Well known lawyers, engineers, and economists were included among those held incommunicado and naked in isolation cells. Several were threatened and mistreated and others have been prevented from leaving the country.

(3) Legal system. The Haitian Government continues to disregard its own Constitution and international law through the

[1] For additional information, please see the forthcoming report by the Lawyers Committee for International Human Rights, entitled: "Violations of Human Rights in Haiti—June, 1981–September, 1982: A Report to the Inter-American Commission on Human Rights of the Organization of American States."

operation of state security legislation, exemplified by the "Anti-Communist Law of 1969", the annual suspension by the President-for-Life of important articles of the Constitution through enactment of the "Plein Pouvoir" and through the systematic disregard of the rule of law by Haitian security forces.

The practice of granting full powers to the President-for-life during the time when the legislature is not sitting "enables the President to govern by decree for a period of eight months during which time the people are deprived of constitutional guarantees and the most elemental human rights". (OAS ICHR Sept. 1982.)

The Haitian judicial system continues to violate various procedural rights of defendants guaranteed both by the Constitution and by international law. On February 26, 1982, the Haitian Court of Appeals annulled on the basis of a technical sentencing error the August, 1981, conviction of 26 defendants charged with arson and plotting against the internal security of the Haitian state. Eleven of the defendants were members of the Christian Democratic Party (PDCH), including its president, Sylvio Claude. Two others were journalists imprisoned during mass arrests conducted by the Government in late November, 1980. On August 27, 1982, 22 of these defendants were retried on similar charges. All were convicted and sentenced to the maximum term of six years in prison. The defendants were denied access to their families and to legal counsel and none were informed of the specific charges on which they were to be tried until days before the trial began. While in detention, a number of defendants were subjected to harassment, beating and intimidation by members of the Haitian security forces. The trial took place behind road blocks set up by the Government's security forces who surveilled the court house with machine guns. After significant national and international pressure was raised following the August, 1982, convictions, President Jean-Claude Duvalier announced on September 21, 1982, that the defendants would benefit from a presidential amnesty on the occasion of the 25th anniversary of the Duvalier era, September 22, 1982. However, some of the defendants remain under strict house arrest and are forced to register with the Criminal Research office of the police every 72 hours.

(4) Human rights monitors. The Haitian Government is not willing to tolerate the existence of any person or organization that advocates the promotion of human rights in Haiti. The Government has effectively suppressed all activities of the Haitian League for Human Rights through the arrest and beating of some of its members and the forcible exiling or intimidation of others. In addition to direct acts of intimidation against the Haitian League for Human Rights and its members, the Haitian Government announced in April, 1982, the creation of an official agency, the National Commission on Human Rights, to replace private human rights monitors. Other Government human rights offices have been created in the past, but they never issued any substantive human rights communication nor took any specific actions. This newly created Government office made no comment following either the August, 1982, trial described above or the mass arrests that occurred earlier that month.

(5) Political prisoners. Prisoners in Haiti's political prisons continue to face severe mistreatment and violations of their fundamental due process rights. While international pressure seems to have improved conditions slightly at the National Penitentiary, no change occured in conditions at other prisons. Most of the defendants at the August, 1982, trial of 22 political prisoners complained in open court of mistreatment, beatings, or torture during their imprisonment. Several persons are known to have died in political prisons in Port-au-Prince during 1982. After the "amnesty" of September, 1982, at least 22 persons remain incommunicado without charge at the National Penitentiary alone. (See Lawyers Committee report for list.)

According to the Inter-American Commission on Human Rights of the OAS, "a considerable number of people remain in the prisons of Haiti without any order from the competent authorities to bring them to trial. It must be added that conditions in the detention centers continue to be worse than deplorable". (Sept., 1982.)

(6) Political participation. The Haitian Government continues to suppress and stifle any effective political activity or opposition. No political parties or independent civic organizations are allowed to operate in Haiti and most independent political leaders are imprisoned or exiled.

(7) Freedom of communication. Freedom of the press is severely curtailed by state security legislation and by a series of press laws that include a highly restrictive act passed in September 1979, and amended in March 1980, which provides for prior censureship and harsh penalties for those who are deemed to have insulted the Duvalier family, the Government, or its allies. In 1982 these open-ended laws continued to be applied to all printed and broadcast media. In March 1982, at its annual meeting, the Inter-American Press Association severely condemned these official restrictions of press freedoms in Haiti.

(8) Trade union rights. In the last two years, the Haitian Government has systematically eliminated all legitimate free trade union activity. All the leaders of the major infant labor organizations have been arrested without charge, forcibly exiled or forced underground. This situation has continued to deteriorate in 1982.

(9) Ministerial changes. Recent changes in the Government have further undermined the prospects for the restoration of basic human rights protections. On July 13, 1982, key ministers pledged to embark on fiscal and social reforms were dismissed without explanation and replaced by persons closely linked to the regime of the late President-for-Life, Francois Duvalier.

(10) "In general, it may be said that no progress has been made in the situation of human rights in Haiti, and that there is no evidence that would lead the IACHR to suppose that there will be any government opening in the near future that will reestablish free democratic life, ideological pluralism or the free exercise of public freedoms." (O.A.S. Sept. 1982.)●

PUBLIC WORKS PROGRAMS DO NOT CREATE JOBS

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. PHILIP M. CRANE. Mr. Speaker, in response to recent legislation concerning Federal jobs creation programs supported by a national gasoline tax, these articles have come to my attention. It appears that continued short-term employment legislation only serves to "feed the fire" of long-term economic disaster for the United States. As these articles point out, new public works job programs will not aid in decreasing the present 10.8 percent of unemployment, but actually increase U.S. unemployment in the long run.

A recent study by OMB found that few workers employed in public works projects were unemployed prior to being hired; as few as 12 percent in one program and no more than 27 percent in another. This is so because 50 to 75 percent of jobs created by public works projects require skilled labor, while the core of unemployed labor is unskilled.

OMB also found that public works were a high-cost method of creating employment citing a cost per job of anywhere from $69,320 all the way up to $198,059 depending on the number of existing jobs which are incorporated into the program. This low substitution rate is due to two major factors. The first is the high cost of complying with union wage requirements. The second is that Federal public works expenditures have historically replaced many States and local government expenditures, therefore resulting in no net job creation. "Quick fix" public works programs are simply not the answer to our unemployment problems. For these reasons, the following articles by Bruce Bartlett and Lindley Clark, Jr., are well worth my colleagues' attention.

The articles follow:

[From the Wall Street Journal, Nov. 30, 1982]

PUBLIC WORKS PROGRAMS DO NOT CREATE JOBS

(By Bruce Bartlett)

As Congress reconvenes for a lameduck session, congressional leaders seem united on the need for a new public works jobs program to combat unemployment, financed by an increase in the gasoline tax. President Reagan has said he supports the proposal primarily because of the deteriorating state of the nation's highways. Unfortunately, it is highly unlikely that such a program will have any significant impact on reducing the unemployment rate. Indeed, it may even increase joblessness.

The principal problem is that business cycles can seldom—if ever—be identified until they have substantially run their course. Consequently, federal jobs programs invariably aren't enacted or implemented until the recession is virtually, or even entirely, over. This is particularly so because politicians are inclined to react to the unemployment rate, which lags behind the business cycle, rather then to changes in real GNP growth.

For example, the 1954 Economic Report of the President, submitted to Congress in January, asserted that the economic state of the nation was "marvelously prosperous,"

although a downturn had begun the previous July. Similarly, it was not until late in 1960 that it was recognized that a recession had begun in April. And the relatively brief 1969-70 recession was over almost before anyone realized it was taking place.

JOBS WILL NOT BE CREATED IN TIME

Consequently, counter-cyclical jobs programs could not even be enacted unitl well after a recession had begun. Although the 1960-61 recession ended in February 1961, anti-recessionary actions were still being taken in September 1962, when Congress adopted a $900 million accelerated public works program to combat the recession that ended 19 months earlier. The Public Works Impact Program was approved in 1972 to fight the recession that ended in 1970. And two public works programs were enacted in response to the 1973-75 recession: one in 1976 and another in 1977.

In addition, a public works program—even if enacted in a timely fashion—will require a significant period before coming on stream. According to a study by the Office of Management and Budget in 1979, less than 8 percent of public works projects can be completed in nine months or less, whereas 30 percent require two years or more. Hence, even if a public works program could be enacted at the beginning of a recession and construction begun within 90 days, the vast bulk of employment wouldn't be created until long after the average recession—which lasts about 12 months—had ended.

Another problem is the relatively low labor intensity of public works projects and the considerable mismatch between the job skills required for construction work and those of the unemployed.

According to OMB, the typical public works project expends only 22 percent of its cost on direct employment. The other 78 percent of expenditures have only indirect employment effects no different form a general increase in government expenditures. In addition, OMB found that very few workers employed in public works projects were unemployed prior to being hired—as few as 12 percent in one program studied and no more than 27 percent in another. And because 50 percent to 75 percent of jobs on public works projects are skilled, the chances of such a project helping unskilled, hard-core unemployed are almost nil.

Finally, OMB found that public works were a relatively high-cost method of creating employment—from $69,320 for each direct job created, assuming no substitution for existing employment, to as much as $198,059 per job with 65 percent substitution. The problem is twofold: First, federal public works projects must comply with Davis-Bacon regulations, which effectively force the payment of high union wage rates on all projects.

Second, experience has shown that federal public works expenditures simply replace a large amount of state and local government expenditures for public works, meaning there is no net job creation. The amount of this substitution rises the longer a program is in place, reaching as much as 100 percent according to some estimates.

In addition to the problem of substitution, there is also the problem of job displacement. The jobs program will destroy some jobs even as others are created. This is because the program will cause a reduction in spending for some other federal program, an increase in taxes, or the displacement of private expenditures due to "crowding out."

Putting all this together, consider the current proposal to increase federal expenditures for road and bridge repair funded by a five-cent increase in the gasoline tax. We are already 15 months into the recession with many indicators showing it to be ending. It will take Congress several weeks to enact the proposal even if it works at high speed, with the possibility that final action cannot be completed before adjournment. It isn't such a simple thing for Congress to raise the gasoline tax without also opening up the bill to other tax issues, such as President Reagan's plan to speed next year's tax cut.

Nor will it be easy for Congress to devise a formula for allocating public works money that is fair to everyone. Thus there will probably be considerable debate on the form of the legislation even if there is consensus on the need for it. Assuming Mr. Reagan signs such legislation this year, moreover, it is doubtful that the first dollar can be spend until next spring at the earliest, with fall being a more reasonable starting time.

Also, it is highly unlikely that economic conditions won't have improved by next fall. This means the program will end up being pro-cyclical—increasing, rather than diminishing, business fluctuations. The program will take effect just when it will end up doing harm rather than good.

Perhaps most important, the gasoline tax boost will have negative effects on employment that no one has taken into account. It is certainly not going to do any good for the hard-hit U.S. auto industry. It may simply accelerate the purchase of smaller, more fuel-efficient foreign cars just as the OPEC oil price increase did.

And even if we assume that as many jobs are created as are destroyed—a very questionable assumption—the tax is likely to be implemented first, meaning that the job-destroying effect of the tax will occur before the job-creating effect of the public works spending. Even if the public works spending and the tax could be matched in the timing of dollar flows, the effect would simply be a trade-off between construction related jobs and auto-related jobs.

QUICK FIX IS NOT THE ANSWER

There also will be regional impacts, since the jobs created are unlikely to be exactly where the unemployed currently are or where the additional job loss from the gasoline tax will be. We may end up creating more unemployment in Detroit while creating a labor shortage somewhere else. Congress also ought to consider that any gasoline tax increase will be permanent, whereas the public works will create jobs only temporarily. Thus there will almost certainly be more unemployment in the long run than if Congress does nothing.

The old-fashioned Keynesian remedy assumed that public works were paid for by deficits. Congress could adopt this method in lieu of enacting a new gasoline tax. But given a deficit already approaching $200 billion and the fact that it would require some $80 billion in public works expenditures to knock one percentage point off the national unemployment rate, this approach seems implausible.

Moreover, it is unlikely that politicians could argue today, as they did earlier, that there are no negative effects from federal deficits. Many people believe that they are primarily responsible for high interest rates. If this is the case, we would simply be trading jobs in construction for others in housing and other interest rate-sensitive industries, not to mention the negative impact of higher interest rates throughout the country.

The human cost of 10.4 percent unemployment is unacceptable. But at some point, we must admit to ourselves that quick-fix public works programs aren't the answer. Instead of reacting to the last recession we ought to be working to make sure that the recovery can be sustained.

[From the Wall Street Journal, Nov. 30, 1982]

THE WAY TO EASE UNEMPLOYMENT PROBLEMS

(By Lindley H. Clark, Jr.)

Washington is full of ideas for easing the unemployment problems. The trigger for all this was the government's announcement early this month that the jobless rate in October has risen to 10.4 percent of the labor force.

The Democrats were first off the mark, putting together an expensive jobs program that would be financed, at least in part, by savings somewhere in defense. But the administration has its own ideas, some of which are beginning to surface. President Reagan last week endorsed a gasoline tax increase to raise funds for highway and mass-transit spending, although he was careful to stress the need for the projects, not their job-creating potential.

It's just as well. One major problem with government job program is that they often provide jobs for people who don't really need them. Fixing up highways and mass tranist systems would require skills that just might not be really available among the nearby unemployed.

Nonetheless it seems inevitable that we will go through this sort of exercise at about this point in the business cycle. Unemployment always lags behind the business cycle, and this time is no exception.

When business slows, companies usually wait a few weeks before they start laying off workers. Employers don't know initially how severe the downturn will be or how long it will last. They worry some about employee morale, but they also worry about the costs of training or retraining a work force once the slowdown is past.

In the latest session, companies thought an upturn was under way last spring; they read comments to that effect in this newspaper and others. Instead, the slump dragged on into the summer and fall, so many companies increased layoffs. In September, the jobless rate finally topped 10 percent.

A modest recovery now may be under way, propelled by defense spending, a pickup in housing and modest strength in consumer outlays. But most companies will wait many months to make sure the upturn is for real before they start energetic hiring. The unemployment rate very well may hover around 9 percent through next year.

How do we get off this roller coaster?

John B. Taylor of Princeton looks at a facet of the problem in "Union Wage Settlements During a Disinflation" (National Bureau of Economic Research, Working Paper No. 985). Since 1979 the Federal Reserve has been slowing the growth rate of the money supply in an effort to reduce inflation, and we have indeed had quite a disinflation.

At the same time we've had a lot of overlapping labor contracts, many of them written for three years and most written on the assumption that inflation would continue almost unabated.

Manufacturers who find that their product prices are rising more slowly than labor costs (or aren't rising at all) have few choices. They can go to the unions and ask for concessions. If it's apparent to the unions that the companies are in deep trouble, concessions may be forthcoming, but the current problems of Chrysler show that even such concessions aren't likely to last long.

The chief alternative the employers have is to reduce labor costs by layoffs, and that's the route most have taken.

One reason the problem has been especially severe this time is that the disinflation has been both sudden and erratic. Mr. Taylor suggests that companies might be able to get by the overhang of the three-year labor contracts if the disinflation at the start had been quite smooth and very gradual. Then when unions and managements got together to renew the contracts they could do so in the knowledge that the more rapid part of the disinflation was still to come.

"The difficulty with this in practice," Mr. Taylor concedes, "is that wage negotiators have to be convinced that the deceleration will come later even though it is not occurring today. This credibility problem is perhaps the central source of difficulty which is raised by long-term union contracts during a period of deflation."

If the contracts are allowed to continue growing and the Fed continues to slow money growth, don't worry about 10% unemployment—we'll have more than that. If on the other hand the Fed prints money faster, it will permit a resumption of inflation and a validation of the big contracts.

Mr. Taylor offers no solution, and there isn't any easy way out.

We've gone through a lot of disinflation, and the volatility of the money supply has made the adjustment more painful than needed. No one at the moment would urge the Fed to slam on the monetary brakes, as it in effect did more than once in the past three years.

As the Fed has pondered what it has wrought it has been understandably disturbed. In the current uncertain state of the economy there is reason for some caution. It is hard, however, to see any rational argument of reinflation, a process that the central bank now seems in danger of starting.

The way to avoid the ups and downs of employment is simple enough to say. Avoid the ups and downs of the economy. That calls for government to reduce its own ups and downs, induced by such measures as stimulative job programs introduced as the economy is moving up on its own.

If we ever lessen the oscillations we can start reducing the absolute level of unemployment, in part by giving people more incentive to work.●

TRIBUTE TO GEORGE TRIEZENBERG

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. RUSSO. Mr. Speaker, an outstanding educator in my district will be retiring at the end of this year—the retirement comes in his 42d year of work in education.

Mr. George Triezenberg, the assistant superintendent for administrative services, Dwight D. Eisenhower High School in Blue Island, has spent these years as a teacher, principal, and administrator. He drew national attention for his remarks on discipline on a Paul Harvey radio commentary and I will include the news coverage of this along with my remarks. In addition, he received the "Those Who Excel" award by the Illinois State Board of Education in 1978.

His professional credentials are so extensive that I can only touch on them here. They reflect a man who has dedicated himself to public service, to the education of our young people and whose talents and caring have no doubt had a profound and positive impact on the many lives he has touched.

He has worked at the elementary, high school and college level teaching and has been principal for five high schools as well as director of the Institute for Teachers of Adult Illiterates at Chicago State University. He has served as president and secretary of the Illinois Association of Secondary School Principals and speaker at both National and Illinois Association of Secondary School Principals conventions. He has been a vice president of the Chicago Principals Club and a member of the General Advisory Committee for the Illinois State Scholarship Commission.

In other areas, he has been a trustee for the Village of Evergreen Park for 12 years and chairman of the police and fire commission for the same village for 2 years and a member of the board of education, Community High School District 231 for 3 years. Numerous articles by Mr. Triezenberg have been published in such publications as the Chicago School Journal, Illinois Vocational Progress, and the NASSP Bulletin.

It is an impressive record. This man has earned the respect he has from those who know him. His clear thinking, as reflected in the remarks which Mr. Harvey felt deserved attention, are what we would like to see more of from our educators. He has also earned some rest, and I know my colleagues join with me in commending him for his work and wishing him well in this retirement.

I would now like to share with you Mr. Triezenberg's thoughts on discipline.

NATIONAL BROADCASTER LAUDS PRINCIPAL'S DISCIPLINE SPEECH

A recent speech on discipline in schools by Eisenhower campus Principal George Triezenberg to the Chicago Suburban Deans' association provided material for a recent radio commentary by Paul Harvey.

The commentary was carried as part of the Paul Harvey news broadcast at noon on May 18 over radio station WJJD.

In an excerpt from that broadcast, Paul Harvey said: "One school administrator is talking back to the bureaucrats, George Triezenberg, principal at Eisenhower High school in Blue Island, suburban Chicago.

"He told a meeting of county educators not to be afraid to suspend or expell students who deserve to be suspended or expelled. He says he does it.

"Triezenberg has real battle scars to show for his years as a school administrator. Battle scars from violent students and parents.

"But he says any student in his school who uses obscene and vulgar language in a classroom is 'out.' He says we teachers and other students have rights, too. They have a right to an education free from that sort of thing.

"Triezenberg says there are people in our government who want to take away our right to suspend students. But, he says, 'I make no apology to them nor will I hesitate to suspend any student who asks for it by persistent misconduct.'

"Mr. Triezenber says the classroom violence of the sixties and seventies is subsiding some—is on the downswing—but discipline remains a problem.

"Now, he says, we have alcohol and drugs compounding that problem. We have a bombardment of violence on television and in movies. . . . Today's delinquents have wheels under them. . . . And we have the vanishing impact of home and church. He says the problem used to be the absentee parent. Now it's the absentee parents.

"He asked the assembled educators, 'How often have you tried to telephone the home of a student and been unable to reach anyone?'

"And now, says Mr. Triezenberg, we have these 'numbers reports.' We have monthly statistics supplied by the HEW (Health, Education and Welfare) and the State Department of Education showing the number of suspensions in each school . . . and demanding that the rate of minority students suspended must not exceed the suspension rate for white students.

"That, says the principal, is 'ridiculous-totally ridiculous.' "

In his speech to the deans, Triezenberg went on to say, "The only legal, moral, professional and justifiable basis for suspensions and expulsions is gross and/or continuous misbehavior which results in the abuse of staff, students and property and that conduct which disrupts the educational process."

"The color of one's skin has no bearing on the decision," he added.

Triezenberg was one of the featured speakers at the Student Violence and Truancy program sponsored by the Office of Cook County Superintendent Richard J. Martwick in conjunction with the Chicago Suburban Deans' association. The topic of his address was Administrative Approaches to Preventing Violence.

The Eisenhower campus principal focused on discipline as a means of preventing violence. He told the deans that discipline is one of the most important concerns in schools today.

Parents, teachers, the public at large and even the students themselves are demanding that discipline be maintained in the classrooms, he said.

Triezenberg pointed out that discipline which is "prompt, consistent and fair" is a key to preventing disruptions and outbreaks of violence in the schools.●

VICA

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. SKELTON. Mr. Speaker, our Nation is currently facing a shortage of skilled workers that threatens our position as a world leader in agriculture and industry, and endangers our national security. This problem must be solved through a coordinated effort of the educational community, parents, private industry, and government.

I am pleased to note that there is one group which is already doing its share. The Vocational Industrial Clubs of America (VICA) is a national organization for students preparing for futures in the trade, industrial, technical and health occupations. The 250,000 student members are dedicated to the development of their occupational skills, and, moreover, they adhere to the ideal that the Nation's craftworkers and technicians must possess qualities of leadership, citizenship, and character to complement their occupational skills.

When the 98th Congress convenes in January, I will push for early consideration of a resolution to designate the week of February 6, 1983, as National VICA Week to focus the attention of the American people on the important contributions being made by these students.●

STUDENT LOAN DEFAULTERS MUST BE ELIMINATED

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. BIAGGI. Mr. Speaker, today I am introducing legislation which will assist us in our ongoing efforts to track down those students who have failed to repay their guaranteed student loans—loans that were made with the full faith and credit of the U.S. Government and are now the subject of collection activities by the Department of Education and State agencies which administer this program.

As a result of the Debt Collection Act of 1982, efforts have been stepped up to match the lists of defaulters with Federal employees. As a result of this activity, a total of $9 million has been recovered and another $68 million will be collected from 47,000 Federal employees. My bill would build upon this practice by authorizing the Secretary of Education to take steps to encourage States to match their delinquent lists with those of State employees. Such action would uncover even more names and would facilitate the Department and States in their loan collection efforts.

Currently, this matching with State employee lists is only done by three States—New York, New Jersey, and Pennsylvania. In a survey of State guarantee agencies it was revealed that the remaining States are not doing this matching because they either never thought of it, they did not want the publicity or they felt that the cost of such an effort would not yield a high enough number of defaulters to be workth it. In the case of small States which have just entered into the program, my bill provides an exemption for them by allowing the Secretary to waive such action in their case.

In my own State of New York, I am pleased to report that our activities in the past 3 years have yielded the names of nearly 5,000 State employees in default. Clearly, this practice can—and should be reproduced in other States. We cannot allow the abuse of this very worthy program to continue and I am confident that my bill would help us to end it.●

JOBS WITH PEACE RESOLUTION

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. EDWARDS of California. Mr. Speaker, today I have introduced a resolution addressing the jobs with peace referendums which passed by large margins everywhere they were on the ballot—including Baltimore, Md., Lansing, Mich., Pittsburgh, Pa., and San Jose, Calif. This resolution expresses the sense of the House that more money should be made available for jobs and programs in education, transportation, housing, health care, human services, and other socially productive industries, by significantly reducing the amount of our tax dollars spent on nuclear weapons, foreign military intervention and wasteful military programs.

The message from the voters on November 2 was loud and clear, and in direct opposition to the current policies of the Reagan administration. With an average affirmative vote of 65 percent, the people of America have called upon the U.S. Congress to divert a significant amount of money from military programs and use these funds to stimulate jobs and industries in more socially oriented programs.

Despite the growing opposition from many Americans, next year's military budget will still average more than $1,200 from each wage-earning taxpayer. While 10 million of our citizens are out of work, the Reagan administration is embarked on the largest peacetime military buildup in U.S. history—more than $1.7 trillion over the next 5 years. This program will cost the average American family over $20,000 in income taxes. These huge military expenditures are a major factor underlying the social and economic crisis which we are currently facing.

Our Nation's industrial base is rapidly eroding. Steel, auto, construction, and other essential industries have been forced to lay off hundreds of thousands of workers. Every dollar spent on military programs creates far fewer jobs than that same dollar spent on civilian activities. Federal dollars that should be invested in jobs and modern industries are being drained off into weapons production. These huge military budgets are contributing to large Federal deficits and high interest rates.

The people of America have called upon the U.S. Congress to redirect significant amounts of Federal dollars currently being spent on nuclear weapons and other wasteful and dangerous military programs, and to make these funds available to the more productive social industries.

Even in my own district, San Jose, Calif., where many of my constituents are employed in Silicon Valley, where the military industries benefit from weapons contracts to the tune of $2 billion per year, the referendum was passed by a surprising 62.3 percent. Congress cannot afford to ignore this mandate from the American people.

This public outcry must be kept in mind as the 98th Congress begins its session. We must begin to develop strategies and legislation which will support and strengthen expanded jobs programs funded by savings in the military budget. We must also strengthen our opposition to nuclear weapons systems, increased military spending, and wasteful weapons programs all funded by further cuts in our much needed social programs.

I introduce this resolution today, with 52 of my colleagues, to acknowledge that the voice of the American people has been heard. The military budget cannot continue to grow at the expense of the American citizens. We are hopeful that this resolution will set a precedent for the direction of the 98th Congress, where the Federal Government will no longer be funding a Pentagon "wish list," and this money will be spent instead on industries which can actually get Americans back to work, and the United States back on the road to prosperity.

COSPONSORS OF THE JOBS WITH PEACE RESOLUTION INTRODUCED BY CONGRESSMAN DON EDWARDS OF CALIFORNIA

Joseph Addabbo, Les Aspin, Les AuCoin, Michael Barnes, Philip Burton, William Clay, John Conyers, William Coyne, George Crockett, Ron Dellums, Merv Dymally, Joseph Early, Bob Edgar, William Ford, Wyche Fowler, Barney Frank, William Gray, Steny Hoyer, Robert Kastenmeier,

Ray Kogovsek, Jim Leach, Mickey Leland, Mike Lowry, Ed Markey, Robert Matsui, Nicholas Mavroules.

Barbara Mikulski, Norman Mineta, Parren Mitchell, Joe Moakley, Richard Ottinger, Leon Panetta, Donald Pease, Charles Rangel, Henry Reuss, Peter Rodino, Ben Rosenthal, Patricia Schroeder, Charles Schumer, John Seiberling, James Shannon, Paul Simon, Stephen Solarz, Pete Stark, Louis Stokes, Gerry Studds, Doug Walgren, Harold Washington, James Weaver, Ted Weiss, Tim Wirth, and Howard Wolpe.●

GEORGE KISTIAKOWSKY—A CHAMPION OF ARMS CONTROL

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. MARKEY. Mr. Speaker, I am saddened by the death of George B. Kistiakowsky, professor emeritus of chemistry at Harvard University, on December 7. I have always had the utmost respect for his expertise and his deep commitment to arms control. Professor Kistiakowsky came to the United States in 1926 and taught for most of the time at Harvard University until he retired in 1971. As one of the Nation's leading scientists, he was very much involved in the Manhattan project of the Los Alamos Laboratory. Later, he chaired President Eisenhower's Science Advisory Committee from its inception in 1957 until 1963. As special assistant for science in the Eisenhower administration, the highest scientific position in this country, he had to deal with issues such as the space program and the negotiation of the test-ban treaty.

I would like to emphasize that Dr. Kistiakowsky belonged to that small group of scientists who understood fairly soon what the explosion of the bomb meant to mankind. "After working so long on those weapons, I came to the conclusion the time had come to control them," he said in 1980.

This indeed was the motto that governed his activities, especially as chairman of the Council for a Livable World, and also in numerous articles he wrote and speeches he gave on security and arms control issues. Mr. Speaker, with George Kistiakowky this country has lost a dedicated and convincing advocate of arms control. His commitment, I am sure, is now being taken up and spread by the nuclear freeze movement that is gaining strength in this country.●

SUPPORT THE PEACE CORPS: A FIRST-CLASS AMERICAN EFFORT

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. PORTER. Mr. Speaker, it has been said, truly, that there are few Government programs that accomplish their intended purposes, and only a minuscule handful that do so efficiently and at low cost to the taxpayers.

One that does both and does both extremely well is the Peace Corps. For less than $100 million we have representatives of our country building good will and understanding in developing nations throughout the world and spreading, in their own ways, the messages of freedom and free enterprise and hope for the future that this country represents—but otherwise only in the abstract—to people everywhere.

It has been said that foreign assistance is an expensive luxury that we cannot afford, particularly in time of economic distress. Such statements represent either colossal ignorance about our budget or the economy, or both, or are loaded with demagoguery.

Foreign assistance, both economic and military, makes up less than 1½ percent of our budget. The funding for the Peace Corps presently amounts to less than 1 percent of that small foreign assistance budget. But the good that can be done—is immeasurable.

Mr. Speaker, in country after country that I have visited, talking with our foreign service people who see the work of the Peace Corps every day, without exception they have attested to the worth of this program.

Too often, foreign assistance is structured only government to government or government to multilateral institution to government. Only a tiny portion reaches out to the people of developing nations directly with the American message.

The Inter-American Foundation, Voice of America and similar broadcasting entities, USIS and the Peace Corps are all low-cost efforts that have a tremendous payoff in terms of good will and understanding for our country, in addition to the real help we provide to others.●

EDWARD J. DERWINSKI

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Ms. OAKAR. Mr. Speaker, I would like to take this opportunity to pay tribute to an outstanding Member of Congress, the Honorable EDWARD J. DERWINSKI, whose presence this body will surely miss as we begin deliberating the Nation's business in the 98th Congress.

I have had the pleasure of serving with Representative DERWINSKI on the Committee on Post Office and Civil Service where he is the ranking minority member. His quick wit, good humor, and incisive intellect have added much to our legislative and public policy debates.

Representative DERWINSKI first entered Congress in 1958 and since then has represented the people of Illinois' Fourth Congressional District with unmatched vigor and dignity.

Representative DERWINSKI, who has spent almost his entire adult life serving our Nation, will soon take up a new challenge with the U.S. Department of State where his many talents will continue to ably serve the public interests.

The members of the Committee on Post Office and Civil Service will particularly miss Representative DERWINSKI. He has worked diligently to maintain a competent, efficient Federal work force and a Postal Service which is the best in the world. We will all miss ED's flamboyancy, sense of humor, and good judgment.●

THE CRISIS OF WORLD DEBT

HON. RALPH REGULA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. REGULA. Mr. Speaker, I commend the following article from the most recent edition of the Economist on the problems associated with world debt, especially debt on the part of our Latin American neighbors.

[From the Economist, Dec. 11, 1982]

BOTTOMLESS DEBT

The International Monetary Fund wants the world's banks to stuff yet more dollars into the stocking of Latin American's debt. The banks have little choice but to concede. They know as they do it, however, that the money will probably not be seen again; indeed, they will be lucky even to get paid the interest. None the less, Santa Reagan was in Brazil last week lending an extra $1.2 billion. Santa IMF is wrapping up a three-year loan of $3.9 billion to Mexico, before catching his sleigh to Argentina and Venezuela (see our special section on pages 69-76). And those much more reluctant Santas, the bankers, have this week not only been asked to reschedule $16 billion of Mexican debt but also to come up with another $5 billion in new loans.

In all about $300 billion of debt is owed by Latin America. The new money that is now being poured in is being lent not for productive long-term capital investment but for a more immediate purpose: to prevent a horrendous jolt to the world's banking system. That jolt would follow if any major debtor—in Latin America alone, count Mexico, Brazil, Argentina, Venezuela—failed to meet

its interest payments. Constant last-minute injections of cash by central private banks have managed, just, to keep that time at bay. So far. Should that time come, however, it would send a hurricane through Wall Street; it would cause the certain collapse of a number of American banks; it would set the price of gold flying; it would produce political chaos in the defaulting country; and, worst of all through a crisis in confidence, it would put off hopes of a world economic recovery.

Unfortunately there are good reasons to give the shadow of that fear some substance, reasons of which every banker is frightened and aware. Look at some of the causes of pessimism.

BANKERS FALL WITH THE OIL PRICE

1. Oil. Here the bankers cannot win. For although Brazil could more readily repay its debts if oil prices fell, and although western Europe's, Japan's and countless small economies' balances of payments would gain, Mexico and Venezuela in Latin America and Nigeria in Africa would be even less able to cope. And it is those countries which would cause a crash before the benefit of a cheaper oil bill seeps through to the rest. Mexico is now the United States' largest supplier of oil. Not being an Opec member, it is selling every drop it can at heavy discount, thus undercutting Venezuela. But the unseasonably warm weather in north-east America has piled more spare oil on to what was already an enormous glut. Prices will fall further, giving Mexico ever less hard currency. A falling oil price also means a less affluent Middle East, which will, therefore, want back the money it lent to the banks which in turn lent it to—you guessed—Latin America. It is not surprising that a number of heretical bankers have become stronger advocates than Sheikh Yamani of higher oil prices.

2. The exposure of the banks. This is hard to quantify, but, unfortunately, harder to exaggerate. The largest nine American banks have lent the equivalent of 50 percent of their capital and reserves to Mexico alone. Some 1,600 banks are now being asked to participate in Mexico's rescheduling. Several hundred small country banks in the south of the United States, wanting to keep in with the big banks, joined in large syndicated loans to the Mexicans. Worse, they made many dubious business or personal loans in the days before exchange controls and before the Mexican peso was devalued by some 70 percent; many of these will not be repaid. The American securities and exchange commission and the Federal Reserve are watching developments by the day. Someone somewhere will squeal soon.

3. Interest rates. Nothing makes repayment more difficult for Latin America than high interest rates. For Mexico and Brazil, each one percentage point drop in interest rates saves each country around $750m a year. Yet though rates have come down, they remain stubbornly high in real terms and the extra premium these countries have to pay has shot up.

4. Politics. There is a curiously perverse reason for fearing that Latin America's debt problem may prove particularly difficult to shake off. It is that the governments of Mexico and Brazil (though not of Argentina) are, just now, particularly good governments. Mexico's new president, Mr. Miguel de la Madrid, pledged himself to meeting his country's debts by swallowing the IMF's proposed medicine. He has kicked out the disastrous economic policies that his predecessor's men learnt in Cambridge, England—huge budget deficits, bank nationalisation, exchange controls—and replaced them instead with those learnt a Cambridge, Massachusetts (there are four Harvard men in his cabinet): tight budgets, tax reform, private incentives. Good. The bankers are rightly happy. The snag is, however, that if this orthodoxy fails or stumbles on at too high a political cost, then the alternative cry from both Mexico and Brazil may be for willing default and a move to the left. These governments, in effect, are the last, best chance that the IMF or the bankers will get. And that puts added pressure on them, of course, to lend yet more money.

THE WAY OUT

What advice can be given to escape these bleak prospects? First to you, gentle reader: study those bank shares in your equity portfolio. The banks know they have little chance of escaping large write-offs in their future accounts. They have to follow the IMF in the hope that time can be bought, that world trade, and therefore commodity prices, will pick up and that interest rates will fall. Apocalypse tomorrow is better than apocalypse today.

Not that every bank is happy with the IMF, which is accused of having kept secret the extent of Latin America's troubles, The IMF argues that it has to observe the confidentiality of information given to it by member countries, though that rule certainly now needs to be broken. In fact, the banks have nobody but themselves to blame. For many years they lent on risks that were known to be bad, and did so merely because their competitors did so, because they did not want to be left out of the crowd. Just a year ago the bankers, for example, were queuing up to lend to third-world Mexico at rates only one-fourth percent over their loans to western Europe. Some of the old-fashioned virtues of the high-street bank could well be learned again by America's largest lenders.

Second, western governments will, whether they like it or not, soon be getting deeply involved in solving Latin America's—and the world's—financial crisis. The banks are screaming for it. It was perhaps a sign that America is turning its gaze to international solutions that it has hitherto disdained when the treasury secretary, Mr. Don Regan, turned up in Frankfurt this week suggesting a new Bretton Woods agreement.

The last, most obvious lesson is for Latin America itself. What nonsense it is to believe that money equals wealth. Mexico would be a much wealthier country today had it borrowed $40 billion rather than $80 billion. Its money would have been sounder; its economy would have grown stronger; its unemployment would have been less; and its politicians would have been poorer. That is a paradox which Latin America still does not fully understand. Having borrowed and spent so foolishly it now has no credit left. Santa Claus will not be heading south again.●

SHIRLEY CHISHOLM

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. CONYERS. Mr. Speaker, the Congress and the country will miss the service of SHIRLEY CHISHOLM when the new Congress convenes in January. She was an inspiration to all of us, not just as a superb legislator, but also as a political leader who gave voice to the tens of millions of Americans who still are voiceless in the political system.

She fought harder than anybody I know for public education and education for the disadvantaged.

Among her devoted constituency, not just in New York, but throughout the Nation, she will also be remembered for her bold, courageous decision in 1972 to offer herself as a candidate for President of the United States. Her candidacy, I am sure, accomplished as much to bring into the political system women and minorities as any other political decision or event of that era. I wish her the best of everything, and hope that she continues to give voice to the concerns that she championed for so many years in Congress.●

PASSAGE OF THE CARIBBEAN BASIN INITIATIVE IS CRITICAL

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. BARNES. Mr. Speaker, during the next day or so, this body is going to decide the fate of the Caribbean Basin Initiative. If we fail to consider the bill reported by the Ways and Mean Committee, or if we defeat that bill, we will be giving our friends and allies in the region a reason to doubt our word. Over the last year, we have been telling the countries of the Caribbean and Central America that we are concerned about them. We have told them that we cannot solve their problems, but we can and will help them. We have said that trade is part of that answer, and that the CBI is a small piece of encouragement to expand economic activity.

I think that anyone who visits with the leaders of the Caribbean and Central American countries quickly realizes that this is a terribly important issue for these countries and for the future of our relations with them. If we fail to pass the CBI, I fear that the repercussions will produce an extremely severe setback for U.S. foreign policy. If we fail to act now, I fear that for years to come, the Caribbean Basin Initiative will be a term that means broken promises and not what it should and can be, the beginning of a new and expanded partnership between us.

To those of my colleagues who are still undecided on this issue, I would like to ask you to read an article written by Robert Pastor, that was published in the Miami Herald. Mr. Pastor makes clear that there are no incompletes for the Caribbean Basin Initia-

tive: the United States either passes or fails this key test in the region:

THE CARIBBEAN NEEDS REAGAN'S ATTENTION

(By Robert A. Pastor)

President Reagan will face his real Latin American and Caribbean challenge only when he returns to Washington. The trade and tax provisions of the Caribbean Basin initiative (CBI), which he launched last February, have been languishing in Congress ever since. Either President Reagan chooses to push this initiative through to passage, or his credibility in the region, which he described as of "vital interest" to the United States, will be shot.

After Congress passed the $350-million aid portion of the CBI—about one-third of which was aimed for El Salvador—the administration seemed to lose interest in the rest of the program. If the CBI remains incomplete, those who viewed the administration's program as positive will be seriously disappointed. The cynics who said that the CBI's most positive and innovative features—the trade and tax incentives—were only a way to dress up and justify the massive aid to El Salvador will be proven right.

There are only two weeks left in this congressional session, but Congress—like the rest of us—works hardest with a deadline. To retain his credibility in the region and to win passage of the CBI, the President will need to do three things:

First, raise the CBI from the tenth to the highest political priority and forge a bipartisan coalition to win passage of the bill;

Second, fight off any attempts to water down the proposal; and

Third, accept a number of modifications that will improve the developmental impact of the CBI.

First, President Reagan has already repeatedly demonstrated that if he gives an issue the highest priority, he can win Congress's approval; this is particularly true in the area of foreign affairs. Up until now, the administration's rhetoric and political-military strategy to the region have antagonized the Democrats almost as much as it has polarized the region. Having failed to reach across the political aisle while he was strong, President Reagan ought to do so now that the CBI is in jeopardy. Rather than blame the Democrats, he ought to enlist their support. Just as he did on the AWACs sale, President Reagan ought to invite Presidents Carter and Ford and the senior national security leadership of previous administrations to join with him on a genuinely nonpartisan basis for passage of the CBI.

Secondly, much of the initial work ought to be in scraping off the barnacles of restrictionist amendments that the subcommittee on trade of the House Ways and Means Committee attached to the bill. The key part of the CBI is the promise that Caribbean Basin products—except sugar, textiles and apparel—will be able to enter the U.S. market duty-free. Even though this only amounts to about 11 per cent of their current exports, this incentive can have a dynamic effect on the region's economy, particularly on the smallest countries. Although the aggregate impact of such exports on the United States will be marginal, still many fearful and uncompetitive industries—representing producers of rum, leather goods, footwear, luggage and handbags, and work gloves—have already successfully lobbied to exempt their products from the program. Other groups representing tuna fish processors, petroleum products and auto parts are already lining up at the trough seeking further exemptions.

The CBI is one Christmas tree that will look much better without these baubles and bangles. The most serious challenge facing the President and Congress is to pass the one-way free trade provisions without exempting the products that could make a difference for the development of the region. But that doesn't mean that the Congress should allow the administration bill to pass untouched; it can improve on it just as it did in amending the administration's aid bill in order to provide more money for the democratic countries and more in development loans rather than balance-of-payments support.

From the perspective of promoting development in the Caribbean, it would be extremely desirable to repeal the sugar quota program, as this has reduced sugar exports by about one-third and is particularly hurting friendly, democratic countries like the Dominican Republic. Similarly, duty-free textile exports would undoubtedly help the region, and only be at the expense of Asian rather than American producers. But these two acts would probably engender more political opposition than the bill could accept at this time, literally breaking Santa's back. Still, other improvements are possible.

If the CBI is to succeed, it must address the problems generated or not addressed by its precursor, Puerto Rico's Operation Bootstrap. Specifically, it must be revised to emphasize agricultural development, population control and integrating new investments into the national economies. As the trade and tax provisions are currently written, they will encourage "enclave" industries, which import most or all of their raw materials and export their entire products. Moreover, the tax provisions are biased to encourage capital-intensive investments by wholly-owned foreign investors. This can and must be corrected. With nearly half the population under 15, the creation of jobs in the Caribbean Basin during the next two decades has to be one of the region's highest priorities, particularly because of the new—and needed—U.S. immigration law, which will prohibit illegal migration. The bill should be revised to encourage joint partnerships, to assist rather than crush the local private sector, to promote labor-intensive investments that create jobs, and to invite plants that will integrate themselves into the national fabric. For example, the United States ought to help the tourism industries to establish "backward" linkages to purchase food locally and "forward" linkages to handicraft industries.

Moreover, instead of undermining the Caribbean Development Bank, the United States ought to literally join the Bank rather than fight it, and instead of negotiating bilateral investment treaties and trade agreements, the United States ought to do everything to encourage regionalism. Congress needs to review the administration's balance between regional and bilateral aid, which should be increased in the eastern Caribbean, and between private sector development and aid for public infrastructure projects that function as the necessary prerequisites for private investment. Building on the ingenious but risky new program run for AID by Coopers & Lybrand to attract private investment, the United States should explore other ways to assist the private sector—perhaps an "Adam Smith" Volunteer Program, whereby junior executives from various corporations would volunteer their services for, say, one year to help get local entrepreneurs started. But the administration should be wary about concentrating exclusively on the private sector when so much remains to be done in the public sector.

The entire U.S. aid program, which has largely been unchanged since 1973, is in need of wholesale re-examination and overhaul. Currently, U.S. aid to spread so thin on so many marginal projects that it wastes scarce economic resources, not to say political capital. Two or three priority projects ought to be identified in each country, and all our resources directed to completing them; this would provide the countries with priority projects and also the kind of psychological momentum so necessary to development.

There is much that can be done and the CBI can give these efforts new impetus, provided that President Reagan himself returns from his trip determined to give a Christmas present to the region—but one with beautiful new ornaments rather than baubles, bangles and barnacles. Florida's leaders—Gov. Bob Graham, Miami Mayor Maurice Ferre and Congressmen Dante Fascell and Sam Gibbons—have all played important roles pressing for more attention to the CBI. One hopes that the Sixth Annual Conference on the Caribbean, which they are all hosting, will send a clear and forceful message back to Washington: There are no incompletes for the Caribbean Basin Initiative; the United States either passes or it fails this key test in the region.●

CITIZENS SET EXAMPLE IN BURDETT, KANS.

HON. PAT ROBERTS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. ROBERTS of Kansas. Mr. Speaker, during a time when economic conditions are forcing self-sacrifice on all levels of government, I want to take this opportunity to bring to the attention of my colleagues the example of the citizens of Burdett, Kans.

Burdett is the boyhood home of Dr. Clyde Tombaugh. Several months ago the citizens of Burdett honored Dr. Tombaugh for his outstanding career in astronomy—it was Clyde Tombaugh who made the discovery of the planet Pluto, along with many other astronomical findings.

But, the story does not end at that point. The citizens of Burdett took it upon themselves to establish a historical marker for Dr. Tombaugh. In this effort, they received no State or Federal money for the project. The $900 cast metal marker was acquired totally by the local Lions Club, homemakers unit, and the American Legion. Nearly every member of the Burdett community assisted in this project.

I draw this to the attention of my colleagues when a majority of this body finds it necessary to appropriate taxpayer dollars for memorials of all types costing millions of dollars—dollars that could come in part from the private sector.

The motto of the State of Kansas is "Ad Astera per aspera" or "Through the stars through difficulty." Dr. Tombaugh's career is a living example of that motto and by their example of honoring their favorite son, the citizens of Burdett, Kans., have also set a similar example.●

POETIC PROCLAMATIONS

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. PEPPER. Mr. Speaker and Members of the House, let me commend again to your attention the effort to establish a nationwide poetry day, which would serve to glorify the literary art responsible for raising our languages and dialects to their highest form of expression.

Among the men and women here assembled, among people all through the land, and especially among professional bards, one sometimes hears more than clarity and correct language: Flights of rhythm and words that suggest new feelings and ideas out of old truths placed in a novel frame.

I urge your support for Poetry Day now pending before us and proudly bring to your attention the excerpted proclamations of 36 Governors who have taken the lead in honoring that ancient craft which can be a wellspring of joy and spiritual inner healing:

PROCLAMATION

Whereas, the art of poetry is a vital part of our culture; and

Whereas, many of our citizens enjoy this form of literature and many also are talented and write poetry;

Now, therefore, I, Ed Herschler, Governor of the State of Wyoming, do hereby proclaim October 15, 1982, as Poetry Day.

PROCLAMATION

Whereas, the State of Wisconsin has a unique tradition of enriching the lives of its citizens through recognition of our state's gifted authors, writers, artists, composers, performers and craftspersons; and

Whereas, the people of the State of Wisconsin are pleased to especially salute our poets, writers of rhyme and simplicity, rhythm and reflection, our special authors of images and imagination, human pathos and parody; and

Whereas, in conjunction with international observances, the National Poetry Committee annually celebrates Poetry Day on October 15th and we are pleased to share in that observance;

Now therefore, I, Lee Sherman Dreyfus, Governor of the State of Wisconsin, do hereby proclaim October 15, 1982, Poetry Day.

PROCLAMATION

Whereas, the poetry and culture of this generation will be a heritage of inestimable value and inspiration to succeeding generations; and

Whereas, it is fitting that our people be made aware of this treasury of wisdom and beauty, that their lives may be made fuller and more meaningful through the enjoyment and appreciation of the Art of Poetry; and

Whereas, Poetry is the common property of all men, enriching the life of the individual as it forms a bond among all who share the human condition.

Now, therefore, I, John D. Rockefeller IV, Governor of the State of West Virginia, do hereby proclaim October 15, 1982, as Poetry Day.

PROCLAMATION

Whereas, poetry reaches for the spirit of communication and brings the joy of expression to all people; and

Whereas, poetry deserves to be lifted to its rightful place as held in our historical past; and

Whereas, poetry opens all our minds to a wider concept of harmony; and

Whereas, the purpose of Poetry Day is to remind people that a love for poetry is the heritage of every person and to encourage today's poets, especially those in Washington State;

Now, therefore, I, John Spellman, Governor of the State of Washington, do hereby proclaim October 15, 1982, as Poetry Day.

CERTIFICATE OF RECOGNITION

Poetry is timeless. Among the most beautiful and enduring of the gifts of the ancient world, it is the most powerful and inspiring instrument by which literate civilizations immortalize the grace and spirit of their language. Poetry touches, it captivates, it enriches, and it ennobles all that is, and has been, most creative in the human spirit.

To honor the priceless legacy poets have left to our society, and to commemorate the influence of poetry upon our lives, the National Poetry Day Committee has set Friday October 15, 1982, as Poetry Day throughout the United States. In recognition of this special occasion, I, Charles S. Robb, call upon all Virginians to pause in attention to Poetry Day.

OFFICIAL MEMORANDUM

October 15, 1982, will be observed as Poetry Day throughout the world. This day is set aside to honor those poets of the past and present who enrich the lives of so many people.

Poetry Day observance was organized in Texas in 1947 and has grown since that time to a worldwide event. It is celebrated throughout the United States and in 40 foreign countries.

Our State is proud of its poets and of the poetic expression which have originated here, and in recognition of their contributions to our cultural life it is fitting that we should set aside a day to honor those poets of the past and present.

Therefore, I, William P. Clements, Jr., as Governor of Texas, do hereby designate October 15, 1982, as "Poetry Day."

PROCLAMATION

Poetry has long appealed to the intellectual, aesthetic and romantic instincts of all people and has been an important form of human expression throughout history. Whether in written or oral form, poetry has affected citizens around the world with its beauty of language.

From the artists of the revolutionary era such as Francis Hopkinson and Philip Freneau to award-winning 20th century poets such as Marianne Moore and Gerald Stern, Pennsylvania's poets have been an inspiration to thousands of writers whose creative endeavors enrich our lives. These poets have often served as the voice of conscience as well as beauty, and it is appropriate that we pay special tribute to them.

Therefore, I, Dick Thornburgh, Governor of the Commonwealth of Pennsylvania, do hereby proclaim October 15, 1982 as Poetry Day.

PROCLAMATION

Whereas, many of our citizens enjoy this form of literature and many also are talented and write poetry;

Now, Therefore, I, Richard W. Riley, Governor of the State of South Carolina, do hereby proclaim October 15, 1982, as Poetry day.

PROCLAMATION

Whereas, poetry is a form of art that tells of happy times and sad times, but always speaks from the heart of the writer to the soul of the reader; and

Whereas, poetry can whisper as softly as a breeze through a cool Tennessee forest or echo the passion of man's battle for survival; and

Whereas, poetry can be seen as words set to "magic" and can help all who hear it to appreciate the deeper and more meaningful side of life; and

Now, Therefore, I, Lamar Alexander, as Governor of the State of Tennessee, do hereby proclaim October 15th, 1982, as Poetry Day.

PROCLAMATION

Whereas, through the adoption of a joint resolution of the Ohio General Assembly in January, 1938, Ohio became the first state in the Union to exercise its legislative authority in promoting the fine art of poetry in the public schools and in seeking to assure it the high cultural position it merits in the public mind; and

Whereas, the Ohio Department of Education, recognizing that this phase of culture, like music and the kindred arts, exerts a molding influence in helping to shape the ideals and purposes of our nation, has issued fine anthologies for use in the public schools and has cooperated with the Ohio Poetry Association in the preparation of the special school programs; and

Now, therefore, I, James A. Rhodes, Governor of the State of Ohio, do hereby designate Friday, October 15, 1982, as Ohio Poetry Day.

PROCLAMATION

Whereas, poetry has been honored as an art and as an important part of our society's cultures; and

Whereas, the United States has been honored by being selected as the site of the Fifth World Congress of Poets in 1981; now

Therefore, I, James B. Hunt, Jr., Governor of the State of North Carolina, do hereby proclaim October 15, 1982, as Poetry Day.

PROCLAMATION

Throughout the ages, poetry has reflected the imagination and creativity of many civilizations.

New York State takes pride in its rich literary heritage and in the many poets who live and practice their art in our State.

Poetry is taught in our schools and used on many occasions in our lives to enhance special activities and events.

Now, therefore, I, Hugh L. Carey, Governor of the State of New York, do hereby proclaim October 15, 1982, as Poetry Day.

PROCLAMATION

Whereas, the art of poetry is a vital part of our culture; and

Whereas, many of our citizens enjoy this form of literature and many also are talented and write poetry; and

Now, therefore, I, Bruce King, Governor of the State of New Mexico, do hereby proclaim October 15, 1982, as "Poetry Day."

PROCLAMATION

Whereas, the poetry of the past and present can serve to strengthen and enlarge the human spirit for the tasks ahead; and

Whereas, the ideals of freedom can find in poetry a powerful medium for impressing their meaning on the minds of men, as the greatest of New Jersey's many poets, Walt Whitman, supremely demonstrated;

Now, therefore, I, Thomas H. Kean, Governor of the State of New Jersey, do hereby proclaim October 15, 1982, as "Poetry Day."

PROCLAMATION

Whereas, the art of poetry is a vital part of our culture; and

Whereas, many of our citizens enjoy this form of literature and many also are talented and write poetry; and

Now, therefore, I, Robert List, Governor of the State of Nevada, do hereby proclaim October 15, 1982, in Nevada as "Poetry Day."

PROCLAMATION

Whereas, the purpose of Poetry Day is to promote the appreciation of one of our civilization's oldest and highest art forms; and

Whereas, Montanans are surrounded by the inspiring beauty of nature's timeless designs and the mountains and open spaces defy description in common words; it is appropriate that there be a day to encourage the appreciation of poetry; and

Whereas, I am certain there are many in this state with the perception and voice to capture the maginficence of Montana with words, there should be a day to encourage the creation of poetry.

Now, therefore, I, Ted Schwinden, Governor of the State of Montana, do hereby proclaim October 15, 1982, as "Poetry Day."

PROCLAMATION

Whereas, the art of poetry is a vital part of our culture; and

Whereas, many of our citizens enjoy this form of literature and many also are talented and write poetry; and

Now, therefore, I, Christopher S. Bond, Governor of the State of Missouri, do hereby proclaim October 15, 1982, as Poetry Day.

PROCLAMATION

Whereas, the art of poetry is a vital part of our culture; and

Whereas, many of our citizens enjoy this form of literature and many talented Mississippians write poetry; and

Whereas, the World Poetry Day Committee will celebrate its sixth annual world Congress in 1982, and many Mississippians will be involved in that Congress:

Now, therefore, I, William F. Winter, Governor of the Stae of Mississippi, do hereby proclaim October 15, 1982, as Poetry Day.

EXECUTIVE DECLARATION

Poetry is the quiet voice of the soul; it struggles to be heard in a world deafened by the roar of machinery.

Poets have contributed significantly to preserving the spiritual element that is unique to humankind.

Poetry has helped humanity to develop culturally and intellectually, and has had a great impact on life as well as literature.

The Poetry Society of Michigan has brought honor to our state and to the literary accomplishments of its members through its active encouragement of professional standards, high quality and literary recognition.

Therefore, I, William G. Milliken, Governor of the State of Michigan, do hereby declare October 15, 1982, as Poetry Day.

PROCLAMATION

Whereas, the Legislature of the State of Maine has mandated that October 15 of every year be designated by proclamation as Poetry Day; and

Whereas, poetry is an honored art form in our culture with a long tradition here in the State of Maine; and

Now, therefore, I, Joseph E. Brennan, Governor of the State of Maine, do hereby proclaim Friday, October 15, 1982 as Poetry Day.

PROCLAMATION

Whereas, people of all ages have universally turned to poetic expressions throughout the centuries as a means of expressing thoughts and hopes of their generations; and

Whereas, much of this poetry has come to us in the Twentieth Century as a cultural heritage of inestimable value, passed down form folklore, patriotism and religion of the past, giving tone and character to the culture of today; and

Whereas, the poetry and culture of this generation will given similar inspiration and strength to the lives of coming generations,

Now, therefore, I, David C. Treen, Governor of the State of Louisiana, do hereby proclaim October 15, 1982, as Poetry Day.

PROCLAMATION

Whereas, Poetry not only provides the opportunity to express one's feelings but also serves as a meaningful tool in the development of our cultural society; and,

Whereas, Poetry is taught in our schools to give our children a sense of culture and historical perspective on great poets of our past; and,

Whereas, There are many talented citizens in our state who write and enjoy this form of literature; and,

Now, therefore, I, John Y. Brown, Jr., Governor of the Commonwealth of Kentucky, do hereby proclaim October 15, 1982, as Poetry Day.

PROCLAMATION

Whereas, the art of poetry is a vital part of our culture; and

Whereas, many of our citizens enjoy this form of literature and many also are talented and write poetry; and

Now, therefore, I, John Carlin, Governor of the State of Kansas, do hereby proclaim October 15, 1982, as Poetry Day.

PROCLAMATION

"The world is so great and rich, and life so full of variety, that you can never lack occasions for poems." Goethe

For centuries, a day in October has been set aside to acknowledge the contributions of the world's poets to our lives.

The unique insights that each artist expresses forever alters, even if in a minute way, our own conception of the world.

It is expecially fitting that Illinois, birthplace of poets of international, prize-winning stature, such as Carl Sanburg, Edgar Lee Masters, Vachel Lindsay, Archibald MacLeish and Gwendolyn Brooks participate in such an observance.

Therefore, I, James R. Thompson, Governor of the State of Illinois, proclaim October 15, 1982, as Poetry Day.

PROCLAMATION

Whereas, the art of poetry is a vital part of our culture; and

Whereas, many of our citizens enjoy this form of literature and many also are talented and write poetry; and

Whereas, in the United States we have many outstanding poets and numerous Idahoans who contribute to the great poetry of our country;

Now, therefore, I, John V. Evans, Governor of the State of Idaho, do hereby proclaim October 15, 1982, to be Poetry Day.

PROCLAMATION

Whereas, poetry has been defined by William Wadsworth as "the spontaneous overflow of powerful feelings; it takes its origin from emotion recollected in tranquility;" and

Whereas, Wentworth Dillon wrote: "True poets are the guardians of the state;" and

Whereas, Percy Bysshe Shelley wrote: "Poets are the unacknowledged legislators of the world;" and

Whereas, all the above are indicative of the importance, power, and beauty of poetry in human life; and

Whereas, poetry is found in all cultures and societies, in many forms, and oral poetry was highly developed by the Hawaiian people in ancient times; and

Whereas, poetry enriches all peoples, and is the expression of that enrichment; and

Whereas, a knowledge of, and love for, poetry is most desirable for all;

Now, therefore, I, George R. Ariyoshi, Governor of the State of Hawaii, mindful of poetry's importance to Hawaii's people, do hereby proclaim October 15, 1982, to be Poetry Day.

PROCLAMATION

Whereas, the art of poetry is a vital part of our culture; and

Whereas, many of our citizens enjoy this form of literature, and many also are talented and write poetry;

Now, therefore, I, Bob Graham, by viture of the authority vested in me as Governor of the State of Florida, do hereby proclaim October 15, 1982, as Poetry Day.

PROCLAMATION

Whereas, people of all ages have universally turned to poetic expression as a means of communicating the thoughts and hopes of their society, culture and generation; and

Whereas, the poetry of this generation will give similar impetus and strength to the lives of coming generations; and

Now, therefore, I, Albert H. Quie, Governor of the State of Minnesota, do hereby proclaim October 15, 1982, to be Poetry Day.

PROCLAMATION

Whereas, throughout the course of history, poets have chronicled the human condition through their writings and examined the intricate workings of man's psyche and the societies in which they lived; and

Whereas, the State of Maryland has a rich heritage of such poets, including Edgar Allan Poe, Sidney Lanier, Josephine Jacobsen and Lucille Clifton;

Now, therefore, I, Harry Hughes, Governor of the State of Maryland, do hereby proclaim Octoer 15, 1982, as Poetry Day.

PROCLAMATION

Whereas, the art of poetry is a vital part of our culture; and

Whereas, many of our citizens enjoy this form of literature and many also are talented and write poetry; and

Now, therefore, I, Fob James, Governor of the State of Alabama, do hereby proclaim October 15, 1982, as Poetry Day.

EXECUTIVE PROCLAMATION

The art of poetry is a vital part of Alaska's culture.

Many of the 49th State's residents enjoy this form of literature, and many, also, are talented and write poetry.

The United States has been honored by having an American chosen as the coordinator for the Sixth World Congress of Poets being held later this year.

Now, therefore, I, Jay S. Hammond, Governor of the State of Alaska, do hereby proclaim the day of October 15, 1982, as Poetry Day.

PROCLAMATION

It has been written, "Poetry is the mother tongue of mankind."

These simple words express the universality of poetry and its strength and vitality. The poets of each language add something precious to their culture which endures for generation after generation.

Therefore, in this, the year of the Sixth World Conference of Poets, I, Edmund G. Brown Jr., Governor of the State of California, am pleased to join in observing October 15, 1982, as Poetry Day.

PROCLAMATION

Whereas, in the rush of modern civilization we frequently give too little attention to the cultural values and ideas which should be a part of our daily lives; and

Whereas, it is only fitting that Coloradans honor the poets of the past and present who have done and are doing so much to enrich the lives of every person;

Now, therefore, I, Richard D. Lamm, Governor of the State of Colorado, do hereby proclaim October 15, 1982, as Poetry Day.

OFFICIAL STATEMENT

Poetry is among the oldest and most influential of all the arts. It provides a cultural heritage rich in historical and philosophical insights and celebrates the achievements of great men and women throughout the ages.

Poetry examines the most profound issues of human life and is a source of wisdom, instruction and inspiration. In addition, poetry brings people together in appreciation of the power, grace and versatility of language.

Every nation in the world has a rich poetic tradition which has had a shaping influence on the development of civilization and culture. Poetry celebrates history, philosophy and experience, the deeds of heroic legends and the values which inspired them. It touches on the most profound issues of human life and brings enlightenment, wisdom and inspiration to its readers.

American poets deserve our praise and support for their tremendous contributions to the vitality and spirit of our country. The sensitivity and skill they share in their works may be counted among our nation's greatest treasures.

Therefore, I, William A. O'Neill, Governor of the State of Connecticut, am pleased to designate October 15, 1982 as Poetry Day.

STATEMENT

Whereas, the art of poetry is a vital part of our culture; and

Whereas, many of our citizens enjoy this form of literature and many also are talented and write poetry; and

Now, therefore, I, Pierre S. du Pont, Governor of the State of Delaware, do hereby declare October 15, 1982, as Poetry Day.●

GERSCHON CANAAN

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. COLLINS of Texas. Mr. Speaker, in the Dallas community we have been proud of the active Consular Corps that we have serving the South and West in the United States.

Gershon Canaan has served for 20 years as the honarary consul of the Federal Republic of Germany. Dallas recognized Gershon Canaan with a special day in September. He has just been decorated with the Grand Cross of Merit by the Federal Republic of Germany. Canaan has strengthened the friendship between Germany and the United States. Since 1963 we have had an annual German Day celebration in Texas. He founded the Goethe Center, which works with SMU to promote the exchange of arts between Germany and the United States.

Gershon Canaan came to the United States in 1947 and attended the Frank Lloyd Wright Foundation. He graduated from the University of Texas with a masters degree in architecture. He now holds the position of senior vice president for international development with the J. L. Williams Co. of Dallas.

Texas is proud of Gershon Canaan's leadership and is looking forward to a great future in American-German relationship and trade.●

INTELLIGENCE COMMITTEE RELEASES 35-YEAR-OLD SECRET TRANSCRIPT

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. McCLORY. Mr. Speaker, the Permanent Select Committee on Intelligence recently released the transcript of a congressional hearing which had been kept secret for the past 35 years. The hearing, held in executive session in 1947 by the House Committee on Expenditures in the executive departments on the then pending National Security Act of 1947 and previously classified "Secret," addressed the need for establishing the Central Intelligence Agency.

As the ranking Republican member on the Intelligence Committee's Subcommittee on Legislation—and from the time I served on the earlier temporary Select Committee on Intelligence—I have long held a strong interest in the CIA and the legislation which provides it with its most basic authority, the National Security Act.

Some months back it was discovered that one executive session hearing held by the Committee on Expenditures had been gathering dust in the back of a locked file drawer for years. Clearly, a document of such historical value should be declassified and released, even though it is exempt from the Freedom of Information Act because it constitutes a "congressional document."

The Committee on Expenditures' original copy was destroyed by its chairman in 1950, presumably because of his concern for its sensitivity. The only other known copy was held at CIA headquarters in Langley, Va. Since the U.S. Court of Appeals for the District of Columbia told the CIA that it could not release it—because, as a "congressional document" it was exempt from the Freedom of Information Act—and since the Archives did not have a copy in the files it maintains for the House—because it was never sent one—the hearings never would have seen daylight in the normal course of events.

Mr. Speaker, it is my understanding that the transcript of an executive session which is no longer within the custody of the committee which conducted the hearing may only be released by a vote of a committee with subject matter jurisdiction as granted in the rules of the House. I am therefore pleased to report that the Permanent Select Committee on Intelligence, having been granted exclusive jurisdiction over the Central Intelligence Agency by rule XLVIII, decided to exercise its jurisdiction by voting to release this 35-year-old transcript in the prescribed fashion. As a further step, the committee sought and received the concurrence of the Committee on Government Operations which when known as the Committee on Expenditures in the Executive Departments held this hearing.

Mr. Speaker, I want to point out that the hearing transcript was originally located by an Intelligence Committee staff member. Ira H. Goldman,

a counsel to the Intelligence Committee, who uncovered the hearing transcript locked up in the CIA's files, recognized the historical significance of this once-secret transcript and brought it to the committee's attention.

While there is nothing extraordinarily revealing or exciting in the transcript, it is quite interesting. Allen Dulles, who ran many OSS operations in Europe during World War II and went on to serve as Director of CIA, testified that he had had startling successes against the Abwehr, the German intelligence service. About 10 percent of the Abwehr provided information to the OSS, including two top German intelligence officials, Admiral Carnaris and General Oster. This information included details of the German missile program and provided us with the information which enabled us to bomb their bases at Peenemunde, undoubtedly saving many Allied lives. One witness even told how, through an intelligence source, we had 2 months' advance knowledge that Mussolini would be removed, but that the report was rejected for lack of corroboration.

It is interesting how the same topics discussed back in 1947 are still being debated today. For instance: (a) Should the CIA, which is responsible for collecting clandestine intelligence, also analyze it, or might this lead to biased intelligence reporting? (b) Should the CIA's authority be detailed in a law or would this inflexibility threaten the national security? (c) How can the accuracy of intelligence analysis be improved? This continual questioning on such subjects is healthy, because it assures a strong and effective intelligence apparatus which is essential to the security of the United States.

Mr. Speaker, I believe the Congress rightfully exempted itself from the Freedom of Information Act, and, in my view, should retrench further on the law's impact on our intelligence agencies. However, this imposes on the Congress, particularly in this age of open government, a special duty to act on its own initiative to release historical information which was once sensitive but which no longer is in need of protection. Historians, and the public at large, should be granted the greatest practicable access to the official documents of the Congress.●

REV. WILLIAM HERBERT BREWSTER

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. FAUNTROY. Mr. Speaker, I would like to bring to your attention Rev. William Herbert Brewster, Sr., a black American gospel music composer who, in the first half of this century pioneered a new genre—gospel, will be the subject of a tribute by the Smithsonian Institution, December 17-19, 1982.

Rev. William Herbert Brewster, Sr., renowned orator and poet, will narrate the concerts of his music performed by Washington, D.C.'s own quintet, Sweet Honey in the Rock, with accompanist Pearl Williams-Jones, gospel music performer and scholar, December 17 and 18 at Smithsonian's Baird Auditorium.

Rev. William Herbert Brewster, Sr., pastor of East Trigg Baptist Church in Memphis, Tenn., for 53 years, and founder and director of the Brewster Theological Clinic has trained hundreds of Baptist ministers across the Nation, including many of Washington, D.C.'s distinguished clergy.

Considered the father of black gospel drama, Rev. William Herbert Brewster will perform with his congregation, an original Brewster pageant as the closing event of the weekend tribute, Sunday, December 19, at Baird Auditorium.

Rev. William Herbert Brewster, a prolific gospel music composer has created superlative music standards including "I'm Leaning and Depending On the Lord," Move On Up a Little Higher," "Just Over the Hill," "How I Got Over," "These Are They," and "Surely, God is Able," —the first gospel song to use triple meters—12/8—and one of the first two gospel songs to sell over 1 million copies, along with "Move On Up a Little Higher."

I call upon all of my colleagues of the U.S. Congress and the people of the United States to join with me in honoring Reverend Brewster with the Smithsonian, in grateful acknowledgement of his outstanding composition and for the extraordinary legacy of gospel music and gospel drama that he embodies and is passing along for the enrichment of all our citizens.●

PORTUGUESE PRIME MINISTER'S VISIT TO WASHINGTON PROVIDES OPPORTUNITY FOR DIPLOMATIC INITIATIVES ON STATUS OF EAST TIMOR

HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. HALL of Ohio. Mr. Speaker, last week marked the seventh anniversary of Indonesia's brutal full scale invasion of the former Portuguese colony of East Timor.

Seven years ago, scarcely a handful of Americans outside of Government knew of the existence of East Timor, but presently American public awareness of the tragedy in this predominantly Roman Catholic island territory is growing. This is a most encouraging development.

As awareness of the Timor tragedy increases, so does the recognition that a political settlement stressing the right of the East Timorese to determine their own future is necessary. As I have stated on previous occasions, and as more of my colleagues have come to believe, there should be official American backing for a process that can lead to authentic self-determination for East Timor. This is one of the points of my resolution on East Timor, House Concurrent Resolution 321, which has been cosponsored by 46 other Representatives.

It is clear that Portugal, which ruled East Timor for 400 years until 1975, and which continues to be recognized under international law as the legal sovereign of East Timor, has a key role to play in the effort to end Indonesian occupation of the territory.

Today, the Prime Minister of Portugal, Dr. Francisco Pinto Balsemao, arrives in Washington for talks with Reagan administration officials and with the President himself. I have been informed that the Portuguese leader plans to discuss the East Timor tragedy with President Reagan.

Before he became Prime Minister in 1981, Dr. Balsemao had a distinguished career as editor of the weekly publication, Expresso. On the occasion of his visit here I would like to commend to my colleagues' attention a translation of an editorial which appeared in Expresso in October, 1981.

This commentary calls for practical, nonpartisan action by Portugal's major political figures to meet Lisbon's historic responsibility to the people of East Timor. It is a moving appeal for cooperation that should be seriously considered by all those concerned about this tragedy.

It is my hope that the administration will take advantage of Dr. Balsemao's visit to pursue new initiatives on the status of East Timor. If Portugal is interested in opening the window on East Timor, we should be prepared for some fresh air on the issues involved.

For the benefit of my colleagues, the Expresso editorial follows:

[Editorial from the Expresso, October 1981]

EAST TIMOR AND THE HOSPITAL AMBULANCE DRIVER

Some days ago, on RTP, in a report on the hold-up of the Bank of the village of Santo Adriao, a statement was made by an ambulance driver from St. Joseph's Hospital who had taken one of the wounded in for treatment. The wounded man had been deposited by his partners at the door of the hospital who had then left in a flash in order not to get caught. The ambulance driver said: "When somebody wounded is brought in, we're not about to notice who brought him. What we really want to do is get him medi-

cal attention as quickly as possible. Saving his life is above everything else".

A sensible philosophy, this ambulance driver's, and one that puts the theory and practice of many political and journalistic strategists to shame. This puts us in mind of the case of Timor and the fuss about the government's report. It's time we looked to the patient who is dying and to those who, ultimately, may have accelerated his demise or dealt him more blows.

(1) Indonesia invaded Timor, whose population it is destroying only because they committed the crime of wanting to be a people.

(2) Portugal has historical responsibilities toward Timor as, for example, did England toward Rhodesia. Great Britain assumed its responsibilities, let that be said for Margaret Thatcher. She met the problem head-on and an honorable solution was found.

(3) To attempt to cast the blame on X, Y or Z, who intervened in that confused process, is all very well and good as an outlet for imperial-style frustrations, but it's not realistic.

(4) The crucial point, and what is hanging in the balance at this very moment, is the existence of a people who were invaded by another stronger than they.

(5) The invader's name is Indonesia: Indonesia the executioner who is committing violence daily against the Maubere people.

(6) The report on Timor focuses on individuals who may have favored an invasion, but they were not decisive. Portugal, once Indonesia made up its mind, did not possess the physical means to avoid it.

(7) Portugal however, has the obligation that History has conferred upon it, and also the right to seek a solution. Not a military solution. It would be ridiculous to advocate that.

But it can take the lead in promoting an international movement that would push Indonesia to accept, at least, a referendum on Timor, a referendum that should be controlled by the United Nations.

(8) And who is the Portugal to whom this historical imperative falls?

That Portugal is Ramalho Eanes, Francisco Pinto Balsemao, as Prime Minister and President of the Social Democratic Party, Mario Soares, Secretary-General of the Socialist Party, Freitas do Amaral of the Christrian Democratic Party, Alvaro Cunhal of the Communist Party, Ribeiro Teles of the PPM, the Council of the Revolution and others more directly involved in shaping the destiny of this people, be it by virtue of the offices they hold at the highest executive level or by virtue of the parties or coalitions that they head. It is the parties who, more than any other group, organize Portugal's political strength.

Let's leave aside, for now, other Portuguese who were involved. Those people will be the first to be judged by History if the Maubere people end up sacrificed on the altar of geopolitical interests or simply for the sake of the immediate interests of the powers or superpowers.

(9) Mario Soares, Secretary-General of the Socialist Party and Vice President of the Socialist International: what is and was he doing to call the world's attention to the dying man?

Alvaro Cunhal, with his many and influential friends in the "Communist International": what is and was he doing?

Freitas do Amaral, together with his friends in the European Christian Democratic Union, of which he is President, and inside his own party: what is he doing? And Pinto Balsemao as Prime Minister and President of the Social Democratic Party? And Ramalho Eanes: what influence has he made use of to try to save East Timor?

(10) Could it be that Indonesia's having big business dealings with the East and West is motive enough to try to silence the cries of a people? They are crying out not only for treatment of the wounded or for "kinder" methods of torture for those Timorese who want to go on being Maubere. They are crying out to be a people, and for Indonesia to leave the territory that doesn't belong to it.

(11) The Portuguese authorities have an obligation to try to reach a national consensus on Timor and to seek an international consensus for it.

Is this what they have been doing?

Being President of a country that has friends and allies, being Prime Minister or Secretary-General of the Communist Party, Socialist Party, Social Democratic Party of Christian Democratic Party and President or Vice President of International organizations means a lot and carries a lot of weight. It is important that everyone remember: History will judge them—judge them more severely than they are now judged. Now they are only judged as men who failed at their duties and did not have the strength to check Indonesia's voracity.

(12) May our leaders take a lesson from the ambulance driver. May they not lose sight of what is crucial, hidden under a cover of incidental detail. All the fuss surrounding the government's report, which Expresso, as a newspaper has the obligation to publish, can, if we are not clear-headed and discerning, lead us to forget about the patient and rail in vain against those who did not cure his wounds before.●

REAGANOMICS SQUEEZES CORPORATE SPENDING PLANS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. FLORIO. Mr. Speaker, the administration's supply-side economics was based on the assumption that business investment would provide the main source of renewed growth.

Unfortunately the reverse happened, business investment declined. Plant and equipment spending by business next year is projected at 6½ percent below that of 4 years ago. This decline in capital spending forecasts continuing economic stagnation and double-digit unemployment. Even the most optimistic reports from administration economists forecast a modest economic recovery that will produce a 10-percent unemployment rate 2 years from now.

This year the American people voted against these policies. We cannot let our industrial plants lay to waste, and human talents go untested when an agenda of work needs to be done in our Nation. I invite my colleagues to review the following article:

[From the Christian Science Monitor, Nov. 12, 1982]

U.S. INDUSTRY TO SCRIMP ON CAPITAL OUTLAY SPENDING IN 1983

(By David T. Cook)

As corporate executives put the final touches on their 1983 budgets, spending plans for new buildings and production equipment are being slashed.

Next year, for instance, the Hughes Tool Company, a Houston-based maker of oil drilling and production equipment, will spend "no more than half" of the $300 million it invested in the business this year, a company official says.

Hughes is not alone. After adjustment for inflation, US companies plan to invest 8.5 percent less in their operations next year than they did this year, according to a recent survey by the Economics Department of the McGraw-Hill Publications Company. And the 450 major companies that were surveyed said their capital spending this year would be 4.5 percent lower than last, after taking inflation into account.

As a result, economic recovery will be less robust, upward pressure will remain on unemployment, and modernization of factories will be delayed.

Managers are chopping spending plans because they are already saddled with excess production capacity. "There is plenty of plant and equipment around without building more," says Edward Yardeni, senior vice-president of Prudential/Bache Securities. In September, 31 percent of US production capacity was idle.

Meanwhile, sagging corporate profits have cut into the funds companies can invest. At Hughes Tool, for example, net income per share for the first nine months of the year is down 26.4 percent.

"Cash flow will improve next year, but it will be used to reduce pressure on balance sheets" burdened with debt, Mr. Yardeni asserts.

While the drop next year could be reduced if a recovery occurred faster than corporate managers expect, "I don't think there is any way we will see" an upturn, say Joseph Spiers, a senior economist at McGraw-Hill.

Lower spending for plant and equipment will not abort the weak economic recovery expected next year. But it could cause some additional upward pressure on unemployment, which is already at a post-World War II high of 10.4 percent. That is because cuts in capital spending imperil the jobs of individuals still at work putting up buildings and turning out production equipment. And any further boost in unemployment weakens demand for consumer products and the equipment used to produce them.

"The negative interaction among economic sectors characteristic of a recession is still very much in evidence and could continue for a while," the Goldman, Sachs Economic and Financial Market Research Group recently wrote clients.

And slimmer capital budgets mean some delay in the modernization of American industry. "We have had very rapid obsolescence of equipment due to extremely high inflation and the extraordinary increase in energy costs," says Ben E. Laden, vice-president and chief economist at T. Rowe Price Associates Inc., a mutual fund manager. "That has left us with a very inefficient capital stock," or collection of production equipment.

The slower pace of US capital equipment spending is not expected to seriously erode the nation's international competitiveness

in manufacturing technology. "Other nations also are in pretty bad shape in capital spending," Mr. Laden notes.

Ironically, though, capital spending by American companies may get less of a boost from the expected economic recovery than do foreign competitors.

"If the dollar remains strong in foreign exchange markets next year, as we expect, then the rust-bowl industries [autos, steel, farm equipment, machine tools] in the United States will find that the coming domestic recovery will mostly benefit their overseas competitors," Mr. Yardeni says.

Of course, not all potential purchasers of buildings and equipment are cutting their 1983 capital budgets at the same rate. When 1982 and '83 capital spending plans are compared, the biggest percentage drop comes at the airlines, which have cut projected outlays 29.7 percent, while food and beverage producers have trimmed spending targets 22 percent, according to McGraw-Hill data. The hard-hit mining industry has reduced spending plans 13.5 percent, and recession-ravaged iron and steel makers have cut plans 15.5 percent.

The spending cuts planned for 1983 come on top of reductions made earlier. For example, the Clark Equipment Company of Buchanan, Mich., plans to spend "a little under $40 million this year and a little over $40 million next year" on purchases of equipment and buildings, a spokeswoman says. By contrast, this maker of forklift trucks and truck transmissions spent $61.8 million in 1981 and $79.5 million in 1980.

Producers of high-technology goods like computers, scientific instruments, and semiconductors are one major exception to the downturn in capital spending. McGraw-Hill shows this sector posting a 15.4 percent increase in capital spending next year. "They should see orders [for products] improving" in 1983, Yardeni notes.

Economists expect that different types of capital goods will both fall and recover at different rates. Purchases of new factories and offices will drop 5 percent in 1983, economist Spiers predicts. Equipment purchases will drop 3.1 percent.

For 1984, most forecasters see capital spending rebounding along with the economy. "In the manufacturing category, almost every industry . . . has double-digit increases slated for 1984," Spiers says.

Much of the pickup will come in outlays for equipment, as a recent overbuilding of office buildings is expected to hold down spending on structures.●

JOHN NELSON—GOOD MAN FOR AN IMPORTANT JOB

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. MOTTL. Mr. Speaker, one of the many reasons for Cleveland's emergence as the health care center of the United States is its string of fine, modern hospitals which dot my native city.

One of the finest Greater Cleveland hospitals is Parma Community General located in the city in which I reside. A major reason for the fine reputation of Parma Community General Hospital is its hardworking administrator, John Nelson, who has held this important job since 1971.

John Nelson, a close personal friend of mine, has directed two major expansion programs in his 11 years at Parma Community General Hospital. The present expansion program will see the number of available beds increased to 321 by July 1984.

I can personally attest to the excellence of the hospital in that three of my four children were born there—namely, Ron Jr., 20, Ronda, 17, and R. Michael, 8. My fourth child, Amanda Leigh, 3½, was a premature baby and was born in Cleveland Metro General Hospital, another excellent facility we Clevelanders are fortunate to have.

Administrator Nelson, a native of Mason City, Iowa, has been in the health care field virtually all of his adult life. After receiving his bachelor's degree from the University of Iowa, and his master's degree from the University of Minnesota, he rolled up his sleeves and went to work in various capacities to make quality health care more attainable for all of us.

Immediately before taking over as Parma administrator, John Nelson was with the American Hospital Association in Chicago. He has held key positions with the Greater Cleveland Hospital Association and with the Ohio Hospital Association as well.

He is a civic leader in Parma. He presently serves as secretary and as a member of the board of directors of the Parma Chamber of Commerce.

John and his wife, Myrna, have three grown children, Craig, Kristine, and Nancy, and are blessed with two grandchildren.●

CONSTITUTIONAL BANKRUPTCY COURT

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. RODINO. Mr. Speaker, I am inserting herewith a letter from the National Conference of Bankruptcy Judges discussing some of the serious problems with the Judicial Conference's legislative proposals on the bankruptcy courts:

NATIONAL CONFERENCE OF BANKRUPTCY JUDGES,
December 10, 1982.

Hon. PETER W. RODINO,
Chairman, House Judiciary Committee,
Rayburn House Office Building,
Washington, D.C.

DEAR CONGRESSMAN RODINO: We have reviewed the December 1, 1982 proposal of the Administrative Office of the United States Courts for restructuring the bankruptcy courts. This document represents a surprising turnabout of position by the Judicial Conference following as it does so closely in time their September 9, 1982 Report on H.R. 6978.

In the September 9, 1982 Report, in an effort to diffuse support for H.R. 6978, the Judicial Conference recommended an interim rule/Article I statutory approach to restructuring the bankruptcy courts that involved utilizing bankruptcy judges as special masters.

Both the Solicitor General and the Department of Justice immediately raised serious questions about the constitutionality of this Judicial Conference proposal and in addition labeled it as cumbersome and unworkable.

Also, in their September 9, 1982 Report, the Judicial Conference expressed great concern about the added cost of establishing Article III bankruptcy courts as contemplated by H.R. 6978, citing cost projections that no knowledgeable person would take seriously. The cost estimates in the House Judiciary Committee Report accompanying H.R. 6978 appear to be more accurate.

Apparently the concern of the Judicial Conference for cost was short lived. Now, in lieu of leaving the present system in place and converting the existing 220 full-time and 20 part-time bankruptcy judge positions to 227 lower eschelon Article III positions as proposed in the Rodino bill, the Judicial Conference suggests that Congress authorize 166 additional district court positions and 50–75 additional magistrate positions, in all up to 241 new judicial positions to handle bankruptcy matters on an integrated basis with the regular caseload of the district court. Further, to "guarantee that bankruptcy cases do not become 'lost' in the heavy caseload of the district judges and magistrates," the Judicial Conference recommends the creation of 120 new Bankruptcy Administrator positions. We presume that the failure of the Judicial Conference to include cost projections with its latest proposal is a tacit admission that the cost of implementing their new proposal would far exceed the cost of H.R. 6978.

For example, unlike H.R. 6978, the Judicial Conference proposal would require extensive modification of existing facilities because present facilities do not meet GSA requirements for district court judges, but would suffice for Article III bankruptcy judges. Also, under the Judicial Conference proposal new facilities would have to be provided for 50–75 new magistrates and their staffs and 120 new Bankruptcy Administrators and their staffs.

Aside from cost considerations there are other serious problems presented by this new Judicial Conference proposal.

Bankruptcy cases were removed from the regular caseload of the district courts by Congress in 1938 because bankruptcy matters required special and often immediate attention and were not being handled very well as part of the regular caseload of the district court. There is a far greater backlog in the district courts today than there was in 1938.

Civil actions arising in, out of, or related to bankruptcy cases could not be finally determined by magistrates except by consent of the parties and such consent is not likely to be given in actions by the trustee or debtor against third parties to recover assets of the estate, as was involved in the *Northern Pipeline* case, or in actions by creditors to reclaim property from the debtor. Absent consent, the magistrate, after hearing such a matter, must file a report and recommendation to be acted on by the district court. This procedure would result in greater delay and transaction costs (attorney fees) for the parties and involves an obvious duplication of judicial time and manpower.

The provision for appointment of 120 Bankruptcy Administrators by the United States appeals courts invests those courts with patronage power and supervisory responsibilities they may not wish to exercise.

The duties enumerated for the Bankruptcy Administrator are now being performed for the most part by the clerk and deputy clerks of the bankruptcy court, which calls into question the need for such an office.

All the persons who testified at House and Senate hearings on legislation to deal with the problem created by the decision of the Supreme Court in the *Northern Pipeline* case were unanimously of the view that the present bankruptcy system is working well and should be preserved to the maximum extent possible, as provided by H.R. 6978. The Judicial Conference proposal enjoys no such documented support. It appears to run against the grain of the historical experience that led to the development of the present efficient bankruptcy system.

Finally, the bankruptcy system that would be preserved by enactment of H.R. 6978 is precisely the system the Chief Justice voted with the dissent to uphold in the *Northern Pipeline* case, with the minor exception that instead of being appointed by the President for 14-year terms, bankruptcy judges will be appointed by the President to hold office during good behavior, a change, which according to the plurality opinions in the *Northern Pipeline* case, is mandated by the Constitution.

Yours truly,

JOE LEE,
Chairman, Committee on Legislation, National Conference of Bankruptcy Judges.●

THE HOUSE SHOULD VOTE ON REGULATORY REFORM

HON. ELLIOTT H. LEVITAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. LEVITAS. Mr. Speaker, regulatory reform is one of the most important issues facing our Nation today. Many people ask how does regulatory reform acquire such an important position on the agenda of Congress, and on the President's list of priority items for this post-election session. The answer is very simple. The cost of regulation to the American people today exceeds $120 billion annually. Many of those costs are unnecessary, and every dollar that is spent on unnecessary regulation takes away from investment in new plant capacity and creating new jobs. And therefore, we see bipartisan support for the enactment of regulatory reform legislation.

In an op-ed article which appeared in the Wall Street Journal on December 6, 1982, John Opel, the head of the Business Roundtable's task force on Government regulation discusses the overwhelming costs of Government regulation. As he notes, it is time to give the House an opportunity to vote on this important legislation. At this point I place Mr. Opel's article in the RECORD.

[From the Wall Street Journal, Dec. 6, 1982]

THE HOUSE SHOULD VOTE ON REGULATORY REFORM

(By John R. Opel)

The post-election session of Congress offers the House leadership another chance to bring the long overdue regulatory reform bill to the floor for a vote. While the session has to deal with pressing budgetary and appropriations matters, time should be found to let the House act on regulatory reform. The president has designated this as one of the key issues Congress needs to address.

Regulatory reform does not mean doing away with regulation. It means making the regulatory process more rational. If anything needs a dose of rationality, it's the way regulations are developed and implemented, often with little understanding of the consequences.

Presidents Ford, Carter and Reagan have recognized the need for sweeping improvements and have done something about it. Their executive orders have gone a long way in the right direction. But these orders only apply to agencies within the executive branch and accomplish only part of what needs to be done. Moreover, executive orders tend to be stop-gap substitutes for legislation and can be reversed at any time. Regulatory reform deserves greater permanence and predictability.

The Senate has already recognized the need for comprehensive, intelligent and fair legislation covering the regulatory process. Under the sponsorship of Senators Laxalt, Leahy, Roth and Eagleton, a Senate bill was approved last March with bipartisan support in a 94–0 vote.

One wonders how many ill-conceived, badly implemented and enormously costly regulations might have had their quality improved had such legislation existed in the past. Businessmen in large and small companies see scores of examples each week of regulations whose benefits are obscure or marginal at best, yet require costly compliance.

No one seriously questions that the costs of regulation are staggering. Those costs are inflating the prices of just about everything Americans buy. They also make our exports less attractive. Some estimates have put the cost of regulation at over $100 billion a year.

Four years ago, the Business Roundtable's task force on government regulation sponsored a study that looked at only six federal agencies and the cost impact of their regulations on only 48 major companies. The results were carefully and independently audited. They revealed that just those 48 companies incurred extra direct compliance costs of a whopping $2.6 billion in the single year that was studied, 1977. This was equivalent to 10.1% of total capital expenditures of the 48 companies, 15.5% of their net income after taxes, and 43.1% of their total research and development expenditures.

The primary objective of the pending legislation is to ensure that regulations that will have major economic impact will undergo careful economic analysis. The idea is to make sure there will be a reasonable balance between the benefits of a regulation and the costs to realize them. Proposed regulations that have been assessed for rationality may then be implemented by the rulemaking agency.

A few critics have argued, incorrectly, that the new legislation would tie agencies in knots, relies too much on cost-benefit analysis, would give the OMB too much power, and would impose too many steps that would delay needed rules. Serious study of the proposed legislation proves such concerns groundless.

Some critics say that benefits cannot be reduced to numbers and that costs cannot be calculated precisely. No one insists on that sort of exercise. Indeed, the bill would not require agencies to mechanically weigh benefits and costs.

What the many supporters of regulatory reform seek is the gathering and analysis of information needed to make more rational decisions. The legislation calls for the simple imposition of some economic discipline in the rulemaking process to ensure that contemplated rules are justified and that the planned approach is efficient.

The legislation also would ensure a more accessible and rational regulatory process with improved agency accountability to the public. In addition, it provides improved recourse to the courts when an agency's actions are considered unjustified or outside its jurisdiction.

During this post-election session, the House should be allowed to vote on the consensus version of the bill offered by Congressmen Hall and Kindness. Otherwise we'll have the spectacle of inaction in the face of a unanimously favorable Senate vote and the support of most House members. It just doesn't make sense to allow a small minority to block action on this legislation.

And it doesn't make sense to have five years of sincere effort by men and women of good will in Congress, business, two administrations and the general public go on the legislative shelf. Scarce resources that are wasted on inefficient, over-costly regulations must be directed to capital investments that create jobs.

But first the House leadership must bring the regulatory reform bill to the floor for a vote. It shouldn't remain bottled up in the rules committee. It shouldn't get nitpicked or amended to death. It is a good bill, fair to business, public interest groups, regulatory agencies and the people.●

TRIBUTE TO GEORGE W. SMITH

HON. ALLEN E. ERTEL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. ERTEL. Mr. Speaker, I would like to take a few moments to honor a man who has contributed so much in the field of education, Mr. George W. Smith, superintendent of Loyalsock Township School District.

Mark Twain once said, "It is noble to teach oneself, it is still nobler to teach others." George Smith quite appropriately fits this quotation. For 35 years, he has given of himself solely to teaching others. As an educated man in his own right, George had the will and desire to educate the youth. He has involved himself in both junior and senior high school education, very demanding and easily influenced age groups whose proper development is crucial to our society.

Mr. Smith, who is retiring as of January 1, 1983, will be remembered as a fine educator of mathematics, an outstanding principal and superintendent,

and an asset to the community. As a graduate of Bloomsburg State College with a bachelor of science in education, Mr. Smith went on to receive a master of science in education at Bucknell University, and then worked toward a doctorate at the University of Pennsylvania. He has dedicated his career to educating others both in the classroom and out, as an administrator and active member of many associations including the National Education Association, the Pennsylvania State Education Association and the National Association of Secondary School Principals.

In his 35 years in education, Mr. Smith has been a role model to the many students he has taught and an inspiration to his colleagues. And so, Mr. Speaker, I would like to congratulate George Smith on 35 years of remarkable service to our educational system and on behalf of his family, friends, and colleagues wish him the best of health and happiness in the years to come.●

TRA: A SAD TALE OF MINES, SHAFTS, AND BROKEN WORDS

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. GAYDOS. Mr. Speaker, 20 years ago, when the Government of the United States decided that unilateral disarmament was the way to avoid the trade war we have now, it purchased the consent to disarm with a promise.

The promise was to the workers whose industries are now decimated by goods that probably could not be exported to the United States but for subsidies and dumping.

The promise was for trade adjustment assistance, which is financial and other help for workers whose jobs would be lost to the imports that this unilateral disarmament was sure to bring.

It was a textbook quid pro quo: A case of this for that; labor agreed to support the disarmament and Government promised to help with trade adjustment assistance. The compact was reaffirmed with the trade laws of 1974 and 1979.

Imports are certainly up. With a $44 billion trade deficit coming, and unemployment at 10.8 percent, they have never been higher. Has the agreement been kept?

"'I guess," says Lloyd McBride, president of the United Steelworkers of America, "it is the same old story; somebody gets the gold mine and somebody gets the shaft. The workers got the shaft."

Furthermore, Mr. Speaker, the traders got the gold and continue to get it because of subsidy and dumping.

Mr. McBride testified today before the Executive Committee of the Steel Caucus on the failure of trade adjustment assistance.

His words and thoughts on the subject are so forceful and full of insight that I commend them to the House without further comment:

STATEMENT OF LLOYD MCBRIDE, PRESIDENT, UNITED STEELWORKERS OF AMERICA, BEFORE THE HOUSE STEEL CAUCUS ON TRADE ADJUSTMENT ASSISTANCE, DECEMBER 14, 1982

At the outset, let me restate something you already know: The American steel industry and its employees are locked in an economic depression unlike anything since the 1930's. The outlook for the immediate future is bleak and no one has any idea of when or how the steel industry will recover. Many of our members—some 120,000—are facing economic disaster and all they hear from the White House are phony excuses and lame appeals to "stay the course." If nothing else, the recent elections should have sent the message that more than Presidential rhetoric is required to get the economy moving again.

Another fact that you already know is that at a time when our industry is operating at below 40 percent capacity, steel imports are approaching record highs, averaging 22.4 percent of our market which is about 25 percent higher than last year. According to recent decisions by the International Trade Commission and the Commerce Department, much of this steel trade is unfair. While the agreement with the European Community to limit future imports may bring some relief, we are very concerned that steel imports from other countries do not simply replace those from Europe.

Undoubtedly, there are a number of important factors contributing to the steel depression. Most of these are rooted in the general recessionary economic conditions affecting most of the world. Unfortunately, the recession came at a time when the steel industry was already suffering from severe problems of overcapacity and industrial restructuring. Thus, a weakened steel industry was caught up in a general economic downturn which for some became a recession but for us resulted in depression.

The misguided economic policies of the Reagan administration must, at least in part, be held responsible for the depth and duration of the recession. Moreover, Reagan's failure to recognize the errors and change policies so as to lead us out of the economic morass is only prolonging the social and economic pain of the American people.

I am here today to raise one particular issue confronting our members, especially those who have had to bear the brunt of steel imports.

The trade adjustment assistance (TRA) program was first conceived as a part of the Kennedy round of trade negotiations and was incorporated into the Trade Act of 1962. It has been refined and imporved upon in the subsequent trade laws of 1974 and 1979. Unfortunately, the program was largely decimated in the Budget Reconciliation Act of 1981.

As initially conceived, TRA was based on the idea that workers who were injured because of liberalized international trade policies should receive special consideration in an effort to help them adjust to changing trade patterns. Indeed, the various trade laws assumed, as a matter of policy, that lower trade barriers would result in increased unemployment in trade sensitive industries such as steel, and that the affected workers should receive special consideration.

Prior to the budget cuts, the heart of the TRA program was the provision of income maintenance benefits amounting to 70 percent of a worker's average weekly wage—not to exceed the national average weekly wage—for up to 52 weeks. For the first 26 weeks of trade-related unemployment, the TRA benefit was partially offset by regular State unemployment compensation benefits and could be further offset if the worker qualified for Federal extended benefits. The point is, that prior to the Reagan administration, workers who became unemployed due to foreign imports received some degree of special adjustment consideration throughout the eligibility period.

For all practical purposes those special considerations and, in fact, the whole notion underlying TRA have been largely eliminated. Basically, over the past 2 years two things have happened:

(1) At the administrative level nearly all of our petitions for TRA have been denied, and

(2) Legislatively, TRA benefits have been reduced to where they are indistinguishable from the regular State unemployment compensation program.

PETITION DENIAL

Since late 1981, our union has filed TRA petitions covering 93 steelmaking facilities. These petitions covered most of basic steel production where imports were high and unfair charges were made by the industry. Thus far, the Labor Department has only certified two of the facilities plus two partials. Seven of our petitions have been denied and the remaining 84 are pending, some as long as 14 months. Because of the method used by the Labor Department in certifying TRA petitions, we believe that most of our petitions will be turned down.

At the same time, steel imports have continued at record high levels. In terms of market share, imports in 1981–82 accounted for a larger share than in 1977–79.

With respect to TRA petitions, however, the 1977–79 period witnessed the highest level of steel petitions approved. In fact, during that period most of our petitions were approved compared to now when very few are being certified.

The question naturally arises, why? Why, if import levels are nearly the same and market shares even larger, does the Labor Department certify import affected steelworkers in 1977 and not in 1982? We asked that question of the Labor Department and were basically told it was because of the criteria used to determine import relatedness.

According to the Labor Department, when it receives a TRA petition, the primary factor to be determined is whether there is a shift in customer preference to imports. If such a shift to imports occurred, then TRA was certified. If there was no shift, on the other hand, then the petition is denied. The problem, as we understand it, is that once the customer shift to imports has occurred, the level of imports is no longer relevant for TRA purposes.

In other words, if in 1977, customer "X" of U.S. steel shifted his purchase from U.S. steel to foreign importers, then the affected U.S. steelworkers could be certified for TRA. However, if 5 years later the same customer "X" continues buying imported steel and, in fact, increases his purchases, the

Labor Department maintains that no customer shift has occurred and denies the petition.

Put another way, once a given customer shifts to steel imports, his future imports are no longer counted for TRA certification purposes, no matter how much imported steel he may buy.

If this indeed is the primary technical method for determining TRA certification, then we believe it should be more closely examined. While it may have had some validity when first developed, circumstances have changed radically in the last few years and we believe that the method might very well be flawed. Certainly, there is nothing in the law that requires the application of such customer shift criteria.

The other major administrative problem with TRA certification is the long lag time involved. Some of our petitions currently pending at the Labor Department were filed over 13 months ago and the affected worker may have already exhausted all of his unemployment compensation benefits and is still waiting on the labor department to make a determination. Given the economic hard times our steelworkers are suffering, we think that their petitions should be processed in a timely manner.

LEGISLATIVE CUTS

In 1981, the Congress approved Reagan's first budget reconciliation bill which included drastic cuts in the TRA program and which nearly eliminated the idea that trade impacted workers should receive special consideration. Indeed, the effect of the legislative cuts was to transform TRA into little more than a 52-week program which is identical in amount to the regular State unemployment compensation program.

In this respect, the budget reconciliation bill:

Cut the TRA, benefit level from 70 percent of a workers weekly wage (subject to a $289 cap), to the level payable under State law;

Required TRA certified workers to first exhaust all State and Federal extended benefits before receiving TRA; and,

Limited the combined State, Federal and TRA benefits to a 52-week period.

While the Reagan administration sought to make the group eligibility requirements even more restrictive, and while these restrictions were initially approved by the Congress, subsequent legislation prevented the restrictions from taking effect.

While the administration claimed that the changes in the TRA benefit structure would be to place the emphasis on training, it refused to make training an entitlement. The long time it is taking for the Department of Labor to conclude its investigation and render a decision means that the training option has run out for most of the workers who would consider retraining.

CONCLUSIONS AND RECOMMENDATIONS

The combination of adverse administrative actions and legislative cuts have all but eliminated TRA as a viable program for workers subject to trade-related unemployment. What little is left of the TRA program is more closely akin to the regular State and Federal unemployment compensation programs available to all workers. Thus, the original idea underlying the TRA program has largely been negated.

Indeed, with the recent passage of emergency unemployment benefit extensions—the Federal supplemental benefits—most eligible workers can receive as much as 49 weeks of unemployment compensation benefits. In this sense, the trade policy factor has largely become irrelevant.

Given this situation, we recommend that the Steel Caucus consider the following:

(1) Review the criteria used by the Labor Department in determining TRA certification in order to identify and correct, and flaws in that criteria. At the very least the Labor Department should be requested to review its criteria and methods in light of existing circumstances and steel import levels.

(2) Examine the Labor Department's long lag time in making a determination on TRA certification.

(3) Address the question of should we have a trade adjustment assistance program or not. This would involve a series of hearings and investigations that could contribute to any final decision on the TRA program which is scheduled to expire in September 1983.●

OPEN SEASON ON FREE TRADE

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. DANNEMEYER. Mr. Speaker, one of the things that struck me as the House began debate on H.R. 5133, the domestic content bill, last week was the ironic twist of historic events relative to the position of our two great political parties on the trade issue. When the Smoot-Hawley Tariff Act of 1930 was enacted, it was signed into law by a Republican President, Herbert Hoover, after passage by a Republican Congress.

Today, however, we see more support for protectionism from Democrats than we do from Republicans. This is not to suggest that the opposition to the domestic content bill is a partisan matter. Far from it. I note with great interest that the able and distinguished chairman of the Committee on Ways and Means, Subcommittee on Trade, the gentleman from Florida (Mr. GIBBONS), continues to be a leading spokesman against the bill. Other speakers on the House floor in opposition to the bill have included the gentleman from Oklahoma (Mr. JONES), the chairman of the Committee on the Budget, the gentlemen from Georgia, (Mr. LEVITAS and Mr. BRINKLEY), and the gentlemen from Texas (Mr. PICKLE and Mr. HANCE). The vote on reporting the bill out of the Energy and Commerce Committee was also bipartisan, with my Democratic colleagues Mr. GRAMM, Mr. WAXMAN, Mr. GORE, Mr. WYDEN, and SANTINI opposing it.

It is also true that some of my Republican colleagues are supporting the legislation now before the House on domestic content. Even some conservative publications have recently made reference to protectionist responses to the economic challenges that confront us.

Nonetheless, all of us, to some degree or another, are students of history. The general switch of the positions of our parties should not go unnoticed. In this connection, I would like to point to a recent commentary by William F. Buckley, Jr., in which he made the following statement: "So here we are: the party of Hawley-Smoot, the GOP of protectionism, campaigning against tariffs. While the party of free trade, the Democratic Party, is attracted to reactionary policies. Well, well."

Mr. Speaker, far be it from me to counsel you and your party on electoral strategies. The history of the 1932 election following the passage of Smoot-Hawley in 1930 does not bode well for those looking to 1984 who are taking a protectionist line today. With international economic policy a major component of overall foreign policy, and with the need for a bipartisan foreign relations strategy as a major element of recent times, let us work toward a bipartisan effort in support of free and fair trade. Instead of shifting roles, let us have the parties come together in this effort.

Mr. Speaker, at this point I would like to insert the full text of Mr. Buckley's remarks into the RECORD:

[From the Washington Post, Dec. 9, 1982]

OPEN SEASON ON FREE TRADE

(By William F. Buckley, Jr.)

Flashback time.

Thirty years ago Herbert Hoover, heading up a commission to explore the ungoverned growth of government, handed in his report to President Harry Truman. It was a massive document, a remote paragraph of which recommended the termination of government subsidies to a small plant in Massachusetts engaged in the manufacture of hemp rope. The plant had been founded during the Civil War to produce a commodity not then available for one reason or another. Hoover's researchers discovered that hemp had become available in America in the early 1870s, but the plant, and its 87 employees, went on and on, surviving by government subsidy.

Truman called in Representative John F. Kennedy and said: go up to Hemptown and make a deal, the bottom line of which is that the United States government is going to get out of the business of making hemp at the taxpayers' expense. Kennedy made the trip, and devised what he thought to be the most munificent possible deal. Just agree to this—he said to the labor union—that no one who quits the hemp factory, or who retires, or who dies, will be replaced. That would mean that in, oh, 40 years, the hemp factory would simply wither away. Meanwhile, no one will lose his job. Okay? Answer: No. Not okay. Kennedy reported back to Harry Truman. What to do about it? Truman changed the subject. For all you know, tomorrow's hanging may be done with the use of hemp made in Massachusetts to cope with a shortage that arose during the Civil War.

Scene, 1960. Senator John F. Kennedy is campaigning in Massachusetts for the presidency, which is on the order of God campaigning in paradise. Massachusetts shoe

factories are depressed, and he is told that an encouraging word is always in order. So, he comes out for protecting native shoe industry from abroad.

And now Walter Mondale, heir apparent since the abdication of Senator Edward Kennedy to the title of Mr. America of Deep-Freeze Liberalism, is going about the country growling about foreign imports. Causing a certain discreet embarrassment to his rooters inasmuch as, dating back to Adam Smith, the idea of tariff barriers has been thought the essence of illiberalism, besides being very bad economics.

But, you say, isn't free trade something that requires two to tango? There is no doubt that Europe is beefing up its tariff walls, and doing so rather blatantly. (The other day, an Englishman who ordered a pair of Timberland shoes from the Lands' End catalog for $60 paid $60 in duty to Her Majesty's customs office.) The Japanese have refined tariff barriers so anfractuously set up as to make it impossible to find out just who is keeping the American car or the American computer from ever getting sold. No law is there to block it, it's just those forms . . . and delays . . . and unwillingness of the merchant to stock the stuff. . . . and you give up.

The American protester then rises to a point of philosophical order. Okay, he begins. We Americans ought to compete. And I repudiate, for the record, any request that the government protect my industry. But do you call it competition when the government I am trading with—let's say, South Korea—is subsidizing its shoe factories? So that a pair of shoes that sells here for $30 is actually being subsidized to the tune of $15. The kind of "export subsidies" President Reagan criticized in his speech in Brazil the other day. Why shouldn't we get a $15 protective tariff so that our shoe manufacturers would be competing against their shoe manufacturers, at the real economic cost?

The protester has to be answered as follows: 1) It is virtually impossible to calculate the true economic cost of a product being imported. The most skillful accountant in the world can't arrive at the exact figure, which needs to take into account domestic taxation, foreign taxation, monopoly or oligopoly leverage, etc. 2) If the U.S. government has grounds for concluding that a foreign country is engaged in an act of economic aggression—i.e., attempting to bankrupt an American business so as subsequently to step in amid the ruins in order to gouge the American consumer—then you call not for fine-tuned tariffs, but for an embargo. The proper role of government is political, not economic. 3) Otherwise, you let things go, remembering that cheap goods in America are of very direct benefit to those who consume those cheap goods, and that the dollars being paid for those cheap goods are of no use whatever to the foreign country—except to buy things from America, giving Americans jobs.

So here we are: the party of Hawley-Smoot, the GOP of protectionism, campaigning against tariffs. While the party of free trade, the Democratic Party, is attracted to reactionary policies. Well, well.●

THE AFTERMATH OF PROPOSITION 15

HON. DUNCAN HUNTER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. HUNTER. Mr. Speaker, how often have we heard the false claims of those who seek more Government restrictions on firearms ownership that the majority of the public is on their side, that the will of the people, as shown in various national public opinion polls, demands stronger gun controls?

I think we can now lay these claims to rest with the outcome of this year's general election. The results show clearly that voters not only reject gun control, but are taking steps to insure the protection of their right to gun ownership.

In New Hampshire and in Nevada, citizens voted overwhelmingly to add to their respective State constitutions amendments protecting the right of the individual citizen to keep and bear arms. These measures gained more than 70 percent of the vote in each State.

And in California, with one of the highest voter turnouts in history, a far-reaching gun control proposal, billed by its proponents as a handgun registration measure, was decidely rejected by a 63- to 37-percent margin. That California vote is especially pertinent for my colleagues who will undoubtedly face legislative proposals for more gun control in the coming session of Congress.

The following commentary from the National Rifle Association's legislative newspaper, Reports from Washington, accurately summarizes what the California vote means. I ask that it be inserted in the RECORD for the benefit of my colleagues so that its message will, indeed, not be lost on those of us in Washington.

THE AFTERMATH OF PROPOSITION 15

Before the elections, when they still boasted a 2-1 margin in the polls, Proposition 15 supporters described the anti-gun measure in all manner of glory.

"If we're successful here," proponent John Phillips told the Tribune Company News Syndicate, "it will do more than break the myth of the invincibility of the gun lobby. What this is designed to do is tell (the public) they can vote their consciences."

With Prop. 15 "you have 10 percent of the American electorate voting on gun control," said Charles Orasin of Handgun Control, Inc. "Their message will not be lost on the politicians in Washington."

San Jose Police Chief Joseph McNamara, one of the few California lawmen to support Prop. 15, put it more bluntly: "We don't have to depend on scared politicians this time," he told the *Washington Post*. "It's the vote of the public."

They were right, of course, and the press lapped it up. Editorial after editorial came out in favor of Prop. 15, as the media felt sure it was backing a winner.

That changed Nov. 2. Prop. 15 went down by nearly a 2-1 margin, and with it, the balloon of the gun control groups.

What did the press say afterwards? California voters were "conned or panicked out of (their) own best democratic impulse" by a well-organized media blitz, the *Atlanta Constitution* said. The *Los Angeles Times* argued that "the will of the people has been thwarted by a vocal, well-financed minority." And the *Washington Post*, in its paltry explanation for Prop. 15's defeat, could credit only a "stubborn unwillingness among most of us to give up an old familiar option."

All the explanations and rationalizations have ignored the obvious: people, not pollsters, pull the ballot-box levers. When the curtain closes behind them, voters are completely free to wipe out public education campaigns, multi-media blitzes or the morning editorial if they so desire.

After his presidential bid failed some years ago, U.S. Sen. Barry Goldwater was asked by newsmen to explain his defeat. "The other fellow got more votes than I did," he quipped.

That is exactly what happened in California Nov. 2. In this country's truest exercise of the freedom of choice, voters overwhelmingly rejected gun control. They said the same thing in Massachusetts in 1976 and they will say the same thing in the future. That is the simple beauty of what happens when mean and women are indeed allowed to "vote their consciences."●

GILMAN SEEKS REPEAL OF WITHHOLDING OF INTEREST ON SAVINGS ACCOUNTS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. GILMAN. Mr. Speaker, today I am introducing one measure which would begin to relieve some of the inequities created by passage of the Tax Equity and Fiscal Responsibility Act of 1982. I am, of course, referring to that provision of the law which would impose a 10-percent withholding requirement on interest and dividend income, effective July 1, 1983, and my bill would repeal that inequitous provision.

When the House of Representatives voted on the conference report of this tax bill, I spoke out against it for several reasons, not the least of which was the withholding requirement of which I now speak. My feelings remain the same today, and it is because of mounting dissatisfaction with this section of the law in my district that I feel the need to enact legislation which would repeal this provision.

When one considers the pros and cons behind the enactment of a requirement such as this, it becomes apparent that as a revenue enhancing device, expectations are for a tax collection of $10.6 billion over the next 3 years. However, that aspect is the only

favorable portion of the legislation. There are so many more negative aspects that outweigh the need to create revenue and those arguments far outweigh that one "pro" argument. The most glaring argument against the withholding of interest and dividends is that it is quite simply a tax on savings and investments, which burdens the honest taxpayer at a time when we have committed ourselves to solving the economic ills of this Nation. This in turn leads to a lessening of the disposable income available to the consumer, which consequently leads to a disincentive to reinvest such interest income. Not only does this section discourage savings, but it assumes that the average taxpayer shirks responsibility in reporting such interest income.

I know the people of my district to be honest and devoted Americans, and I feel that enactment and administration of this section of the tax bill suggests otherwise. It is an affront to the dignity of the people of this country to suggest that deliberate unreporting of earned income earned from savings and dividends to the Internal Revenue Service; it is an injustice to penalize the American people on this matter. Furthermore, administering this requirement will ultimately fall to this Nation's financial institutions, who estimate $1 billion in startup cost while at the same time forseeing $1 billion in carrying out the administration of this tax each and every year. We can only assume that this projection will change drastically in a few years, and that amount will start to creep well above the $1 billion mark. And as we well know that these administrative costs will be passed along to the consumer—the very individual who is being taxed. Accordingly, this provision is in actuality a double tax—the initial tax, and the subsequent higher charges for services rendered by financial institutions. Some even foresee the lowering of interest rates on savings accounts, as these institutions find themselves unable to fully absorb the costs brought about by enactment of the tax bill during the summer. This tax is wrong and inequitable. I urge my colleagues to support the adoption of my bill and I ask that a full text of my bill be printed at this point in the RECORD for the edification of my colleagues.

H.R. 7417

A bill to repeal the withholding on interest and dividends enacted by the Tax Equity and Fiscal Responsibility Act of 1982.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subpart A of title III of the Tax Equity and Fiscal Responsibility Act of 1982 (relating to withholding on interest and dividends), and the amendments made by such subpart, are hereby repealed; and the Internal Revenue Code of 1954 shall be applied as if such subpart (and amendments) had never been enacted.●

THE REGULATORY PROCEDURE ACT OF 1982

HON. ELLIOTT H. LEVITAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. LEVITAS. Mr. Speaker, over the past few months the House leadership along with representatives of the business community, representatives of so-called public interest groups and other parties have negotiated a compromise version of H.R. 746 which resolves the major concerns over the original regulatory reform bill. A few critics, however, have tried to raise a confusing smokescreen of questions about the bipartisan compromise bill. In order to answer these questions and set the record straight, the Business Coalition on Regulatory Reform has developed an analysis of the compromise version of H.R. 746 which responds to the objections which have been raised.

I hope that each of you will take the time to read through this analysis and become more familiar with this important legislation. It is time to relieve the American people of burdensome regulations. It is time to make our regulatory process more fair, open, and accountable. The compromise version of H.R. 746 will do just that.

At this point, I would like to place in the RECORD, the Business Coalition on Regulatory Reform's response to the major objections raised to H.R. 746. I believe that after reading this analysis, you will see that it is difficult to object to this legislation which will be of great benefit to the American people.

RESPONSE TO THE PRINCIPAL OBJECTIONS THAT HAVE BEEN RAISED TO THE COMPROMISE VERSION OF H.R. 746

The compromise version of H.R. 746 is the culmination of years of analysis, negotiation and compromise. As discussed in Part II of this document, the bill represents a carefully drafted and well-balanced legislative attempt to make a number of sorely needed improvements in the procedures and practices that agencies follow in formulating and adopting regulations in informal rulemaking proceedings. If enacted into law, it will result in rules that are better crafted, better supported, better understood and better accepted than has often been the case in the past.

Nevertheless, critics of the legislation portray the bill as a threat to the regulatory process, to the independence and jurisdiction of federal agencies, and to the underlying enabling statutes administered by those agencies.

We believe these criticisms are demonstrably incorrect and cannot survive an objective examination of the bill's provisions. The principal arguments that have been raised against the compromise bill and the answers to those arguments appear in the sections that follow.

1. THE ALLEGATION THAT THE BILL WOULD TIE AGENCIES IN KNOTS AND CREATE AN AVALANCHE OF LITIGATION

The claim that the analytical and procedural reforms embodied in the compromise version of H.R. 746 would effectively chock off agency rulemaking activities is an argument commonly advanced whenever proposals are made to reform the regulatory process.

The compromise version of H.R. 746 is the product of long and careful negotiations that took place over the course of the last two Congresses. As a result of those negotiations, the bill was carefully refined, and its analytical and other procedural requirements were significantly streamlined. Indeed, many of the public interest groups that had criticized the regulatory analysis requirements of the original committee bill have acknowledged that the cost-benefit provisions have been improved significantly in the compromise version of the bill. For a variety of reasons, these requirements would not stymie agency rulemaking activities.

First, whenever one is considering the additional burdens that may be involved in performing a regulatory analysis, it is essential to bear in mind that the analytical requirements apply only to major rules—basically, those fifty to one hundred rules per year that will have an annual impact on the economy of $100 million or more. It does not seem too much to ask that rules of such far-reaching impact be analyzed carefully by the agency and that reasonable alternative means of accomplishing the rulemaking objectives be considered. A succession of administrations, both Democratic and Republican, have agreed on this point, as reflected in executive orders imposing regulatory analysis requirements on executive branch agencies.

Second, there is no substance to the allegation that the regulatory analysis requirements for major rules will tie agencies up in endless litigation over asserted failures to comply with the new provisions. For all practical purposes, the compromise version of H.R. 746 excludes courts completely from review and enforcement of the regulatory analysis process. No judicial review is permitted of the decision whether or not to treat a rule as a major rule or of the adequacy of an agency's compliance with the regulatory analysis requirements. Consequently, these analytical requirements cannot give rise to the spate of litigation that has been predicted by some critics of the bill.

Third, while the bill would establish a requirement for oral presentations, accompanied in some instances by limited cross-examination, this additional opportunity for public participation (which applies only to major rules) can hardly be expected to tie an agency in knots. The fact is that many agencies commonly and successfully utilize informal public hearings (often with cross-examination) when considering major rules today. And the compromise version H.R. 746 provides agencies with broad discretion to regulate the course of such informal public hearings "in order to ensure orderly and expeditious proceedings." The bill specifically authorizes agencies (1) to limit the time allowed for oral presentations and cross-examination, (2) to establish procedures designed to limit cross-examination to significant issues of fact which the agency determines could not adequately be resolved by other means, and (3) to designate "repre-

sentatives to make oral presentations or engage in cross-examination on behalf of persons with a common interest in the rulemaking." (Section 622(e).) Moreover, the compromise version of H.R. 746 carefully limits the scope of judicial review of an agency's failure to allow cross-examination, using as its model the comparable provision of the Clean Air Act, which has been praised by environmental groups in the past.

One last observation: Some critics allege that H.R. 746 would require an agency to maneuver through thirty-two procedural steps to adopt a rule instead of what they assert is the current six. Neither of these numbers (thirty-two of six) has any meaning or validity as used by the critics. To be sure, H.R. 746 would require an agency to provide more complete information for its major rules than currently is required. But the fact is that, under the compromise version of H.R. 746, an agency would proceed through the same basic steps that it now follows in adopting a rule—i.e., publishing a proposed rule (along with a supporting explanation and information), receiving public comment on the proposal, and publishing a final rule (along with an explanation of its basis and purpose).

In short, the allegation that the bill would tie an agency in knots, produce endless litigation, and effectively choke off agency rulemaking is unfounded. Indeed, some of the very groups that have raised this claim in a general way have, at the same time, taken an opposite tack by suggesting that the bill be revised to impose additional requirements for including material in the rulemaking file and for more detailed explanations by the agency of its evaluation of factual materials.

2. THE ALLEGATION THAT THE BILL PLACES TOO MUCH RELIANCE ON COST-BENEFIT ANALYSIS

The assertion that the bill places undue reliance on cost-benefit analysis for major rules cannot be maintained. In fact, the bill does not require that all benefits and costs of a rule be quantified in any terms, let alone in dollars. Nor does it require agencies mechanically to weigh the costs and benefits of a rule and to reject any rule whose costs outweigh its benefits. Under the bill, an agency is required only to analyze "the extent to which the benefits of the rule justify its costs." (Section 622(c)(5).) Both "benefits" and "costs" are defined broadly to include health, safety and environmental, as well as economic and other effects. (Section 621(a)(2) and (3).) In these circumstances, the determination of whether the "benefits" of a rule (as broadly defined) "justify" its "costs" (as broadly defined) will be essentially a matter of agency judgment, and that is as it should be. Moreover, as discussed above, courts will have no authority whatsoever to second-guess the agency's judgment on this point. Finally, even where the benefits of a rule do not justify its costs, an agency would still be free to adopt the rule; it simply would explain its decision to do so. (Section 622(c)(5).)

By the same token, while an agency would be expected to analyze alternatives to the rule that attain the rulemaking objectives "in a manner consistent with applicable statutes," it would not be required to adopt such an alternative simply because it has lower costs than the rule itself. Again, the only requirement is that the agency state its reasons for selecting the rule rather than a lower cost alternative that would accomplish the same objectives. (Section 622(c)(6).)

Finally, nothing in the bill requires agencies, in performing the foregoing analyses for major rules, to quantify costs or benefits that cannot reasonably or responsibly be quantified. The fact is that H.R. 746 would not require agencies to place a value on human life or health. Any claims to the contrary are absolutely untrue.

3. THE ALLEGATION THAT THE BILL BRINGS INDEPENDENT AGENCIES UNDER THE CONTROL OF OMB AND PERMITS OMB TO DISPLACE AGENCIES IN THE EXERCISE OF RULEMAKING DISCRETION

The claim that the compromise version of H.R. 746 would bring the federal agencies, particularly the independent agencies, under the thumb of OMB is demonstrably untrue. In fact, except for its role in coordinating the preparation and publication of agency regulatory agendas in a single issue of the Federal Register, OMB is not even mentioned in the bill. Moreover, the limited new authority that the bill confers on the President—namely, the authority to designate new or existing rules as "major" rules and to modify the schedule for review of rules—expressly may not be delegated to OMB or anyone else. (Sections 621(b)(1) & 641(a)(2).)

To be sure, Section 624 of the bill does contemplate limited presidential review of agency compliance with the new analytical requirements for major rules, and a limited delegation of that authority is permitted. But this basically is authority that the President has today. And it is particularly important to preserve this authority, since the bill permits virtually no judicial review of agency compliance with the new analytical requirements. Therefore, the provisions of Section 624, which apply only to major rules, have been carefully designed to avoid making any essential change in the existing status quo regarding the President's constitutional and statutory authority vis-a-vis the federal agencies.

Thus, Section 624 contemplates that the President will establish guidelines and procedures relating to agency compliance with the new requirements for major rules. But the provision does not give the President any new authority to enforce such guidelines and procedures. To the contrary, the bill contains a variety of safeguards to protect against presidential interference with either the timing or the substance of agency rulemaking.

For example, the President is specifically precluded from utilizing authority under Section 624 "to prevent an agency from proceeding with a rulemaking or issuing a proposed or final rule" or "to require an agency to modify a proposed or final rule." Similarly, the bill explicitly states that the authority of the President under Section 624 does not "change the standards applicable to agency action under any other provision of law." Indeed, the bill contains a separate savings clause, Section 626, stating that nothing in the entire chapter dealing with major rules "(1) limits agency jurisdiction to prescribe a rule, (2) relieves an agency of statutory requirements applicable to rulemaking , or (3) displaces rulemaking authority vested by statute in an agency." In addition, even without such explicit statutory safeguards, an agency could not lawfully adopt a rule that is unsupported by the rulemaking record or that otherwise represents an abuse of its discretion—and could not unlawfully withhold or unreasonably delay rulemaking action—regardless of what the President might desire.

In fact, the compromise version of H.R. 746 actually imposes a new restriction upon presidential involvement in rulemaking proceedings. The bill's amendment to section 553 of the APA would require agencies to place on the public record materials relating to involvement by the President or his designee (including OMB) in any informal rulemaking. In this important respect, the bill may be seen as a limitation on authority that the President currently is free to exercise with respect to agency rulemaking proceedings.

In short, the numerous safeguards contained in the compromise version of H.R. 746 carefully preserve agency independence and ensure that the rulemaking authority and discretion that Congress lodged in the agencies is not shifted to OMB.

4. THE ALLEGATION THAT THE BILL WOULD UNDERMINE STANDARDS OF SUBSTANTIVE ENABLING STATUTES

The claim that H.R. 746 would somehow undermine the standards of substantive enabling statutes can be disposed of quickly in light of the proceeding discussion. As noted on page 11 above, the bill does not establish a new cost-benefit or cost-effectiveness standard that agencies must satisfy in adopting all major rules. The standards set forth in the enabling statute pursuant to which an agency is acting continue to apply with full force and effect in the rulemaking proceeding. If there were any doubt on that score, it would be resolved by Section 622(g) of the bill, which states in no uncertain terms:

"The requirements of this section do not change the standards applicable to agency action under any other provision of law or relieve an agency of procedural requirements imposed by any other provision of law."

A similar refrain is sounded in at least two other provisions of the bill. Thus, Section 626, as noted above, makes clear that nothing in the bill "relieves an agency of statutory requirements applicable to rulemaking." And Section 624 states that authority exercised by the President under that provision does not "change the standards applicable to agency action under any other provision of law."

In light of the foregoing, there is no substance to the claim that the bill undermines the standards applicable to rulemaking under substantive enabling statutes.●

TACTICS OF AN ACE IN THE CONGRESSIONAL AIR WARS

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. McCLOSKEY. Mr. Speaker, as the 97th Congress comes to a close, I think posterity should be afforded the privilege of reading about the work of one of our most distinguished colleagues, the Honorable Henry Waxman of California, on a crucial issue before the House.

I attach the article of Michael Barone which appeared in today's Washington Post entitled "Tactics of an Ace in the Congressional Air Wars."

[The Washington Post, Dec. 14, 1982]

TACTICS OF AN ACE IN THE CONGRESSIONAL AIR WARS

(By Michael Barone)

The Reagan administration came to office determined to reduce government regulation of business, and in dollar terms, one of the most expensive forms of regulation is the Clean Air Act. It came up for renewal in September 1981, and the administration, the auto industry, the coal industry, the steel industry, and the utilities all looked forward to this deadline as an opportunity for what they like to call regulatory relief. In January 1981, it seemed likely they would prevail. The potential majority was there: most Republicans plus Democrats from auto, steel and coal constituencies. But the act wasn't revised, and the old provisions remain in effect.

One reason is that the administration and its allies made some mistakes. Another is Sen. Robert Stafford, chairman of the Senate committee that handles the issue; up for reelection in environment-conscious Vermont, he had strong environmentalist backing, and skillfully got his committee to approve a bill that in many ways increased rather than decreased regulation.

But much of the credit—or blame—for the failure to change the Clean Air Act must go to Rep. Henry Waxman (D-Calif.), the 43-year-old chairman of the House Energy and Commerce Committee's subcommittee on health. Chairing a subcommittee with a clear 12-8 majority for revision, and with a full committee chairman who dearly wants relief for the auto industry, Waxman maneuvered and delayed masterfully, preventing action until he had the votes to win. He proved himself to be one of the shrewdest legislators in Congress—and one of the most powerful. The story is worth pondering.

Henry Waxman doesn't look the part. He is 5-feet-5 and bald, with a mustache that could almost be called bushy. Though he represents central Los Angeles, he is not fashionable; he once practiced law in Beverly Hills, but he grew up in Watts, over his family's store, and the closest thing to a Mercedes he has driven is the Buick he was provided as a California assemblyman. He talks in a quiet voice, and, to hear him tell it, he gets along well with everyone he deals with.

Yet he is obviously not a political innocent. At 29, he beat an elderly assemblyman; in his second term, he was made chairman of the Redistricting Committee—not a position entrusted to the naive. He was elected to Congress in 1974; only four years later he got himself elected chairman of the health subcommittee—arguably the most important subcommittee, year in and year out, in the House. And he beat a popular and more senior member, Richardson Preyer, who had the support of the leadership.

In the fight for the subcommittee chairmanship, Waxman operated as they do in Sacramento, pushing hard and unapologetically for support: he emphasized his support of national health insurance, he argued that as a North Carolinian, Preyer would have to support the tobacco industry, and he suggested Preyer might have conflict-of-interest problems because of his family pharmaceutical stock holdings. Waxman also made campaign contributions to some committee Democrats—a common practice in Sacramento and one also engaged in by House Democratic leaders, who nonetheless criticized him for it.

He added another reason: "I know more about health issues than anyone else in the House." House committee and subcommittee chairmen have, since 1974, been elected rather than selected automatically by seniority, and so chairmen now tend to be more in line with the views of their party's members and are more likely to be qualified. In the case of the Clean Air Act, this has given the health subcommittee a chairman who opposed the revisions the administration sought and who had the legislative competence to make his views prevail. Here is how:

May 1981. The administration agreed to a five-year extension for compliance deadlines for the steel industry. This was a deal reached by the Carter administration, the steel companies and the United Steelworkers; by going along, the Reaganites kept everyone happy but lost a key ally: the steel companies and union no longer had an urgent reason to seek changes.

June 1981. Waxman got hold of and released a copy of the administration's draft proposals for revising the act. He called them "radical," and they sparked protest that threw the Environmental Protection Agency into consternation and kept it from ever submitting detailed legislation. When asked how he got the draft, Waxman just smiles; presumably it come from an EPA employee opposed to the administration's ideas.

September 1981. Waxman assembled his subcommittee to hear testimony on the Clean Air Act and public opinion from pollster Lou Harris. The message was unequivocal. "Never in my career," said Harris "have I seen such strong opinion on one side of an issue." Harris told the members it would be political suicide to change the Clean Air Act. Waxman and others believe his testimony had a deep impact, not just on the subcommittee but on congressmen generally.

December 1981. Waxman got the ranking Republican on the health subcommittee, Edward Madigan of Illinois, plus the chairman and ranking Republican on the full Energy and Commerce Committee, John Dingell (D-Mich.) and James Broyhill (R-N.C.) to sign a letter requesting additional technical information from EPA.

Getting those signatures could not have been easy. Madigan, though not necessarily a Reagan ally on the Clean Air Act, was not an ally of Waxman by any means. Dingell, one of the most aggressive chairmen in the House, represents a suburban Detroit district that includes most of the Ford Motor Company's Michigan plants; he was fighting desperately for relief for the auto industry. He lost a major Clean Air Act fight against Waxman's predecessor, Paul Rogers, in 1977, and he is one of the most aggressive members of the House. Broyhill is from a family of furniture manufacturers and has often carried the ball for business groups. Their agreeing to sign Waxman's letter is testimony to his detailed knowledge of Clean Air Act issues.

March 1982. The health subcommittee passed a revision of the Clean Air Act backed by the administration. Waxman lost votes on important provisions by identical 12-8 margins.

April 1982. The full Energy and Commerce Committee voted 25 to 12 against relaxing air standards in national parks and wilderness areas. Two days later, Chairman Dingell suspended the committee's markup sessions. The western utilities lost their key provision, and the administration's coalition was in danger of unraveling; relief for the auto industry—the No. 1 issue for Dingell—was imperiled. Apparently unable to rally a committee majority, Digell suspended action for three months.

August 1982. Dingell opened hearings, apparently with a majority. But Waxman beat him 21-20 on airborne hazardous pollutants, scuttling a provision of key importance to the chemical industry. With two weeks to go until Congress recessed, Dingell and Broyhill refused to negotiate with Waxman, and Waxman resorted to delaying tactics, objecting to the absence of a quorum at committee sessions and objecting on the floor of the House to committee meetings while the House was in session. Stafford's committee in the Senate passed a bill largely extending the current Clean Air Act and adding tough acid rain provisions.

"I'd clearly won a victory," Waxman says. "Now the question is whether we can look at the changed realities and see where we can compromise." "We" includes, he says, Dingell and the various industries; but he and his environmental allies have some new items they want, too: tougher prohibitions on airborne hazardous pollutants and on acid rain.

The Reagan administration's main leverage is a threat by EPA to enforce strictly some Dec. 31, 1982, deadlines that everyone agrees should be extended. But in the first two weeks of the lame-duck session, the bill has gone nowhere, and it seems unlikely to move farther in 1982. In the next Congress, the fulcrum point of compromise will surely be in a much different place than it was in January 1981. The big industries will not get what they want without major concessions to such legislators as Waxman and Stafford.

So in this important area the Reagan administration has failed to dismantle or make less expensive a regulatory system it strongly opposes. The Democrats, who were the architects of so many of these laws, are concentrating on keeping their edifices intact, and they have the skill and, ultimately, the popular support, to do so.

The Republicans are now the party of change and the Democrats the party of the status quo. Legislators like Waxman are practical men of affairs who understand instinctively the way the system works and keep it going; their opponents seem to have a tin ear for politics and make numerous mistakes. The legislative skill of men like Waxman enables them to fight the battle, ultimately, on the most favorable ground, and to maneuver fights until they have the voters behind them on a given issue. For on the big-dollar regulation issues, it is not so much the public as it is businessmen who want change.

Businessmen look at men like Waxman and see them almost as radicals; it's hard for them to understand that, in the House and in major state legislatures, at high levels of state and local government, people like Waxman decide things and get things done. There is a historical analogy here: during the 30 years after Roosevelt's New Deal, Congress and state legislatures were run mostly by men who strongly opposed the New Deal. Now, while Reaganites staff the top levels of the federal government, people who support the welfare state and the regulatory status quo wield most of the power in legislatures and administrative branches of government. So, while the Reaganites prevail on a few highly visible issues like tax cuts, they are losing most of the quieter but certainly very important fights like the one over the Clean Air Act.●

HONG KONG AND THE FLAT TAX RATE

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. DANNEMEYER, Mr. Speaker, now that support for the flat-rate tax has ripened in recent months both in the minds of the Congress and the American people, the time has come to properly question the claims of those who insist that a flat-rate tax simply will not work as its proponents intend.

History tells us that experience is the best teacher. For that reason, it is worth looking at what has happened in the territory of Hong Kong. Hong Kong is presently the only country in the world whose tax structure resembles the flat-rate variety, and its inhabitants have little reason to apologize for that fact. Since April 1, 1966, when a standard rate of 15 percent for individuals and 16.5 percent for corporations was enacted, Hong Kong has enjoyed one of the simplest, and also the lowest, forms of taxation of any nation on this Earth. Compared to the 6,000 pages of small print that comprise the United States Tax Code, Hong Kong's tax statute lists only 5 tax deductions, exemptions, or credits—a personal deduction, a deduction for dependents, a credit for charitable contributions, a deduction for business related expenses and an exemption for all those making less than $5,000 per year. As the Deputy Commissioner of Hong Kong's income tax division puts it: "Our philosophy is not only to keep each and every taxation levy, be it direct or indirect, simple and easy for the taxpayers, but also productive and inexpensive for the Government to administer."

If anything, the tax policies of Hong Kong have surpassed those objectives. In 1948, in the period immediately following World War II, Hong Kong was in the economic doldrums. An impoverished and devastatingly depressed state, its annual per capita income stood at a mere $180. But, since that time, minimized disincentives on savings and investment due to the low levels of taxation have led to an economic growth rate of 9 percent per year in Hong Kong, including double-digit growth in the past few years. Even in the "recession" year of 1981, investment and job creation stimulated by low rates of taxation held the unemployment rate in Hong Kong to 3.8 percent. And that is not all; due to a narrow tax base and low standard rates of taxation, rapid economic growth has been facilitated which, in turn, has yielded increased tax revenues for the Government. Currently, Hong Kong has a budget surplus, a near absence of public debt and no need to resort to the inflationary practice of deficit financing. At the same time, Hong Kong provides its citizens with a rather generous social safety net including extensive housing, education, health, transportation, social security, and other community services, not to mention the fact that the poorest 20 percent of the population has made the most of the fivefold increase in per capita income that has taken place since 1948. Is it any wonder then that officials in Hong Kong are so enthusiastic about the virtues of a simple and inexpensive way to implement tax system?

Of course, Hong Kong is not the United States and what works there might not work here. But we, in this country, have already experimented extensively with a progressive income tax system that is neither simple nor inexpensive and our experience suggests that the more complex and expensive the system gets, the poorer the economic results. Thus, it should not be surprising that a number of measures have been introduced into Congress that would reform our tax laws. Some of these aim at a greater redistribution of income than at either a reduction or a simplification of our current tax burden. These should be avoided like the plague of our present system. But others resemble, to a greater or lesser extent, the true-to-life example Hong Kong has provided us. That being the case, the least we can do is give these proposals a closer look. If those who fail to learn from the mistakes of history are destined to repeat them, then it stands to reason that those who absorb the lessons of history can benefit accordingly.●

TRAINING THE MILITARY WITH ELECTRONIC TRAINER

HON. DUNCAN HUNTER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. HUNTER. Mr. Speaker, against the backdrop of today's record costs associated with recruiting, training, and retention of our military forces, it is encouraging to note the rapidly emerging technological developments involving electronic simulations, a presence only now beginning to be felt that can save U.S. taxpayers untold millions of dollars.

Moreover, the application of simulation systems has already replaced the need for costly and scarce actual hardware that, until now, has been required for hands-on training in the military environment.

There are 32 electronic equipment maintenance trainer devices, for instance, placed in classroom use earlier this year at the U.S. Naval Training Center.

Technicians enrolled at this school are graduated at a rate of 4,000 annually for assignment to the fleet.

Before introduction of the trainer device at this school, Lt. Comdr. Charles Arsta, its officer in charge, stated that he faced two major problems: Too many students for classroom capacities and too few shipboard radar systems on which his students could be trained.

Even with 10 of the AN/SPN-10 radar systems available, the costs for installation and maintenance totaled more than $1 million.

This cost will be cut by more than $700,000 in 1982 through use of the new trainer devices, which were designed and produced by Cubic Corp. in San Diego.

Further, Capt. Charles E. Heiland, commanding officer of Service Schools Command of which the electronic technicians school is a part at Great Lakes, reports that classroom capacities and training capabilities have been increased by more than a third.

Costs for training these specialists, meanwhile, can be cut by 36 percent. An additional benefit is recognized in the improved performance test scores, up to 10 points, since use of the new devices began earlier this year.

The technology involved in development of the electronic equipment maintenance trainer device draws on integrated computer simulation in establishing a self-paced learning environment. Each device consists of a student console containing a cathode ray tube (CRT) display, touch panels, videodisc player, microcomputer, dual floppy discs and internal electronics.

Students interact with the trainer device through touch panels on the face of the video (color CRT) display and an adaptive black and white display.

Up to 108 images can be recorded on each floppy disc, illustrating maintenance procedures and trouble shooting techniques. By touching the face of the display, students cause the device to respond pictorially in a manner similar to the way actual equipment would respond.

The devices currently in use are two-dimensional while a second version of the trainer device offers three-dimensional capabilities.

Cubic has developed in the course of 10 years a broad range of electronic systems and devices, one of which has gained global prominence as a method of training combat fighter pilots.

This high technology company has installed seven training ranges in the United States and three abroad, providing realistic air-to-air combat training for U.S. Air Force, Navy, and Marine pilots, as well as fighter pilots for allies.

An estimated cost savings by the Navy is identified as nearly $100 mil-

lion through use of Cubics' tactical aircrew combat training system. And Air Force users of Cubic's air combat maneuvering instrumentation ranges have achieved corresponding savings.

Through electronic simulation of weapon firings, no actual missiles are expended, yet pilots extract maximum realism from the training exercises. And following each air-to-air training mission, they can review their strengths and weaknesses during playback.

Air combat simulation technology is largely an outgrowth of training requirements produced during the Vietnam war because of unacceptably high U.S. fighter pilot losses.

It should be noted that the two U.S. Navy pilots who destroyed two attacking Libyan aircraft over the Mediterranean Sea in August 1981, were trained on Cubic's air-to-air combat ranges.

Both the Navy pilots reported that their success was attributable to the simulated combat training they experienced before deploying to the U.S. 6th Fleet in the Mediterranean.

Numbers of other electronic simulation capabilities are on the way to military users, including a close-in weapon system maintenance trainer.

The recent past indicates a growing need for training of military personnel who may someday face a multithreat environment not unlike the limited warfare in the South Atlantic.

Through use of this new still-developing technology field in which Cubic has distinguished its pioneering leadership while helping provide more cost-efficient response to training needs, it is my belief that a threshold has been established.

I call upon my colleagues to support this technology growth and the broad fields of application that are presenting and will continue to present themselves.●

CONGRESSIONAL PAY RAISE

HON. ROBERT W. DAVIS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. DAVIS. Mr. Chairman, the continuing resolution, as reported, would have automatically provided a 27-percent pay increase for Members of Congress. It has been determined that Members' salaries would be 27 percent greater if we had accepted the same cost-of-living adjustments other civil servants received. Today we voted on an amendment to the continuing resolution which would have reinstituted the pay cap on congressional and executive salaries, but as a 15-percent increase over the current level.

My vote against the amendment to increase the pay cap by 15 percent should not be construed as disagreement with the amount of the pay raise it contained, but as a vote against a congressional pay increase of any amount. For that reason, I voted in favor of a subsequent amendment which would have maintained the pay cap at the current level, eliminating any pay rise.●

WATER: JACK THOMSON'S LEGACY TO KERN COUNTY

HON. WILLIAM M. THOMAS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. THOMAS. Mr. Speaker, I would like to commend to my colleagues the lifelong efforts of one of my constituents, Mr. Jack G. Thomson, to bring water to the people and farms of the San Joaquin Valley.

Anyone familiar with California knows that much of our history revolves around the search for and use of water. Many of California's early water struggles have been highly publicized and dramatized, because power over those decisions rested in the hands of the few. However, I would like to tell my colleagues about one of the less dramatic, but equally important, water projects and one of its chief architects.

Jack Thomson is retiring from the Kern County Water Agency board of directors on which he has served for more than 20 years. He helped to found the agency in 1961, and his was one of the signatures on an historic water contract in 1963 which paved the way for State-supplied water to our county. It was a wise and farseeing act to form the water agency to bring more of California's lifeblood—water—to Kern County, because water obtained under that contract and under renewals of that pact now produces nearly a billion dollars of economic impact within Kern County each year. It has made possible the literal blossoming of a semiarid desert, which in turn has provided countless new jobs.

In 1964, a year after the first water contract was signed with the State of California, Jack Thomson served as president of the board and helped to establish much of the framework which would enable the county's water needs through the years to be met in a democratic, public-minded manner. The agency continues today as a vital force in Kern County's water delivery structure, and that is largely due to the stewardship of people like Jack Thomson.

Jack is a Kern County native who has given a great deal of his time, not just to water problems, but to the betterment of the entire farming industry and to his community. He was named an outstanding Young Farmer by the U.S. Junior Chamber of Commerce in 1954; he served as a trustee of the Vineland school district from 1958–68; he has been a 4-H Club leader; a charter member of the Water Association of Kern County; a longstanding member of the Kern County Water Problems Committee; president of the Kern County Farm Bureau and delegate to the California Farm Bureau Federation.

All of these achievements are a testament to Jack's public service, and they also testify to people's trust in Jack's commonsense, his balance, perspective, and his fairness in solving agricultural problems. I have always found Jack to be a valuable sounding board in my discussions with local leaders on farm problems, and I am sure many other people will also greatly miss his leadership.

As he retires, Jack Thomson leaves a valuable legacy to Kern County, for he recognized that water is our very future, and he has acted to strengthen and preserve that precious lifeline.●

LORRAINE GILES RECEIVES SAFETY AWARD

HON. HAL DAUB

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. DAUB. Mr. Speaker, I take this opportunity to pay tribute to an outstanding educator in my district, Lorraine Giles, on her receipt of the Distinguished Service to Safety Award for 1982 from the National Safety Council.

Ms. Giles, whose career has spanned more than 30 years, has been a member of the council's board of directors for the past 8 years and has held office in the National Safety Council since 1968.

In addition to her work as principal of Gilder Elementary School, Ms. Giles works with the Omaha Police Division to maintain the 59-year record of the Omaha Safety Patrol for no fatalities at a patrol crossing. In an effort to share her knowledge, Ms. Giles has also worked on and contributed to safety manuals that have been used throughout Nebraska, the Nation, and internationally in recent years.

The Distinguished Service to Safety Award is a prestigious recognition of exceptional public service, and I ask my colleagues to join in saluting Lorraine Giles for her important contribution to the safety of our Nation's children.●

THE RETIREMENT OF WILLIAM H. WINKELMAN

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the retirement of Sgt. William H. Winkelman.

Bill was born on July 30, 1926, in Glendale, Oreg. In 1943, his family moved to the Klamath Falls, and upon graduation from high school he enlisted in the U.S. Navy.

From 1943 until his discharge in June of 1946, Bill was stationed at Farragut, Idaho, for boot camp and Norman, Okla., for aviation and aerial gunner radioman's school. From there, the Navy assigned him to NAS Cecil Field in Jacksonville, Fla., and NAS in North Island, San Diego.

Shortly after his discharge from the Navy, Bill began working as a locomotive fireman for the Southern Pacific Railroad in Northern California. On Christmas day, he married Shirley Stead, whom he had met while stationed at North Island.

On September 11, 1950, Bill was sworn in as a police officer for the San Diego Police Department. He worked in the patrol and traffic divisions and the business office until July 18, 1955, then he entered the California Highway Patrol Academy.

When he completed the academy, he was assigned to the Compton office in Los Angeles County and in 1956 transferred to San Diego, where he worked traffic patrol, motors, the commercial detail, and the Pine Valley Resident Post. In 1965, Bill transferred to Santa Barbara, where he spent the most enjoyable and interesting period of his career. Bill worked all of the special duty assignments but specialized in the public affairs field. In 1970, one of the most challenging events occurred, the Santa Barbara riots.

Bill was promoted in 1974 and he was assigned to the Pomona office in Los Angeles County.

In March of 1980, Bill found he was suffering from arterial blockages. He was operated on for a quadruple arterial bypass graft. He was taken off the active list of highway patrolmen and placed on the disabled list. On the first of May 1983, Bill will retire after 32 years, 9 months of combined police and highway patrol service, the last 27 years and 10 months with the California Highway Patrol.

His family includes his wife Shirley; children Richard, Steven, and Beth; and his grandchildren Danny, Erik, Steffanie, and Sonya.

Bill Winkelman's retirement marks the conclusion of an outstanding career as a lawman. However, I am sure it will not stop his devoted service to his friends and community. I ask my colleagues to join me in congratulating him on his accomplishments to date and on best wishes in the future.●

TRIBUTE TO THE HOLT CHILDREN'S SERVICES, INC.

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. CARMAN. Mr. Speaker, I would like to bring to your attention a very special organization, the Holt Children's Services, Inc. This group is a nonprofit social welfare organization approved by the Ministry of Social Affairs of the Republic of Korea. The organization was started in 1955 by the late Mr. Harry Holt. He started the group with the adoption of eight children who became orphans during the Korean war.

The cardinal philosophy of the organization is based upon Christianity. The Holt Children's Services is an outstanding example of child welfare work. Its main programs consist of counseling and prevention of unmarried parents, adoption at home and abroad, medical welfare service, rehabilitation for mentally retarded and physically handicapped children, scholarships for underprivilged children, and the management of the Saemaul Day Care Center and Baby Home.

I have had a special association with the Holt Children's Services. As some of you may know, my family has been blessed by my daughter whom we adopted through the Holt Services. After recently visiting the organization in Seoul, Korea and meeting with the President, Han Kyu Kim, I commend the group for the special joy they have brought to my life and to the lives of many children and families throughout the world.●

WRESTLERS HONORED

HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. NELLIGAN. Mr. Speaker, it is a rare occasion when any of the 435 Members of Congress can boast that a world champion hails from his congressional district. Well, I am proud that the 11th Congressional District of Pennsylvania, which I am privileged to represent, can boast that it had not one—but two—world champions in 1982. They are Carey Falcone and Jim Martin, world schoolboy wrestling champions. The wrestling tournament, which took place during the summer of 1982, was conducted at California State University at Fullerton.

Carey Falcone, representing the Back Mountain Wrestling Club, won the world schoolboy championship in the 66-pound class. Carey pinned the representative from India in 52 seconds of the championship meet. Carey is a student at Dallas Junior High School, and his overall record for the 1981–82 season was 64 wins and no losses.

Jim Martin of Danville, a 16-year-old, won the 106-pound class by defeating the Italian representative to the competition. Jim, a student at Danville Area High School, won the State championship in the 98-pound class. His overall record for the 1981–82 wrestling season was 39 wins and no defeats.

It should be noted that Carey Falcone and Jim Martin were two of the three Pennsylvania wrestlers who captured first place honors from approximately 1,250 wrestlers from throughout the United States.

Both of these fine young athletes automatically are entitled to compete for the U.S. Olympic wrestling team.

I join other residents of the 11th District in congratulating them on their tremendous achievements and wish them continued success in the future.●

IN MEMORY OF DR. ROBERT BRACKEN WHITE

HON. ROBERT W. DAVIS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. DAVIS. Mr. Speaker, the American people, particularly residents of northern Michigan, recently suffered the loss of a truly inspirational man, Dr. Robert Bracken White.

At the time of his death on November 5, 1982, Dr. White was a physician and director of Northern Michigan University's Health Center in Marquette, Mich. He served the students at NMU for the past 13 years.

To all of those who knew him, Dr. White was a compassionate and religious man who devoted his life to the medical profession. Many said he lived his life as an example to others of his strong Christian convictions. While he shared his unwavering faith with the people around him—students, coworkers, and friends—he always listened to and respected the attitudes of others who did not share his beliefs. His friendship was valued by all because he had a genuine concern and love for people.

Dr. White expressed strong convictions regarding Christianity, marriage, and personal attitudes in a writing which he titled, "Here I Stand." He said that this writing, which he com-

posed shortly before his death, contained the most important ideals for which to strive. Dr. White attained these ideals and it was his hope that they be used by others for personal growth and an understanding of the true value of Christian life.

Dr. White was a respected and loved man who will be greatly missed. It is important that we do not remorse in his death, but be thankful that this man of courage and high principles lived and worked among us, and set a fine example for us to live by.●

THE CASE FOR CLINCH RIVER

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. DANNEMEYER. Mr. Speaker, there have been a lot of arguments in recent weeks, both pro and con, over the Clinch River breeder reactor. With estimated budget deficits of $150 billion or more, that is hardly surprising given the fact that Clinch River is a $2.3 billion project. However, what is often overlooked is that it would cost us almost as much—roughly $1.7 billion—to liquidate the project at this point and by so doing we would run the risk of severe energy shortages down the road.

Mr. Speaker, as one who has been greatly concerned with the adverse consequences of Federal spending, even an extra $600 million in spending is no small matter. Therefore, I can certainly understand the concern of conservatives as well as many liberals over this measure. But, to waste $1.7 billion and to compromise the objective of energy independence in the years ahead is an unpleasant prospect indeed. Also, the arguments of those who say that the project is technologically obsolete overlook two important factors: First, that design changes can and are being made as work progresses and second, at some point you have to build in order to reap the benefits of years of theoretical research. Only by building a first generation facility can an improved second-generation facility eventually become a reality.

Some who question the wisdom of Clinch River attempt to draw an analogy between it and the SST that we never built and have not significantly missed. However, I suspect a better analogy would be with the B-1 bomber. With the B-52 as obsolete as our ability to meet domestic energy demands is inadequate, it is essential we go ahead with the B-1 even if Stealth bomber technology is on the drawing boards. Likewise, I suspect we need to proceed with the Clinch River breeder reactor so that we can have a safe supply of energy if we need it rather than need it and find out that we either cannot get it or must fight for it. Nothing could be more expensive than that last alternative.

Mr. Speaker, there are a number of additional arguments that can be made in favor of the Clinch River breeder reactor project. For the benefit of those with whom I am generally in agreement but who might understandably have some doubts about the propriety of this project, I am inserting an item, prepared by the American Energy Education Foundation, Inc., in the RECORD at this point. The message, which appeared in a recent issue of the Washington Times, is entitled "A Message to Conservatives About Clinch River" and makes worthwhile reading.

A MESSAGE TO CONSERVATIVES ABOUT CLINCH RIVER

At a time when the Reagan Administration sorely needs all the economic help it can get, some of the President's oldest and most philosophically committed conservative friends are making a bad mistake in their fight against the Clinch River Breeder Reactor, a mistake we might all have to live with.

In recent months an unusal coalition has come into being which seeks to halt the development of the United States' breeder reactor program. Publicly, this coalition states that its only target is the Clinch River Breeder Reactor, a Federal research and development project now beginning construction; however, many of the liberal members of this coalition desire to halt Clinch River as part of a broader effort to curb not only U.S. breeder technology but nuclear power and energy growth in general.

Perhaps unwittingly, respected conservative organizations have allied themselves with such groups as Ralph Nader's Congress Watch, William Winpisinger's Association of Machinists and no-growth advocates like the Friends of the Earth and the Natural Resources Defense Council. Conservatives in Congress have found themselves helping ultra-liberals attack a project which is essential to a secure supply of energy for America's future.

Why have some conservatives suddenly attracted such strange bedfellows and joined with the liberal critics of Clinch River? Is it because they have turned against nuclear power? Is it for reasons of fiscal responsibility?

Logic and the preponderance of the evidence dictates that the sound conservative position is to support the completion of the Clinch River Breeder Reactor. Here are some of the reasons why:

If the United States is to maintain even a modest annual growth rate of 3 percent, we will have to double our electric power capacity in 25 years. Breeder reactor technology, an essentially inexhaustible source of energy, is needed to help supply this increased capacity if we are to have economic growth without relying upon foreign energy sources.

As the International Energy Agency recently warned, a new oil crisis may hit by the mid-1980's that would deal a "devastating blow" to the U.S. and other industrial nations. Such a prospect makes any effort to kill the Clinch River Breeder and thus cripple a readily available U.S. energy option the equivalent of committing national suicide.

President Reagan is firmly committed to breeder reactor technology and the "completion of the Clinch River Breeder Reactor". He states that Clinch River is "essential to ensure our preparedness for longer-term nuclear power needs".

President Jimmy Carter, beginning weeks after his inauguration in 1977, attempted to kill the project and succeeded in stalling construction work on Clinch River for more than four years. This short-sighted move is largely responsible for the increased cost of CRBR.

The Soviet Union, France, Japan, and other nations are moving ahead of the United States in breeder technology. How can conservatives, or even liberals for that matter, force the nation to withdraw from this competition at the expense of America's continued growth?

Contrary to environmentalists' misstatements, the Clinch River Breeder Design is technologically up to date and contains features, such as its heterogeneous core, which have attracted the attention of German, British and other foreign breeder experts. Repeated assessments by the General Accounting Office, most recently supported by their July, 1982 report, have concluded that among "a wide range of knowledgeable industry, government, and private individuals, no one we talked with was able to provide us with any specific facts indicating that components or design features were obsolete."

After years of bureaucratic and regulatory delays, work has begun at the Clinch River site. Some 3,500 workers are already employed in 29 states and the District of Columbia, the plant design is 86 percent complete and about $700 million worth of components have been delivered or are on order. If cancelled now, the cost to the taxpayers would be $1.4 billion with nothing to show for it.

According to Senator James McClure, "the opponents of the Clinch River Breeder Reactor have come up with false and phony rigged figures and then repeat them". Among other things, the revenues from CRBR are liberally estimated at more than $20 billion payable to the government over the 30 year life of the plant. This figure, developed by the Appropriations Committee estimates 2 percent real growth in electricity prices.

Many question why private utilities have not contributed more money to this plant. It should be pointed out that the electric utilities, companies that are closely regulated by government, are limited in their financial ability to invest in a long-term research and development project.

Professor Hans Bethe, a Nobel Prize Laureate, says that "once the breeder or a similar type of reactor is in place, the uranium in the U.S. will last for tens of thousands of years, at an affordable price. An inexhaustible energy source is as good as a renewable one".

Finally, halting the Clinch River project now, just as construction is finally beginning would be tragic. The G.A.O. put it best in its most recent report. Failure to construct Clinch River, it said, would "foreclose on the long-term future of a major energy option nuclear fission—".●

CHANCELLOR EDWARD M. SINGLETON

HON. JOHN L. NAPIER

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. NAPIER. Mr. Speaker, I would like to take this opportunity to point with pride to a lifetime of achievement by a man who has made a significant contribution to the academic world. Chancellor Edward M. Singleton, head of the University of South Carolina's Coastal Carolina College in Conway, S.C., is retiring soon. This man, after nearly 40 years in public service, continues to place the highest priority on our educational system.

Chancellor Singleton first assumed the mantle of leadership at the college nearly 20 years ago when the campus first opened. He had already proven himself to be a capable educator while serving as superintendent of Conway city schools, therefore—this was a natural transition.

Dr. Singleton holds a Ph. D in education administration from the University of South Carolina as well as a master's degree in education. He also served on the University of South Carolina Board of Trustees for more than a decade. He is a former president of the Conway Chamber of Commerce. President Singleton served with Conway city schools as principal of Conway Junior High and as a teacher and coach. He also founded the Conway Recreation Department and created youth baseball leagues in the town.

The leadership Dr. Singleton has provided education in South Carolina will remain as a guiding light to those who follow him.●

PERSONAL EXPLANATION

HON. THOMAS J. BLILEY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. BLILEY. Mr. Speaker, I was granted an official leave of absence yesterday because I was hospitalized with a broken arm. I want to assure my colleagues that it was a fall on the ice and not a lobbyist's armtwisting that caused the break.

Unfortunately, I missed rollcall votes on several suspensions as a result of the absence. Had I been present, I would have voted on the measures as follows:

H.R. 3191, modification of North American Convention Tax Rules: "no";

House Joint Resolution 429, State Commissions on Teacher Excellence: "no";

S. 2355, telecommunications for the Disabled Act: "no";

H.R. 4281, Critical Materials Act of 1982: "no";

H.R. 7044, mail order consumer fraud protection, "no";

S. 2059, special prosecutor appointments amendments: "no";

S. 1621, authorize replacement of existing pump casings in southern Nevada water project: "no"; and

House Joint Resolution 553, authorize Indian tribes to bring actions with respect to certain legal claims: "no".●

CONGRESSIONAL SALUTE TO THE HONORABLE LEO A. MAULT, OF NEW JERSEY—DISTINGUISHED CITIZEN AND OUTSTANDING COMMUNITY LEADER AND GREAT AMERICAN

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. ROE. Mr. Speaker, it is indeed appropriate that we reflect on the deeds and achievements of our people who have contributed to the quality of life and way of life here in America. In this respect I am pleased to call to the attention of you and our colleagues here in the Congress the outstanding public service rendered by a distinguished citizen, community leader and good friend, the Honorable Leo Mault, whose standards of excellence throughout his lifetime have truly enriched our community, State and Nation.

Mr. Speaker, I join with the Members of the New Jersey State Legislature in deep appreciation of all of Leo Mault's good works and share great pride in the success of his achievements with his good wife Louise, their sons, Douglas, Donald and Robert, their daughters-in-law and grandchildren.

Marshal Leo A. Mault has indeed earned the highest respect and esteem of all of us for the quality of his leadership, staunch support and active participation in many civic and community improvement programs in a most illustrious career providing exemplary service to the U.S. Department of Justice, the courts of our Nation and to all of our people. He rose from a rookie to the highest office of public trust in the U.S. Marshal Service of the the Department of Justice. Leo joined the U.S. Marshal Service in 1941, served as a Deputy U.S. Marshal until 1961 when he was appointed U.S. Marshal for the great sovereign State of New Jersey until his retirement in 1969—close to three decades of service, ever seeking to achieve optimum public safety for all of our people.

Mr. Speaker, we are proud to boast that Leo Mault was born in the city of Paterson, N.J., in my congressional district and is one of the most personable and highly competent marshals in our Nation. He also served our country with distinction in the U.S. Navy during World War II.

The quality of his expertise and sincerity of purpose in service to our Nation have been warmly captured in the resolution of tribute adopted by the New Jersey State General Assembly and with your permission, Mr. Speaker, I would like to insert at this point in our historic journal of Congress this testimonial by our State Legislators which reads, as follows:

ASSEMBLY RESOLUTION

Whereas, Leo A. Mault has had a long and distinguished career in public service and is presently the Sergeant-at-Arms of this House; and,

Whereas, Leo A. Mault was born in Paterson, Passaic County, in the year 1902 and attended local schools in that municipality, after which he served his country in the United States Navy; and,

Whereas, Leo A. Mault joined the United States Marshal's Service in the Department of Justice in 1941 and served as a Deputy United States Marshal until 1961, at which time he was appointed by President John F. Kennedy, United States Marshal for this State; and,

Whereas, He was reappointed to that post by President Lyndon B. Johnson in 1965 and served until his retirement from the United States Marshal's Service in 1969; and,

Whereas, During this period he also served under Mayor Edward J. O'Byrne as a member of the Police and Fire Commission and served as President of the Commission and as Police Commissioner under Mayor Francis X. Graves; and,

Whereas, Subsequent to his retirement from the United States Marshal's Service, he was appointed chief Sergeant-at-Arms of this House; and,

Whereas, Mr. Mault has been a life-long Democrat and has served under 8 United States Presidents; is a parishioner at Saint Brendan's Roman Catholic Church; and recently celebrated the 52nd anniversary of his marriage to the former Louise Adelman, also of Paterson; and,

Whereas, Mr. and Mrs. Mault are the proud parents of 3 sons, Douglas, of East Greenwich, Rhode Island; Donald of Churchville, Pennsylvania; and Robert, of San Francisco, California; and the proud grandparents of four grandchildren; now, therefore,

Be It Resolved by the General Assembly of the State of New Jersey.

That this House hereby honors Leo A. Mault for his years of public service to his country and to this State and especially commends him for his outstanding tenure as Chief Sergeant-at-Arms of this House; and,

Be It Further Resolved, That a duly authenticated copy of this resolution, signed by the Speaker and attested by the Clerk, be delivered to Mr. Leo A. Mault.

Mr. Speaker, it is a pleasure to seek this national recognition of Leo Mault and his contribution to the quality of life and way of life of our people. Throughout his lifetime Marshal Mault has forged ahead with dedica-

tion and devotion in seeking justice, combating crime and protecting the life of our people. We applaud his knowledge, training, hard work and personal commitment that has enabled him to achieve the fullest confidence and strongest support of the people of our community and State. We do indeed salute a distinguished citizen, outstanding community leader and great American—the Honorable Leo A. Mault of New Jersey.●

PAY RAISE VOTE

HON. W. HENSON MOORE

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. MOORE. Mr. Speaker, I voted against the amendment offered by the gentleman from California (Mr. FAZIO) to House Joint Resolution 631 to allow the pay of Members of Congress to increase by 15 percent as I oppose any increase in pay. This is verified by my subsequent vote for the amendment by the gentleman from Michigan (Mr. TRAXLER) to keep the pay cap at its current level. If Congress is to impose austerity in expenditure control to successfully reduce the deficit, then it must impose austerity on its own pay as well. I have never voted for a pay raise. I voted against final passage of House Joint Resolution 631 due to the passage of the Fazio amendment and failure of the Traxler amendment.●

CONGRESSMAN WILLIAM BRODHEAD

HON. RALPH REGULA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. REGULA. Mr. Speaker, I am pleased that my colleague from Michigan, Mr. BONIOR, has taken this special order so that tribute can be paid to WILLIAM BRODHEAD.

It has been a privilege to serve this body with BILL BRODHEAD. BILL has brought this institution distinction and candor. He leaves the House and the Congress a better place because of his effective and dedicated work.

I had the pleasure of serving with BILL on the Budget Committee where he was a force for bipartisanship, a characteristic which seems increasingly illusive in budgeting.

The Congress will be both lesser and greater when BILL BRODHEAD leaves. It will be lesser because of his leaving. It will be greater because of the legacy of statesmanship he leaves.●

JAPAN SUBVERTS WHALING BAN

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. BONKER. Mr. Speaker, at the July 1982 International Whaling Commission (IWC) meeting, the United States achieved its decade-long goal of bringing an end to commercial whaling. The Commission overwhelmingly voted to ban commercial whaling beginning in the late fall of 1985. In the meantime, the whaling countries continue to flaunt IWC rules. Japan, the whalers' torchbearer, never misses an opportunity to point to its record of adherence to IWC decisions. But the facts do not support Japan's claims.

Two years ago, the IWC outlawed the use of the cold (nonexplosive) harpoon for the taking of all whales but the smaller minkes. Yet, Japan's whalers blatantly ignored the ban by attempting to pass off cold harpoons as hot—explosive—harpoons: the heads of the harpoons contained no firing caps, and were, therefore, "cold." The American observer for the IWC in Japan, Mr. Gosho, reported 22 such infractions this year; the Japanese observers failed to report a single violation of the cold harpoon ban. This clear subversion of the IWC decisions must be taken into account as the United States considers whether to certify Japan, under the Pelly and Packwood-Magnuson amendments, for violating the cold harpoon ban, which has now been extended to include minke whaling.

Mr. Speaker, I wish to submit for the RECORD the IWC observer's report on Japan's infractions involving the outlawed cold harpoon. It is my hope that, in the future, Japan will comply fully with this important IWC regulation.

INTERNATIONAL OBSERVER SCHEME—SUMMARY OF REPORTS, NORTH PACIFIC LAND STATIONS

REPORTS OF MR. M. GOSHO AT THE JAPANESE LAND STATIONS

Mr. Gosho made the following comments with regard to the use of cold harpoons:

"At the time of this report, the Whaling Section of the Japan Fisheries Agency (JFA) was still conducting an investigation regarding the use of the cold harpoons. The IWC Observer was informed that the Senior National Inspector (JFA), upon learning of the infractions regarding the taking of undersized and lactating whales, ordered the whaling companies to prepare written explanations of the incidents. The whaling companies were warned not to repeat the infractions.

"The amounts of the bonuses withheld as a result of the above infractions had not been computed by the whaling companies at the time of this report."

Mr. Gosho reported that 22 infractions involved the use of the cold harpoon. The Infractions report submitted by the Government of Japan reported 13 infractions of this nature. Attention is drawn to the statement by the Government of Japan given in IWC/34/6. The discrepancy between the numbers may be due to different interpretations of the term cold harpoon; in this regard a copy of a letter received by the Secretariat from Mr. Gosho is Appended.

In addition Mr. Gosho commented that (i) as much meat as possible was processed for use as human food for consumption within Japan, other parts were used for human consumption and for pharmaceuticals while the remainder was processed for oil, animal feed, meal or fertilizer (ii) land station managers and personnel kept a permanent record of information required by the IWC and assisted Japanese biologists in their work (iii) the company and national inspectors generously and courteously co-operated with him and provided the information he required to carry out his duties.

He also made the following recommendation:

"Thirty of the thirty-two infractions which were reported during the 1981-82 whaling season occurred during the Bryde's whaling season. Twenty-nine of these infractions involving Bryde's whales were reported by the IWC Observer. Although it is estimated that the JFA Inspectors observed 44 per cent of the Bryde's whale landings (compared with ten per cent for the IWC Observer), the JFA Inspectors did not report a single infraction involving Bryde's whaling. The IWC Observer noted that of the Bryde's whales he observed, 70 percent contained a cold harpoon and 25 percent of the females were lacting.

"The IWC Observer recommends that, in the future, the JFA Inspectors pay closer attention to the incidence of cold harpoon use in Bryde's whales and to the condition of the mammary glands of Bryde's whales."

APPENDIX 1—EXTRACT FROM LETTER DATED JANUARY 29 FROM MR. GOSHO TO DR. GAMBELL

Thank you for your letter of January 4, 1982 (RG/EE/4266). Your confusion concerning the data which I presented in my memorandum is justified. This is partly due to the lack of any definition of the term "cold harpoon". I considered a "cold harpoon" to be any harpoon in which the head did not explode. Because I observed 21 harpoons (in 21 Bryde's whales) which still had the heads intact, I cited 21 cases where a cold harpoon was used. I personally unscrewed the heads of 13 harpoons and found that they contained no firing caps (harpoon fuses). The heads of the remaining 8 harpoons were frozen or so firmly lodged that I could not unscrew them. Thus, I can say that, in 13 of the 21 cases, the harpoon was never intended to explode; while in all 21 cases, the end result was that the harpoon head did not explode.

I examined the heads of or the shrapnel from a total of 36 harpoons. Fifteen had exploded (two exploded harpoons were in one whale) and 21 had not. The 8 cases where I could not remove the harpoon head represented 22% of the total. This figure is obviously too high to represent the normal occurrence of misfires or hangfires.

I believe that the occurrence of misfires or hangfires during the Bryde's season was negligible, and that the majority, if not all, of the 21 unexploded harpoons which I observed in the Bryde's whales were cold harpoons which were never intended to explode.●

JACK BRINKLEY

HON. MARILYN LLOYD BOUQUARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mrs. BOUQUARD. Mr. Speaker, it is a great honor for me to add my praise and heartfelt thanks to a colleague and dear friend, JACK BRINKLEY, for the hard work and dedication he has brought to this Congress. He has contributed to this body, as well as to his country, faithful and diligent service.

JACK BRINKLEY, as dean of the Georgia delegation, in his quite and unassuming manner, served his constituents in a style we all could emulate. Very few weekends were not spent going back to his district to see and serve those he represents. His views on the needs and opinions of his constituency were reflected so ably in his voting pattern.

JACK BRINKLEY, always had time for his colleagues as well. I have never asked for his help or his opinion that I was turned down or begrudged an adequate time for thought or evaluation.

JACK BRINKLEY is a southern gentleman, an unrelenting stateman without parallel whom we will all miss.●

AGRICULTURAL EXPORT SUBSIDY OFFSET ACT OF 1982

HON. LYNN MARTIN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mrs. MARTIN of Illinois. Mr. Speaker, I am introducing legislation to use surplus Government stocks of agricultural commodities to offset the unfair trade practices of many of our trading partners. While I am committed to the principle of free trade, I believe current trends in the international marketplace necessitate a strong measure such as this.

Every year I send out a farm report to my farm constituency to inform them of Federal issues that affect farming and to solicit their opinions on farm problems and solutions. In response to my 1982 farm report, many of my farmers stressed the need to expand agricultural exports to relieve the crop surplus that is depressing farm prices. Most of these comments referred to the unfair trade practices of other nations, especially the European Economic Community (EEC), that were either barring U.S. farm exports or competing unfairly through the use of direct and indirect subsidies.

On November 10 of this year, I was part of the U.S. delegation to the GATT ministerial meetings to discuss trade barriers and practices in the international marketplace. I was especially interested in the effect trade issues have on the farm economy and industrial work force of northern Illinois. I returned from these meetings convinced that the United States must take stronger actions to protest the trade policies of other nations, especially the agricultural export subsidies used by the European Economic Community.

I find it totally unacceptable that while the United States supplies a majority of the defene needs of the Europeans at great financial cost to us, the Europeans subsidize their agricultural exports to undermine our export markets. U.S. farm exports receive no similar subsidies, nor do we wish to begin subsidizing our exports. It was hoped that through the GATT meetings compromises could be reached on the issue of EEC farm subsidies, but the meeting ended with no such agreements. The Europeans will continue to subsidize their farm exports. I believe this situation necessitates a response.

There is an old rule in the Midwest that when you cannot get someone's attention through talking, you hit them over the head with a 2 by 4. I propose we provide the administration with a 2 by 4 to use in bringing the EEC and other nations to some fruitful trade negotiations. The 2 by 4 I am proposing uses what is becoming know as the Christmas approach or the buy 10 get 1 free method of supporting agricultural exports.

The bill I am offering to the House will grant the Secretary of Agriculture the authority to make surplus Commodity Credit Corporation (CCC) agricultural commodities available to U.S. exporters, U.S. processors, and foreign customers. The Secretary can make these stocks available for the purpose of maintaining, developing, and expanding the markets for U.S. farm products where competition exists from other nation's subsidized exports. Precautions are taken to insure that the use of this authority does not result in displacement of U.S. commercial sales in the export market, thus insuring that the release of these stocks will not result in lower domestic prices for farm products. Other precautions are taken so that the commodities released are not resold to some other country and that U.S. farm products are not negatively affected.

This method of offsetting other nations' farm export subsidies has several advantages over other proposals for direct price subsidies or interest buydowns. First, this act will not result in any financial outlays by the Federal Government. Because the CCC already owns massive amounts of grain, it will reduce the cost of CCC storage. Second, the disposal of CCC stocks into the international market will help improve domestic farm prices and the agricultural economy by lessening the huge grain surplus. This surplus is causing the worst difficulties in farm country since the Great Depression. Again, this is accomplished without adding to the burden of the Federal budget deficit.

Time before the adjournment of the 97th Congress is limited, but I believe this legislation offers a constructive addition to the debate that is being conducted in the Congress on the subject of international trade practices. I offer this legislation for inclusion in the proposed farm stimulus package the administration is pushing in the Senate. If action on this proposal is not taken in this lameduck session, the groundwork will be completed for its reintroduction when the 98th Congress takes office next month. Most importantly, the introduction and consideration of this proposal sends a strong message to the Europeans and other exporters that the United States will use a 2 by 4 if necessary to move the international marketplace toward the goal of free trade.

I urge your support and cosponsorship of this legislation.●

A TRIBUTE TO THE HONORABLE HENRY REUSS

HON. DOUG BARNARD, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 7, 1982

● Mr. BARNARD. Mr. Speaker, when I came to Congress as a new Member in 1977, HENRY REUSS was one of the people from whom I learned the ropes. He was chairman of the Banking Committee, and served as an able leader of that committee for 6 years. His stewardship on the Monetary Control Act was one of the hallmarks of his service in Congress.

As we worked together, I came to value his experience, his insight, and his concern for our Nation's cities and housing. I remember with gratitude his strong voice on the workings of our economy. Our opinions may have differed, but one always knew where he stood, and that trait is all too rare in politics.

Mr. Speaker, this is the season in which we hear a good number of tributes to our departing colleagues. But I do not know of many Congressmen who deserve the praise and respect more than does HENRY REUSS.●

PARKVILLE AMERICAN LEGION POST 183

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. LONG of Maryland. Mr. Speaker, on November 11, Veterans Day, the Parkville American Legion Post 183 celebrated the 25th anniversary of the opening of its meeting hall located at 2301 Putty Hill Avenue in Parkville, Md., as well as its 37th year as an American Legion Post.

The American Legion is the largest veterans' group in the United States consisting of men and women who have served during World War I, World War II as well as the Korean and Vietnam wars. It seeks to advance the aims and interests of veterans, to continue friendships formed during military service, and to insure that disabled veterans receive the care and help they need.

Parkville American Legion Post 183 has, throughout its history, maintained high standards of community service. It is with great pride, Mr. Speaker, that I share with my colleagues the names of the men who have served as commanders of the Parkville American Legion Post 183.

Year	Past commanders	Membership
1945–46	*William Brown	42
1946–47	Gus Voss	61
1947–48	Clem Schaeffer	80
1948–49	Harry Bleakley	64
1949–50	Hall Tircuit	67
1950–51	*Henry P. Lennon	74
1951–52	Edgar Shannahan	93
1952–53	Frank Hendriksen	157
1953–54	George W. Crowley	183
1954–55	*Paul McDermott	257
1955–56	H. Laird Roeder	327
1956–57	John W. Goff	386
1957–58	William Wienecke	904
1958–59	Leo Rydezewski	1,070
1959–60	Ronald O. Reese	1,168
1960–61	*Henry P. Lennon	1,376
1961–62	George R. Smith	1,426
1962–63	Carl Link	1,682
1963–64	Raymond Magill	1,982
1964–65	Frank Barrett	2,302
1965–66	Charles Gralley	2,354
1966–67	*Joseph Gummer	2,633
1967–68	Larry Tiberia	2,428
1968–69	Joseph O'Donnell	2,327
1969–70	Theodore Gray	2,254
1970–71	Don Lory	2,291
1971–72	Douglas Johnson	2,555
1972–73	Douglas Johnson	2,724
1973–74	Charles Schnitzlein	2,816
1974–75	Thomas Keyes	2,869
1975–76	George Thomas	2,894
1976–77	George Thomas	2,932
1977–78	George Fiedler	3,039
1978–79	John Burgan	3,183

1980–81	John Hammond	3,517
1981–82	Bernie Ulrich (2/1/82)	3,524
1982–83	Richard Prevail	

*Deceased.

I know that my colleagues join me in praising these men and the thousands of men and women who are and have been members of this excellent organization.●

EXECUTIVES HONORED

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. RUSSO. Mr. Speaker, Concordia Federal Savings & Loan in Evergreen Park, Ill., is paying tribute this month to three of its distinguished retiring executives, men who have worked with great talent and dedication for the organization for decades. I want to take a moment to commend these men for a job well done.

Mr. John J. Gill, senior vice president with 36 years of service, Senior Vice President Frank R. Palmer with 31 years, and Mr. John William Gillully, chairman of the board, who started in December of 1945 as an assistant bookkeeper, are all going to be greatly missed by the 93-year-old association. They have seen Concordia grow to its present nine-office south Chicagoland network of financial service centers. All of them have worn many hats and have the kind of expertise that comes from applying yourself to whatever your assignment and learning and growing. Their work record is impressive and one can only guess at the number of people whose lives they have helped with their financial skills.

These are also the kind of public-spirited men who involve themselves in community service, church, and organizational improvements, so while their full-time talents will be missed, I know they will continue to make considerable contributions to Concordia and to the community at large. Today I ask my colleagues to join with me in wishing these fine gentlemen all the best and continued success in all their endeavors.●

CLINCH RIVER

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. HOLLENBECK. Mr. Speaker, I submit the following advertisement from today's Washington Post concerning the Clinch River breeder reactor to the CONGRESSIONAL RECORD for the benefit of my colleagues.

[From the Washington Post, Tuesday, Dec. 14, 1982]

WE DON'T USUALLY AGREE . . . BUT ON CLINCH RIVER WE DO

18 labor unions, the NAACP, the U.S. Chamber of Commerce, the General Federation of Women's Clubs, the National Conference of Black Mayors, the National Association of Manufacturers . . .

Along with more than a dozen other business, labor, minority, scientific and professional organizations, we have formed the "Committee on Jobs, Environment and Technology." We have done so because we all agree on one vital issue:

The Clinch River Breeder Reactor must be included in any responsible planning to supply future generations with the affordable energy they will need.

In real terms, America is still dependent on foreign sources of energy. A sudden increase in the price of oil or a cutback in OPEC production could again wreck havoc with our economy. Therefore, we have a responsibility to pursue policies that will help free America from the grip of foreign energy sources and enable us to regain control over our own energy and economic destiny.

Without available and affordable energy supplies, there can be no sustained economic growth, no abundant employment opportunities, no world leadership status.

While CJET will ultimately concern itself with a range of issues, our first priority is completion of the Clinch River Breeder Project. The result of a 20 year alliance between the federal government and private industry, this project represents the spirit of innovative research and development that has characterized U.S. history at its best.

CONSIDER THESE FACTS

Even using conservative growth estimates of 1 percent or 2 percent per year, America will still have to double its electrical energy capacity by early in the next century.

Breeder reactors produce more fuel than they consume and represent an energy potential that exceeds all U.S. coal reserves or three times OPEC oil reserves. They will use already mined uranium valued at $17 trillion, which has no other use to mankind.

Completion of Clinch River will cost the government $2 billion over the $1.3 billion already invested. Thus the total cost, including the unprecedented utility investment of $340 million, will be $3.6 billion . . . a figure confirmed by the General Accounting Office.

Some opponents claim that the final cost will be $8 billion without explaining that that figure includes "imputed interest" . . . something never included in any previous government R&D project cost estimates.

Termination will cost the government at least $300 million, plus the $1.3 billion already spent. Completing the plant will enable the government to recoup its investment through the sale of the plant's electricity.

75 percent of the equipment is either now on site or on order at a fixed price. The design of the plant is almost 90 percent complete and site preparation has begun.

Japan, Germany, Great Britain, France and the Soviet Union are pushing ahead with breeder programs because they know that those who lead the world in energy development will lead the world economically and politically.

Clinch River is not just another government project. It is a vital and prudent technological demonstration project that will help assure future generations of adequate energy supplies, a secure economy and jobs.

America has always been a world leader in developing advanced technologies to benefit current and future generations.

Now is no time to turn back. The future depends on us.

The Committee on Jobs, Environment and Technology; Robert Georgine, Chairman, President, Building and Construction Trades Department, AFL-CIO.

Given the support which the Clinch River project has been able to gather and its significance in terms of America's energy independent future, I intend to vote for Clinch River when it comes before the House later today.●

TRIBUTE TO HON. M. CALDWELL BUTLER

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. RODINO. Mr. Speaker, M. CALDWELL BUTLER, a most valuable member of the Judiciary Committee, has chosen to retire from the Congress after serving 10 years in this body.

As we all well remember, CALDWELL had precious little time to ease into his duties. Taking office in 1973, he soon had thrust upon him, as a member of the committee, what he has called the joyless task of participating in the impeachment hearings. It was at these hearings that the diligence, integrity, and courage for which he has become so well known were amply exhibited. These qualities have continued to earn him respect on both sides of the aisle.

Another characteristic that his colleagues have come to appreciate immensely is his quick and subtle wit. I can recall many times in the course of committee hearings and deliberations that his sharp sense of humor was most instrumental in defusing tense situations.

One Virginia newspaper columnist succinctly summed up the essence of CALDWELL BUTLER: "* * * affably, funny, and smart."

I specifically want to note his important role, as a member of the Subcommittee on Monopolies and Commercial Law, in drafting revisions of the Federal bankruptcy laws. In this task, as in so many others on which we worked together, I have come to deepen my respect for his industriousness, his knowledge of the issues and his forthrightness, even though we, of course, were not always on the same side.

The retirement of CALDWEL L. BUTLER will take from this body a talented lawmaker and a diligent representative of his constituency. His experience here will serve him well as he returns to his Roanoke home to engage in the private practice of law.●
